

## Press Release

### **CTT Systems receives order from Titan Airways for the Zonal Drying™ System to be installed in two Boeing B737-300QC aircraft.**

**Nyköping, Sweden September 06, 2012**, – CTT Systems today announced that Titan Airways based in UK has placed an order for two Zonal Drying™ Systems to be installed in their Boeing B737-300QC aircraft. The systems, which eliminate condensation in the aircraft, are scheduled for installation during 2012.

“We selected the Zonal Dryer system with the aim of reducing our operational costs and improving the on-board product for our customers” comments Paul Woodman, Technical Director at Titan Airways

“We are very pleased to add Titan Airways as a new customer for our Zonal Drying system” comments Peter Landquist, VP Sales & Marketing CTT Systems AB.

By eliminating condensation in the aircraft both operational and maintenance costs will be lowered through:

- lowered fuel consumption (i.e. lower aircraft weight due to elimination of accumulated water),
- improved operational reliability (i.e. less corrective maintenance)
- consistent insulation performance (i.e. water reduces insulation performance),

Further, the aircraft residual value will be protected or even improved due to reduced corrosive impact over the years. Reduced fuel burn (due to lowered aircraft weight) also has a positive impact on the environment.

CTT's Zonal Drying™ System has been selected as basic equipment for the new B787 “Dreamliner” and CTT's humidifiers are options in crew rest compartments and on the flight deck. The A380 offers CTT's humidifiers as option in crew rest compartments. CTT will also supply the Zonal Drying™ system and the Cair™ system for the A350 aircraft, as options.

CTTs products Zonal Drying™, Cair™, Flight Deck and Crew Humidifier are standard or optional equipment on Boeing B787, Airbus A350 and A380. CTT has today more than 400 systems installed in more than 30 airlines worldwide. CTT has now 18 years of operating experience on the Zonal Drying™ system plus 12 years on Cair™ and Crew Humidifier systems. IATAs report on fuel-saving measures is now including Zonal Drying™ as one of the few available fuel-saving systems for retrofitting.
