CTT Systems Announces Zonal Drying™ Order for six Boeing 737-800s

CTT Systems AB (“CTT”), the market leader of aircraft humidity control systems, announces Zonal Drying™ order for six Boeing 737-800s to be factory installed by Boeing for an undisclosed customer starting in December 2015 and to be finalized in April 2016.

“We are pleased with another order for factory installation at Boeing,” said Peter Landquist, VP Sales & Marketing CTT Systems AB. “We are honored that airlines value the benefits from mastering the root-cause of aircraft condensation/moisture problems from the very first day of its entry into service”.

The Zonal Drying™ Anti-Condensation System generates the following advantages:

- Lower fuel burn and CO2/NOX emissions from excess weight reduction of 200-300kg of accumulated condensate water in B737/A320 aircraft;
- Higher operational reliability from significant lowered moisture related faults in electrical equipment (reduced Out-Of-Service time)
- Lower attrition of replacing insulation blankets

About CTT SYSTEMS

CTT Systems is the market leading provider of humidity control products in aircraft, including anti-condensation systems preventing moisture problems in the aircraft and humidifiers for in-flight comfort and wellbeing for crew and passengers. Our products are offered for retrofit installations and line-fit on A380, A350XWB and Boeing 787. The crew humidifier is standard in all crew rest compartment fitted Boeing 787 aircraft and optional in the crew rest compartment on A380 and A350XWB program. The flight deck humidifier is optional on both the Airbus A350XWB and Boeing 787 aircraft. The Airbus A350XWB is first to offer Cair™ humidification as SFE for First/Business Class (Zone1-3). The Zonal Drying™ anti-condensation system is basic equipment in all Boeing 787 aircraft and optional (as Buyer-Furnished-Equipment) on the Boeing 737NG program. The Zonal Drying™ is basic equipment on all Boeing 787 “Dreamliner” aircraft and the humidifiers are standard in all crew rest compartment fitted Dreamliner aircraft and optional for flight deck. The flight deck humidifier is optional on the A350XWB aircraft, the crew rest compartments humidifiers are optional on both A380/A350XWB and the Zonal Drying™ and Cair™ systems are optional on the A350XWB aircraft.
