## About IRLAB

IRLAB discovers and develops novel treatments of Parkinson's disease and other CNS disorders. The company's most advanced drug candidates, mesdopetam (IRL790) and pirepemal (IRL752), are in Phase IIb and are designed to treat some of the most difficult complications related to Parkinson's disease. In 2021, IRLAB entered an exclusive global license agreement with Ipsen for the development and commercialization of mesdopetam.

Through the systems biology based Integrative Screening Process (ISP), its IRLABs proprietary research platform, IRLAB has discovered and generated all its drug candidates and continues to discover innovative drug candidates for the treatment of CNS disorders. In addition to IRLAB's strong clinical pipeline, IRLAB runs several preclinical programs with IRL942 and IRL757 currently in development towards Phase I studies. IRLAB is listed on Nasdaq Stockholm.
