CY21 H1 User Highlights

Connecting families and saving lives

Free crash detection user

“

360 told us my grandson was in a motorcycle accident as soon as it happened.

We were able to get to him as soon as the ambulance got the hospital by following the 360 app, we know exactly where he was. 35 miles away... 45 minutes before the police called to notify us of the accident, we were sitting in the waiting room when the call came in.

If you don't have it... Get it. Everyone I know has it now. I would not feel comfortable, if my loved ones and friends left home without it.

”

Paid Member user

“

Just wanted to say thank you to the operator that helped me last night. My girlfriend was having a medical emergency 2 hours away from me and thanks to the app and the emergency operator EMS was dispatched to her location and saved her.

I don't know what would of happened if we didn't have this app!

Thank you again your all HEROES!

Upcoming

Build User Base

Launch of free data breach alerts

Why ID theft?

- **25%** more internet usage during the pandemic
- **1 in 3** surveyed Life360 members have experienced ID theft
- **1M+** children have their identities stolen each year
- **3x** higher cost for families with children to resolve fraud than those without

How it works

Detect

We actively scan the dark web where hackers sell stolen info

Alert

We alert users as soon as we detect a breach

Resolve

We share next steps to secure user accounts and prevent ID theft

CY21 contribution

Jiobit expected to contribute revenue of \$3m and EBITDA of \$(3)m from date of acquisition

Financial Overview

Improving retention metrics

US Organic User Retention

US Subscription Retention after 12 months

July 2020 Membership cohort vs pre-Membership averages

- Line charts indicate how long users within a given cohort remain with Life360
- COVID-19 had an initial negative impact on organic users followed by a “bump” of reactivations
- User retention rates benefit from reactivation of previous users
- Enhanced product initiatives supporting user retention in June ‘21 quarter
- Membership subscribers showing improving retention metrics versus pre-Membership subscriber averages

Unit Economics

Net subscription revenue retention exceeds 100%

Net Revenue Retention - Subscription (vs Previous Half)*

- The strength of Life360's freemium model is reflected in net subscription revenue retention exceeding 100%. This is supported by success in driving free users to paid subscriptions, and paid subscribers into higher price plans
- In each half year period (excluding 1H20), net revenue retention is above 100% across the cohort of users who had signed up by the end of the previous period
- In 1H20, there was a modest COVID-related decline in revenue retention, with a full recovery to historic levels in 2H20 and ongoing strong performance in 1H21

Net revenue retention is measured based on the revenue in the final month of the previous period compared to the revenue from the same set of users earned over the next six months e.g. for 1H19, revenue retention is calculated as the average monthly revenue over the period vs. the revenue earned in December 2018

Unit Economics

Significant US ARPPC uplift from the launch of membership with significant room for growth

Unit Economics

Cohorts continue to perform in-line with expectations

- Blended summary provides performance insight into overall efforts across all channels in aggregate
- Return to growth in 1Q'21 and 2Q'21 underpinned the decision to increase marketing spend including investments in brand and TV spend, with 2Q'21 in line with the prior year's investment
- Investment into marketing is expected to accelerate in 2H'21, including a national brand campaign and an expansion of performance marketing spend to support the launch of the direct-to-premium web experience

*Marketing payback calculated as contribution profit, which includes cost of sales less sales & marketing expenses (excluding commissions and stock-based compensation)

* Non-recurring adjustment related to the deferral of a portion of monthly subscription sales through a channel partner

Commentary

- Direct revenue growth of 29% (excluding non-recurring adjustment) supported by 19% YoY growth in Paying Circles to 1.0 million. ~14% increase in ARPPC supported by the launch of the Membership model
- Indirect revenue growth of 11% underpinned by growth in Data revenue
- Gross Margin declined due to technology costs associated with indirect revenue
- Increased Research and Development expenses due to higher FTE to support product development
- Lower user acquisition expenses reflects a shift away from traditional performance marketing to new channels including streaming TV. Overall investment in paid search and TV increased slightly YoY.
- Increased sales and marketing expense due to higher commissions and spend on new marketing channels including TV
- General and administration expense reflects primarily scaling of headcount to support growth in the business, insurance, facilities and public company requirements
- Increased EBITDA loss driven by growth investment

Commentary

- Cash and cash equivalents decreased by \$5.8m largely reflecting cash outflow from operating activities
- Accounts receivable increase of \$3.0m relates to timing of receipts from a channel partner
- Prepaid expenses and other non current assets decreased by \$3.1m due to prepayment of technology and insurance expenses in the prior period
- Convertible note receivable (non-current) of \$2.5m relates to convertible note receivables in relation to the Jibit acquisition
- Other current liabilities of \$2.1m reflect the convertible notes in connection with the Family Advisory Council

Commentary

- Net cash outflows from operating activities reduced by \$0.6m
- Net cash outflows from investing activities related to the convertible note receivable in connection with the Jibit acquisition
- Net cash inflows from financing activities reflect proceeds from the exercise of options and the cash received in advance of convertible notes in relation to the creation of the Family Advisory Council

Outlook & Strategic Review Update

Q3 business update

Resilient performance in the face of COVID-19 Delta wave

- Q3 business update provided due to the recent rapid spread of the COVID-19 Delta variant
- Current US registrations are showing considerable resilience, significantly outperforming the first COVID wave and showing a recent uptick ahead of back-to-school
- The strong MAU and Paying Circles growth rates delivered in Q2 continue into Q3

Outlook

- Life360's strong Q2 performance in MAU and Paying Circles has continued into Q3 despite the rapid spread of the Delta variant in the US. As a result, we now expect Annualised Monthly Revenue by December 2021 in the range of \$120-125 million for Life360's core business, ahead of original CY21 guidance of \$110 to \$120 million. While this updated guidance takes the current Delta impact into account, at the time of this release, cases are still growing exponentially, and the ultimate changes in social distancing patterns and government restrictions remain unclear.
- Life360's current momentum, along with our track record of successfully navigating prior COVID spikes, provide confidence to accelerate investment in growth initiatives. Life360 will be increasing spend on brand marketing, paid acquisition, R&D, and joint initiatives with Jiobit. These investments will increase CY21 underlying EBITDA loss (excluding Stock Based Compensation) from the original CY21 guidance of no greater than \$(15) million for the core business.
- Jiobit's Annualised Monthly Revenue for the month of December 2021 is anticipated to be in the range of \$11-12 million, with a \$3 million revenue contribution in CY21 post acquisition. The underlying CY21 EBITDA loss contribution from Jiobit from the time of acquisition is expected to be approximately \$(3) million.

Strategic Review Update

The acquisition of Jibit marks a milestone, but not a completion of the strategic review originally announced in February 2021. Life360 is actively evaluating opportunities to accelerate progress towards our vision of being the dominant platform for a much broader suite of family services. This includes transactions that could simultaneously result in a dual listing on a US exchange.

The recent Jibit acquisition has raised our profile with other companies that similarly see the potential to accelerate Life360's platform vision. While discussions with insurtech companies are ongoing, we are seeing a dislocation between public market multiples which have fallen recently, and private market multiples which continue to rise, and we are maintaining a disciplined approach to valuation.

As a result, we have expanded our search beyond insurance verticals, and are in early stage discussions with companies in other family services verticals which may or may not result in a transaction.

There is no certainty that the review will result in any additional transactions or any changes to current listing arrangements. We remain committed to our existing strategic plan, and will only consider complementary pathways that we believe will result in a significant increase in shareholder value.
