

## FIRE AT MIDSONA'S PRODUCTION PLANT IN CASTELLCIR, SPAIN

**Early Monday morning, Midsona experienced a fire at its production plant for plant-based protein alternatives in Castellcir, Spain.**

Thanks to swift action from the on-site personnel well as the local fire authorities the fire was contained to a section of the production site, but this section sustained material damages and will be out of commission for an extended period of time. This section of the production plant produces goods with a sales value of approximately SEK 75 million on an annual basis. "No one was hurt by the fire, which is ultimately the most important thing, and we are now working intensely to secure normal operations in the parts of the site which were not directly impacted by the fire in order to secure continued delivery of these products to our customers" says Henrik Hjalmarsson President & CEO at Midsona. An investigation into the cause and spread of the fire as well as the more detailed damages has started.
