

PRESS RELEASE

Helsingborg January 17, 2011

Nederman Norclean moves production to Helsingborg and Töredal.

Nederman has today made a decision to move the production of subsidiary Nederman Norclean AS from the unit in Sandefjord, Norway, to the Nederman production units in Töredal and Helsingborg, Sweden.

The close down in Sandefjord will affect a total of 25 blue- and white collar workers. Some new positions will be created in Töredal and Helsingborg, which will be offered to the affected personnel in Sandefjord.

The process of transferring the production to Helsingborg and Töredal will commence immediately and is estimated to be complete by the end of the second quarter 2011.

Nederman Norclean produces a range of industrial vacuum cleaning systems for the extraction, collection, separation and transportation of a wide variety of materials and liquids. The range includes both Air Powered as well as Electric Powered products and is designed to operate in difficult and demanding industrial conditions. The product range of Nederman Norclean will not be affected by the decision to transfer the production.

The decision is a result of the previously communicated in-depth review of alternatives and actions required to strengthen & improve the long term competitiveness and profitability of the Norclean product range. The decision is also a result of Nederman's ongoing analysis of its businesses and operational structure, following the acquisition of Dantherm Filtration.

Facts about Nederman

Nederman is one of the world's leading companies supplying products and services in the environmental technology sector. The company's products and systems are contributing to the creation of clean and safe working environments focusing on clean air, recycling and environmentally friendly transport management.

Nederman's offering on the market encompasses everything from the design stage through to installation, commissioning and servicing. Sales and marketing are carried out via subsidiaries in 27 countries as well as agents and distributors in over 30 countries. Nederman develops and produces in its own manufacturing and assembly units in 8 countries.

In April 2010, Dantherm Filtration, with its primary focus on industrial air filtration, was acquired.

The Group was floated in 2007 on OMX Small Cap list; it has circa 1500 employees and a turnover of circa 2 billion SEK.
