Siemens places environmental technology order with Nederman

Nederman has received an order worth more than 15 million SEK from Siemens' new state of the art wind turbine plant in Tillsonburg, Ontario, Canada.

Nederman will supply a solution for the extraction and filtration of composite dust during the manufacturing of wind turbine blades.

The installation will be carried out by the Nederman owned company Dantherm Filtration A/S in Denmark together with Canadian contractors.

"We are very proud to receive this order from Siemens. It is an acknowledgement for Nederman's global expertise in solutions for the wind power manufacturing industry", says Sven Kristensson, CEO Nederman

Facts about Nederman

Nederman is one of the world's leading companies supplying products and services in the environmental technology sector focusing on industrial air filtration and recycling. The company's products and systems are contributing to reducing the environmental effects from industrial production, to creating safe and clean working environments and to boosting production efficiency.

Nederman's offering encompasses everything from the design stage through to installation, commissioning and servicing. Sales are carried out via subsidiaries in 29 countries and agents and distributors in over 30 countries. Nederman develops and produces in its own manufacturing and assembly units in Europe, North America and Asia. In April 2010, Dantherm Filtration, with its primary focus on industrial air filtration, was acquired. The Group is listed on Nasdaq OMX, Stockholm; it has about 1400 employees and a turnover of about 2 billion SEK.
