

Nederman receives order from Sandvik worth over SEK 11 million

Nederman will supply Sandvik Materials Technology with a complete solution for filtration and recycling of cutting fluids.

The solution includes two complete vacuum filter systems for cutting fluids used during metal machining. The order also includes oil mist filters and a number of conveyors for swarf. Nederman's solution enables effective re-use of large amounts of cutting fluids, which provides savings while producing less waste. Installation and start-up will be completed during the second quarter of 2013.

"This order confirms Nederman's competitive strength in solutions that enable effective and resource-saving production. We are very proud of the confidence that Sandvik is showing in us," says Sven Kristensson, CEO of Nederman.

Sandvik Material Technology in Sandviken, Sweden, is a developer and producer of advanced stainless steels, special alloys, titanium and other high-performance materials. Their products include tubes, bars and fittings.

Nederman's concept for metal machining includes a flexible selection of filters, conveyors, crushers, separators, etc. that can be combined into complete solutions. There are both financial and environmental rewards in industry for recycling cutting fluids and coolants as well as handling metal remains efficiently.
