

Nederman receives order worth SEK 55 million.

Nederman has received an order from Johnson Control Inc. to supply complete solutions for filtration of lead dust in two plants in North America. The order is worth SEK 55 million.

Johnson Control Inc. is a global diversified technology and industrial company with 168,000 employees serving customers in more than 150 countries. The order includes baghouses to filtrate lead dust from several furnaces in two North American plants where Johnson Control Inc. melts batteries to recycle lead.

“The recycling industry is an interesting and growing business and Johnson Control is a demanding customer. Getting this order shows our ability to create eco-efficient production with a unique technology resulting in lead emission levels well under the stated requirements” says Sven Kristensson, CEO of Nederman.

The order is booked in the third quarter and installation is planned to take place in the second and third quarter 2014.
