

Interim report

Q1 2022

First quarter 2022

- Incoming orders rose 27% to SEK 1,293 million (1,018)
- Net sales rose 23% to SEK 1,118 million (907)
- Operating profit rose 34% to SEK 181 million (135)
- EBITA rose 35% to SEK 187 million (138)
- Profit after tax rose 33% to SEK 144 million (108)
- Earnings per share were SEK 2.08 (1.56)

Record sales and earnings

Demand was strong in the fourth quarter of 2021 and remained high in the first quarter of this year. In combination with good delivery capabilities, this resulted in a 23% increase in sales. The impact on net sales from acquisitions and exchange rate movements was 7 percentage points and 4 percentage points respectively, resulting in organic growth of 12%.

Incoming orders also remained strong and rose 27%, exceeding sales by 16%. As delivery times from manufacturers become increasingly longer, customers are placing longer orders than normal in order to secure supplies for the future.

Operating profit (EBITA) rose 35% in the quarter and the EBITA margin expanded to 16.7% (15.2%). The strong performance was due to increased sales and an improved gross margin.

The war in Ukraine has had limited impact on OEM to date. OEM has a few customers in the affected region with minimal sales activity. Deliveries to the customers that it had in Russia have been halted. A number of OEM's large customers, however, have customers of their own in the region and this will result in a decline in demand. Given OEM's total sales, this is not expected to impact its sales to any great extent.

Acquisition of company in Ireland

The Irish company Demesne Electrical was acquired in early January 2022. It had a turnover of approximately SEK 205 million and an operating profit of around SEK 26 million in 2021. The company is a leading distributor of electrical components and uses several of the same suppliers as other OEM companies. The acquired business is an excellent complement to the Group and has grown well during the first quarter.

Growth across the regions

The combination of strong demand, price increases and positive currency movements has generally resulted in robust growth and improved gross margin. Growth was strongest in Region Denmark, Norway, the British Isles and East Central Europe, and in Region Finland, the Baltic states and China, with organic growth reaching 20% and 18% respectively. Organic growth in Region Sweden reached 8%.

Although OEM's operations have managed to maintain good delivery capabilities so far, they will continue to face issues with delivery capacity and this is reflected in the ever-growing order book.

Market situation remains uncertain

The current geopolitical tensions, shortage of raw materials and significant price increases are causing uncertainty about the future. OEM has a history of strengthening market positions and market share during troubled times. The creativity and commitment of our employees are key to the positive performance of the Group which allows it grow stronger over time.

The Group's investments in fixed assets in the first quarter of 2022 totalled SEK 187 million (1). Property, machinery and equipment accounted for SEK 5 million (1), and intangible assets for SEK 182 million (0), SEK 182 million (0) of which is related to business acquisitions.

Cash and cash equivalents

Cash and cash equivalents, comprising cash and bank balances, amounted to SEK 114 million (424) on 31 March 2022. Cash and cash equivalents, together with committed and undrawn credit facilities, amounted to SEK 437 million (797) on 31 March 2022. The Group's interest-bearing financial liabilities totalled SEK 180 million (107), of which SEK 50 million (56) are liabilities recognised in accordance with IFRS 16 Leases.

Intangible assets

Amortisation of intangible assets totalling SEK 6.6 million (3.7) was charged to the income statement in the first quarter of 2022. On 31 March 2022, intangible assets amounted to SEK 353 million (185).

Equity/assets ratio

On 31 March 2022, the equity/assets ratio was 62% (69%).

Employees

The Group's average number of employees in the first quarter of 2022 was 943 (878). The number of employees at the end of the period was 957 (881). The increase is due in part to the acquisition of a business with 46 employees (-).

Share repurchase

OEM did not repurchase any shares during the period. On 31 March 2022, OEM held a total of 185,541 treasury shares. The holding corresponds to 0.3% of the total number of shares. The repurchase mandate granted by the General Meeting is for up to 10% of the shares, which is 6,950,792 shares.

Acquisitions

On 13 January 2022, all of the shares in Demesne Electrical Sales Ltd were acquired. The company was acquired through the transfer of all shares in the parent company Balfe Securities Limited. Demesne Electrical Sales is Ireland's leading independent importer and distributor of electrical control, switch-gear, energy-saving and installation products. It has 52 employees and an annual turnover of approximately SEK 205 million. The company has its head office in Dublin. The company became part of Region Denmark, Norway, the British Isles and East Central Europe on 1 January 2022. The consideration for the business acquired was SEK 209.3 million, plus contingent considerations estimated at SEK 71.4 million, based on how the business develops in 2022 and 2023.

The analysis of acquisition that has been made is a preliminary analysis due to the short amount of time between the date of acquisition and the preparation of the interim report.

Preliminary acquisition analysis (SEK million)

The acquired company's net assets at the time of acquisition	Group fair value
Intangible fixed assets	91.2
Other fixed assets	3.4
Inventories	22.8
Trade and other receivables	71.3
Cash and cash equivalents	20.2
Deferred tax liability	-11.4
Trade payables and other operating liabilities	-78.9
Net identifiable assets/liabilities	118.6
Consolidated goodwill	90.7
Cash consideration	209.3

Cash consideration comprises cash payment of a fixed purchase price of SEK 125.7 million, a withheld amount on the fixed purchase price of SEK 12.2 million and a contingent consideration of SEK 71.4 million.

As a result of the acquisition, other intangible fixed assets increase by SEK 181.9 million, relating to supplier relationships and goodwill. Supplier relationships will be amortised over a 5-year period.

OEM normally uses an acquisition structure with a base consideration and contingent consideration. Contingent consideration is initially measured at the present value of the probable earn-out amount, which is SEK 71.4 million for the acquisitions this year. The period for contingent consideration is three (3) years at most and the earn-out is capped at SEK 79.5 million. Both the base consideration and the contingent consideration are settled in cash.

External transaction expenses linked to acquisitions amount to SEK 1.5 million (-) in the period.

Remeasurement of contingent consideration

Developments in previously implemented acquisitions have not resulted in a remeasurement of contingent consideration recognised as a liability. Acquisition-related consideration liabilities (both absolute and contingent) on 31 March 2022 totalled SEK 87 million (5.4).

Accounting policies

This condensed consolidated interim report has been prepared in accordance with IAS 34, Interim Financial Reporting, and with relevant provisions in the Swedish Annual Accounts Act. The interim report for the Parent Company has been prepared in compliance with Chapter 9, Interim Reports, of the Swedish Annual Accounts Act. The Group and the Parent Company have applied the same accounting policies and basis of preparation as in the latest annual report. No International Financial Reporting Standards (IFRS) or International Financial Reporting Interpretations Committee (IFRIC) interpretations adopted in 2022 have had a significant effect on the reported results or financial position of the Group.

There are no separate disclosures of the fair values of financial assets and liabilities stated at amortised cost because the carrying amounts of financial assets and financial liabilities are considered to be reasonable approximations of their fair values. This is because, in the opinion of management, there have been no significant changes in market interest rates or credit spreads that would have a material

impact on the fair value of the Group's interest-bearing liabilities. Furthermore, the fair value of trade and other current receivables and payables is assumed to approximate their carrying amount given their short-term nature.

Risks and uncertainties

The OEM Group is exposed to both business-related risks and financial risks through its activities. Business-related risks include competition and operational risks, and financial risks include liquidity risk, interest rate risk and currency risk. The financial operations of the OEM Group and management of financial risks are mainly handled by the Parent Company. For a complete report on the risks affecting the Group, please refer to pages 32 and 33 and pages 78 to 81 of the 2021 Annual Report.

In addition to the risks and uncertainties set out in the 2021 Annual Report, along with the uncertainty surrounding the current geopolitical tensions, the shortage of materials in certain sectors is expected to continue to impact the capacity of our supply chains, resulting in longer lead times. The imbalance in the transport sector has also led to a significant increase in freight costs, which is expected to continue to affect margins in the coming quarters.

Related party transactions

No transactions between OEM and related parties have been entered into that have materially affected the financial position and performance of the Group or the Parent Company during the period, with the exception of inter-company dividends.

Parent Company

Net sales for the Parent Company in the first quarter of 2022 totalled SEK 20 million (14) and profit after financial items was SEK 16 million (4). Net sales relate entirely to inter-company transactions. The foregoing risks and uncertainties specified for the Group also apply indirectly to the Parent Company.

Events after the close of the reporting period

There are no other significant events to report after the close of the reporting period.

The impact of the war in Ukraine on the OEM Group

The escalating geopolitical tensions at the EU border with Ukraine are having an impact on world trade that is causing uncertainty about the economic outlook. Since the Group's sales to Ukraine and Russia are negligible, the direct impact of the situation on OEM is assessed as low. OEM has a few customers in the affected region with minimal sales activity. Deliveries to customers in Russia have been halted. A number of OEM's large customers, however, have customers of their own in the region and this will result in a decline in demand. Given OEM's total sales, this is not expected to impact its sales to any great extent. Group management and the management team of each company are monitoring developments closely and are adapting their strategies in order to best serve their customers.

* Attributable to shareholders of the parent company. There are no dilution effects.

** The key indicator are corrected for the 4:1 share split and automatic redemption of each fourth share carried out Q2 2021.

Prior periods have been adjusted with a factor of 3 since that financial implication of the transaction is a 3:1 split combined with an extra dividend.

Notes

Segment reporting is presented on pages 5, 6 and 11. Disclosures about fair value of financial instruments and accounting policies are presented on page 8.

Definitions

In addition to the conventional financial performance measures established by IFRS, OEM uses the terms Organic growth and EBITA/EBITA margin, the definitions of which are given below. The reason is that OEM wants to provide clearer comparability of sales performance between periods, without the effects of currency movements or acquisitions, and be able to summarise the companies' operations with regard to profit and margins, excluding amortisation and depreciation that arose on acquisition.

Organic growth

The change in total revenue in the period, adjusted for acquisitions, sales and currency movements, measured against the total revenue in the comparative period.

EBITA

Operating profit before amortisation and impairment of acquisition-related intangible fixed assets
A reconciliation of the calculation of EBITA is presented on page 11.

EBITA margin

EBITA divided by net sales

Return on capital employed

EBITA plus finance income as a percentage of average capital employed

Capital employed

Total assets reduced by non-interest bearing liabilities and provisions

Return on total capital

EBITA plus finance income as a percentage of average total capital

Return on equity

Profit for the year divided by average shareholders' equity
