

Proact upgrades ÖstgötaTrafikens' IT

Proact has updated local transport company ÖstgötaTrafikens IT infrastructure to increase continuity, performance and data access. The project has included, amongst other things, new solutions for storage, backup and network. The project started at the beginning of 2012 and was completed during the summer. The agreement also includes ongoing support from Proact.

ÖstgötaTrafiken is responsible for public transport and the county assisted travel service in Östergötland County in Sweden. The company provides transport by bus, train and tram on 190 routes in the county's 13 municipalities. During a regular day the company cover 9 350 European miles with a fleet consisting of 350 vehicles. To increase performance, flexibility and continuity in the operations, Proact has now updated a significant part of the IT infrastructure.

– We have updated our IT infrastructure in order to meet the increased demands of data access and secure backup from the internal organization, but also to meet the increasing customer demands of accessibility in our external systems. Our IT plays a vital role in the customer experience and to secure service delivery to the end consumer we identified a need to renew ourselves by adding power and capacity in our entire IT infrastructure. Proact has delivered on those demands by installing a flexible end-to-end solution which we can grow with, says Zeraldin Hajdarevic, CIO, ÖstgötaTrafiken

To address the demands of ÖstgötaTrafiken, Proact presented a solution including migration of the old platform to an upgraded version, configuration of switches and consolidation of file servers and around 60 virtual servers. ÖstgötaTrafiken has also received new solutions for management, storage and backup of data. To protect previous IT investments, the previous IT environment is used for testing and development

– ÖstgötaTrafiken has a strong link between the IT function and the core operations. Both travelers and employees are depending on IT continuity. It has been great working with ÖstgötaTrafiken as we have managed the project from start to finish. Today ÖstgötaTrafiken has an IT environment addressing both current and future IT challenges, says Martin Ödman, Regional manager, Proact.
