Press release 4th of June 2013

Proact wins EMC Isilon partner of the year award for the second year in a row

Proact IT Group has received the Pan-EMEA Best Isilon Partner of the Year award at EMC World in Las Vegas for the second time.

Astonishing 136% growth compared to last year

Proact received the award based on revenue, growth and dedication to the EMC Isilon platform at an international level.

EMC Isilon Best Partner of the Year award was presented to Proact at the official awards ceremony at EMC's main annual event EMC World in Las Vegas. The award was presented to Proact by EMC Vice President of Channel Sales in EMEA, Philippe Fosse.

- This award celebrates the performance of Proact across EMEA. The channel has never been as vital as it is now and this Award recognizes the great achievements by Proact over the last year in growing their Isilon business by 136% during this time mainly in the Media & Entertainment, Oil & Gas and Life Science segments. We truly value the relationship that we have with Proact and recognise the contribution they make to EMC's business, says Philippe Fosse.

- We are excited to get this award for the second year and it shows that we have managed to continue to grow in this area like we announced when we got the award last year. The Isilon platform fits well into the strong portfolio of products that we already have in Proact and we will utilize this expertise even more going forward, says Martin Ödman, CEO at Proact IT Group.

Pascal Gelac, Director of Isilon Channel Sales in EMEA at EMC, added: - The business opportunity for our Isilon platforms is concentrated on a number of vertical market segments and each need a tailored marketing approach. It is amazing to see how quickly Proact was able to adapt to these new market opportunities. A great example is Kanal 75, Sweden's biggest producer of TV and Internet services for harness racing. Proact has implemented a completely new storage solution in order to solve Kanal 75's challenge of managing the company's rapidly growing information volumes with EMC Isilon.
