Proact wins major contract with international company

A number of big contracts have been concluded with a major international company in the first quarter of 2015, and the value of completed transactions amounts to more than SEK 50 million in total.

“These contracts are strategically important to us, and at the same time they are proof that our specialist expertise and market leading services are appreciated by our customers,” says Martin Ödman, CEO and Group President of Proact.

Proact is Europe’s leading independent integrator in the field of integrated systems (data storage, servers and networks) and private cloud services. Proact supplies business benefits by helping companies and authorities the world over to reduce risk and costs, and above all to supply flexible, accessible and secure IT services.

The customer is currently undergoing a process of modernisation, with the aim of enhancing its efficiency and quality. They needed greater storage capacity and improved systems reliability, while at the same time it was imperative that switching to the new system would not cause downtime in their day-to-day operations.

Proact’s special position as an independent specialist was an important criterion when it came to selecting a supplier. Proact was chosen as a partner because it was offering a competitive price and was capable of supplying the functionality the company needed, but also because of its professional attitude and superb technical expertise.
