

Rejlers is one of the largest engineering consultancy firms in the Nordic region. Our 2,000 experts work with projects within the areas of Building and property, Energy, Industry and Infrastructure. With us, you will meet specialist engineers with the breadth, cutting edge expertise and not least energy to create the results you want. We are continuing to grow rapidly and our activities are spread across 80 locations in Sweden, Finland and Norway. In 2014, Rejlers had revenue of SEK 1.7 billion and its Class B share is listed on Nasdaq Stockholm.

Press release
12-11-2015

Rejlers manages energy efficiency in Mariestad municipality.

Rejlers Energiprojekt has been appointed to implement the first two part projects of a collaborative project for energy efficiency in Mariestad municipality. The project is run as a complete contract. The objective is to increase the technological status and to make energy use more efficient in the schools and other premises covered by the project.

The assignment covers replacement of ventilation systems, upgrading of control systems, replacement of windows, additional insulation and energy optimisation. The order value is 12 MSEK and the project is estimated to be completed in 2016. The project is a continuation of the energy inventory work, analysis and action package that Rejlers Energiprojekt has carried out on the municipal buildings.

"In a previous phase, we took an inventory, analysed and developed concrete proposals for energy efficiency in the municipal premises. It is therefore very satisfying that we have also been given the role of implementing these actions in a turnkey contract and thereby see how the practical aspect meets the theory", says Per Sjöbom, Project Manager Rejlers.
