Rejlers consultants in demand from Railway Training Centre

Rejlers has signed a framework agreement with the new Railway Training Centre [Trafikverksskolan] in Ängelholm, regarding hiring out the company's consultants as lecturers at the centre. The current subject areas are basic signal technology, railway technology, power technology, project management, general railway technology, telecommunications technology, CAD, Microstation, BIM, track technology, points and track welding.

The framework agreement is valid until 2017, with an extension option to 31/12/2019.

From 1 January, the Railway Training Centre is combining all the Transport Administration's training sessions into one unit. This means that the centre is continuing to develop and provide high quality road and rail training to the market and will also manage all internal training for the Transport Administration.

"The new framework agreement is a good mark for our consultants, who are in great demand in the industry, and are appreciated for their teaching abilities," says a happy Mats Lithner, Project Manager, Rejlers Sweden.
