# Rejlers to present 'Digitalisation in a Nordic energy system' at SvD Energy Summit

**The 2016 Energy Summit will be taking place from 13–14 September at Berns in Stockholm, Sweden. The event will bring together key energy sector stakeholders to discuss the next steps to be taken in the world of energy. Speakers include Jenny Edfast, Head of the Energy division at Rejlers Sweden, and Thomas Pettersen, CEO of Rejlers Embriq, who will be presenting Rejlers and 'digitalisation in a Nordic energy system'.**

"Here at Rejlers we believe very strongly that digitalisation of the energy system will lead to more effective grid operation, as well as better optimisation of investments. This would in turn lead to the streamlining of our energy system in line with the EU's climate goals. In that way, we could help both our customers' businesses and society as a whole", says Jenny Edfast, Head of the Energy division at Rejlers Sweden.

The energy sector is facing certain significant challenges at the moment. How can we create a market that will press ahead with the switch-over to renewables and at the same time guarantee the energy supply? At the SvD Energy Summit from 13–14 September, key individuals from the energy sector ecosystem will come together to give their views on the current market and the strategic choices they have made. They will also look at future opportunities and threats. The conference will give you a clearer idea of developments, but also solutions to the problems the sector is facing.

#### **You will get answers to questions such as:**

- Swedish energy policy and transformation across Europe – how are these connected?
- What does Sweden's policy have to say on this? Listen to Ibrahim Baylan
- What effect could the Energy Union have on the market?
- How could the energy situation be improved while nuclear power is being phased out?
- What investment will there be in the energy sector in future?
- How could energy stocks affect electrics?
- What effect could smarter networks and new business models have on the sector?
