CEO Statement

The year has started with strong growth in net sales driven by continued good demand in Sweden and a recovery of the market in Norway. In Norway, we also benefitted from new customer contracts. We had a particularly strong development in chilled products with a growth of 16 percent at constant exchange rates. The adjusted operating margin was somewhat lower than last year due to the consolidation of the Finnish operation, which was effective as of the second quarter last year. The adjusted margin for comparable units improved to 5.7 percent.

The Swedish operation showed a continued positive trend in both net sales and adjusted operating income with a higher margin. This was achieved through product innovation, an improved product mix and efficiency gains in production. Our newly introduced products sold well including the ready-to-eat Minutkyckling products that are produced in the new processing section in the Valla facility. We also launched the first chicken bacon on the Nordic market. Chicken bacon contains substantially less fat than traditional bacon and still has great taste. As a result of the cancellation of the acquisition of Lagerbergs in Sweden and the need for further capacity to meet the demand in the Swedish market, we have signed a long-term lease contract for an industrial facility close to Kristianstad in the south of Sweden. We are now evaluating to invest in this facility to reach an annual capacity of 20 million chickens in the first phase.

The market in Denmark continued to be very competitive with price pressure both locally and on exports. Net sales and the adjusted operating income for the Danish operation declined, and the margin was lower than last year. At the end of the quarter, we acquired a majority shareholding in Sødams Øko Fjerkræslagteri in Denmark, a producer of organic and free-range chicken with annual sales of approximately MDKK 18. The acquisition is in line with our strategy to broaden the product portfolio and expand our presence in the premium segment of the Danish market.

Net sales for the Norwegian operation increased substantially as a result of strong growth in market demand compared to a weak first quarter last year. The retail market for chilled chicken products grew by approximately 22 percent in value in the quarter. We also benefitted from increased volumes to Coop Norway and the start of deliveries to Norgesgruppen. Adjusted operating income rose substantially, although from a low level, and the margin improved.

As expected, capacity utilization in the Finnish facility was low in the quarter. We have signed additional contracts for the supply of birds and will be able to increase volumes during 2016.

To summarize, we continued to deliver on our strategy, i.e. to achieve organic growth in line with our vision to inspire the Nordic consumers to eat chicken once more per week, to improve operational efficiency and to strengthen the Group through acquisitions.

Acquisition in Denmark

On 30 March 2016, Scandi Standard's subsidiary Danpo A/S signed an agreement to acquire a majority shareholding in Sødams Øko Fjerkræslagteri ApS that processes approximately 500,000 organic and free-range chickens annually. The acquisition is made in order to broaden the product portfolio and expand the Group's presence in the premium segment of the Danish market.

The purchase price amounts to a maximum of MDKK 48 for 80 percent shareholding, including an initial payment of MDKK 18 in connection with signing of the agreement. The remaining payments will be performed partially over four years depending on achievement of certain criteria.

The purchase agreement includes a put/call option for acquisition and sale of the remaining 20 percent of the shares and the total price is estimated to increase to a maximum of MDKK 61 over four years including payment of MDKK 13 for the remaining shares.

A preliminary purchase price allocation has been performed per 31 March 2016. No intangible assets except for goodwill have been identified, and MDKK 60.5 was allocated to goodwill. The purchase price allocation will be finalized during the coming quarters. The financial effects of the transaction have been recognized per 31 March 2016 and the acquired company has been recognized as a wholly owned subsidiary.

Long-term incentive program

The Annual General Meeting ("The AGM") 2016 decided on a Long-term incentive programme, LTIP 2016, for key employees intended to contribute to long-term value growth of the same type as LTIP 2015. LTIP 2015 and 2016 are equity-settled, share based compensation plans accounted for in accordance with IFRS 2, Share based payments. The programmes are expensed over the vesting period (3 years). At the end of each reporting period, the Company considers changes in the anticipated number of vested shares. Social charges related to the program are recognized as a cash-settled instrument. For more information about the Group's long-term incentive programmes, see Note 1 and 5 in the Annual Report 2015.

No changes have been made in the Group's accounting and valuation principles compared with the accounting and valuation principles described in Note 1 of the Annual Report 2015.

Note 2. Segment information

¹The valuation of the Groups financial assets and liabilities is performed in accordance with the fair-value hierarchy:

Level 1. Quoted prices (unadjusted) in active markets for identical instruments

Level 2. Data other than quoted prices included within level 1 that are observable for the asset or liability either directly as prices or indirectly as derived from prices.

Level 3. Non-observable data for the asset or liability.

As of 31 March 2016 and at the end of the comparison periods the Group had financial derivatives (level 2) and biological assets (level 3) measured at fair value on the balance sheet. The fair value of forward exchange contracts is estimated based on current forward rates at the reporting date, while interest rate swaps are valued using estimates of future discounted cash flows. As of 31 March 2016 the derivatives amounted to MSEK -17.6 (-17.6). The biological assets (parent animals in the rearing of day old chicks, as well as broilers) are measured in accordance with IAS 41 at fair value less selling costs and as of 31 March 2016 those amounted to MSEK 37.5 (35.6). For the Group's long-term borrowing, which as of 31 March 2016 amounted to MSEK 1,498.3 (1,499.7), fair value is considered to be equal to the amortized cost as the borrowings are held at floating market rates and hence the booked value will be approximated as the fair value. For other financial instruments fair value is estimated at cost adjusted for any impairment.

Note 4. Other liabilities

The entire other long-term liability per 31 March 2016 for the Group amounting to MSEK 53.3 (2.4) refers to additional purchase price related to acquisitions performed in 2015 and 2016. The entire other current liability in the Parent Company as per 31 March 2016 amounting to MSEK 78.1 (-) is related to dividend paid by another Group company.
