

Press release June 28, 2024

Tobii Dynavox AB (publ) has changed its company name to Dynavox Group AB (publ)

The Swedish legal entity Tobii Dynavox AB (publ), listed on Nasdaq Stockholm, has changed its company name to Dynavox Group AB (publ). The share will be traded under the new ticker DYVOX.

In accordance with the resolution of the annual general meeting, the Swedish Companies Registration Office (Sw. *Bolagsverket*) registered the new company name on June 27, 2024. As of Monday, July 1, 2024, the share will be traded on Nasdaq Stockholm under the new company name and in connection with this, the ticker will also be changed to DYVOX. The company will also change the address of its Investor Relations website to dynavoxgroup.com.

As previously communicated, the name change aims to clarify for the investor community and for new talent in Sweden that the company is separate from Tobii AB. The two companies, Tobii Dynavox AB and Tobii AB, were legally separated in a listing process in December 2021. The name change only concerns the group's parent company. The group's customer facing activities will remain unchanged under the current commercial brands, including "Tobii Dynavox" (communication aids), "Acapela group" (synthetic voice solutions) and "Rehadapt" (mounting solutions).

About Dynavox Group

Dynavox Group AB (publ) is the parent company for Tobii Dynavox, the global leader in assistive communication. Headquartered in Stockholm, and listed on Nasdaq Stockholm (DYVOX), Dynavox Group, together with its brands has over 700 employees and serves customers in 65+ countries. Tobii Dynavox's custom designed solutions enable people with disabilities such as cerebral palsy, ALS, autism and spinal cord injury to communicate with a voice of their own, develop literacy skills and live more independently. To date, hundreds of thousands of people worldwide have benefited from our integrated solutions, which include hardware, software, clinically developed language systems, mounting solutions, training, and dedicated support. We offer extensive funding expertise to facilitate funding for as many people as possible. As voice and motor impairments are common among our users, our solutions are accessed via alternative methods, such as eye gaze or touch screen. Using AI-based speech synthesis, we offer users a personalized voice identity in over 30 languages, for children and adults.
