Valuation of financial instruments at level 3

Valuation of unlisted holdings is made based on *International Private Equity and Venture Capital Valuation Guidelines* as developed and published jointly by risk capital organisations EVCA, BVCA and AFIC. For directly owned investments, an overall assessment is made to determine which valuation method is appropriate for each individual holding. Taken into account will be whether any financing or transaction "at arms-length distance" has been made and an evaluation is also made by applying relevant multiples to the company's key financial indicators from a selected group of similar companies, less an adjustment for, for instance, difference in size between the company in question and the group of comparable companies. In cases where there are other methods that better reflect the fair value of an individual holding, such methods are used which means that

individual holdings may be valued by other than the methods described above.

All level 3 assets consist of shares in unlisted companies and are valued in accordance with the following valuation methods and non-observable data used for determining the carrying value. The data in the table below represent a selection and is therefore not all input data used in the valuation.

EBIT multiples: 5 - 9

Revenue multiples: 0.5 - 3.0

Net asset valuation: Established net asset value

Most recent transaction: In the case of recently floated new issue/share offering, the price thereon is taken into account. Higher multiples may also be applied in cases of expected rapid growth.
