

ASX RELEASE**Illuccix® Granted Use Authorisation for Prostate Cancer Imaging in Brazil**

Melbourne (Australia) and Porto Alegre (Brazil) – 1 December 2021. Telix Pharmaceuticals Limited (ASX: TLX, Telix, the Company) today announces that the Brazilian Health Regulatory Agency (Agencia Nacional de Vigilância Sanitária or ‘Anvisa’) has granted an exceptional authorisation for Illuccix® (TLX591-CDx) the Company’s lead prostate cancer imaging product.

Illuccix (Kit for the preparation of ⁶⁸Ga PSMA-11 Injection) is a positron emission tomography (PET) imaging agent targeting prostate specific membrane antigen (PSMA) for the staging of prostate cancer. The exceptional authorisation grants permission to commence selling Illuccix in Brazil, ahead of a full regulatory approval, expected next year.

The authorisation is granted to Telix’s partner MJM Produtos Farmacêuticos e de Radioproteção LTDA (Grupo RPH), Brazil’s leading cold kit plant and radiopharmacy network. RPH has an exclusive licence agreement with Telix to manufacture and distribute Illuccix in Brazil.¹

The Anvisa approval facilitates wide-spread clinical access to state-of-the-art prostate cancer imaging for all men across Brazil, a large and rapidly growing market for gallium-68 based radiopharmaceuticals.

Dr Christian Behrenbruch, CEO and Managing Director of Telix said, “Prostate cancer is the most commonly diagnosed male cancer in Brazil, with approximately 65,840 new cases each year.² PSMA-PET imaging has the potential to have a profound impact on the management of prostate cancer, enabling clinicians to detect prostate cancer right throughout the body. We look forward to working closely with our partner RPH to facilitate widespread patient access to Illuccix for men living with prostate cancer in Brazil.”

Grupo RPH Nuclear Medicine & Innovation Vice-President, Rafael Madke, added, “We are very pleased to have received this exceptional authorisation for Illuccix in Brazil, which is only given in select circumstances, and we look forward to playing an important role in transforming outcomes for men with prostate cancer. Grupo RPH is pleased to be working with a global leader such as Telix. We have extensive capability to manufacture and distribute nuclear medicine products in this region, and our objectives to support physicians and patients in Brazil are closely aligned.”

About Illuccix®

Illuccix (TLX591-CDx) is a preparation for imaging prostate cancer with positron emission tomography (PET), targeting prostate specific membrane antigen (PSMA), a protein that is overexpressed on the surface of more than 90% of primary and metastatic prostate cancer cells. Illuccix enables PSMA-11 to be labelled with the radionuclide Ga-68 directly before injection by medical professionals. After preparing the radiopharmaceutical and injecting it into the patient, PSMA positive lesions are localised by PET imaging.

Illuccix (TLX591-CDx) for prostate cancer imaging, has been approved by the Australian Therapeutic Goods Administration (TGA),³ and accepted for filing by the U.S. Food and Drug Administration (FDA).⁴ Telix is also progressing marketing authorisation applications for Illuccix in the European

About Prostate Cancer in Brazil

In 2020, prostate cancer was the most commonly diagnosed male cancer in Brazil with approximately 65,840 new cases per year. Prostate cancer was also the second most common cause of cancer death in men (after lung cancer), with more than 18,000 men dying from their disease in 2020. More than 320,000 men in Brazil were estimated to be living with prostate cancer in 2020.⁷

About Grupo RPH

Operating since 2004, Grupo RPH commercially delivers eight different Cold Kits for ^{99m}Tc and ⁶⁸Ga preparation for the Brazilian market. Grupo RPH is also the proud owner of the only private-owned fully GMP production facility in Brazil for nuclear medicine products. Grupo RPH's products are sold throughout the whole Brazilian territory, serving nearly 400 customers on a daily basis. Grupo RPH is also a pioneer of the centralized radiopharmacy model in Brazil.
