**Active Biotech AB (publ)** (Nasdaq Stockholm: ACTI) is a biotechnology company with focus on neurodegenerative/inflammatory diseases and cancer. Laquinimod, an orally administered small molecule with unique immunomodulatory properties, is in pivotal phase III development for the treatment of relapsing remitting multiple sclerosis. Also, laquinimod is in phase II development for the treatment of primary progressive multiple sclerosis and Huntington's disease. The project portfolio includes a preclinical project, ISI, with the objective to produce new, patentable chemical compounds for treatment of diseases within the company's focus areas. Please visit [www.activebiotech.com](http://www.activebiotech.com) for more information.
