Indicate by check mark whether the registrant files or will file annual reports under cover of Form 20-F or Form 40-F.

Form 20-F ☒ Form 40-F ☐

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes ☐ No ☒

If "Yes" is marked, indicate below the file number assigned to the registrant in connection with Rule 12g3-2(b): N/A

Attached to the Registrant Form 6-K filing for the month of October 2013, incorporated by reference herein:

Exhibit

99.1 Release dated October 22, 2013, entitled “GROUP RESULTS: KEY FEATURES”.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

DRDGOLD LIMITED

Date: October 22, 2013

By: /s/ Themba Gwebu

Name: Themba Gwebu

Title: Company Secretary

REPORT TO SHAREHOLDERS

FOR THE QUARTER ENDED
30 SEPTEMBER 2013

GROUP RESULTS: KEY FEATURES

Q1 2014 V Q1 2013

- ▲ Two-year wage settlement
- ▲ Flotation/fine-grind commissioning underway
- ▲ Gold production down **6%** to **33 597oz**
- ▲ Operating profit down to **R72.0 million**

DEAR SHAREHOLDER

This quarter was all about our efforts to commission and integrate our new flotation/fine-grind circuit. Volume delivery into the plant was solid and the flotation circuit worked very well. The mills, however, were slow to get going. This meant that we created a very rich concentrate, which resulted in a bottleneck at the mills. This, in turn, had the effect that most of the gold in concentrate remained in concentrate.

In production terms, this meant lower gold production and higher unit costs. Our all-in sustaining costs were R436 954/kg and, for the first time since the September 2010 quarter, the all-in sustaining costs margin was negative at -2%. The start-up issues we experienced with the mills have now been resolved.

Although the flotation/fine-grind circuit has introduced a layer of complexity into our operations – a set of thickeners and a dedicated high-grade leach and elution circuit – we are achieving consistency in the operation of the thickeners and our understanding of the workings of the high-grade leach is improving. We therefore remain committed to attaining our target of stable operation by December 2013.

While wage negotiations with the National Union of Mineworkers gave rise to a two-day strike by some 600 employees earlier this month – outside of the reporting period – I am pleased to report that the wage negotiating process during the quarter was expeditious and largely constructive, resulting ultimately in a settlement within budgeted parameters. We do not expect that the industrial action, which was peaceful, will have materially impacted on performance in the second quarter.

On the financial front, operating profit reduced as a result of higher costs, lower gold production and a lower average rand gold price received. We therefore saw a decline in earnings before interest, taxes, depreciation and amortisation ("EBITDA") and a headline loss of R12.5 million.

Q1 2014 v Q1 2013

OPERATIONAL REVIEW

Throughput for the quarter under review was 9% higher at 6 098 000t compared with the first quarter of FY2013. This was due, as intimated above, to the on-going stabilisation of both the western circuit (previously described separately as the Crown/City Deep circuit) and the Elsburg tailings complex circuit, and consequent, continuing improvement in the operating parameters of the main Crown/Ergo pipeline.

The average yield, however, was 14% lower at 0.171g/t due both to the phasing out of sand material reporting to City Deep for milling and its replacement with 3L42 slimes material, and to the gold lock-up described above, associated with commissioning of the flotation/fine-grind circuit.

Consequently, gold production was lower at 33 597oz, compared to 35 815oz.

Cash operating costs rose to R373 433/kg from R305 265/kg and all-in sustaining costs increased to R436 954/kg. This was due mainly to the increase in throughput, lower gold production, an 8% increase by power utility Eskom in the annual electricity tariff, increases averaging 10% in the cost of various other consumables and provision for wage increments flowing from the recently concluded two-year wage agreement with the National Union of Mineworkers, which are backdated to July 2013.

Capital expenditure was 34% lower at R52.3 million, reflecting completion of the construction of the flotation/fine-grind circuit.

FINANCIAL REVIEW

Revenue was 8% lower at R484.0 million due to the lower gold production and a 4% decline both in gold sold to 36 394oz and in the average rand gold price received to R427 604/kg.

After accounting for the increase in cash operating and all-in sustaining costs, operating profit was 59% lower at R72.0 million.

The operating margin was 60% lower at 13% and the all-in sustaining costs margin negative at -2%.

EBITDA declined by 76% to R27.6 million and a headline loss of R12.5 million, or 3 South African cents per share (SA cps), was recorded compared with headline earnings of R77.2 million or 20 SA cps.

Q1 2014 v Q4 2013

OPERATIONAL REVIEW

Throughput, quarter-on-quarter, improved by 5% from 5 824 000t but the average yield declined by 10% from 0.190g/t, resulting in a 6% drop in gold production to 33 597oz. Reasons for these quarter-on-quarter movements are detailed in the Q1 2014 v Q1 2013 comparison above.

Cash operating costs increased by 11% from R336 809/kg and all-in sustaining costs by 19% from R365 665/kg while capital expenditure declined by 29% from R73.8 million.

FINANCIAL REVIEW

Gold revenue rose 10% from R438.1 million quarter on quarter due to an 11% increase in gold sold from 32 826oz. The average rand gold price received was virtually unchanged at R427 604/kg. After accounting for the increases in cash operating costs, however, operating profit decreased by 25% from R96.2 million.

The operating margin was 41% lower at 13% and the all-in sustaining costs margin was negative at -2%.

EBITDA was down 73% from R101.5 million and the headline loss of -3 SA cents was recorded, compared with headline earnings of R34 million, or 9 SA cps previously.

LOOKING AHEAD

As previously reported, commissioning and integration of the flotation/fine-grind circuit will continue during the second quarter, with completion expected by December. While some impact on production in the second quarter is expected, this should be less substantial than in the quarter under review. During this time we will, of course, seek to offset this impact by paying close attention to all other operating parameters, not least costs.

Niël Pretorius

Chief executive officer

FORWARD LOOKING STATEMENTS

Many factors could cause the actual results, performance or achievements to be materially different from any future results, performance or achievements that may be expressed or implied by such forward-looking statements, including, among others, adverse changes or uncertainties in general economic conditions in the markets we serve, a drop in the gold price, a sustained strengthening of the rand against the dollar, regulatory developments adverse to DRDGOLD or difficulties in maintaining necessary licences or other governmental approvals, changes in DRDGOLD's competitive position, changes in business strategy, any major disruption in production at key facilities or adverse changes in foreign exchange rates and various other factors.

These risks include, without limitation, those described in the section entitled "Risk Factors" included in our annual report for the fiscal year ended 30 June 2012, which we filed with the United States Securities and Exchange Commission on 26 October 2012 on Form 20-F. You should not place undue reliance on these forward-looking statements, which speak only as of the date thereof. We do not undertake any obligation to publicly update or revise these forward-looking statements to reflect events or circumstances after the date of this report or to the occurrence of unanticipated events. Any forward-looking statements included in this report have not been reviewed and reported on by DRDGOLD's auditors.
