

Episurf Medical submits 510(k) application for Episealer® Patellofemoral System

Episurf Medical (NASDAQ: EPIS B) today announces that the company is now filing a 510(k) application to the US FDA for US market clearance for the Episealer® Patellofemoral System. The application is ready for filing and following certain administrative steps, it is expected that it is submitted within the next days. The application will undergo a review process.

Episealer® Patellofemoral System is an implant system with two implants for treatment of chondral and osteochondral lesions in the knee joint. The system is based on Episurf Medical's proprietary implant technology with individualised implants and surgical instruments, and detailed pre-surgical visualisation tools. As communicated earlier, the company is simultaneously preparing for a commercial launch in the US of the Episealer® Patellofemoral System during 2022.

"It is gratifying to submit Episurf's first ever 510(k) application, and I am proud of our team for the work to date on this project. We will continue to execute on this exciting initiative as we enter into the next phase, which includes the commercial preparations" says Pål Ryfors, CEO Episurf Medical.
