Episurf Medical's implants receive national regulatory approval in Hong Kong

Episurf Medical (NASDAQ: EPIS B) today announces that the Department of Health (Medical Device Division) in Hong Kong has approved the company's implant technologies Episealer® Knee and Episealer® Talus for the Hong Kong market. Included in the approval is also the ankle device Talus Osteotomy Guide. The approval follows a review process.

"Previously we were able to act in this market thanks to our CE marked products, but it brought on various limitations. This national approval is important, and it will help us increase the market acceptance in the region even further", says Michael Näsström, Head of Quality and Regulatory Affairs at Episurf Medical.
