Helsingborg, Sweden, June 24, 2021

MilDef Group wins Swedish order worth 23.6 MSEK

MilDef Sweden AB, a subsidiary of MilDef Group AB (“MilDef”), a global supplier of tactical IT, has received an order worth 23.6 MSEK for specialized computers in an integration project. The order is part of a larger system and planned delivery will take place during December 2021. Additional orders within the same project are anticipated.

The order will provide the Swedish Armed Forces with significant components for its digital infrastructure. The systems are designed to function as mobile nodes for the Armed Forces' forward command posts. MilDef has earlier during 2021 delivered prototype systems and these have undergone thorough tests that prove both capacity and modularity. The successful results from these tests have now generated this serial order.

“We are proud to be part of the digitalization and modernization of the Swedish Armed Forces,” says Evelina Hedskog, Managing Director of MilDef Sweden AB. “This important order underpins the trust the Swedish Armed Forces and FMV have in our products, services and systems.”

About MilDef

MilDef was founded in 1997 in Helsingborg, Sweden, and is a supplier of rugged electronics within tactical IT for challenging environments. MilDef's products are sold to more than 160 customers through MilDef's subsidiaries in Sweden, Norway, United Kingdom, and the United States and through partner networks in more than 30 countries, predominantly within the EU. The product portfolio encompasses all components of an IT system – from servers and client computers to network equipment and intelligent displays and have been developed to withstand heat, cold, moisture, vibration, shock, and other environmental impacts. MilDef is listed on Nasdaq Stockholm.
