

## Net Insight receives expansion order from EBU

7 March, 2008

### **Stockholm, Sweden – European Broadcasting Union has placed an expansion order for its Eurovision Nimbra network**

Net Insight has received a further order from the EBU (European Broadcasting Union) to upgrade and expand the Eurovision Nimbra network mainly for the TV feeds from the Olympic Games in Beijing. The order contains both an upgrade of the Eurovision backbone network with Net Insight's high capacity switch Nimbra 680 as well as more Nimbra One and Nimbra 340 access nodes. The upgrade is initially driven by large requirements from the major TV broadcasters in Europe to cover the Olympic Games in Beijing. The order will be delivered during the first quarter 2008.

"It is an honor to have been trusted for many years by Eurovision for the technology transporting feeds from major mission critical news and sport events around the world", says Fredrik Trägårdh, CEO of Net Insight.
