

Net Insight receives additional order from European telecom operator

30 November 2009

Stockholm, Sweden – Net Insight, a leading developer of efficient and scalable optical transport solutions for media, IP and broadcast networks, has received an add-on order of the Nimbra platform from a telecom operator in Europe.

The European telecom operator has an existing media network based on Net Insight's Nimbra platform to carry data and broadcast traffic between production sites and media centers. They are now deploying a capacity upgrade of their media network for the benefit of their customers in several European cities.

The Nimbra platform is a versatile transport solution with several unique features for Broadcast and media networks, offering a flexible and cost-effective solution for delivering rich media content.

"The telecom operator is upgrading the network to support an increasing amount of uncompressed video services, which is one of the Nimbra platform's many capabilities and we are pleased to receive a new add-on order for this", says Fredrik Trägårdh, CEO of Net Insight.
