

Net Insight receives order from South African Broadcaster

STOCKHOLM, Sweden - Net Insight, a leading developer of efficient and scalable transport solutions for media, IP and broadcast networks, today announces that one of South Africa's leading production and broadcast service companies has selected Net Insight's Nimbra platform for a new fibre-based contribution network.

Through the order from one of the leading production and broadcast service companies Net Insight expands into the South African market.

The new fibre-based network will deliver a high density of compressed services for contribution purposes. The Nimbra platform offers a seamless mix of compressed and uncompressed video and audio services, as well as Ethernet based services such as File-Transfer. Additionally, this new customer will leverage the Nimbra Vision, Net Insight's network management platform, to minimize the operational cost of services.

Net Insight's Nimbra multiservice platform with its proven global track record at broadcasters and service providers was a natural decision for one of Africa's leading broadcast service companies.
