

Net Insight wins expansion order for DTT network in Eastern Europe

STOCKHOLM, Sweden – Net Insight, a leading provider of efficient and scalable transport solutions for media, IP and broadcast networks, today announces that a national telecommunication operator in Eastern Europe has selected the Nimbra MSR platform for expansion of a nationwide Digital Terrestrial TV network.

With the network expansion, the DTT network will transport DVB-T, radio and IPTV distribution signals to more than 100 transmitter sites in all regions of the country. Now, also DVB-T2 distribution and contribution services between regions for local broadcasters will be included.

Net Insight supplies the Nimbra MSR platform including the JPEG2000 video compression solution for all formats providing highest video quality and with guaranteed quality of service. Nimbra Vision, the comprehensive network management tool enabling superior control of the operation of a Nimbra MSR network, will also be part of this deployment.

The contract was won in partnership with a premium partner in Eastern Europe.

The order value exceeds SEK 6 million and delivery will take place during Q2 and Q3 2013.

"This DTT network build-out in Eastern Europe is significant," says Fredrik Trägårdh, CEO of Net Insight. "Our Nimbra MSR solution is the leading DTT transport platform installed in more than 30 countries worldwide. One important feature in this network is our unique Time Transfer, making the network GPS independent and more secure."
