PRECISE BIOMETRICS RECEIVES ORDER WORTH SEK 9.9 MILLION

Precise Biometrics has received an order for hardware worth SEK 9.9 million. The order is an additional follow-up order from an existing customer in the Middle East. The delivery of the order is split between Q2 and Q3 2013.

The delivery consists of Precise Biometrics' 200-series readers, combined fingerprint and smart card readers that will be used in a current government ID card project together with the Precise Match-on-Card™ technology.

The government is an existing customer of Precise Biometrics since 2004, when the company delivered the first volume order of fingerprint readers. Since then, Precise Biometrics has supplied fingerprint readers on a regular basis.

Thomas Marschall, President and CEO of Precise Biometrics, says: "It is very satisfying to see that this customer is so pleased with our products that they keep returning. This order proves that our two business units, IAM and Mobile, both have strong market opportunities for future growth".

Precise Biometrics AB (publ) may be required to disclose the information provided herein pursuant to the Securities Markets Act. The information was submitted for publication at 8:00 am on July 5, 2013.
