TactivoTM follow-up order from US Department of Defense

Precise Biometrics has received an order of 1200 Tactivo from the Defense Logistics Agency (DLA) within the US Department of Defense. The value of the order is 1.1 million SEK and will impact second quarter revenues 2015 with the full amount.

DLA continues to invest in their mobility solution that provides secure e-mail and browsing capabilities on iOS devices. The solution is based on the existing Common Access Card (CAC) infrastructure and adds to the overall usability of the long standing smart card system. The order, which has been placed through Precise Biometrics' partner Carahsoft, includes Tactivo for iPhone and iPad devices.

"We are pleased to see that DLA are following up on their previous order from December. This shows their confidence and commitment to Tactivo for convenient and secure mobile access to information systems and resources. The solution increases employee flexibility and efficiency, while ensuring a high level of security by utilizing two-factor authentication", says Håkan Persson, CEO of Precise Biometrics.

About Tactivo

Tactivo is a product line of mobile smart card readers for iOS and Android devices that provides convenient and secure access to restricted resources from mobile devices. Tactivo brings true mobility to organizations using smart cards, such as CAC and Personal Identity Verification (PIV). The smart card readers can be used with a wide range of applications that enable many different use cases, such as secure browsing, e-mail, document signing and more.
