Change in the number of shares and votes in Starbreeze AB

In accordance with Starbreeze' articles of association, holders of series A-shares have the right to request that the shares be converted into series B-shares. The purpose of the conversion program is eventually to only have series B-shares issued. Such a conversion reduces the total number of votes in the company but does not affect owner's share in terms of capital. When such conversion has taken place, the company has an obligation according to law to publish information about any changes on a monthly basis.

During the current month, at the request of shareholder's, 41,000 shares of series A-shares have been converted into the same number of series B-shares. The total number of votes in Starbreeze then amounts to 2,821,155,499.

The total number of registered shares in the company after the conversion amounts to 1,476,762,040, of which 149,377,051 series A-shares and 1,327,384,989 series B-shares.
