Studsvik signs strategic agreements for dismantling of nuclear power plants in Germany with a total order value of SEK 135 million

Studsvik has been working in dismantling for about 20 years in Germany and nearby countries. The agreements now signed create the foundation for long-term business relations. The services will be evenly distributed over a three-year period.

Studsvik Decommissioning and Radiation Protection Services business area offers services in radiation protection, decommissioning, dismantling, decontamination, and engineering. Customers are nuclear power plants, research centers and other nuclear facilities in Germany, Switzerland, Belgium, and the Netherlands.

“The new agreements are strategically important and confirm our long experience combined with innovative solutions in dismantling. Studsvik will continue to deliver high customer value on the dismantling market in Germany and nearby countries,” says CEO Camilla Hoflund.
