☒ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2024

OR

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from: _____ to _____

Commission File No. 1-13219

Onity Group Inc.

(Exact name of registrant as specified in its charter)

Florida

(State or other jurisdiction of incorporation or organization)

1661 Worthington Road, Suite 100

West Palm Beach, Florida

(Address of principal executive office)

65-0039856

(I.R.S. Employer Identification No.)

33409

(Zip Code)

(561) 682-8000

(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common Stock, \$0.01 Par Value	ONIT	New York Stock Exchange

Securities registered pursuant to Section 12 (g) of the Act: Not applicable.

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act:

Large Accelerated filer	<input type="checkbox"/>	Accelerated filer	<input checked="" type="checkbox"/>
Non-accelerated filer	<input type="checkbox"/>	Smaller reporting company	<input checked="" type="checkbox"/>
		Emerging growth company	<input type="checkbox"/>

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act) Yes ☐ No ☒

Aggregate market value of the voting and non-voting common equity of the registrant held by non-affiliates as of June 30, 2024:
\$174,631,880

Number of shares of common stock outstanding as of February 14, 2025: 7,873,053 shares

Documents incorporated by reference: Portions of our definitive Proxy Statement with respect to our Annual Meeting of Shareholders, which will be filed with the Securities and Exchange Commission within 120 days after the end of our fiscal year ended December 31, 2024, are incorporated by reference into Part III, Items 10 - 14.

FORWARD-LOOKING STATEMENTS

This Annual Report contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. All statements, other than statements of historical fact included in this report, including statements regarding our financial position, business strategy and other plans and objectives for our future operations, are forward-looking statements.

Forward-looking statements may be identified by a reference to a future period or by the use of forward-looking terminology. Forward-looking statements are typically identified by words such as “expect”, “believe”, “foresee”, “anticipate”, “intend”, “estimate”, “goal”, “strategy”, “plan”, “target” and “project” or conditional verbs such as “will”, “may”, “should”, “could” or “would” or the negative of these terms, although not all forward-looking statements contain these words. Forward-looking statements by their nature address matters that are, to different degrees, uncertain. Readers should bear these factors in mind when considering forward-looking statements and should not place undue reliance on such statements. Forward-looking statements involve a number of assumptions, risks and uncertainties that could cause actual results to differ materially from those suggested by such statements. In the past, actual results have differed from those suggested by forward-looking statements and this may happen again. Important factors that could cause actual results to differ include, but are not limited to, the risks discussed under Part I, Item 1A, Risk Factors and the following:

- the potential for ongoing disruption in the financial markets and in commercial activity generally related to changes in monetary and fiscal policy, United States political developments, geopolitical events and other sources of instability;
- the impacts of inflation, employment disruption, and other financial difficulties facing our borrowers;
- the impact of the recent failures and re-organization of banking institutions and continued uncertainty in the banking industry;
- the timing for completion of our PHH Mortgage Corporation rebranding and its impact on our business and third parties’ perceptions of us;
- our ability to timely reduce operating costs or generate offsetting revenue in proportion to the industry-wide decrease in originations activity, and the impact of cost-reduction initiatives on our business, operations, and financial performance;
- our ability to maintain and increase market share in our target markets, including in forward and reverse servicing;
- breach or failure of Onity’s, our contractual counterparties’, or our vendors’ information technology or other security systems or privacy protections, including any failure to protect customers’ data, resulting in disruption to our operations, loss of income, reputational damage, costly litigation and regulatory penalties;
- our reliance on our technology vendors to adequately maintain and support our systems, including our servicing systems, loan originations and financial reporting systems, and uncertainty relating to our ability to transition to alternative vendors, if necessary, without incurring significant cost or disruption to our operations;
- our ability to interpret correctly and comply with current or future liquidity, net worth and other financial and other requirements of regulators, the Federal National Mortgage Association (Fannie Mae), and Federal Home Loan Mortgage Corporation (Freddie Mac) (together, the GSEs), and the Government National Mortgage Association (Ginnie Mae), as well as those set forth in our debt and other agreements;
- our ability to implement, in a timely and cost-effective manner, our planned response to Ginnie Mae’s risk-based capital requirements by the extended deadline granted to us by Ginnie Mae of October 1, 2025;
- the amount of common stock or senior debt that we may repurchase under any future stock or debt repurchase programs, the timing of such repurchases, and the long-term impact, if any, of repurchases on the trading price of our stock or our financial condition;
- our ability to repay, renew and extend our other borrowings, borrow additional amounts as and when required, meet our mortgage servicing rights (MSR) or other asset investment objectives and comply with our debt agreements, including the financial and other covenants contained in them;
- the extent to which our strategic transactions and enterprise sales initiatives will generate additional subservicing volume and result in increased profitability;
- uncertainty whether Rithm Capital Corp. (Rithm), one of our largest subservicing clients as of December 31, 2024, will renew its agreements with us that otherwise will terminate effective February 1, 2026;
- uncertainty related to the extent to which MSR Asset Vehicle LLC will exercise its rights to sell MSRs which are presently subserviced by PHH and the impact to our subservicing portfolio;
- our ability to identify, enter into and close additional strategic transactions, including the ability to obtain regulatory approvals, enter into definitive financing arrangements, and satisfy closing conditions, and the timing for doing so;
- our ability to efficiently integrate the operations and assets of acquired businesses and to retain their employees and customers over time;
- the adequacy of our financial resources, including our sources of liquidity and ability to sell, fund and recover servicing advances, forward and reverse whole loans, future draws on existing reverse loans, and Home Equity Conversion Mortgage (HECM) and forward loan buyouts and put-backs;

- uncertainty related to the ability of third party obligors and financing sources to fund servicing advances on a timely basis on loans serviced by us;
- increased servicing costs and reduced or delayed servicing income due to rising borrower delinquency levels , forbearance plans, moratoria on evictions and delays in foreclosure proceedings;
- the characteristics of our servicing portfolio, including prepayment speeds along with delinquency and advance rates;
- our ability to continue to collect certain expedited payment or convenience fees and potential liability for charging such fees;
- an increase in severe weather or natural disaster events resulting in costly disruptions to our operations and increased servicing costs due to property damage;
- our ability to successfully modify delinquent loans, manage foreclosures and maintain and sell foreclosed properties;
- adverse effects on our business related to past, present or future claims, litigation, cease and desist orders and investigations relating to our business practices, including those brought by private parties and state regulators, the Consumer Financial Protection Bureau (CFPB), State Attorneys General, the Securities and Exchange Commission (SEC), the Department of Justice or the Department of Housing and Urban Development (HUD);
- scrutiny of our compliance with COVID-19-related rules and regulations, including requirements instituted by state governments, the GSEs, Ginnie Mae and regulators;
- the reactions of key counterparties, including lenders, the GSEs and Ginnie Mae, to our regulatory engagements and litigation matters;
- any adverse developments in existing legal proceedings or the initiation of new legal proceedings;
- our ability to efficiently manage our regulatory and contractual compliance obligations and fully comply with all applicable requirements, and the costs of doing so;
- uncertainty related to changes in legislation, regulations, government programs and policies, industry initiatives, best servicing and lending practices, and media scrutiny of our business and industry;
- the extent to which changes in, or in the interpretation of, laws or regulations may require us to modify our business practices and expose us to increased expense, regulatory engagement and litigation risk, including with respect to the collection of expedited payment, or convenience, fees;
- our ability to comply with our servicing agreements, including our ability to comply with our agreements with the GSEs and Ginnie Mae and maintain our seller/servicer and other statuses with them;
- our servicer and credit ratings as well as other actions from various rating agencies, including the impact of prior or future downgrades of our servicer and credit ratings;
- uncertainty related to the actions of loan owners and guarantors, including mortgage-backed securities investors, the GSEs, Ginnie Mae and trustees regarding loan put-backs, penalties and legal actions;
- uncertainty related to the GSEs substantially curtailing or ceasing to purchase our conforming loan originations or the Federal Housing Administration (FHA) of the HUD, Department of Veterans Affairs (VA) or United States Department of Agriculture (USDA) ceasing to provide insurance;
- our ability to recruit and retain senior managers and key employees;
- increased compensation and benefits expense as a result of rising inflation and labor market trends;
- uncertainty related to our reserves, valuations, provisions and anticipated realization of assets;
- our ability to effectively manage our exposure to interest rate changes and foreign exchange fluctuations;
- our ability to effectively transform our operations in response to changing business needs, including our ability to do so without unanticipated adverse tax consequences;
- political or economic stability in the foreign countries in which we operate; and
- our ability to maintain positive relationships with our large shareholders and obtain their support for management proposals requiring shareholder approval.

Further information on the risks specific to our business is detailed within this report, including under “Risk Factors.” Forward-looking statements speak only as of the date they were made and we disclaim any obligation to update or revise forward-looking statements whether because of new information, future events or otherwise.

PART I

ITEM 1. BUSINESS

When we use the terms “Onity,” “ONIT,” “we,” “us” and “our,” we are referring to Onity Group Inc. and its consolidated subsidiaries.

OVERVIEW

We are a financial services company that services and originates both forward and reverse mortgage loans, through our primary brands, PHH Mortgage and Liberty Reverse Mortgage. In June 2024, we rebranded our company to Onity Group reflecting the progressive transformation of our business. We are a leader in the servicing industry that helps homeowners stay in their homes and improves financial outcomes for mortgage loan investors. This long-standing core competency continues to be a guiding principle as we seek to grow our business and improve our financial performance.

We are headquartered in West Palm Beach, Florida with offices and operations in the U.S., in the United States Virgin Islands (USVI), in India and the Philippines. At December 31, 2024, approximately 76% of our workforce was located outside the U.S. Onity Group Inc. is a Florida corporation organized in February 1988. With our predecessor companies, we have been servicing residential mortgage loans since 1988. We have been originating forward mortgage loans since 2012 and reverse mortgage loans since 2013. We currently provide solutions through our primary operating, wholly-owned subsidiary, PHH Mortgage Corporation (PHH), formerly referred to as PMC.

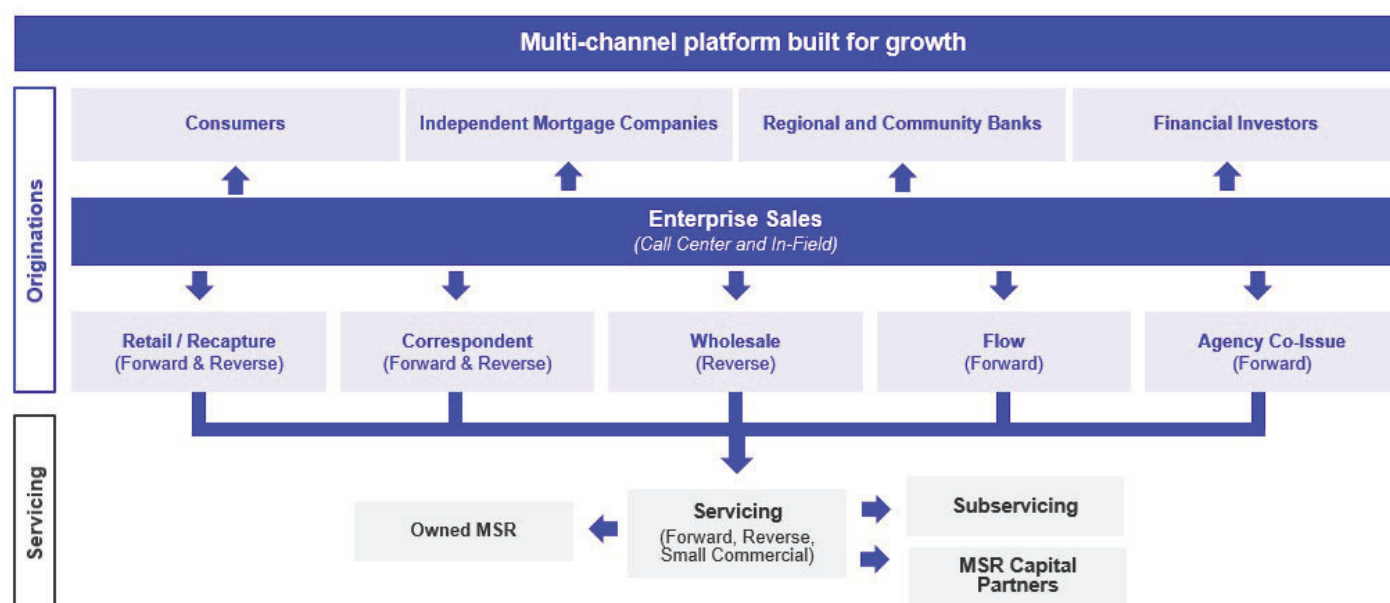

BUSINESS MODEL AND SEGMENTS

We seek to create value and maximize returns for shareholders through balance and diversification, prudent capital-light growth, industry-leading cost structure, top tier operating performance and capabilities, and dynamic asset management. Our core competencies revolve around our Servicing business with an Originations platform to replenish and pursue growth of our servicing portfolio.

Our Servicing business is comprised of two components, our owned mortgage servicing rights (MSR) servicing portfolio and our subservicing portfolio that complement each other when managing scale. We invest our capital to fund purchases and originations of our owned MSRs, for which we establish a targeted return on investment. Our net return includes servicing revenue net of servicing costs, less MSR portfolio runoff, and less MSR and advance funding cost. Our net return is impacted by fair value changes of our owned MSRs, net of hedging, that vary based on market conditions. Our subservicing portfolio generates a relatively stable source of revenue that enhances our returns. While subservicing fees are relatively lower than servicing fees, we do not incur any significant capital utilization or funding of advances and are not exposed to MSR fair value volatility. We target a balanced mix of our portfolio between servicing and subservicing based on capital allocation and returns. Our servicing operations and customer interactions do not differentiate whether loans are serviced or subserviced.

Our Originations business' strategy is to provide self-sustained replenishment opportunities to our servicing portfolio and profitable growth. Our Originations success is built on our relationships with borrowers, lenders and other market participants. We purchase MSRs through bulk portfolio purchases, through flow purchase agreements with our network of mortgage companies and financial institutions, and through participation in the Agency Cash Window (or Co-Issue) programs. In order to diversify our sources of servicing and reduce our reliance on others, we have been developing our origination of MSRs through different channels, including our portfolio recapture channel, retail, wholesale and correspondent lending.

The chart below summarizes our current business model:

We report our activities in three segments, Servicing, Originations and Corporate. Our business segments reflect the internal reporting that we use to evaluate operating performance of services and to assess the allocation of our resources. The financial information for our segments is presented in our financial statements in Note 24 — Business Segment Reporting and discussed in the individual business operations sections of Management’s Discussion and Analysis of Financial Condition and Results of Operations.

Servicing

Our Servicing business is primarily comprised of our residential forward mortgage servicing business that currently accounts for the majority of our total revenues, our reverse mortgage servicing business, and our small commercial mortgage servicing business. Our servicing clients include some of the largest financial institutions in the U.S., including the GSEs, Ginnie Mae and non-Agency residential mortgage-backed securities (RMBS) trusts, and other large MSR investors, including Rithm, MAV and MAM, an affiliate of Waterfall Asset Management, LLC (“Waterfall”).

As of December 31, 2024, our servicing and subservicing portfolio consisted of approximately 1.4 million loans with a unpaid principal balance (UPB) of \$301.7 billion.

Servicing involves the collection of principal and interest payments from borrowers, the administration of tax and insurance escrow accounts, the collection of insurance claims, the management of loans that are delinquent or in foreclosure or bankruptcy, including making servicing advances, evaluating loans for modification and other loss mitigation activities and, if necessary, foreclosure referrals and the sale of the underlying mortgaged property following foreclosure (REO) on behalf of mortgage loan investors or other servicers. Master servicing involves the collection of payments from servicers and the distribution of funds to investors in mortgage and asset-backed securities and whole loan packages. Reverse servicing includes additional functions such as the funding of borrowers under their approved borrowing capacity, the repurchase of loans and assignment to HUD upon reaching a limit (based on the maximum claim amount) and the securitization of tails under the Ginnie Mae program. We earn contractual monthly servicing fees (which are typically payable as a fixed percentage of UPB) pursuant to servicing agreements as well as other ancillary fees relating to our servicing activities such as late fees.

We own MSRs outright, where we typically receive all the servicing economics, and we subservice on behalf of other institutions that own the MSRs, in which case we typically earn a relatively smaller fee for performing the subservicing activities. Special servicing is a form of subservicing where we generally manage only delinquent loans on behalf of a loan owner. We typically earn subservicing and special servicing fees either as a percentage of UPB or on a per loan basis based on delinquency status. Our reverse owned servicing activities are mainly reflected in our financial statements with the gain on reverse loans held for investment and HMBS-related borrowings, net.

Servicing advances are an important component of our business and are amounts that we, as MSR owner, are required to advance to, or on behalf of, investors if we do not receive such amounts from borrowers. These amounts include principal and interest payments, property taxes and insurance premiums and amounts to maintain, repair and market real estate properties on behalf of our servicing clients. Most of our advances have the highest reimbursement priority, entitling us to repayment of the

advances from the loan or property liquidation proceeds before most other claims on these proceeds. Advances are contractually non-interest bearing. The costs incurred by servicers in meeting advancing obligations consist principally of the interest expense incurred in financing the advance receivables and the costs of arranging such financing. Under subservicing agreements, Onity is promptly reimbursed by the owners of the MSR who generally finance the advances and incur the associated financing cost.

Reducing delinquencies is important to our business because it enables us to recover advances and recognize additional ancillary income, such as late fees, which we do not recognize on delinquent loans until they are brought current. Performing loans also require less work and thus are generally less costly to service. While increasing borrower participation in loan modification programs is a critical component of our ability to reduce delinquencies, borrower compliance with those modifications is also an important factor.

Our servicing and subservicing portfolios naturally decrease over time as homeowners make regularly scheduled mortgage payments, prepay loans prior to maturity, refinance with a mortgage loan not serviced by us or involuntarily liquidate through foreclosure or other liquidation process. In addition, existing clients may determine to terminate their servicing and subservicing arrangements with us and transfer the servicing to others. Therefore, our ability to maintain or grow our servicing revenue or the size of our servicing and subservicing portfolios depends on our ability to acquire the right to service or subservice additional mortgage loans at a rate that exceeds portfolio runoff and any client terminations. Our Originations segment is focused on profitably replenishing and growing our servicing and subservicing portfolios.

Originations

The primary source of revenue in our Originations segment is gain on loan sales. We originate and purchase residential mortgage loans that we promptly sell or securitize on a servicing retained basis, thereby generating mortgage servicing rights. Our mortgage loans are conventional (conforming to the underwriting standards of the GSEs) and government-insured loans (insured by the FHA or VA) (collectively Agency loans). We generally package and sell promptly the loans in the secondary mortgage market, through GSE and Ginnie Mae guaranteed securitizations and whole loan transactions. We originate forward mortgage loans directly with customers (consumer direct channel) as well as through correspondent lending arrangements. We originate reverse mortgage loans in three channels, through our correspondent lending arrangements, broker relationships (wholesale) and retail channels. Per-loan gain on sale margins vary by channel, with correspondent typically being the lowest margin and retail the highest, commensurate with fulfillment costs. Further, margins are generally higher for reverse mortgages than forward mortgages.

In addition to our originated MSRs, we acquire MSRs through multiple channels, including flow purchase agreements, the Agency Cash Window co-issue programs and bulk MSR purchases. Our Originations business also includes the sourcing and acquisition of new subservicing clients.

In 2024, our Originations business generated total volume additions of \$85.6 billion in UPB (refer to Part II, Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations - Overview for further details).

Retail Lending. We originate forward and reverse mortgage loans directly with borrowers through our retail lending business. Our forward lending business benefits from our servicing portfolio by offering rate and term refinance options to qualified borrowers seeking to lower their mortgage payments and cash-out refinance options. Depending on borrower eligibility, we refinance eligible customers into conforming or government-insured products. We are focused on increasing recapture rates on our existing servicing portfolio to grow this business. We also originate retail reverse loans to non-Onity servicing customers.

Correspondent Lending. Our correspondent lending operation purchases forward and reverse mortgage loans that have been originated by a network of approved third-party lenders, under our lending and risk management programs. We employ an ongoing monitoring and renewal process for participating lenders that includes an evaluation of the performance of the loans they have sold to us. We perform pre- and post-funding review procedures to ensure that the loans we purchase conform to our requirements and to the requirements of the investors to whom we sell loans. We are focused on expanding our network of correspondent lenders and increased participation of our existing relationships.

Wholesale Lending. We originate reverse mortgage loans through a network of approved brokers. Brokers are subject to a formal approval and monitoring process. We underwrite all loans originated through this channel consistent with the underwriting standards required by the ultimate investor prior to funding.

MSR Purchases. We purchase MSRs through flow purchase agreements, the Agency Cash Window co-issue programs and bulk MSR purchases. The Agency Cash Window programs we participate in, and purchase MSRs from, allow mortgage companies and financial institutions to sell whole loans to the respective Agency and sell the MSR to the winning bidder servicing released. In addition, we partner with other originators to replenish our MSR through flow purchase agreements.

New Servicing and Subservicing Acquisitions. Our enterprise sales department strives to expand our network of servicing and subservicing clients and source new flow and co-issue or subservicing agreements. We compete as a low cost provider with our demonstrated expertise to service mortgage assets across borrowers of every credit level and our recapture capabilities.

REGULATION

Our business is subject to extensive regulation and supervision by federal, state, local and foreign governmental authorities, including the CFPB, HUD, the SEC and various state agencies that license our servicing and lending activities. Accordingly, we are regularly subject to examinations, inquiries and requests, including civil investigative demands and subpoenas. The GSEs, Ginnie Mae, the United States Treasury Department, various investors, non-Agency securitization trustees and others also subject us to periodic reviews and audits. See Item 1A. Risk Factors – Legal and Regulatory Risks for further information.

We have faced and expect to continue to face heightened regulatory scrutiny as well as stricter and more comprehensive regulation of the entire mortgage sector. We continue to work diligently to assess and understand the implications of the regulatory environment in which we operate and to meet the requirements of this constantly changing environment. In the normal course of business, we devote substantial resources to regulatory compliance, while, at the same time, striving to meet the needs and expectations of our customers, clients and other stakeholders. See Item 1A. Risk Factors – Legal and Regulatory Risks for further information.

We must comply with a large number of federal, state and local consumer protection and other laws and regulations, including, among others, the CARES Act, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act), the Telephone Consumer Protection Act (TCPA), the Gramm-Leach-Bliley Act, the Fair Debt Collection Practices Act (FDCPA), the Real Estate Settlement Procedures Act (RESPA), the Truth in Lending Act (TILA), the Servicemembers Civil Relief Act, the Homeowners Protection Act, the Home Mortgage Disclosure Act (HMDA), the Federal Trade Commission Act, the Fair Credit Reporting Act, the Equal Credit Opportunity Act, as well as individual state and local laws, and federal and local bankruptcy rules. These laws and regulations apply to all facets of our business, including, but not limited to, licensing, loan originations, consumer disclosures, default servicing and collections, foreclosure, filing of claims, registration of vacant or foreclosed properties, handling of escrow accounts, payment application, interest rate adjustments, assessment of fees, loss mitigation, use of credit reports, handling of unclaimed property, safeguarding of non-public personally identifiable information about our customers, and the ability of our employees to work remotely. These complex requirements can and do change as laws and regulations are enacted, promulgated, amended, interpreted and enforced. See Item 1A. Risk Factors – Legal and Regulatory Risks for further information.

In addition, a number of foreign laws and regulations apply to our operations outside of the U.S., including laws and regulations that govern licensing, privacy, employment, safety, payroll and other taxes and insurance and laws and regulations that govern the creation, continuation and the winding up of companies as well as the relationships between shareholders, our corporate entities, the public and the government in these countries. Our foreign subsidiaries are subject to inquiries and examinations from foreign governmental regulators in the countries in which we operate outside of the U.S.

Our licensed entities are required to renew their licenses, typically on an annual basis, and to do so they must satisfy the license renewal requirements of each jurisdiction, which generally include financial requirements such as providing audited financial statements and satisfying minimum net worth requirements and non-financial requirements such as satisfactory completion of examinations relating to the licensee's compliance with applicable laws and regulations. The minimum net worth requirements to which our licensed entities are subject are unique to each state and type of license. See Item 1A. Risk Factors – Legal and Regulatory Risks for further information.

The general trend among federal, state and local legislative bodies and regulatory agencies as well as state attorneys general has been toward increasing laws, regulations, investigative proceedings and enforcement actions with regard to residential real estate lenders and servicers, which could increase the possibility of adverse regulatory action against us. The CFPB continues to take a very active role in the mortgage industry, and its rule-making and regulatory agenda relating to loan servicing and origination continues to evolve. Individual states have also been active, as have other regulatory organizations such as the Multistate Mortgage Committee (MMC), a multistate coalition of various mortgage banking regulators. In addition to their traditional focus on licensing and examination matters, certain regulators make observations, recommendations or demands with respect to areas such as corporate governance, safety and soundness and risk and compliance management.

The CFPB and state regulators have also focused on the use and adequacy of technology in the mortgage servicing industry, privacy concerns and other topical issues, such as communications from debt collectors, the ability of borrowers to repay mortgage loans, or servicer responses to the COVID-19 pandemic. In March 2020, the CARES Act was signed into law, allowing borrowers affected by COVID-19 to request temporary loan forbearance for federally backed mortgage loans. In addition, multiple forbearance programs, moratoria of foreclosure and eviction and other requirements to assist borrowers enduring financial hardship due to COVID-19 were implemented by states, agencies and regulators. Further, the CFPB promulgated certain amendments to RESPA (Regulation X) that became effective on August 31, 2021 and that impose certain

additional COVID-19-related requirements with respect to loss mitigation, early intervention call requirements, and initiating new foreclosures.

COMPETITION

The financial services markets in which we operate are highly competitive and fragmented, and we do not expect that to change. We compete with large and small financial services companies, including bank and non-bank entities, in the forward and reverse servicing, lending and MSR transaction markets. Our competitors include large and regional banks, large non-bank servicers and mortgage originators, and real estate investment trusts. In both our servicing and originations businesses, new competitors continue to emerge, including companies that developed new technology around customer interactions and process automation.

In our Servicing business, we compete based on price, operating performance, service quality and customer and client satisfaction. Potential counterparties also (1) assess our regulatory compliance track record and examine our systems and processes for maintaining and demonstrating regulatory compliance, (2) consider our customer satisfaction rankings, and (3) consider our third-party servicer ratings. Certain of our competitors, especially large banks, may have substantially lower costs of capital and greater financial resources, which can create competitive challenges for us in certain situations. We believe that our competitive strengths flow from our ability to control and drive down delinquencies using proprietary processes, our superior operating performance, our lower cost to service, our deep know-how as a long-time operator of servicing loans and our long-standing and well-established Asia-Pacific (APAC) operations. Our operational expertise has been recognized by the Agencies. PHH received Fannie Mae's Servicer Total Achievement and Rewards (STARTM) performer recognition for the 2024 program year for the fourth consecutive year. In addition, PHH was recognized for servicing excellence through Freddie Mac's Servicer Honors and Rewards Program (SHARPSM) award in the top tier servicing group for the 2022 program year for the third consecutive year, and as subservicer for the 2024 program year for the second consecutive year. PHH also achieved HUD's Tier 1 servicer ranking for the 2024 program year, for the fourth consecutive year.

In our Originations business, we face intense competition in most areas, including rates, margins, fees, customer service and name recognition. Some of our competitors, including the larger banks, have substantially lower costs of capital and strong retail presence, which can create competitive challenges in certain situations. For example, if interest rates remain elevated, we expect to face continued competitive pressures as the refinance opportunities remain limited. We believe our competitive strengths flow from our existing client relationships and from our focus on providing strong customer service, our brand recognition, our long-standing and well-established APAC operations and use of technology.

THIRD-PARTY SERVICER RATINGS

Like other servicers, we are the subject of mortgage servicer ratings or rankings (collectively, ratings) issued and revised from time to time by rating agencies including Moody's Investors Service, Inc. (Moody's), S&P Global Ratings, Inc. (S&P) and Fitch Ratings, Inc. (Fitch). Favorable ratings from these agencies are important to the conduct of our loan servicing and lending businesses.

The following table summarizes our latest key servicer ratings:

	PHH		
	Moody's	S&P	Fitch
Forward			
Residential Prime Servicer	SQ3+	Above Average	RPS3+
Residential Subprime Servicer	SQ3+	Above Average	RPS3+

Ratings Outlook	—	Stable	—
Date of initial rating	—	October 11, 2024	—

In addition to servicer ratings, each of the agencies will from time to time assign an outlook (or a ratings watch such as Moody's review status) to the rating status of a mortgage servicer. A negative outlook is generally used to indicate that a rating "may be lowered," while a positive outlook is generally used to indicate a rating "may be raised."

On August 10, 2023, Moody's upgraded the ratings for residential prime, subprime, special servicer and second lien servicer quality (SQ) assessments from SQ3 to SQ3+, and affirmed the master servicer assessment at SQ3+. Moody's ratings reflects i) significant investment in technology, ii) improvement in loan boarding, iii) improvement in document management and iv) improvement in bank account reconciliation process.

On October 11, 2024, S&P affirmed the Above Average ratings and Stable outlook citing the company's experienced management and team, effective systems and technology, sound control framework and good servicing performance metrics, among other factors.

On February 13, 2024, Fitch affirmed PHH's residential servicer ratings and revised its outlook from Positive to Stable for Prime and Subprime products. The rating outlook remains Stable for the other products. The rating actions reflect PHH's comprehensive enterprise-wide internal control environment, extensive industry experience and highly-developed global loan servicing platform, competitive loan servicing performance metrics, and effective technology platform. The ratings also consider the financial condition of PHH's parent, Onity Group Inc.. The affirmed ratings and Stable outlook on PHH's residential servicer ratings are reflective of the company's continued business growth, diversified sourcing strategies and overall loan servicing performance.

On February 15, 2024, Fitch affirmed PHH's Master Servicer rating and Stable outlook, reflecting the company's effective enterprise-wide risk environment and compliance management framework, satisfactory loan servicing performance metrics, special servicing expertise, and efficient servicing technology. The ratings also consider the financial condition of PHH's parent, Onity Group Inc.

RITHM CAPITAL CORP. RELATIONSHIP

We service loans on behalf of Rithm under various agreements, including traditional subservicing agreements, where Rithm is the legal owner of the MSR, and in connection with legacy MSR transfers, referred to as Rights to MSR (RMSR), where Onity retains legal title to the underlying MSR but Rithm has generally assumed risks and rewards consistent with an MSR owner. See Note 8 — Other Financing Liabilities, at Fair Value.

Rithm is one of our largest servicing clients, accounting for \$41.2 billion of UPB or 14% of the UPB of our total servicing and subservicing portfolio, and approximately 63% of all delinquent loans that Onity serviced as of December 31, 2024. In addition to a base servicing fee, we also receive some ancillary income and certain incentive fees or pay penalties tied to various contractual performance metrics. Rithm receives all float earnings and deferred servicing fees related to delinquent borrower payments, as well as certain REO-related income, including REO referral commissions. As legal MSR owner, or in compliance with the Rights to MSR agreement, Rithm is responsible for financing all servicing advance obligations in connection with the loans underlying the MSR.

In November 2024, Onity and Rithm agreed to extend the Rights to MSR and subservicing agreements through February 1, 2026, with subsequent, automatic one-year renewals if notice of termination is not provided by July 1, 2025 by Onity or November 1, 2025 by Rithm. In connection with the renewals, the parties made changes to certain economic terms of the agreements including a reduction to Onity's subservicing fees.

The underlying loans are almost exclusively non-Agency loans, involving a higher level of operational and regulatory risk, and requiring substantial direct and oversight staffing relative to Agency loans. Because of the relative size of the servicing agreements with Rithm, if Rithm exercises its right to terminate the subservicing agreements, we might need to right-size certain aspects of our servicing business as well as the related corporate support functions, and we may need to adjust our daily liquidity management due to the reduction of servicing float balances associated with the Rithm servicing agreements.

OAKTREE AND MAV RELATIONSHIP

We established a strategic alliance with Oaktree in 2020 that we amended in November 2024. The Oaktree relationship included the launch of an MSR investment vehicle (referred to as MAV as the operating company or MAV Canopy as MAV's parent entity) to scale up our servicing business in a capital efficient manner. Oaktree also invested in our debt and equity with certain warrants on our common stock. Oaktree and MAV are deemed related parties to Onity.

MAV Investment and Subservicing

On December 21, 2020, Onity and Oaktree formed a joint venture MAV Canopy for the purpose of investing in GSE MSR exclusively subserviced by PHH, with Oaktree and Onity holding 85% and 15% interests, respectively, and initially agreeing to invest equity up to \$250.0 million over three years. In 2021, PHH entered into a number of agreements with MAV,

the licensed mortgage subsidiary of MAV Canopy, including a Subservicing Agreement, Joint Marketing Agreement and Recapture Agreement.

On November 27, 2024, Onity sold to Oaktree its 15% equity interest in MAV Canopy. Through the date of sale of our ownership interest, we accounted for our 15% investment in MAV Canopy under the equity method.

Upon the sale of our 15% interest in MAV Canopy in November 2024, PHH and MAV amended the Subservicing Agreement to provide that PHH will be the exclusive servicer for an initial term of five years through November 2029 subject to certain extensions of all MSR's that MAV currently owns, for all future MSR's that MAV acquires from PHH, and for the majority of MAV's MSR portfolio overall, as defined. In addition, the parties agreed to a six-month lockout during which MAV shall not sell or otherwise transfer any MSR's owned by MAV at the MAV Canopy sale date without the prior consent of PHH. Following this initial six-month period, the lockout restriction is subject to reduction in 25% increments through September 30, 2027. MAV may freely sell or transfer any MSR's thereafter. As of December 31, 2024, PHH subserviced a total \$41.2 billion UPB on behalf of MAV under the Subservicing Agreement, of which \$21.5 billion of MSR's were previously sold by PHH to MAV and do not qualify for sale accounting.

Financial Interests

In 2021, we issued to Oaktree in a private placement \$285.0 million of Onity senior secured notes due 2027 in two separate tranches. In addition, in conjunction with the senior secured note issuances:

- On March 4, 2021, we issued 1,184,768 warrants to Oaktree to purchase shares of our common stock at an exercise price of \$26.82 per share, subject to anti-dilution adjustments. The warrants may be exercised at any time through March 4, 2027.
- On May 3, 2021, we issued 261,248 warrants to Oaktree to purchase additional common stock at an exercise price of \$24.31 per share, subject to anti-dilution adjustments. The warrants may be exercised at any time through May 3, 2025. See Note 28 - Subsequent Events for a description of the warrant exercise by Oaktree in February 2025.
- On May 3, 2021, we issued to Oaktree 426,705 shares at a purchase price of \$23.15 per share.

In November 2024, we prepaid Oaktree the \$285.0 million senior secured notes due 2027 in connection with our corporate debt refinancing and our sale of MAV Canopy that generated \$50.0 million cash proceeds. Oaktree was allocated \$50.0 million principal amount of the new corporate debt issued in such refinancing.

See Note 12 — Investment in Equity Method Investee and Related Party Transactions, Note 14 — Borrowings and Note 17 — Stockholders' Equity to the Consolidated Financial Statements for additional information.

HUMAN CAPITAL RESOURCES

We believe the success of our organization is highly dependent on the quality and engagement of our human capital resources. Our workforce is dedicated to creating positive outcomes for homeowners, communities and investors through caring service and innovative solutions. We strive to develop a working environment and culture that fosters our company values:

- *Integrity*: Do What's Right – Always
- *Service Excellence*: Consistently Delivering on Our Commitments
- *People*: Develop, Grow and Value All Employees
- *Teamwork*: Succeed Together as a Global Team
- *Embracing Change*: Value Innovation and New Thinking

We had a total of approximately 4,300 employees at December 31, 2024. Approximately 1,000 of our employees were employed in the U.S. and USVI, and approximately 3,300 of our employees were employed in our operations in India and the Philippines.

Our Board of Directors and executive leadership team places significant focus on our human capital resources through fostering and measuring employee engagement and committing to a comprehensive equal opportunity merit-based organization, free of unlawful discrimination, where all employees regardless of background, sex, race or other protected characteristic are encouraged and supported in contributing to our business objectives. To support this non-discriminatory culture of equal opportunity we engage with both internal and external groups and organizations to ensure that our culture enables employees to consistently demonstrate our company values.

Our company culture drives success for all our stakeholders, from employees and clients to homeowners, investors, and the communities we serve. The results achieved through our equal opportunity programs have been central to building that culture, which promotes integrity, respect, and teamwork. We are committed to these programs as equal opportunity is essential to our innovation and employee engagement and aids in the retention of key talent. We review all our programs and practices to ensure they remain competitive, compliant, non-discriminatory and promote opportunity and fairness based on merit.

Our affinity groups are open to everyone, and when coupled with a culture of appreciation, help provide a comprehensive ecosystem for all our employees to flourish in within our merit-based pay for performance culture.

Pay equity as viewed through a merit-based lens is a key component of Onity's employment value proposition and regulatory compliance. We regularly evaluate our performance management, merit increase incentive award and promotion processes to ensure that all employees, regardless of race, gender, and other protected characteristics, are evaluated objectively based on their performance.

Talent Development. We continue to foster an environment in which every team member has the opportunity to gain experience and achieve his or her professional goals, with support and encouragement. We regularly measure employee engagement – our employees' pride, energy and optimism that fuels their effort – and implement action plans that respond to employee feedback. Our most recent employee survey indicated strong engagement levels of 85% favorable. Our training platform focuses not only on the technical domain skills essential to role success but includes competency-based programs to develop leadership capabilities and skills needed for the future. Succession planning occurs annually and is reviewed by the CEO and the Compensation and Human Capital Committee. Strategic talent reviews to identify, develop and promote top talent are part of our performance management processes.

Rewards. Our total rewards (compensation and benefits) programs are developed to attract, motivate, and retain employees. They demonstrate the value the employee provides to the organization, are designed to be competitive to the marketplace, and connect directly to key business strategies. Our compensation programs, including salaries and short- and long-term incentives, are centered on our pay-for-performance philosophy, aligning the interests of employees and stakeholders by rewarding both individual and overall company performance. Onity's health and welfare benefit programs strive to keep employees productive and engaged at work by serving the total well-being of employees and their families. We are committed to and regularly evaluate our practices to ensure pay is fair in accordance with applicable law, and competitive to the marketplace.

Environmental, Social and Corporate Governance (ESG) Practices and Corporate Sustainability

Our Board of Directors and our management are committed to ensuring Onity has responsible practices to address the needs of its customers, employees, and the communities it serves. Our approach is represented by the following policies and programs:

Policy on non-discrimination. Onity's non-discrimination policy provides equal employment opportunities for all qualified individuals without discrimination based upon legally protected characteristics in accordance with applicable law. Underlying this policy is Onity's culture and values, including employees' rights to be free from unlawful discrimination, and its commitment to providing a safe, secure, and productive work environment.

Onity's hiring, salary administration, promotion and transfer policies are based solely on job requirements, job performance and job-related criteria. In addition, every effort is made to ensure that Onity's personnel policies and practices (including those relating to compensation, benefits, transfer, retention, termination, training, and self-development opportunities, as well as social and recreational programs) are administered without discrimination on the basis of any legally protected characteristic.

Promoting equal opportunity. Onity remains committed to fostering a non-discriminatory equal opportunity environment where equal opportunity in all areas of employment selection, compensation, training, and promotion are provided. Company policies prohibit discrimination of any form in all of the locations in which Onity operates. Onity strives to foster an environment in which people of all backgrounds can participate and contribute to the success of the organization's enterprise, taking full advantage of the collective sum of individual differences, life experiences, inventiveness, self-expression and unique capabilities, knowledge and talent.

Onity relies on employee-led resource groups to help support employee development and foster our culture of equal opportunity. More than half of our workforce are members of these groups, which collectively hosted more than 30 employee events globally.

Commitment to Ethics. We have adopted a robust Code of Business Conduct and Ethics that applies to all employees and our Board of Directors, as well as an additional Code of Ethics for Senior Financial Officers that applies to our Chief Executive Officer, Chief Financial Officer, and Chief Accounting Officer. We provide multiple anonymous methods for any employee or other person to report a suspected ethical violation, including whistleblower complaints relating to accounting, internal controls, audit matters or securities law, and our policies prohibit retaliation against any person for making a good faith complaint. We also provide methods for interested individuals to contact the members of our Board of Directors and communicate directly with the Chair of our Audit Committee. Our General Counsel serves as our Chief Ethics Officer and collaborates with members of our Internal Audit function to ensure every ethics complaint and communication to our Board is addressed in accordance with our company policies.

Benefits. Onity's benefits programs strive to keep employees productive and engaged at work by serving the total well-being of employees' and their families' physical, mental, and financial health. In the U.S., our comprehensive benefits plan includes company-sponsored medical, dental and vision; company-paid basic life, accident, and disability coverage; 401(k) with company match; and supplemental group coverage for critical illness, accident, auto, home, pet, legal, identity protection, childcare/eldercare and tutoring. The medical plans include 100% coverage for all preventive care services and all generic preventive medications.

Our wellness programs offer incentives for completing preventive health screenings, participating in online and telephonic health coaching, improving, or reaching targeted health scores, and increasing physical activity. Additionally, we provide employees with a comprehensive employee assistance program that includes virtual counseling, personalized health coaching for diabetes and other chronic conditions, stress management and financial planning workshops, online guided meditation, and yoga, and more. Onity also provides a generous paid time off (PTO) program to support employees' need to rest and recharge. Our medical and family leave programs offer paid disability absences and paid parental/adoption leave, in addition to FMLA-required schedule flexibility and job security. Outside the U.S., our employee benefit programs provide comparable, and market appropriate benefits focused on supporting our employee's well-being and retirement needs.

Training and development. Onity is committed to providing our employees with high-quality training and learning experiences targeted to increase industry knowledge levels, improve process efficiency, and promote personal growth, which in turn helps improve customer experience, reduce foreclosures, and contribute to our success as an organization. Onity facilitates professional development through the lifecycle of employees through functional business training, regulatory and compliance training, and skill and competency development programs. We also provide individualized one-on-one coaching to help customer-facing staff guide customers to positive experiences. In addition to learning programs designed to build functional and leadership competency for all levels of leadership throughout the organization, Onity offers a Leadership Development Training curriculum specifically designed to prepare employees at the Supervisor level and above with the competencies to make them successful in their roles as leaders. Training courses are housed in our continuously reviewed and updated learning management system.

Our training and development programs are important contributors to our ability to deliver industry-leading customer service. Over the past few years, PHH has been recognized for servicing excellence through Freddie Mac's SHARPSM and Fannie Mae's STARTM awards and HUD's ranking.

Community development. At Onity, we believe homeownership is an important part of achieving financial independence, and our philosophy in this regard is "helping homeowners is what we do." This philosophy is what guides us in our commitment to the communities we serve. We organize a variety of community outreach programs and events with local and national organizations around the country to assist homeowners, particularly in communities of color. Our outreach events began during the 2008 mortgage crisis and have continued since then. In 2024, we hosted 42 borrower outreach events across 32 states in partnership with nine HUD certified housing counseling agencies. In addition, Onity partners with several local municipalities around vacant and abandoned properties to mitigate blight in communities.

To better serve our stakeholders and communities, Onity created a Community Advisory Council in 2014, consisting of 15 leaders from a diverse group of national non-profit organizations, consumer advocacy groups and civil rights organizations, as a platform to collaborate and share ideas on how to help homeowners. Onity provides grants and sponsorship funding to local and national nonprofit organizations each year, in support of the work they do to help distressed communities and homeowners. Since the COVID pandemic, Onity has contributed nearly \$7 million to these organizations, and more than \$28 million since 2012.

Charitable activity. Onity continues to find meaningful ways to give back to the communities where we live and work. The charitable events at our office locations around the globe in 2024 included raising funds for autism and cancer research, supporting local food banks through food drives and volunteering, helping economically disadvantaged children and the elderly, donating supplies to schools for vision-impaired children, holding toy drives and back-to-school supply drives, making donations to first responders and military veterans, hosting blood drives through the American Red Cross and OneBlood and making donations to the Mortgage Bankers Association's (MBA) Opens Doors Foundation to help families with a critically ill or injured child.

Responsible information security management. Onity maintains a comprehensive information security program designed to safeguard the confidentiality, integrity and availability of its data and information systems. Onity's Board of Directors is periodically updated on information security risks, which are managed through a strategic blend of policies, advanced tools and technologies, and continuous staff awareness initiatives. Onity's cybersecurity controls are structured around a multi-layered defense-in-depth strategy designed to protect the integrity of the network against potential breaches.

Our workforce undergoes regular training designed to enhance their ability to recognize, avert, and report cybersecurity risks and incidents. In parallel, Onity's third-party risk management program assesses and supervises the information security

practices of our vendors. For example, we require certain third-party vendors who handle data processing activities on our behalf to maintain a formal information security program that meets our security standards for such vendors.

Onity's readiness for and responsiveness to cyber threats are periodically evaluated through various assessments. These include both internal and external vulnerability assessments, penetration testing, incident response table-top exercises, and breach readiness and response drills. For more detailed information regarding Onity's approach to information security risk management, see "Item 1. Business - Risk Management."

Environmental Impact. In 2024, Onity continued its commitment to operate through a primarily remote working model, reducing the percentage of employees commuting daily to the office. Fewer associates in the offices afforded the opportunity to reduce our office footprint in several markets. As office space footprints were reduced, improvements were made to retrofit lighting and equipment to lower our use of natural resources. Recycling of office and paper products in all U.S. facilities continues to be a priority, which reduces our imprint on the local landfills. In addition, we continue to reduce paper mailings to customers through our digital mailing service, electronic notice delivery and process automations.

RISK MANAGEMENT

Our risk management framework seeks to mitigate risk and appropriately balance risk and return. We have established policies and procedures intended to identify, assess, monitor and manage the types of risk to which we are subject, including strategic, market, credit, liquidity and operational risks.

Our Chief Risk and Compliance Officer is responsible for the design, implementation and oversight of our global risk management and compliance programs. Risks unique to our businesses are governed through various management processes and governance committees to oversee risk and related control activities across our company and provide a framework for potential issues to be identified, assessed and remediated under the direction of senior executives from our business, finance, risk, compliance, internal audit and law departments, as applicable. Information is aggregated and reports on risk matters are made to the Board of Directors, its Risk and Compliance Committee or its other committees, as applicable, to enable the Board of Directors and its committees to fulfill their governance and oversight responsibilities.

Strategic Risk

We are exposed to risk with respect to the strategic initiatives we have taken to return to sustainable growth and profitability. Strategic risk represents the risk to shareholder or enterprise value, current or future earnings, capital and liquidity from adverse business decisions and/or improper implementation of business strategies. Management is responsible for developing and implementing business strategies that leverage our core competencies and are appropriately structured, resourced and executed. Oversight for our strategic actions is provided by the Board of Directors. Our performance, relative to our business plans and our longer-term strategic plans, is reviewed by senior management and the Board of Directors.

To achieve our near-term financial objectives, we believe we need to execute on our business strategy discussed under "Item 7. Management Discussion and Analysis-Overview-Business Strategy". Our ability to achieve our objectives is highly dependent on the success of our business relationships with our critical counterparties like the GSEs, FHFA, Ginnie Mae, our lenders, regulators, significant customers and our ability to attract new customers, all of which are impacted by our capability to adequately address the competitive challenges we face.

Market Risk

See Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

Liquidity Risk

We are exposed to liquidity risk through our ongoing needs to: originate, purchase, repurchase and finance mortgage loans; sell mortgage loans into secondary markets; retain, acquire, finance and hedge MSR, make and finance advances; fund and sell additional future draws by borrowers under variable rate HECM loans; meet our HMBS issuer obligations with respect to MCA repurchases; repay maturing debt; meet our contractual obligations; and otherwise fund our operations. Liquidity is an essential component of our ability to operate and grow our business; therefore, it is crucial that we maintain adequate levels of excess liquidity to fund our businesses during normal economic cycles and events of market stress.

We estimate how our liquidity needs may be impacted by a number of factors, including fluctuations in asset and liability levels due to our business strategy, asset valuations, changes in cash flows from operations, levels of interest rates, debt service requirements including contractual amortization, margin calls and maturities, and unanticipated events, including legal and regulatory expenses. We also assess market conditions and capacity for debt issuance in the various markets that we access to fund our business needs. We have established internal processes to anticipate future cash needs and continuously monitor the availability of funds pursuant to our existing debt arrangements. We monitor MSR asset valuations and communicate closely with our lenders for this asset class to ensure adequate liquidity is maintained for mark-to-market valuation changes within

MSR financing facilities. We manage this risk in multiple ways, including but not limited to engaging in MSR hedging activities, and maintaining liquidity earmarks at levels to support potential changes in MSR fair values.

We regularly evaluate capital structure options that we believe will most effectively provide the necessary capacity to support our investment objectives, address upcoming debt maturities and contractual amortization, and accommodate our business needs. Our objective is to maximize the total investment capacity through diversification of our funding sources while optimizing cost, advance rates and terms.

In general, we finance our business operations through a variety of activities - cash on hand, operating cash flow, strategic investor relationships and both committed and non-committed asset-based lending facilities for our significant MSR, mortgage warehouse and servicing advance activities. We address liquidity risk by actively managing our sources and uses of funds and maintaining contingency funding capacities, including but not limited to undrawn excess borrowing capacity on credit lines beyond our expected needs and by extending the tenor of our financing arrangements from time to time. Management closely monitors growth, and can adjust originations pricing quickly to manage its liquidity profile as needed. We have typically amended sizing on existing facilities or entered into new secured facilities in anticipation of our changing liquidity needs.

Operational Risk

Operational risk is inherent in each of our business lines and related support activities. This risk can manifest itself in various ways, including process execution errors, clerical or technological failures or errors, business interruptions and frauds, all of which could cause us to incur losses. Operational risk includes the following key risks:

- legal risk, as we can have legal disputes with borrowers or counterparties;
- compliance risk, as we are subject to many federal and state rules and regulations;
- third-party risk, as we have many processes that have been outsourced to third parties;
- information technology risk, as we operate many information systems that depend on proper functioning of hardware and software;
- information security risk, as our information systems and associates handle personal financial data of borrowers, and
- business continuity risk, as natural disasters, pandemics, extreme weather, and other unexpected events can cause disruption to our operations.

The Board of Directors provides direction to senior executives by setting our organization's risk appetite, and delegates to our Chief Executive Officer and senior executives the primary ownership and responsibility for operational risk management and control. Senior executives in our risk department oversee the establishment of policies and control frameworks that are designed, executed and administered to provide a sound and well-controlled operational environment in accordance with our risk appetite framework. We mandate training for our employees in respect to these policies, require business line change management control oversight, and we conduct targeted control assessment/reviews on a regular basis. Risk issues identified are tracked in our Governance, Risk and Compliance (GRC) system. Remediation and assurance testing are also tracked in our GRC system. We also have several channels for employees to report operational and/or technological issues affecting their operations to management, the operational risk or compliance teams or the Board.

We seek to embed a culture of compliance and business line responsibility for managing operational and compliance risks in our enterprise-wide approach toward risk management. Onity has adopted a "Three Lines of Defense" model to enable risks and controls to be properly managed on an on-going basis. The model delineates business line management's accountabilities and responsibilities over risk management and the control environment and includes mechanisms to assess the effectiveness of executing these responsibilities.

The first line of defense consists of business line management, dedicated control directors and quality assurance personnel who are accountable and responsible for their day-to-day activities, processes and controls. The first line of defense is responsible for ensuring that key risks within their activities and operations are identified, assessed, mitigated and monitored by an appropriate control environment that is commensurate with the operations risk profile.

The second line of defense is independent from the business and comprises a Risk Management function (including Third-Party Risk and Information Security) and a Compliance function, which are responsible for:

- providing assurance, oversight, and credible challenge over the effectiveness of the risk and control activities conducted by the first line;
- establishing frameworks to identify and measure the risks being taken by different parts of the business;
- monitoring risk levels, through key indicators and oversight/assurance and testing programs; and
- providing periodic reporting to senior management and the Board of Directors for transparency.

The third line of defense, Internal Audit, provides independent assurance as to the effectiveness of the design, implementation and embedding of the risk management frameworks, as well as the management of the risks and controls by the

first line and control oversight by the second line. The Internal Audit function provides periodic reporting on its activities to senior management and the Board of Directors for transparency.

All business units and overhead functions are subject to unrestricted audits by our internal audit department. Internal audit is granted unrestricted access to our records, physical properties, systems, management and employees in order to perform these audits. The internal audit department reports to the Audit Committee of the Board and assists the Audit Committee in fulfilling its governance and oversight responsibility.

Compliance risk is managed through an enterprise-wide compliance risk management program designed to monitor, detect and deter compliance issues. Our compliance and risk management policies assign primary responsibility and accountability for the management of compliance risk in the lines of business to business line management.

Information Security Risk oversight is performed by our Chief Information Security Officer who reports to the Chief Administrative Officer. Onity's information security plans are developed to meet or exceed Federal Financial Institutions Examination Council standards. See Item 1 C. "Cybersecurity" below.

Credit Risk

Consumer Credit Risk

The typical obligor credit-related risks inherent in maintaining a mortgage loan portfolio as an investment tend to impact us less than a typical long-term investor because we generally sell the mortgage loans that we originate in the secondary market shortly after origination through GSE and Ginnie Mae guaranteed securitizations and whole loan transactions. We are exposed to early payment defaults from the time that we originate a loan to the time that the loan is sold in the secondary market or shortly thereafter. Early payment defaults are monitored and loans are audited by our quality assurance teams for origination defects. Our exposure to early payment defaults remains very limited and we do not anticipate material losses from this exposure.

Servicing costs are generally higher on higher credit risk loans. In addition, higher credit risk loans are generally affected to a greater extent by an economic downturn or a deterioration of the housing market. An increase in delinquencies and foreclosure rates generally results in increased advances for delinquent principal and interest, taxes and insurance, foreclosure costs and the upkeep of vacant property in foreclosure. Interest expense on advances and higher operating expenses decrease the value of our servicing portfolio. We track the credit risk profile of our servicing portfolio, including the recoverability of advances, with a view to ensuring that changes in portfolio credit risk are identified on a timely basis.

We have loan repurchase and indemnification obligations arising from potential breaches of the representation and warranty provisions in connection with loans we sell in the secondary market. In the event of a breach of these representations and warranties, we may be required to repurchase a mortgage loan or indemnify the purchaser, and we may bear any subsequent loss on the mortgage loan.

We endeavor to minimize our losses from loan repurchases and indemnifications by focusing on originating or purchasing fully compliant mortgage loans and closely monitoring investor and agency eligibility requirements for loan sales. Our quality assurance teams perform independent testing related to the processing and underwriting of mortgage loans to investor guidelines prior to closing, as well as after the closing but before the sale of loans, to identify potential repurchase exposures due to breach of representations and warranties. In addition, we perform a comprehensive review of the loan files where we receive investor requests for repurchase and indemnification to establish the validity of the claims and determine our obligation. In limited circumstances, we may retain the full risk of loss on loans sold to the extent that the liquidation value of the asset collateralizing the loan is insufficient to cover the loan itself and associated servicing expenses. In instances where we have purchased loans from third parties, we usually have the ability to recover the loss from the third-party originator.

Counterparty Credit Risk

Counterparty credit risk represents the potential loss that may occur because a party to a transaction fails to perform according to the terms of the contract. We regularly evaluate the financial position and creditworthiness of our counterparties and disperse risk among multiple counterparties to the extent possible. We manage derivative counterparty credit risk by entering into financial instrument transactions through national exchanges, primary dealers or approved counterparties and using mutual margining agreements whenever possible to limit potential exposure.

Rithm is contractually obligated, pursuant to our agreements with them related to the Rights to MSRs, to make all advances required in connection with the loans underlying such MSRs. If Rithm's advance financing facilities do not perform as envisaged or should Rithm otherwise be unable to meet its advance financing obligations, we would be required to meet our advance financing obligations with respect to the loans underlying these Rights to MSRs, which could materially and adversely affect our liquidity, financial condition and servicing operations. Due to its concentration in our portfolio, we monitor Rithm's payment performance, liquidity and capital on a regular basis.

Counterparty credit risk exists with our third-party originators, including our correspondent lenders, from whom we purchase originated mortgage loans. The third-party originators make certain representations and warranties to us when we acquire the mortgage loan from them, and they agree to reimburse us for losses incurred due to an origination defect. We become exposed to losses for origination defects if the third-party originator is not able to reimburse us for losses incurred for indemnification or repurchase. We mitigate this risk by monitoring purchase levels from our third-party originators (to reduce concentration risk), by performing regular quality control reviews of the third-party originators' underwriting standards and by regular reviews of the creditworthiness of third-party originators.

Concentration Risk

We strive to develop a diversified and balanced business to mitigate any concentration risk in our segments and operations (also refer to discussion of our financing sources).

Client concentration - Rithm is one of our largest servicing clients, accounting for \$41.2 billion of UPB or 14% of the UPB of our total servicing and subservicing portfolio, and approximately 63% of all delinquent loans that Onity serviced as of December 31, 2024. Our servicing agreements with Rithm provide for automatic one-year renewals, unless Onity or Rithm provide advance notice of termination. In November 2024, Onity and Rithm agreed to extend the Rights to MSRs and subservicing agreements through February 1, 2026, with subsequent, automatic one-year renewals if notice of termination is not provided by July 1, 2025 by Onity or November 1, 2025 by Rithm. If Rithm exercises its right to terminate the subservicing agreements for convenience or for cause at any time, we might need to right-size certain aspects of our servicing business as well as the related corporate support functions, and we may need to adjust our daily liquidity management due to the reduction of servicing float balances associated with the Rithm agreements.

Market conditions, including interest rates and future economic projections, could impact investor demand to hold MSRs, which may result in our loss of subservicing relationships (including MAV, MSR capital partners and others), or significantly decrease the number of loans under such relationships.

Geographic concentration - The mortgaged properties securing the residential loans that we service are geographically dispersed throughout all 50 states, the District of Columbia and two U.S. territories. The five largest concentrations of properties are located in California, Texas, Florida, New Jersey and New York, comprising 39% of the number of loans serviced underlying our MSRs at December 31, 2024. California has the largest concentration with 15% of the total loans serviced.

AVAILABLE INFORMATION

Our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and all amendments to those reports are made available free of charge through our website (www.onitygroup.com) as soon as reasonably practicable after such material is electronically filed with or furnished to the SEC. The SEC maintains an Internet site that contains reports, proxy and information statements and other information regarding issuers, including Onity, that file electronically with the SEC. The address of that site is www.sec.gov. We have also posted on our website, and have available in print upon request (1) the charters for our Audit Committee, Compensation and Human Capital Committee, Nomination/Governance Committee and Risk and Compliance Committee, (2) our Corporate Governance Guidelines, (3) our Code of Business Conduct and Ethics and (4) our Code of Ethics for Senior Financial Officers. These documents may be found at <http://www.onitygroup.com> in the Shareholder Relations section. We also post information such as quarterly earnings presentations, press releases, and other information that may be important to investors on our website. However, the information located on, or accessible from, our website, is not, and should not be deemed to be, part of this report or incorporated into any other filing that we submit to the Securities and Exchange Commission.

ITEM 1A. RISK FACTORS

An investment in our common stock involves significant risk. We describe below material risks that management believes affect or could affect us. Understanding these risks is important to understanding any statement in this Annual Report and to evaluating an investment in our common stock. You should carefully read and consider the risks and uncertainties described below together with all the other information included or incorporated by reference in this Annual Report before you make any decision regarding an investment in our common stock. If any of the following risks actually occur, our business, financial condition, liquidity and results of operations could be materially and adversely affected. If this were to happen, the value of our

common stock could significantly decline, and you could lose some or all of your investment. While the following discussion provides a description of material risks that could cause our results to vary materially from those expressed in public statements or documents, other factors besides those discussed within this Annual Report or elsewhere in other of our reports filed with or furnished to the SEC could also affect our business, financial condition, liquidity and results of operations.

Summary of Risk Factors

As a non-bank mortgage company, we are exposed in the normal course of business to multiple risks shared by other participants in our industry. In addition, some of the risks we face are unique to Onity or such risks could have a different or greater impact on Onity than on other companies. These risks could adversely impact our business, regulatory or agency approval, financial condition, liquidity, results of operations, ability to grow, and reputation, and are summarized below. This summary is intended to supplement, and should not be considered a substitute for, the complete Risk Factors that follow.

Legal and Regulatory Risks

- Failure to operate our business in compliance with complex legal or regulatory requirements or contractual obligations
- Adverse litigation outcomes
- Adverse changes to GSE and Ginnie Mae business models, initiatives and other actions

Risks Related to Our Financial Performance, Financing Our Business, Liquidity and Net Worth, and the Economy

- Inability to execute our strategic plan to return to sustainable profitability or pursue business or asset acquisitions
- Inability to access capital to meet the financing requirements of our business, or noncompliance with our debt agreements or covenants
- Inability to obtain sufficient servicer advance financing necessary to meet the financing requirements due to increased delinquencies or forbearance plans
- Inability to obtain sufficient warehouse financing necessary to meet the financing requirements for reverse mortgage loan repurchases or draws
- Failure to satisfy current or future minimum net worth and liquidity requirements established by regulators, GSEs, Ginnie Mae, lenders, or other counterparties
- Policies or regulations adopted by the GSEs or Ginnie Mae that may be more advantageous to our competitors' business models than our own
- Inability to appropriately manage liquidity, interest rate and foreign currency exchange risks, including ineffective hedging strategies
- Inability to control decisions by the management of MSR Asset Vehicle LLC to exercise their contractual rights to sell MSRs, which potentially impacts the size of our subservicing portfolio
- Economic slowdown or downturn, a capital market disruption, or a deterioration of the housing market, including but not limited to, in the states where we have some concentration of our business
- Inability to acquire additional profitable client relationships
- Inability to meet future advance financing obligations if Rithm were to fail to comply with its servicing advance obligations under the subservicing agreement

Operational Risks and Other Risks Related to Our Business

- Disruption in our operations or technology systems due to the failure or disagreements of our service providers to fulfill their obligations under their agreements with us, including but not limited to Black Knight Financial Services, Inc. (Black Knight)
- Failure by us or our vendors to adequately update technology systems and processes, interruption or delay in our or our vendors' operations due to cybersecurity breaches or system failures, and resulting economic loss or regulatory penalties
- Adverse changes in political or economic stability or government policies in the U.S., India, the Philippines or the USVI
- Disruption in our operations and reduced profitability in our servicing operations as a result of severe weather or natural disaster events
- Material increase in loan put-backs and related liabilities for breaches of representations and warranties regarding sold loans or MSRs
- Heightened reputational risk due to media and regulatory scrutiny of companies that originate and securitize reverse mortgages

- Incurrence of losses by our captive reinsurance entity from catastrophic events, particularly in areas where a significant portion of the insured properties are located
- Incurrence of litigation costs and related losses if the validity of a foreclosure action is challenged by a borrower or if a court overturns a foreclosure
- Failure to maintain minimum servicer ratings and impairment of our ability to sell or fund servicing advances, access financing, consummate future servicing transactions, and maintain our status as an approved servicer by the GSEs
- Volatility of our earnings due to MSR valuation changes, financial instrument valuation changes and other factors
- Loss of the confidence of investors and counterparties if we fail to reasonably estimate the fair value of our assets and liabilities or our internal controls over financial reporting are found to be inadequate

Tax Risks

- Changes in tax law and interpretations and tax challenges
- Failure to retain or collect the tax benefits provided by the USVI, or certain past income becoming subject to increased U.S. federal income taxation
- Inability to utilize our net operating losses carryforwards and other deferred tax assets due to “ownership change” as defined in Section 382 of the Internal Revenue Code or other factors

Risks Relating to Ownership of Our Common Stock

- Substantial volatility in our common stock price
- The vote by large shareholders of their shares to influence matters requiring shareholder approval in a way that management does not believe represents the best interests of all shareholders
- The issuance of additional securities authorized by the Board of Directors that causes dilution and depresses the price of our securities
- Future offerings of debt securities that are senior to our common stock in liquidation, or equity securities that are senior to our common stock in respect of liquidation and distributions
- Certain provisions in our organizational documents and regulatory restrictions may make takeovers more difficult, and significant investments in our common stock may be restricted

Legal and Regulatory Risks

The business in which we engage is complex and heavily regulated. If we fail to operate our business in compliance with both existing and future regulations, our business, reputation, financial condition or results of operations could be materially and adversely affected.

Our business is subject to extensive regulation by federal, state, local and foreign governmental authorities, including the CFPB, HUD, the SEC and various state agencies that license and conduct examinations of our servicing and lending activities. In addition, we operate under a number of regulatory settlements that subject us to ongoing reporting and other obligations. See the next risk factor below for additional detail concerning these regulatory settlements. From time to time, we also receive requests (including requests in the form of subpoenas and civil investigative demands) from federal, state and local agencies for records, documents and information relating to our servicing and lending activities. The GSEs (and their conservator, the FHFA), Ginnie Mae, the United States Treasury Department, various investors, non-Agency securitization trustees and others also subject us to periodic reviews and audits.

In the current regulatory environment, we have faced and expect to continue to face heightened regulatory and public scrutiny as an organization as well as stricter and more comprehensive regulation of the entire mortgage sector. We must devote substantial resources to regulatory compliance, and we incurred, and expect to continue to incur, significant ongoing costs to comply with new and existing laws and governmental regulation of our business. If we fail to effectively manage our regulatory and contractual compliance, the resources we are required to devote and our compliance expenses would likely increase. Any significant delay or complication in fulfilling our regulatory commitments and resolving remaining legacy matters may jeopardize our ability to return to sustainable profitability.

We must comply with a large number of federal, state and local consumer protection and other laws and regulations including, among others, the CARES Act, the Dodd-Frank Act, the TCPA, the Gramm-Leach-Bliley Act, the FDCPA, RESPA, TILA, the Fair Credit Reporting Act, the Servicemembers Civil Relief Act, the Homeowners Protection Act, the Federal Trade Commission Act, the Fair Credit Reporting Act, the Equal Credit Opportunity Act, as well as individual state laws pertaining to licensing, general mortgage origination and servicing practices and foreclosure and federal and local bankruptcy rules. These laws and regulations apply to all facets of our business, including, but not limited to, licensing, loan originations, consumer disclosures, default servicing and collections, foreclosure, filing of claims, registration of vacant or foreclosed properties,

handling of escrow accounts, payment application, interest rate adjustments, assessment of fees, loss mitigation, use of credit reports, handling of unclaimed property, safeguarding of non-public personally identifiable information about our customers, and the ability of our employees to work remotely. These complex requirements can and do change as laws and regulations are enacted, promulgated, amended, interpreted and enforced. In addition, we must maintain an effective corporate governance and compliance management system. See “Business - Regulation” for additional information regarding our regulators and the laws that apply to us.

We must structure and operate our business to comply with applicable laws and regulations and the terms of our regulatory settlements. This can require judgment with respect to the requirements of such laws and regulations and such settlements. While we endeavor to engage proactively with our regulators in an effort to ensure we do so correctly, if we fail to interpret correctly the requirements of such laws and regulations or the terms of our regulatory settlements, we could be found to be in breach of such laws, regulations or settlements.

Failure or alleged failure to comply with the terms of our regulatory settlements or applicable federal, state and local consumer protection laws, regulations and licensing requirements could lead to any of the following:

- administrative fines and penalties and litigation;
- loss of our licenses and approvals to engage in our servicing and lending businesses;
- governmental investigations and enforcement actions;
- civil and criminal liability, including class action lawsuits and actions to recover incentive and other payments made by governmental entities;
- breaches of covenants and representations under our servicing, debt or other agreements;
- damage to our reputation;
- inability to raise capital or otherwise secure the necessary financing to operate the business and refinance maturing liabilities;
- changes to our operations that may otherwise not occur in the normal course, and that could cause us to incur significant costs; or
- inability to execute our business strategy.

Any of these outcomes could materially and adversely affect our business, reputation, financial condition, liquidity and results of operations.

In recent years, the general trend among federal, state and local legislative bodies and regulatory agencies as well as state attorneys general has been toward increasing laws, regulations, investigative proceedings and enforcement actions with regard to residential mortgage lenders and servicers. The CFPB continues to take a very active role in the mortgage industry, and its rule-making and regulatory agenda relating to loan servicing and origination continues to evolve. Individual states have also been active, as have other regulatory organizations such as the MMC, a multistate coalition of various mortgage banking regulators. In addition to their traditional focus on licensing and examination matters, certain regulators make observations, recommendations or demands with respect to areas such as corporate governance, safety and soundness, and risk and compliance management. We must endeavor to work cooperatively with our regulators to understand all their concerns if we are to be successful in our business.

The CFPB and state regulators have also increasingly focused on the use, and adequacy, of technology in the mortgage servicing industry, privacy concerns and other topical issues, such as communications from debt collectors and the ability of borrowers to repay mortgage loans, including in relation to COVID-19. See below as well as Business - Regulation for additional information regarding the rules, regulations and legislative developments most pertinent to our operations.

Presently, a level of heightened uncertainty exists with respect to the future of regulation of mortgage lending and servicing. We cannot predict the specific legislative or executive actions that may result or what actions federal or state regulators might take in response to potential changes to the federal regulatory environment generally. Such actions could impact the industry generally or us specifically, could impact our relationships with other regulators, and could adversely impact our business.

New regulatory and legislative measures, or changes in enforcement practices, including those related to the technology we use, could, either individually or in the aggregate, require significant changes to our business practices, impose additional costs on us, limit our product offerings, limit our ability to efficiently pursue business opportunities, negatively impact asset values or reduce our revenues. Accordingly, they could materially and adversely affect our business and our financial condition, liquidity and results of operations.

Governmental bodies have taken regulatory and legal actions against us in the past and may in the future impose regulatory fines or penalties or impose additional requirements or restrictions on our activities that could increase our operating expenses, reduce our revenues or otherwise adversely affect our business, financial condition, liquidity, results of operations, ability to grow and reputation.

We are subject to a number of ongoing federal and state regulatory examinations, consent orders, inquiries, subpoenas, civil investigative demands, requests for information and other actions that could result in further adverse regulatory action against us, including certain matters summarized below. See Note 25 — Regulatory Requirements and Note 27 — Contingencies to the Consolidated Financial Statements.

CFPB

We are subject to supervision by the CFPB. In April 2017, the CFPB filed a lawsuit in the federal district court for the Southern District of Florida against Onity, OMS and OLS alleging violations of federal consumer financial laws relating to our servicing business dating back to 2014. This lawsuit was resolved in Onity's favor in 2023 following years of litigation that generated significant legal expense and adversely impacted our reputation and business. The CFPB has resumed normal course supervisory activities with respect to our business and operations. If the CFPB asserts any alleged deficiencies in Onity's practices that we are unable to refute or defend, the CFPB could potentially commence an enforcement action involving monetary fines, penalties or restrictions on our business, which could have a material adverse impact on our business, reputation, financial condition, liquidity and results of operations.

State Licensing and State Attorneys General

Our licensed entities are required to renew their licenses, typically on an annual basis, and to do so they must satisfy the license renewal requirements of each jurisdiction, which generally include financial requirements such as providing audited financial statements or satisfying minimum net worth requirements and non-financial requirements such as satisfactorily completing examinations as to the licensee's compliance with applicable laws and regulations. The minimum net worth requirements to which our licensed entities are subject are unique to each state and type of license. We believe our licensed entities were in compliance with all of their minimum net worth requirements at December 31, 2024. However, it is possible that regulators could disagree with our calculations, and one state regulator has disagreed with our calculation for a prior year period; we have discussed the matter with the regulator, including why we believe we were in compliance with the applicable net worth requirements. Failure to satisfy any of the requirements to which our licensed entities are subject could result in a variety of regulatory actions ranging from a fine, a directive requiring a certain step to be taken, a suspension or, ultimately, a revocation of a license, any of which could have a material adverse impact on our results of operations and financial condition.

We have incurred significant costs complying with the terms of settlements with regulatory agencies. To the extent that legal or other actions are taken against us by regulators or others with respect to matters, they could result in additional costs or other adverse impacts and could have a materially adverse impact on our business, reputation, financial condition, liquidity and results of operations.

We continue to work with the New York Department of Financial Services (NY DFS) to address matters they raise with us as well as to fulfill our commitments under the 2017 NY Consent Order and PHH Corporation acquisition conditional approval. To the extent that we fail to address adequately any concerns raised by the NY DFS or fail to fulfill our commitments to the NY DFS, the NY DFS could take regulatory action against us, including imposing fines or penalties or otherwise restricting our business activities. Any such actions could have a material adverse impact on our business, financial condition liquidity and results of operations.

Other Matters

On occasion, we engage with agencies of the federal government on various matters, including the Department of Justice, the Office of Inspector General of HUD, Special Inspector General for the Troubled Asset Relief Program (SIGTARP) and the VA Office of the Inspector General. In addition to the expense of responding to subpoenas and other requests for information from such agencies, in the event that any of these engagements result in allegations of wrongdoing by us, we may incur fines or penalties or significant legal expenses defending ourselves against such allegations.

In the past, we have entered into significant settlements with the NY DFS, the CA DFPI, and the 2013 Onity National Mortgage Settlement which involved payments of significant monetary amounts, monitoring by third-party firms for which we were financially responsible and other restrictions on our business. While we are not currently subject to active monitorships under these settlements, we remain obligated to comply with the commitments made to our regulators and if we violate those commitments one or more of these entities could take regulatory action against us. Any future settlements or other regulatory actions against us could have a material adverse impact on our business, reputation, operating results, liquidity and financial condition.

To the extent that an examination or other regulatory engagement results in an alleged failure by us to comply with applicable laws, regulations or licensing requirements, or if allegations are made that we have failed to comply with applicable laws, regulations or licensing requirements or the commitments we have made in connection with our regulatory settlements (whether such allegations are made through administrative actions such as cease and desist orders, through legal proceedings or otherwise) or if other regulatory actions of a similar or different nature are taken in the future against us, this could lead to (i) administrative fines, penalties and litigation, (ii) loss of our licenses and approvals to engage in our servicing and lending businesses, (iii) governmental investigations and enforcement actions, (iv) civil and criminal liability, including class action lawsuits and actions to recover incentive and other payments made by governmental entities, (v) breaches of covenants and representations under our servicing, debt or other agreements, (vi) damage to our reputation, (vii) inability to raise capital or otherwise secure the necessary funding to operate the business, (viii) changes to our operations that may otherwise not occur in the normal course, and that could cause us to incur significant costs, and (ix) inability to execute on our business strategy. Any of these outcomes could increase our operating expenses and reduce our revenues, hamper our ability to grow or otherwise materially and adversely affect our business, reputation, financial condition, liquidity and results of operations.

Our regulatory settlements and public allegations regarding our business practices by regulators and other third parties may affect other regulators', rating agencies', and creditors' perceptions, which could adversely impact our financial results and ongoing operations.

Our regulatory settlements and public allegations regarding our business practices by regulators and other third parties may affect other regulators', rating agencies' and creditors' perceptions of us. As a result, our ordinary course interactions with regulators may be adversely affected. We may incur additional compliance costs and management time may be diverted from other aspects of our business to address regulatory issues. It is possible that we may incur additional fines or penalties or even that we could lose the licenses and approvals necessary to engage in our servicing and lending businesses. In addition, certain regulators make observations, recommendations or demands with respect to areas such as corporate governance, safety and soundness and risk and compliance management, which could require us to incur additional expense or which could result in the imposition of additional requirements such as liquidity and capital requirements or restrictions on business conduct such as engaging in stock repurchases. To the extent that rating agencies or creditors perceive us negatively, our servicer or credit ratings could be adversely impacted and our access to funding could be limited.

If regulators allege that we do not comply with the terms of our regulatory settlements, or if we enter into future regulatory settlements, it could significantly impact our ability to maintain and grow our servicing portfolio.

Our servicing portfolio naturally decreases over time as homeowners make regularly scheduled mortgage payments, prepay loans prior to maturity, refinance with a mortgage loan not serviced by us or involuntarily liquidate through foreclosure or other liquidation process. Our ability to maintain or grow the size of our servicing portfolio depends on our ability to acquire the right to service or subservice additional pools of mortgage loans or to originate additional loans for which we retain the MSRs.

Historically, our regulatory settlements significantly impacted our ability to maintain or grow our servicing portfolio because we agreed to certain restrictions that effectively prohibited future bulk acquisitions of residential servicing. While certain of these restrictions have been eased in connection with our resolution of state regulatory matters and acquisition of PHH Corporation, we are still restricted in our ability to grow our portfolio under the terms of our agreements with the NY DFS. If we are unable to satisfy the conditions of the regulatory commitments we made to these and other regulators, or if a future regulatory settlement restricts our ability to acquire MSRs, we will be unable to grow or even maintain the size of our servicing portfolio through acquisitions and our business could be materially and adversely affected. Moreover, even when regulatory restrictions are lifted, the reputational damage done by these actions may inhibit our ability to acquire new business.

If we are unable to respond timely and effectively to routine or other regulatory examinations and borrower complaints, our business and financial conditions may be adversely affected.

Regulatory examinations by state and federal regulators are part of our ordinary course business activities. If we are unable to respond effectively to regulatory examinations, our business and financial conditions may be adversely affected. In addition, we receive various escalated borrower complaints and inquiries from our state and federal regulators and state Attorneys General and are required to respond within the time periods prescribed by such entities. If we fail to respond effectively and timely to regulatory examinations and escalations, legal action could be taken against us by such regulators and, as a result, we may incur fines or penalties or we could lose the licenses and approvals necessary to engage in our servicing and lending businesses. We could also suffer from reputational harm and become subject to private litigation.

Private legal proceedings and related costs alleging failures to comply with applicable laws or regulatory requirements could adversely affect our financial condition and results of operations.

We are subject to various pending private legal proceedings, including purported class actions, challenging whether certain of our loan servicing practices and other aspects of our business comply with applicable laws and regulatory requirements. For example, we are currently a defendant in various matters alleging that (1) certain fees imposed on borrowers relating to

payment processing, payment facilitation, or payment convenience violate state laws similar to the Fair Debt Collection Practices Act, (2) certain fees we assess on borrowers are marked up improperly in violation of applicable state and federal law, (3) we breached fiduciary duties we purportedly owe to benefit plans due to the discretion we exercise in servicing certain securitized mortgage loans, (4) certain legacy mortgage reinsurance arrangements violated RESPA, (5) we failed to subservice loans appropriately pursuant to subservicing and other agreements, (6) we violated the False Claims Act related to our participation in the Home Affordable Modification Program, and (7) we originated and sold loans to counterparties that were not underwritten in accordance with applicable guidelines. In the future, we are likely to become subject to other private legal proceedings alleging failures to comply with applicable laws and regulations, including putative class actions, in the ordinary course of our business. While we do not currently believe that the resolution of the vast majority of the legal proceedings we face will have a material adverse effect on our financial condition or results of operations, we cannot express a view with respect to all of these proceedings. The outcome of any pending legal matter is never certain, and it is possible that adverse results in private legal proceedings could materially and adversely affect our financial results and operations. We have paid significant amounts to settle private legal proceedings in recent periods and paid significant amounts in legal and other costs in connection with defending ourselves in such proceedings. To the extent we are unable to avoid such costs in future periods, our business, financial position, results of operations and cash flows could be materially and adversely affected.

Non-compliance with laws and regulations could lead to termination of servicing agreements or defaults under our debt agreements.

Most of our servicing agreements and debt agreements contain provisions requiring compliance with applicable laws and regulations. While the specific language in these agreements takes many forms and materiality qualifiers are often present, if we fail to comply with applicable laws and regulations, we could be terminated as a servicer and defaults could be triggered under our debt agreements, which could materially and adversely affect our revenues, cash flows, liquidity, business and financial condition. We could also suffer reputational damage and trustees, lenders and other counterparties could cease wanting to do business with us.

If new laws and regulations lengthen foreclosure times or introduce new regulatory requirements regarding foreclosure procedures, our operating costs and liquidity requirements could increase and we could be subject to regulatory action.

When a mortgage loan that we service is in foreclosure, we are generally required to continue to advance delinquent principal and interest to the securitization trust and to make advances for delinquent taxes and insurance and foreclosure costs and the upkeep of vacant property in foreclosure to the extent that we determine that such amounts are recoverable. These servicing advances are generally recovered when the delinquency is resolved or upon liquidation. Regulatory actions that lengthen the foreclosure process will increase the amount of servicing advances that we are required to make, lengthen the time it takes for us to be reimbursed for such advances and increase the costs incurred during the foreclosure process.

Increased regulatory scrutiny and new laws and procedures could cause us to adopt additional compliance measures and incur additional compliance costs in connection with our foreclosure processes. We may incur legal and other costs responding to regulatory inquiries or any allegation that we improperly foreclosed on a borrower. We could also suffer reputational damage and could be fined or otherwise penalized if we are found to have breached regulatory requirements.

If we fail to comply with the TILA-RESPA Integrated Disclosure (TRID) rules, our business and operations could be materially and adversely affected and our plans to expand our lending business could be adversely impacted.

The TRID rules include requirements relating to consumer facing disclosure and waiting periods to allow consumers to reconsider committing to loans after receiving required disclosures. If we fail to comply with the TRID rules, we may be unable to sell loans that we originate or purchase, or we may be required to sell such loans at a discount compared to other loans. We also could be subject to repurchase or indemnification claims from purchasers of such loans, including the GSEs. Additionally, loans might stay on our warehouse lines for longer periods before sale, which would increase our liquidity needs, holding costs and interest expense. We could also be subject to regulatory actions or private lawsuits.

In response to the TRID rules, we have implemented significant modifications and enhancements to our loan production processes and systems, and we continue to devote significant resources to TRID compliance. As regulatory guidance and enforcement and the views of the GSEs and other market participants such as warehouse loan lenders evolve, we may need to modify further our loan production processes and systems in order to adjust to evolution in the regulatory landscape and successfully operate our lending business. In such circumstances, if we are unable to make the necessary adjustments, our business and operations could be adversely affected and we may not be able to execute on our plans to grow our lending business.

Failure to comply with the Home Mortgage Disclosure Act (HMDA) and related CFPB regulations could adversely impact our business.

HMDA requires financial institutions to report certain mortgage data in an effort to provide the regulators and the public with information that will help show whether financial institutions are serving the housing credit needs of the neighborhoods

and communities in which they are located. The data points include information related to the loan applicant/borrower (e.g., age, ethnicity, race and credit score), the underwriting process, loan terms and fees, lender credits and interest rate, among others. The scope of the information available to the public could increase fair lending regulatory scrutiny and third-party plaintiff litigation, as the changes will expand the ability of regulators and third parties to compare a particular lender to its peers in an effort to determine differences among lenders in certain demographic borrower populations. We have devoted, and continue to devote, significant resources to establishing and maintaining systems and processes for complying with HMDA on an ongoing basis. If we are not successful in capturing and reporting the new HMDA data, and analyzing and correcting any adverse patterns, we could be exposed to regulatory actions and private litigation against us, we could suffer reputational damage and we could incur losses, any of which could materially and adversely impact our business, financial condition and results of operations.

There may be material changes to the laws, regulations, rules or practices applicable to reverse mortgage programs sponsored by HUD and FHA, and securitized by Ginnie Mae, which could materially and adversely affect us and the reverse mortgage industry as a whole.

The reverse mortgage industry is largely dependent upon rules and regulations implemented by HUD, FHA and Ginnie Mae. There can be no guarantee that HUD/FHA will retain Congressional authorization to continue the HECM program, which provides FHA government insurance for qualifying HECM loans, or that they will not make material changes to the laws, regulations, rules or practices applicable to reverse mortgage programs. For example, HUD previously implemented certain lending limits for the HECM program, and added credit-based underwriting criteria designed to assess a borrower's ability and willingness to satisfy future tax and insurance obligations. In addition, Ginnie Mae's participation in the reverse mortgage industry may be subject to economic and political changes that cannot be predicted. Any of the aforementioned circumstances could materially and adversely affect the performance of our reverse mortgage business and the value of our common stock.

Regulators continue to be active in the reverse mortgage space, including due to the perceived susceptibility of older borrowers to be influenced by deceptive or misleading marketing activities. Regulators have also focused on appraisal practices because reverse mortgages are largely dependent on collateral valuation. If we fail to comply with applicable laws and regulations relating to the origination of reverse mortgages, we could be subject to adverse regulatory actions, including potential fines, penalties or sanctions, and our business, reputation, financial condition and results of operations could be materially and adversely affected.

Violations of fair lending and/or servicing laws could negatively affect our business.

Various federal, state and local laws have been enacted that are designed to discourage predatory lending and servicing practices. The federal Home Ownership and Equity Protection Act of 1994 (HOEPA) prohibits inclusion of certain provisions in residential loans that have mortgage rates or origination costs in excess of prescribed levels and requires that borrowers be given certain additional disclosures prior to origination. Some states have enacted, or may enact, similar laws or regulations, which in some cases impose restrictions and requirements greater than are those in HOEPA. In addition, under the anti-predatory lending laws of some states, the origination of certain residential loans, including loans that are not classified as "high cost" loans under HOEPA or other applicable law, must satisfy a net tangible benefits test with respect to the related borrower. A failure by us to comply with these laws, to the extent we originate, service or acquire residential loans that are non-compliant with HOEPA or other predatory lending or servicing laws, could subject us, as an originator or a servicer, or as an assignee, in the case of acquired loans, to monetary penalties and could result in the borrowers rescinding the affected loans. Lawsuits have been brought in various states making claims against originators, servicers and assignees of high cost loans for violations of state law. Named defendants in these cases have included numerous participants within the secondary mortgage market. If we are found to have violated predatory or abusive lending laws, defaults could be declared under our debt or servicing agreements, we could suffer reputational damage, and we could incur losses, any of which could materially and adversely impact our business, financial condition and results of operations.

Failure to comply with FHA underwriting guidelines could adversely impact our business.

We must comply with FHA underwriting guidelines in order to successfully originate FHA loans. If we fail to do so, we may not be able to collect on FHA insurance. In addition, we could be subject to allegations of violations of the False Claims Act asserting that we submitted claims for FHA insurance on loans that had not been underwritten in accordance with FHA underwriting guidelines. If we are found to have violated FHA underwriting guidelines, we could face regulatory penalties and damages in litigation, suffer reputational damage, and we could incur losses due to an inability to collect on such insurance, any of which could materially and adversely impact our business, financial condition and results of operations.

Failure to comply with U.S. and foreign laws and regulations applicable to our global operations could have an adverse effect on our business, financial position, results of operations or cash flows.

As a business with a global workforce, we need to ensure that our activities, including those of our foreign operations, comply with applicable U.S. and foreign laws and regulations. Various states have implemented regulations which specifically

restrict the ability to perform certain servicing and originations functions offshore and, from time to time, various state regulators have scrutinized the operations of our foreign subsidiaries. Our failure to comply with applicable laws and regulations could, among other things, result in restrictions on our operations, loss of licenses, fines, penalties or reputational damage and have an adverse effect on our business.

Failure to comply with the S.A.F.E. Act could adversely impact our business.

The Secure and Fair Enforcement for Mortgage Licensing Act of 2008 (the S.A.F.E. Act) requires the individual licensing and registration of those engaged in the business of loan origination. The S.A.F.E. Act is designed to improve accountability on the part of loan originators, combat fraud and enhance consumer protections by encouraging states to establish a national licensing system and minimum qualification requirements for applicants. Thus, Onity must ensure proper licensing for all employees who participate in certain specified loan origination activities. Failure to comply with the S.A.F.E. Act licensing requirements could adversely impact Onity's origination business.

Risks Related to Our Financial Performance, Financing Our Business, Liquidity and Net Worth and the Economy

Our strategic plan to return to sustainable profitability may not be successful.

We are facing certain challenges and uncertainties that could have significant adverse effects on our business, financial condition, liquidity and results of operations. The ability of management to appropriately address these challenges and uncertainties in a timely and effective manner is critical to our ability to operate our business successfully.

Historical losses significantly eroded stockholders' equity and weakened our financial condition. We established a set of key initiatives to achieve our objective of returning to sustainable profitability in the shortest timeframe possible within an appropriate risk and compliance environment. While we generated net income in 2021, 2022 and 2024, we incurred a net loss in 2023 driven by MSR fair value losses, net of hedging. We are exposed to earnings volatility due to the effect of changes in interest rates and other market conditions on the valuation of our assets and liabilities measured at fair value, including MSRs which represent our most interest-rate sensitive asset. While the objective of our MSR interest rate risk management and hedging policy is to protect shareholders' equity and earnings against the fair value volatility of interest-rate sensitive MSR portfolio exposure considering market, liquidity and other conditions, our hedging strategy may not be as effective as desired due to the actual performance of an MSR and hedges differing from the expected performance. See Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations-Overview-Business Initiatives.

There can be no assurance that we will continue to successfully execute on these initiatives, or that even if we do execute on these initiatives we will be able to return to sustained profitability. In addition to successful operational execution of our key initiatives, our success will also depend on market conditions and other factors outside of our control, including continued access to capital. If we continue to experience losses, our share price, business, reputation, financial condition, liquidity and results of operations could be materially and adversely affected.

If we are unable to obtain sufficient capital to meet the financing requirements of our business, or if we fail to comply with our debt agreements, our business, financing activities, financial condition and results of operations will be adversely affected.

Our business requires substantial amounts of capital and our financing strategy includes the use of leverage. Accordingly, our ability to finance our operations and repay maturing obligations rests in large part on our ability to continue to borrow money at reasonable rates. If we are unable to maintain adequate financing, or other sources of capital are not available, we could be forced to suspend, curtail or reduce our revenue generating objectives, which could harm our results of operations, liquidity, financial condition and business prospects. Our ability to borrow money is affected by a variety of factors including:

- limitations imposed on us by existing debt agreements that contain restrictive covenants that may limit our ability to raise additional debt;
- credit market conditions;
- the potential for ongoing disruption in the financial markets and in commercial activity generally related to changes in monetary and fiscal policy, international events including conflicts or wars and other sources of instability;
- the strength of the lenders from whom we borrow;
- lenders' perceptions of us or our sector;
- changes in interest rates or other drivers that affect the value of pledged collateral;
- corporate credit and servicer ratings from rating agencies;
- limitations on borrowing under our MSR and advance facilities and mortgage loan warehouse facilities due to structural features in these facilities and the amount of eligible collateral that is pledged; and
- revenue opportunities including products not currently supported in the financing market.

Our advance facilities are revolving facilities that generally have a revolving period up to 24 months. In a typical monthly cycle, we repay a portion of the borrowings under these facilities from collections. During the remittance cycle, which starts in

the middle of each month, we depend on our lenders to provide us with a significant portion of the cash necessary to make the advances that we are required to make as servicer. If one or more of these lenders were to restrict our ability to access these revolving facilities or were to fail, we may not have sufficient funds to meet our obligations. We typically require significantly more liquidity to meet our advance funding obligations than our available cash on hand.

In addition, we use mortgage loan warehouse facilities to fund newly originated loans, HECM tails, buyouts and a number of other assets on a short-term basis until they are sold to secondary market investors, including GSEs or other third-party investors. Currently, our master repurchase and participation agreements for financing new loan originations generally have maximum terms of 364 days, and they are typically renewed, replaced or extended annually. We issued asset-backed securitization notes in 2023 and 2024 to diversify our financing of reverse mortgage buyouts and REO properties with a three-year anniversary mandatory call dates.

We have diversified sources of funding for our GSE, Ginnie Mae and PLS MSR portfolios. GSE MSR financing is provided through two bank financing facilities whose total capacity was \$500.0 million and \$400.0 million, respectively, at December 31, 2024. The \$500.0 million GSE MSR facility terminates in September 2025 and the \$400.0 million GSE MSR facility converts into a term loan in February 2025 with a final maturity date in December 2026. The Ginnie Mae facility, provided through private investor arrangement, carried total capacity of \$300.0 million at December 31, 2024. The PLS MSR financing was issued to capital markets investors as an amortizing note structure. The Ginnie Mae and PLS financing arrangements terminate in February 2025 and are expected to be extended for another 364-day period.

Our MSR financing facilities provide funding based on an advance rate against MSR value that is subject to periodic mark-to-market valuation adjustments (MSR valuation is expected to decline if market interest rates decline). In the normal course, and without any additions to our MSR portfolio from production or acquisition activities, MSR value is expected to decline over time due to run off of the loan balances in our servicing portfolio. As a result, we anticipate having to repay a portion of our MSR debt over a given time period. The requirements to repay MSR debt including those due to unfavorable fair value adjustment attributable to interest rates or other factors may require us to allocate a substantial amount of our available liquidity or future cash flows to meet these requirements. To the extent we are unable to generate sufficient cash flows from operations to meet these requirements, we may be more constrained to invest in our business and fund other obligations, and our business, financing activities, liquidity, financial condition and results of operations will be adversely affected.

On November 6, 2024, we successfully completed our corporate debt restructuring. PHH Corporation issued \$500.0 million aggregate principal amount of 9.875% Senior Notes due November 1, 2029 (Senior Notes Due 2029) in a syndicated private placement. Interest on the Senior Notes Due 2029 is payable semi-annually and principal is due at maturity. The Senior Notes Due 2029 are guaranteed by Onity and certain wholly-owned subsidiaries including PMC (collectively “restricted subsidiaries”). The Senior Notes are secured by the equity interests of the restricted subsidiaries and any available cash in excess of regulatory requirements, as defined. The proceeds from the issuance of the Senior Notes Due 2029 described above, together with proceeds from the sale of MAV Canopy and available cash, were used to redeem in November 2024 all of the outstanding \$289.1 million 7.875% PMC Senior Secured Notes due in 2026 and \$285.0 million 12% Onity Senior Secured Notes due in 2027.

While we currently plan to renew, replace or extend all of the above debt agreements consistent with our historical practice, there can be no assurance that we will be able to do so on appropriate terms or at all and, if we fail to do so, we may not have adequate sources of funding for our business.

Our debt agreements contain various qualitative and quantitative covenants, including financial covenants, covenants to operate in material compliance with applicable laws and regulations, monitoring and reporting obligations and restrictions on our ability to engage in various activities, including but not limited to incurring or guarantying additional debt, paying dividends or making distributions on or purchasing equity interests of Onity and its subsidiaries, repurchasing or redeeming capital stock or junior capital, repurchasing or redeeming subordinated debt prior to maturity, issuing certain types of preferred stock, selling or transferring assets or making loans or investments or other restricted payments, entering into mergers or consolidations or sales of all or substantially all of the assets of Onity and its subsidiaries, creating liens on assets to secure debt, and entering into transactions with affiliates. As a result of the covenants to which we are subject, we may be limited in the manner in which we conduct our business and may be limited in our ability to engage in favorable business activities or raise additional capital to finance future operations or satisfy future liquidity needs. In addition, breaches or events that may result in a default under our debt agreements include, among other things, noncompliance with our covenants, nonpayment of principal or interest, material misrepresentations, the occurrence of a material adverse effect or material adverse change, insolvency, bankruptcy, certain material judgments and changes of control. Covenants and defaults of this type are commonly found in debt agreements such as ours. Certain of these covenants and defaults are open to subjective interpretation and, if our interpretation were contested by a lender, a court may ultimately be required to determine compliance or lack thereof. In addition, our debt agreements generally include cross default provisions such that a default under one agreement could trigger defaults under other agreements. If we fail to comply with our debt agreements and are unable to avoid, remedy or secure a waiver of any resulting default, we may be subject to adverse action by our lenders, including termination of further funding,

acceleration of outstanding obligations, enforcement of liens against the assets securing or otherwise supporting our obligations and other legal remedies. In addition to these covenants, certain agreements also include trigger events which may lead to adverse actions such as acceleration of outstanding obligations, step down in advance rates and termination of further funding.

An actual or alleged default under any of our debt agreements, negative ratings action by a rating agency (including as a result of our increased leverage or erosion of net worth), the perception of financial weakness, an adverse action by a regulatory authority or GSE, a lengthening of foreclosure timelines or a general deterioration in the economy that constricts the availability of credit may increase our cost of funds and make it difficult for us to renew existing credit facilities or obtain new lines of credit. Any or all the above could have an adverse effect on our business, financing activities, financial condition and results of operations.

We may be unable to obtain sufficient servicer advance financing necessary to meet the financing requirements of our business, which could adversely affect our liquidity position and result in a loss of servicing rights.

We currently fund a substantial portion of our servicing advance obligations through our servicing advance facilities. Under normal market conditions, mortgage servicers typically have been able to renew or refinance these facilities. However, market conditions or lenders' perceptions of us at the time of any renewal or refinancing may mean that we are unable to renew or refinance our advance financing facilities or obtain additional facilities on favorable terms or at all.

If we fail to satisfy minimum net worth and liquidity requirements established by regulators, GSEs, Ginnie Mae, lenders, or other counterparties, our business, financing activities, financial condition or results of operations could be materially and adversely affected.

As a result of our servicing and loan origination activities, we are subject to minimum net worth and liquidity requirements established by state regulators, GSEs, Ginnie Mae, lenders, and other counterparties. Losses incurred in prior years and in 2023 have eroded our net worth. In addition, we must structure our business so each licensed entity satisfies the net worth and liquidity requirements applicable to it, which can be challenging.

The minimum net worth and liquidity requirements to which our licensed entities are subject vary by state and type of license. We must also satisfy the minimum net worth and liquidity requirements of the GSEs and Ginnie Mae in order to maintain our approved status with such agencies and the minimum net worth and liquidity requirements set forth in our agreements with our lenders.

Minimum net worth requirements and liquidity are generally calculated using specific adjustments that may require interpretation or judgment. Changes to these adjustments have the potential to significantly affect net worth and liquidity calculations and imperil our ability to satisfy future minimum net worth and liquidity requirements. We believe our licensed entities were in compliance with all of their minimum net worth and liquidity requirements at December 31, 2024. However, it is possible that regulators could disagree with our calculations. If we fail to satisfy minimum net worth or liquidity requirements, absent a waiver or other accommodation, we could lose our licenses or have other regulatory action taken against us, we could lose our ability to sell and service loans to or on behalf of the GSEs or Ginnie Mae, or it could trigger a default under our debt agreements. Any of these occurrences could have a material adverse effect on our business, reputation, financing activities, liquidity, financial condition or results of operations.

In 2022, Ginnie Mae announced updated minimum financial eligibility requirements for Ginnie Mae issuers and included a new risk-based capital ratio effective December 31, 2024. Ginnie Mae issued a waiver extending the deadline by which PHH must meet the RBCR requirements to October 1, 2025. PHH will be required to maintain a minimum of 6% ratio of Adjusted Net Worth less Excess MSRs, as defined, to risk weighted assets. We are currently implementing certain actions intended to achieve compliance with the requirements. We intend to continue to operate our Ginnie Mae issuer activities through PHH which would be subject to the risk-based capital rules, and separately operate our GSE MSR investment activities through PHH Asset Services LLC (PAS), a wholly owned subsidiary of PHH Corporation and Onity. We have received all necessary licensing and regulatory approvals to operate PAS except for one state with whom discussions are ongoing.

We use estimates in measuring or determining the fair value of the majority of our assets and liabilities. If our estimates prove to be incorrect, we may be required to write down the value of these assets or write up the value of these liabilities, which could adversely affect our earnings.

Our ability to measure and report our financial position and operating results is influenced by the need to estimate the impact or outcome of future events based on information available at the time of the financial statements. An accounting estimate is considered critical if it requires that management make assumptions about matters that were highly uncertain at the time the accounting estimate was made. If actual results differ from our judgments and assumptions, then it may have an adverse impact on the results of operations and cash flows.

Fair value is estimated based on a hierarchy that maximizes the use of observable inputs and minimizes the use of unobservable inputs. Observable inputs are inputs that reflect the assumptions that market participants would use in pricing the

asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels whereby the highest priority is given to Level 1 inputs and the lowest to Level 3 inputs.

Most of our consolidated total assets and liabilities are measured at fair value on a recurring and nonrecurring basis, most of which are considered Level 3 valuations, including our MSR portfolio. Our largest Level 3 asset and liability carried at fair value on a recurring basis is Loans held for investment - reverse mortgages and the related secured financing. We pool home equity conversion mortgages (reverse mortgages) into Ginnie Mae Home Equity Conversion Mortgage-Backed Securities (HMBS). Because the securitization of reverse mortgage loans does not qualify for sale accounting, we account for these transfers as secured financings and classify the transferred reverse mortgages as Loans held for investment - reverse mortgages and recognize the related Financing liabilities. Holders of HMBS have no recourse against our assets, except for standard representations and warranties and our contractual obligations to service the reverse mortgages and HMBS.

We estimate the fair value of our assets and liabilities utilizing assumptions that we believe are appropriate and are used by market participants. We generally engage third-party valuation experts to support our fair value determination for Level 3 assets and liabilities. The methodology used to estimate these values is complex and uses asset- and liability-specific data and market inputs for assumptions including interest and discount rates, collateral status and expected future performance. If these assumptions prove to be inaccurate, if market conditions change or if errors are found in our models, the value of certain of our assets may decrease, which could adversely affect our business, financial condition and results of operations, including through negative impacts on our ability to satisfy minimum net worth and liquidity covenants.

Valuations are highly dependent upon the reasonableness of our assumptions and the predictability of the relationships that drive the results of our valuation methodologies. If changes to interest rates or other factors cause prepayment speeds to increase more than estimated, delinquency and default levels are higher than anticipated or financial market illiquidity is greater than anticipated, or other inputs or assumptions change, we may be required to adjust the value of certain assets or liabilities, which could adversely affect our business, financial condition and results of operations.

We are exposed to liquidity, interest rate and foreign currency exchange risks.

We are exposed to liquidity risk primarily because of the highly variable daily cash requirements to support our servicing business, including the requirement to make advances pursuant to our servicing agreements and the process of collecting and applying recoveries of advances. We are also exposed to liquidity risk due to margin calls or potential accelerated repayment of our debt depending on the performance of the underlying collateral, including the fair value of MSRs, and certain covenants or trigger events, among other factors. We are also exposed to liquidity and interest rate risk by our decision to originate and finance mortgage loans and the timing of their subsequent sales into the secondary market. Further, as discussed below, the derivative instruments that we have entered into in order to limit MSR fair value change exposure may require margin calls should the hedge instrument lose value. In general, we finance our operations through operating cash flows and various other sources of funding, including advance match funded borrowing agreements, secured lines of credit and repurchase agreements.

We are exposed to interest rate risk to the degree that our interest-bearing liabilities mature or reprice at different speeds, or on different bases, than our interest earning assets or when financed assets are not interest-bearing. Our servicing business is characterized by non-interest earning assets financed by interest-bearing liabilities. Servicing advances are among our more significant non-interest earning assets. We are also exposed to interest rate risk because a portion of our advance financing and other outstanding debt is at variable rates. Rising interest rates may increase our interest expense. Earnings on float balances may partially offset these higher funding costs.

Our MSRs, which we carry at fair value, are subject to substantial interest rate risk, primarily because the mortgage loans underlying the servicing rights permit the borrowers to prepay the loans. A decrease in interest rates generally increases prepayment speeds and vice versa. An interest rate decrease could result in an array of fair value changes, the severity of which would depend on several factors, including the magnitude of the change, whether the decrease is across specific rate tenors or a parallel change across the entire yield curve, and impact from market-side adjustments, among others. The objective of our MSR hedging policy is to provide a targeted level of hedge coverage on our interest-rate sensitive MSR portfolio exposure. The targeted hedge coverage ratio increased in the second quarter of 2023 from 25% to 60%. Effective December 2023, we established a targeted hedge coverage ratio range between 95% and 105%. In April 2024, we changed the risk measure to an interest rate sensitivity measure (dollar DV01) that resulted in an equivalent range of approximately 90% to 110%. However, as discussed below, there can be no assurance that our hedging strategy will be effective in partially mitigating our exposure to changes in fair value of our MSRs due to interest rate changes. Also refer to Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

In our Originations business, we are exposed to interest rate risk and related price risk on our pipeline (i.e., interest rate loan commitments (IRLCs) and mortgage loans held for sale) from the commitment date up until the date the commitment is

cancelled or expires, or the loan is sold into the secondary market. Generally, the fair value of the pipeline will decline in value when interest rates increase and will rise in value when interest rates decrease. We economically hedge our pipeline interest rate risk with freestanding derivatives such as TBAs and forward sale contracts.

In addition, we are exposed to foreign currency exchange rate risk in connection with our investment in non-U.S. dollar currency operations to the extent that our foreign exchange positions remain unhedged. Our operations in the Philippines and India expose us to foreign currency exchange rate risk.

While we have established policies and procedures intended to identify, monitor and manage the risks described above, our risk management policies and procedures may not be effective. Further, such policies and procedures are not designed to mitigate or eliminate all of the risks we face. As a result, these risks could materially and adversely affect our business, financial condition and results of operations.

Our hedging strategy may not be successful in partially mitigating our exposure to interest rate risk.

Our hedging strategy may not be as effective as desired due to the actual performance of an MSR differing from the expected performance. While we actively track the actual performance of our MSRs across rate change environments, there is potential for our economic hedges to underperform. The underperformance may be a result of various factors, including but not limited to the following: available hedge instruments have a different profile than the underlying asset, the duration of the hedge is different from the MSR, the convexity of the hedge is not proportional to the valuation change of the MSR asset, the actual asset and hedge performance may differ from the model-expected asset and hedge instruments performance, transacting in certain TBA, swap futures and options hedges drives costs, the counterparty with which we have traded has failed to deliver under the terms of the contract, or we fail to renew or adjust the hedge position in a timely or efficient manner.

Unexpected changes in market rates or secondary liquidity may have a materially adverse impact on the cash flows or operating performance of Onity. The expected hedge coverage profile may not correlate to the asset as desired, resulting in poorer performance than had we not hedged at all. In addition, hedging strategies involve transaction and other costs. We cannot be assured that our hedging strategy and the derivatives that we use will adequately offset the risks of interest rate volatility or that our hedging transactions will not result in or magnify losses.

Rising inflation may result in increased compensation and benefit expense and exacerbate pressures created by current labor market trends, increase the rates charged by vendors, and generally increase our operating costs, which could negatively impact our operations and financial results.

Our ability to provide competitive compensation packages and employee benefits programs is impacted by increases in the cost of living and wage inflation. This pressure, combined with tightening and competitive labor markets could increase the cost and difficulty of recruiting and retaining skilled employees. In addition, inflation may increase the rates charged by our vendors and our operating expenses generally. Any of these risks could negatively impact our operations and financial results.

GSE and Ginnie Mae initiatives and other actions may affect our financial condition and results of operations.

Due to the significant role that the GSEs and Ginnie Mae play in the secondary mortgage market, new initiatives and other actions that they may implement could become prevalent in the mortgage originations and servicing industries generally. To the extent that FHFA, the GSEs, HUD, Ginnie Mae or other authoritative body implements reforms that materially affect the market not only for conventional and/or government-insured loans but also for non-qualifying loan markets, such reforms could have a material adverse effect on the creation of new MSRs, the economics or performance of any MSRs that we acquire, servicing fees that we can charge and costs that we incur to comply with new servicing requirements. Further, to the extent a GSE or Ginnie Mae proposal or requirement impacts our business model differently than our competitors', we may face a competitive disadvantage.

In addition, our ability to generate revenues through mortgage loan sales to institutional investors depends to a significant degree on programs administered by the GSEs, Ginnie Mae, and others that facilitate the issuance of MBS in the secondary market. These entities play a critical role in the residential mortgage industry and we have significant business relationships with many of them. If it is not possible for us to complete the sale or securitization of certain of our mortgage loans due to changes in GSE and Ginnie Mae programs, we may lack liquidity to continue to fund mortgage loans and our revenues and margins on new loan originations would be materially and negatively impacted.

Our plans to acquire MSRs will require approvals and cooperation by the GSEs and Ginnie Mae. Should approval or cooperation be withheld, we would have difficulty meeting our MSR acquisition objectives.

There are various proposals that deal with the future of the GSEs, including with respect to their ownership and role in the mortgage market, as well as proposals to implement GSE reforms relating to borrowers, lenders and investors in the mortgage market. Thus, the long-term future of the GSEs remains uncertain. Any change in the ownership of the GSEs, or in their

programs or role within the mortgage market, could materially and adversely affect our business, liquidity, financial position and results of operations.

A disruption in the mortgage capital markets may affect our financial and results of operations.

In addition to Fannie Mae, Freddie Mac and Ginnie Mae, we are heavily reliant on the mortgage capital markets to provide liquidity for loans we originate. If the securitization or whole loan markets are disrupted, prices of the loans we have originated and not yet sold could be adversely impacted and/or we could be forced to hold these loans on balance sheet for longer than intended. To the extent we expand our originations business into new non-Agency product offerings, these risks may increase.

An economic slowdown or a deterioration of the housing market could increase both interest expense on servicing advances and operating expenses and could cause a reduction in income from, and the value of, our servicing portfolio.

During any period in which a borrower is not making payments, we are required under most of our servicing contracts to advance our own funds to meet contractual principal and interest remittance requirements for investors, pay property taxes and insurance premiums and process modifications and foreclosures. We also advance funds to maintain, repair and market real estate properties on behalf of investors. Most of our advances have the highest standing and are “top of the waterfall” so that we are entitled to repayment from respective loan or REO liquidations proceeds before most other claims on these proceeds, and in the majority of cases, advances in excess of respective loan or REO liquidation proceeds may be recovered from pool level proceeds. Consequently, the primary impacts of an increase in advances are generally increased interest expense as we finance a large portion of servicing advance obligations and a decline in the fair value of MSRs as the projected funding cost of existing and future expected servicing advances is a component of the fair value of MSRs. Our liquidity is also negatively impacted because we must fund the portion of our advance obligations that is not financed. Our liquidity would be more severely impacted if we were unable to continue to finance a large portion of servicing advance obligations.

Higher delinquencies also decrease the fair value of MSRs and increase our cost to service loans, as loans in default require more intensive effort to bring them current or manage the foreclosure process. An increase in delinquencies may delay the timing of revenue recognition because we recognize servicing fees as earned, which is generally upon collection of payments from borrowers or proceeds from REO liquidations. An increase in delinquencies also generally leads to lower balances in custodial and escrow accounts (float balances) and lower net earnings on custodial and escrow accounts (float earnings). Additionally, an increase in delinquencies in our servicing portfolio will result in lower revenue because we collect servicing fees only on performing loans.

Foreclosures are involuntary prepayments resulting in a reduction in UPB. This may also result in declines in the value of our MSRs.

Adverse economic conditions could also negatively impact our lending businesses. For example, declining home prices and increasing loan-to-value ratios may preclude many borrowers from refinancing their existing loans or obtaining new loans.

Any of the foregoing could adversely affect our business, liquidity, financial condition and results of operations.

A significant increase in prepayment speeds could adversely affect our financial results.

Prepayment speed is a significant driver of our business. Prepayment speed is the measurement of how quickly borrowers pay down the UPB of their loans or how quickly loans are otherwise modified involving forgiveness of principal, liquidated or charged off. Prepayment speeds have a significant impact on our servicing fee revenues, our expenses and on the valuation of our MSRs as follows:

- **Revenue.** If prepayment speeds increase, our servicing fees will decline more rapidly than anticipated because of the greater decrease in the UPB on which those fees are based. The reduction in servicing fees would be somewhat offset by increased float earnings because the faster repayment of loans will result in higher float balances that generate the float earnings. Conversely, decreases in prepayment speeds result in increased servicing fees but lead to lower float balances and float earnings.
- **Expenses.** Faster prepayment speeds result in higher compensating interest expense, which represents the difference between the full month of interest we are required to remit in the month a loan pays off and the amount of interest we collect from the borrower for that month. Slower prepayment speeds also lead to lower compensating interest expense.
- **Valuation of MSRs.** The fair value of MSRs is based on, among other things, projection of the cash flows from the related pool of mortgage loans. The expectation of prepayment speeds is a significant assumption underlying those cash flow projections from the perspective of market participants. Increases or decreases in interest rates have an impact on prepayment rates. If prepayment speeds were significantly greater than expected, the fair value of our MSRs, which we carry at fair value, could decrease. When the fair value of these MSRs decreases, we record a loss on fair value, which also has a negative impact on our financial results.

Operational Risks and Other Risks Related to Our Business

If we do not comply with our obligations under our servicing agreements or if others allege non-compliance, our business and results of operations may be harmed.

We have contractual obligations under the servicing agreements pursuant to which we service mortgage loans. Our non-Agency servicing agreements generally contain detailed provisions regarding servicing practices, reporting and other matters. In addition, PHH is party to seller/servicer agreements and/or subject to guidelines and regulations (collectively, seller/servicer obligations) with one or more of the GSEs, HUD, FHA, VA and Ginnie Mae. These seller/servicer obligations include financial covenants that include capital requirements related to tangible net worth, as defined by the applicable agency, an obligation to provide audited consolidated financial statements within 90 days of the applicable entity's fiscal year end as well as extensive requirements regarding servicing, selling and other matters. To the extent that these requirements are not met or waived, the applicable agency may, at its option, utilize a variety of remedies including requirements to provide certain information or take actions at the direction of the applicable agency, requirements to deposit funds as security for our obligations, sanctions, suspension or even termination of approved seller/servicer status, which would prohibit future originations or securitizations of forward or reverse mortgage loans or servicing for the applicable agency.

Many of our servicing agreements require adherence to general servicing standards, and certain contractual provisions delegate judgment over various servicing matters to us. Our servicing practices, and the judgments that we make in our servicing of loans, could be questioned by parties to these agreements, such as GSEs, Ginnie Mae, trustees or master servicers, or by investors in the trusts which own the mortgage loans or other third parties. As a result, we could be required to repurchase mortgage loans, make whole or otherwise indemnify such mortgage loan investors or other parties. Advances that we have made could be unrecoverable. We could also be terminated as servicer or become subject to litigation or other claims seeking damages or other remedies arising from alleged breaches of our servicing agreements. For example, we are currently involved in a dispute with a former subservicing client relating to alleged violations of our contractual agreements. We are unable to predict the outcome of this dispute or the size of any loss we might incur. In addition, several trustees are currently defending themselves against claims by RMBS investors that the trustees failed to properly oversee mortgage servicers - including Onity - in the servicing of hundreds of trusts. Trustees subject to those suits have informed Onity that they may seek indemnification for losses they suffer as a result of the filings.

Any of the foregoing could have a significant negative impact on our business, financial condition and results of operations. Even if allegations against us lack merit, we may have to spend additional resources and devote additional management time to contesting such allegations, which would reduce the resources available to address, and the time management is able to devote to, other matters.

GSEs or Ginnie Mae may curtail or terminate our ability to sell, service or securitize newly originated loans to them.

As noted in the prior risk factor, if we do not comply with our seller/servicer obligations, the GSEs or Ginnie Mae may utilize a variety of remedies against us. Such remedies include curtailment of our ability to sell newly originated loans or even termination of our ability to sell, service or securitize such loans altogether. Any such curtailment or termination would likely have a material adverse impact on our business, liquidity, financial condition and results of operations.

A significant reduction in, or the total loss of, our remaining Rithm-related servicing would significantly impact our business, liquidity, financial condition and results of operations.

Rithm is one of our largest servicing clients, accounting for 14% of the UPB and 24% of the loan count in our servicing and subservicing portfolio as of December 31, 2024. It is possible that Rithm could exercise its rights to terminate for convenience or opt not to renew some or all of our servicing agreements. See Note 8 — Other Financing Liabilities, at Fair Value for information regarding renewal of our agreements with Rithm.

In addition, any failure by us to comply with a financial covenant could result in Rithm terminating Onity as subservicer under the subservicing agreements or in directing the transfer of servicing away from Onity under the Rights to MSR agreements. Similarly, failure by Onity to meet operational requirements, including service levels, critical reporting and other obligations, could also result in termination or transfer for cause. In addition, if there is a change of control to which Rithm did not consent, Rithm could terminate for cause and direct the transfer of servicing away from Onity. A termination for cause and transfer of servicing could materially and adversely affect Onity's business, liquidity, financial condition and results of operations.

Further, under our Rights to MSR agreements, in certain circumstances, Rithm has the right to sell its Rights to MSR to a third-party and require us to transfer title to the related MSR, subject to an Onity option to acquire at a price based on the winning third-party bid rather than selling to the third party. If Rithm sells its Rights to MSR to a third party, the transaction can only be completed if the third-party buyer can obtain the necessary third-party consents to transfer the MSR. Rithm also has the obligation to use reasonable efforts to encourage such third-party buyer to enter into a subservicing agreement with

Onity. Onity may lose future compensation for subservicing, however, if no subservicing agreement is ultimately entered into with the third-party buyer.

Because of the large percentage of our servicing business that is represented by the agreements with Rithm, if Rithm exercised all or a significant portion of its rights to decline to continue doing business with us we anticipate that we would need to restructure many aspects of our servicing business as well as the related corporate support functions to address our smaller servicing portfolio and we may need to adjust our daily liquidity management due to the reduction of servicing float balances associated with the Rithm agreements.

If Rithm were to fail to comply with its servicing advance obligations under its agreements with us, it could materially and adversely affect us.

Under the Rights to MSRs agreements, Rithm is responsible for financing all servicing advance obligations in connection with the loans underlying the MSRs. At December 31, 2024, such servicing advances made by Rithm were approximately \$408.5 million. However, under the Rights to MSRs structure, we are contractually required under our servicing agreements with the RMBS trusts to make the relevant servicing advances even if Rithm does not perform its contractual obligations to fund those advances. Therefore, if Rithm were unable to meet its advance financing obligations, we would remain obligated to meet any future advance financing obligations with respect to the loans underlying these Rights to MSRs, which could materially and adversely affect our liquidity, financial condition, results of operations and servicing operations.

Rithm currently uses advance financing facilities to fund a substantial portion of the servicing advances that Rithm is contractually obligated to make pursuant to the Rights to MSRs agreements. Although we are not an obligor or guarantor under Rithm's advance financing facilities, we are a party to certain of the facility documents as the entity performing the work of servicing the underlying loans on which advances are being financed. As such, we make certain representations, warranties and covenants, including representations and warranties in connection with our sale of advances to Rithm. If we were to make representations or warranties that were untrue or if we were otherwise to fail to comply with our contractual obligations, we could become subject to claims for damages or events of default under such facilities could be asserted.

If MAV exercises its rights to sell MSRs subserviced by PHH and we are unable to either continue as subservicer of the sold MSRs or replenish our subservicing portfolio to replace the sold MSRs, it could result in our loss of subservicing income and could significantly impact our business, liquidity, financial condition and results of operations.

MAV is one of our largest subservicing clients, accounting for 14% of the UPB and 11% of the loan count in our servicing and subservicing portfolio as of December 31, 2024. Upon the sale of our 15% interest in MAV Canopy in November 2024, PHH and MAV amended the Subservicing Agreement to provide that PHH will have the right to be the exclusive subservicer for an initial term of five years (subject to certain extensions) of all MSRs that MAV currently owns, for all future MSRs that MAV acquires from PHH, and for the majority of MAV's MSR portfolio overall, as defined. In addition, the parties agreed to a six-month lockout during which MAV shall not sell or otherwise transfer any MSRs owned by MAV at the MAV Canopy sale date without the prior consent of PHH. Following this initial six-month period, the lockout restriction is subject to reduction in 25% increments through September 30, 2027. MAV may freely sell or transfer any MSRs thereafter. Under the terms of our Subservicing Agreement, our subservicing rights terminate as to MSRs sold by MAV to any unaffiliated third party.

If MAV chooses to exercise these sale rights, and we are unable to reach an agreement with the purchaser(s) of the MSRs to continue as subservicer, we will lose the corresponding subservicing income. Further, if the MSRs sold by MAV include MSRs previously sold by PHH, we may recognize additional losses on the associated MSR and Pledged MSR liability reported at fair value on our consolidated balance sheets (see Note 12 — Investment in Equity Method Investee and Related Party Transactions).

In addition, MAV has the right to terminate the Subservicing Agreement entirely in the event of certain events of default, including failure by Onity to meet financial or operational requirements, including service levels. MAV may also terminate the Subservicing Agreement in the event of a change of control of Onity or PHH.

Termination of some or all of our subservicing rights due to sales by MAV or termination of the entire Subservicing Agreement for cause could result in the loss of a significant portion of Onity's total subservicing portfolio and materially and adversely affect Onity's business, liquidity, financial condition and results of operations.

Technology or process failures or employee misconduct could damage our business operations or reputation, harm our relationships with key stakeholders and lead to regulatory sanctions or penalties.

We are responsible for developing and maintaining sophisticated operational systems and infrastructure, which is challenging. As a result, operational risk is inherent in virtually all of our activities. In addition, the CFPB and other regulators have emphasized their focus on the importance of servicers' and lenders' systems and infrastructure operating effectively. If our systems and infrastructure fail to operate effectively, such failures could damage our business and reputation, harm our relationships with key stakeholders and lead to regulatory sanctions or penalties.

Our business is substantially dependent on our ability to process and monitor a large number of transactions, many of which are complex, across various parts of our business. These transactions often must adhere to the terms of a complex set of legal and regulatory standards, as well as the terms of our servicing and other agreements. In addition, given the volume of transactions that we process and monitor, certain errors may be repeated or compounded before they are discovered and rectified. For example, because we send over millions of communications in an average month, a process problem such as erroneous letter dating has the potential to negatively affect many parts of our business and have widespread negative implications.

We are similarly dependent on our employees. We could be materially adversely affected if an employee or employees, acting alone or in concert with non-affiliated third parties, causes a significant operational break-down or failure, either because of human error or where an individual purposefully sabotages or fraudulently manipulates our operations or systems, including by means of cyberattack, such as unauthorized data exfiltration or manipulation. In addition to direct losses from such actions, we could be subject to regulatory sanctions or suffer harm to our reputation, financial condition, customer relationships, and ability to attract future customers or employees. Employee misconduct could prompt regulators to allege or to determine based upon such misconduct that we have not established adequate supervisory systems and procedures to inform employees of applicable rules or to detect and deter violations of such rules. It is not always possible to deter employee misconduct, and the precautions we take that are designed to detect and prevent misconduct may not be effective in all cases. Misconduct by our employees, or even unsubstantiated allegations of misconduct, could result in a material adverse effect on our reputation and our business.

Third parties with which we do business could also be sources of operational risk to us, including risks relating to break-downs or failures of such parties' own systems or employees. Any of these occurrences could diminish our ability to operate one or more of our businesses or lead to potential liability to clients, reputational damage or regulatory intervention. We could also be required to take legal action against or replace third-party vendors, which could be costly, involve a diversion of management time and energy and lead to operational disruptions. Any of these occurrences could materially adversely affect us.

We are dependent on Black Knight and other vendors, service provider and other contractual counterparties for much of our technology, business process outsourcing and other services.

Our vendor relationships subject us to a variety of risks. We have significant exposure to third-party risks, as we are dependent on vendors, including Black Knight, Altisource and other vendors for a number of key services to operate our business effectively and in compliance with applicable regulatory and contractual obligations, and on banks and other financing sources to finance our business.

We use the Black Knight MSP servicing system pursuant to a seven-year agreement with Black Knight expiring in 2026, and we are highly dependent on the successful functioning of it to operate our loan servicing business effectively and in compliance with our regulatory and contractual obligations. It would be difficult, costly and complex to transfer all of our loans to another servicing system in the event Black Knight failed to perform under its agreements with us and any such transfer would take considerable time. Any such transfer would also likely be subject us to considerable scrutiny from regulators, GSEs, Ginnie Mae and other counterparties.

If Black Knight were to fail to properly fulfill its contractual obligations to us, including through a failure to provide services at the required level to maintain and support our systems, our business and operations would suffer. In addition, if Black Knight fails to develop and maintain its technology so as to provide us with an effective and competitive servicing system, our business could suffer. Similarly, we are reliant on other vendors for the proper maintenance and support of our technological systems and our business and operations would suffer if these vendors do not perform as required. If our vendors do not adequately maintain and support our systems, including our servicing systems, loan originations and financial reporting systems, our business and operations could be materially and adversely affected.

Altisource and other vendors supply us with other services in connection with our business activities such as property preservation and inspection services and valuation services. In the event that a vendor's activities do not comply with the applicable servicing criteria, we could be exposed to liability as the servicer and it could negatively impact our relationships with our servicing clients, borrowers or regulators, among others. In addition, if our current vendors were to stop providing services to us on acceptable terms, we may be unable to procure alternatives from other vendors in a timely and efficient manner and on acceptable terms, or at all. Further, we may incur significant costs to resolve any such disruptions in service and this could adversely affect our business, financial condition and results of operations.

In addition to our reliance on the vendors discussed above, our business is reliant on a number of technology vendors that provide services such as integrated cloud applications and financial institutions that provide essential banking services on a daily basis. Even short-term interruptions in the services provided by these vendors and financial institutions could be disruptive to our business and cause us financial loss. Significant or prolonged disruptions in the ability of these companies to provide services to us could have a material adverse impact on our operations.

Certain provisions of the agreements underlying our relationships with our vendors, service providers, financing sources and other contractual counterparties could be open to subjective interpretation. Disagreements with these counterparties, including disagreements over contract interpretation, could lead to business disruptions or could result in litigation or arbitration or mediation proceedings, any of which could be expensive and divert senior management's attention from other matters. While we have been able to resolve disagreements with these counterparties in the past, if we were unable to resolve a disagreement, a court, arbitrator or mediator might be required to resolve the matter and there can be no assurance that the outcome of a material disagreement with a contractual counterparty would not materially and adversely affect our business, financing activities, financial condition or results of operations.

We have undergone and continue to undergo significant change to our technology infrastructure and business processes. Failure to adequately update our systems and processes could harm our ability to run our business and adversely affect our results of operations.

We are currently making, and will continue to make, technology investments and process improvements to improve or replace the information processes and systems that are key to managing our business, to improve our compliance management system, and to reduce costs. Additionally, as part of the transition to Black Knight MSP and the integration of our information processes and systems with PHH Corporation, we have undergone and continue to undergo significant changes to our technology infrastructure and business processes. Failure to select the appropriate technology investments, or to implement them correctly and efficiently, could have a significant negative impact on our operations. Furthermore, rapid technological advancements that could make existing products or services obsolete could negatively impact on our operations.

We and the third parties with whom we work are subject to stringent and evolving laws, regulations, and rules, contractual obligations, industry standards, policies and other obligations related to data privacy and security. Our (or the third parties with whom we work) actual or perceived failure to comply with such obligations could lead to regulatory investigations or actions; litigation (including class claims) and mass arbitration demands; fines and penalties; disruptions of our business operations; reputational harm; loss of revenue or profits; and other adverse business consequences.

In the ordinary course of business, we collect, receive, store, process, generate, use, transfer, disclose, make accessible, protect, secure, dispose of, transmit, and share (collectively, process) personal data and other sensitive information, including proprietary and confidential business data, trade secrets, intellectual property, sensitive third-party data, business plans, transactions, and financial information (collectively, sensitive data).

Our data processing activities subject us to numerous data privacy and security obligations, such as various laws, regulations, guidance, industry standards, external and internal privacy and security policies, contractual requirements, and other obligations relating to data privacy and security.

In the United States, federal, state, and local governments have enacted numerous data privacy and security laws, including data breach notification laws, personal data privacy laws, consumer protection laws (e.g., Section 5 of the Federal Trade Commission Act), and other similar laws (e.g., wiretapping laws). Additionally, certain sector-specific regulations, including regarding the financial industry, require additional privacy and security-related obligations. For example, the Gramm-Leach-Bliley Act, as amended, imposes specific requirements relating to the privacy and security of certain "nonpublic personal information" processed by covered financial institutions.

In the past few years, numerous U.S. states have enacted comprehensive privacy laws that impose certain obligations on covered businesses, including providing specific disclosures in privacy notices and affording residents with certain rights concerning their personal data. As applicable, such rights may include the right to access, correct, or delete certain personal data, and to opt-out of certain data processing activities, such as targeted advertising, profiling, and automated decision-making. The exercise of these rights may impact our business and ability to provide our products and services. Certain states also impose stricter requirements for processing certain personal data, including sensitive data, such as conducting data privacy impact assessments. These state laws allow for statutory fines for noncompliance. For example, the California Consumer Privacy Act of 2018 (CCPA), applies to personal data of consumers, business representatives, and employees who are California residents, and requires businesses to provide specific disclosures in privacy notices and honor requests of such individuals to exercise certain privacy rights. The CCPA provides for fines, including increased fines for intentional violations, and allows private litigants affected by certain data breaches to recover significant statutory damages.

Similar laws are being considered in several other states, as well as at the federal and local levels, and we expect more states to pass similar laws in the future. These developments further complicate compliance efforts and increase legal risk and compliance costs for us and the third parties with whom we work.

Our employees and personnel use generative artificial intelligence ("AI") technologies to perform their work, and the disclosure and use of personal data in generative AI technologies is subject to various privacy laws and other privacy obligations. Governments have passed and are likely to pass additional laws regulating generative AI. Our use of this

technology could result in additional compliance costs, regulatory investigations and actions, and lawsuits. If we are unable to use generative AI, it could make our business less efficient and result in competitive disadvantages.

In addition to data privacy and security laws, we are bound by other contractual obligations related to data privacy and security, and our efforts to comply with such obligations may not be successful.

We publish privacy policies, marketing materials, and other statements, such as statements related to compliance with certain certifications or self-regulatory principles, concerning data privacy and security. Regulators are increasingly scrutinizing these statements, and if these policies, materials, or statements are found to be deficient, lacking in transparency, deceptive, unfair, misleading, or misrepresentative of our practices, we may be subject to investigation, enforcement actions by regulators, or other adverse consequences.

Obligations related to data privacy and security (and consumers' data privacy expectations) are quickly changing, becoming increasingly stringent, and creating uncertainty. Additionally, these obligations may be subject to differing applications and interpretations, which may be inconsistent or conflict among jurisdictions. Preparing for and complying with these obligations requires us to devote significant resources and has in the past and may in the future necessitate changes to our services, information technologies, systems, and practices and to those of any third parties that process personal data on our behalf.

We may at times fail (or be perceived to have failed) in our efforts to comply with our data privacy and security obligations. Moreover, despite our efforts, our personnel or third parties with whom we work may fail to comply with such obligations, which could negatively impact our business operations. If we or the third parties on which we rely fail, or are perceived to have failed, to address or comply with applicable data privacy and security obligations, we could face significant consequences, including but not limited to: government enforcement actions (e.g., investigations, fines, penalties, audits, inspections, and similar); litigation (including class-action claims) and mass arbitration demands; additional reporting requirements and/or oversight; bans on processing personal data; and orders to destroy or not use personal data. In particular, plaintiffs have become increasingly more active in bringing privacy-related claims against companies, including class claims and mass arbitration demands. Some of these claims allow for the recovery of statutory damages on a per violation basis, and, if viable, carry the potential for monumental statutory damages, depending on the volume of data and the number of violations. Any of these events could have a material adverse effect on our reputation, business, or financial condition, including but not limited to: loss of customers; inability to process personal data or to operate in certain jurisdictions; limited ability to develop or commercialize our products; expenditure of time and resources to defend any claim or inquiry; adverse publicity; or substantial changes to our business model or operations.

Cybersecurity risks and the failure to maintain the security, confidentiality, integrity, and availability of our information technology systems or data, and those maintained on our behalf, could result in a material adverse impact to our business, including without limitation regulatory investigations or actions, a material interruption to our ability to provide services to our customers, damage to our reputation and/or subject us to costs, fines and penalties or lawsuits and otherwise adversely affect our operations.

In the ordinary course of our business, we and the third parties with whom we work process sensitive data, and, as a result, we and the third parties with whom we work face a variety of evolving threats that could cause security incidents. Cyberattacks, malicious internet-based activity, online and offline fraud, and other similar activities threaten the confidentiality, integrity, and availability of our sensitive data and information technology systems, and those of the third parties with whom we work. We have programs in place designed to detect and respond to security incidents. However, because the techniques used to obtain unauthorized access, disable or degrade service, or sabotage systems change frequently and may be difficult to detect for long periods of time, we may be unable to anticipate these techniques or implement adequate preventive measures. While none of the cybersecurity incidents that we have experienced to date have had a material adverse impact on our business, financial condition or operations, recent cybersecurity incidents involving our vendors and other contractual counterparties briefly impacted our operations, and we cannot assure that future third-party incidents will not materially and adversely impact us.

Security breaches, malicious code (such as viruses and worms), phishing attacks, cyberattacks, ransomware attacks, hacking, social-engineering attacks (including through deep fakes, which are increasingly more difficult to identify as fake, and phishing attacks), malware (including as a result of advanced persistent threat intrusions), denial-of-service attacks, credential stuffing, credential harvesting, personnel misconduct or error, supply-chain attacks, software bugs, server malfunctions, software or hardware failures, loss of data or other information technology assets, adware, attacks enhanced or facilitated by AI, telecommunications failures, earthquakes, fires, floods, and other similar threats could result in a compromise or breach of the technology that we or our vendors use to protect our sensitive data and other information that we must keep secure. In particular, severe ransomware attacks are becoming increasingly prevalent and can lead to significant interruptions in our operations, ability to provide our products or services, loss of sensitive data and income, reputational harm, and diversion of

funds. Extortion payments may alleviate the negative impact of a ransomware attack, but we may be unwilling or unable to make such payments due to, for example, applicable laws or regulations prohibiting such payments.

Remote work has increased risks to our information technology systems and data, as more of our employees utilize network connections, computers, and devices outside our premises or network, including working at home, while in transit and in public locations. Additionally, future or past business transactions (such as acquisitions or integrations) could expose us to additional cybersecurity risks and vulnerabilities, as our systems could be negatively affected by vulnerabilities present in acquired or integrated entities' systems and technologies. Furthermore, we may discover security issues that were not found during due diligence of such acquired or integrated entities, and it may be difficult to integrate companies into our information technology environment and security program.

We take steps designed to detect, mitigate, and remediate vulnerabilities in our information systems (such as our hardware and/or software, including that of third parties with whom we work). We may not, however, detect and remediate all such vulnerabilities including on a timely basis. Unremediated high risk or critical vulnerabilities pose material risks to our business and we may experience delays in deploying remedial measures and patches designed to address identified vulnerabilities. Furthermore, our financial, accounting, data processing or other operating systems and facilities (or those of our vendors) may fail to operate properly or become disabled as a result of events that are wholly or partially beyond our control, such as a cyberattack, a spike in transaction volume or unforeseen catastrophic events, potentially resulting in data loss and adversely affecting our ability to process transactions or otherwise operate our business. If one or more of these events occurs, this could potentially jeopardize data integrity or confidentiality of information processed and stored in, or transmitted through, our computer systems and networks. Any failure, interruption or breach of our computer systems and networks could result in reputational harm, disruption of our customer relationships, or an inability to originate and service loans and otherwise operate our business.

Applicable data privacy and security obligations may require us, or we may voluntarily choose, to notify relevant stakeholders, including affected individuals, customers, regulators, and investors, of security incidents (including those impacting our vendors), or to take other actions, such as providing credit monitoring and identity theft protection services, and we have done so in the past. Such disclosures and related actions can be costly, and the disclosure or the failure to comply with such applicable requirements could lead to adverse consequences.

Further, if we (or a third party with whom we work) experience a security incident or are perceived to have experienced a security incident, we could experience material adverse consequences, such as government enforcement actions (for example, investigations, fines, penalties, audits, and inspections); additional reporting requirements and/or oversight; restrictions on processing sensitive data (including personal data); litigation (including class claims); indemnification obligations; negative publicity; reputational harm; monetary fund diversions; diversion of management attention; interruptions in our operations (including availability of data); financial loss; and other similar harms. Security incidents and attendant consequences may prevent or cause customers to stop using our services, deter new customers from using our services, and negatively impact our ability to grow and operate our business.

Regulators may impose penalties or require remedial action if they identify weaknesses in our systems, and we may be required to incur significant costs to address any identified deficiencies or to remediate any harm caused. A number of states have specific reporting and other requirements with respect to cybersecurity in addition to applicable federal laws. For instance, the NY DFS Cybersecurity Regulation requires New York insurance companies, banks, and other regulated financial services institutions - including certain Onity entities licensed in the state of New York - to assess their cybersecurity risk profile. Regulated entities are required, among other things, to adopt the core requirements of a cybersecurity program, including a cybersecurity policy, effective access privileges, cybersecurity risk assessments, training and monitoring for all authorized users, and appropriate governance processes. This regulation also requires regulated entities to submit notices to the NY DFS of any security breaches or other cybersecurity events, and to certify their compliance with the regulation on an annual basis. In addition, consumers generally are concerned with security breaches and privacy on the Internet, and Congress or individual states could enact new laws regulating the use of technology in our business that could adversely affect us or result in significant compliance costs.

As part of our business, we may share sensitive data with customers, vendors, service providers, and business partners. Our ability to monitor these third parties' information security practices is limited and the information systems of these third parties may be vulnerable to security breaches as these third parties may not have appropriate security controls in place to protect the sensitive data we share with them. If our sensitive data is intercepted, stolen, misused, or mishandled while in possession of a third party, it could result in reputational harm to us, loss of customer business, and additional regulatory scrutiny, and it could expose us to civil litigation and possible financial liability, any of which could have a material adverse effect on our results of operations, financial condition and liquidity. While we may be entitled to damages if our third-party vendors and/or service providers fail to satisfy their privacy or security-related obligations to us, any award may be insufficient to cover our damages, or we may be unable to recover such award.

Our insurance coverage may not be adequate or sufficient to protect us from or to mitigate liabilities arising out of our privacy and security practices, such coverage may not continue to be available on commercially reasonable terms or at all, and such coverage may not pay future claims.

Damage to our reputation could adversely impact our financial results and ongoing operations.

Our ability to serve and retain customers and conduct business transactions with our counterparties could be adversely affected to the extent our reputation is damaged. Our failure to address, or to appear to fail to address, the various regulatory, operational and other challenges facing Onity could give rise to reputational risk that could cause harm to us and our business prospects. Reputational issues may arise from the following, among other factors:

- negative news about Onity or the mortgage industry generally;
- allegations of non-compliance with legal and regulatory requirements;
- ethical issues, including alleged deceptive or unfair servicing or lending practices;
- our practices relating to collections, foreclosures, property preservation, modifications, interest rate adjustments, loans impacted by natural disasters, escrow and insurance;
- consumer privacy concerns;
- consumer financial fraud;
- data security issues related to our customers or employees;
- cybersecurity issues and cyber incidents, whether actual, threatened, or perceived;
- customer service or consumer complaints;
- legal, reputational, credit, liquidity and market risks inherent in our businesses;
- a downgrade of or negative watch warning on any of our servicer or credit ratings; and
- alleged or perceived conflicts of interest.

The proliferation of social media websites as well as the personal use of social media by our employees and others, including personal blogs and social network profiles, also may increase the risk that negative, inappropriate or unauthorized information may be posted or released publicly that could harm our reputation or have other negative consequences, including as a result of our employees interacting with our customers in an unauthorized manner in various social media outlets. The failure to address, or the perception that we have failed to address, any of these issues appropriately could give rise to increased regulatory action, which could adversely affect our results of operations.

The industry in which we operate is highly competitive, and, to the extent we fail to meet these competitive challenges, it would have a material adverse effect on our business, financial position, results of operations or cash flows.

We operate in a highly competitive industry that could become even more competitive as a result of economic, legislative, regulatory or technological changes. Competition to service mortgage loans and for mortgage loan originations comes primarily from commercial banks and savings institutions and non-bank lenders and mortgage servicers. Many of our competitors are substantially larger and have considerably greater financial, technical and marketing resources, and lower funding costs. Further, our competitors that are national banks may also benefit from a federal exemption from certain state regulatory requirements that is applicable to depository institutions. In addition, some of our competitors may have higher risk tolerances or different risk assessments, which could allow them to consider a wider variety of revenue generating options (e.g., originating types of loans that we choose not to originate) and establish more favorable relationships than we can. With the proliferation of smartphones and technological changes enabling improved payment systems and cheaper data storage, newer market participants, often called “disruptors,” are reinventing aspects of the financial industry and capturing profit pools previously enjoyed by existing market participants. As a result, the lending industry could become even more competitive if new market participants are successful in capturing market share from existing market participants such as ourselves. Competition to service mortgage loans may result in lower margins. Because of the relatively limited number of servicing clients, our failure to meet the expectations of any significant client could materially impact our business. Onity has suffered reputational damage as a result of our regulatory settlements and the associated scrutiny of our business. We believe this may have weakened our competitive position against both our bank and non-bank mortgage servicing competitors. These competitive pressures could have a material adverse effect on our business, financial condition or results of operations.

The unexpected departure of key executives or an inability to attract and retain qualified personnel could harm our business, financial condition and results of operations.

We are highly dependent on an experienced leadership team, including our Chair, President and Chief Executive Officer, Glen A. Messina. We do not maintain key man life insurance relating to Mr. Messina or any other executive officer. The unexpected loss of the services of Mr. Messina or any of our other senior officers could have a material adverse effect on us.

More generally, our future success depends, in part, on our ability to identify, attract and retain highly skilled servicing, lending, finance, risk, compliance and technical personnel. We face intense competition for qualified individuals from

numerous financial services and other companies, some of which have greater resources, better recent financial performance, fewer regulatory challenges and better reputations than we do.

If we are unable to attract and retain the personnel necessary to conduct our originations business, or other operations, or if the costs of doing so rise significantly, it could negatively impact our financial condition and results of operations.

The human capital components of our ongoing cost-reduction efforts could disrupt operations, impair productivity and reduce morale, which could have a material adverse effect on our operations, business and financial performance.

As part of our ongoing initiatives to reduce operating costs, we reduced both our U.S.-based and APAC staffing levels in 2023 and 2024. While we believe these planned departures are necessary in order to simplify our operations and drive stronger financial performance, internal reorganizations and personnel turnover add uncertainty to our operations in the short-term and divert management and employee attention from our other initiatives. In addition, the reduction in our workforce may negatively impact employee morale. It is possible that critical employees may seek other employment, and if we have misjudged the number or allocation of positions needed to run our operations efficiently, critical functions could be understaffed. Finally, our workforce reductions, management changes and internal reorganization could potentially invite increased regulatory inquiries. Any of the above risks, or a combination of these risks, could impair our ability to realize intended productivity increases and cost savings and result in a material adverse effect on our business and operating results.

We have operations in India and the Philippines that could be adversely affected by changes in the political or economic stability of these countries or by government policies in India, the Philippines or the U.S.

Approximately 2,900, or 67%, of our employees as of December 31, 2024 are located in India. A significant change in India's economic liberalization and deregulation policies could adversely affect business and economic conditions in India generally and our business in particular. The political or regulatory climate in the U.S. or elsewhere also could change so that it would not be lawful or practical for us to use international operations in the manner in which we currently use them. For example, changes in regulatory requirements could require us to curtail our use of lower-cost operations in India to service our businesses. If we had to curtail or cease our operations in India and transfer some or all of these operations to another geographic area, we could incur significant transition costs as well as higher future overhead costs that could materially and adversely affect our results of operations.

We may need to increase the levels of our employee compensation more rapidly than in the past to retain talent in India. Unless we can continue to enhance the efficiency and productivity of our employees, wage increases in the long-term may negatively impact our financial performance.

Political activity or other changes in political or economic stability in India and the Philippines could affect our ability to operate our business effectively. In 2023, for instance, our Philippines operations were briefly impacted by a series of transportation strikes. While we have implemented and maintain business continuity plans to reduce the disruption such events cause to our critical operations, we cannot guarantee that such plans will eliminate any negative impact on our business. Depending on the frequency and intensity of future occurrences of instability, our India or Philippines operations could be significantly adversely affected.

There are a number of foreign laws and regulations that are applicable to our operations in India and the Philippines, including laws and regulations that govern licensing, employment, privacy and data security, safety, taxes and insurance and laws and regulations that govern the creation, continuation and winding up of companies as well as the relationships between shareholders, our corporate entities, the public and the government in these countries. Non-compliance with the laws and regulations of India or the Philippines could result in (i) restrictions on our operations in these countries, (ii) fines, penalties or sanctions or (iii) reputational damage.

Our operations are vulnerable to disruptions resulting from severe weather events.

Our operations are vulnerable to disruptions resulting from severe weather events, including our operations in India, the Philippines, the USVI and Florida. Approximately 3,300, or 76%, of our employees as of December 31, 2024 are located in India or the Philippines. In recent years, severe weather events caused disruptions to our operations in India, the Philippines, and the USVI and we incurred expense resulting from the evacuation of personnel and from property damage. In addition, employees located in Pennsylvania, New Jersey and Texas have been impacted by severe weather events in recent years, including as a result of power failures due to such events which temporarily prevented some remote employees from working. While we have implemented and maintain business continuity plans to reduce the disruption such events cause to our critical operations, we cannot guarantee that such plans will eliminate any negative impact on our business, including the cost of evacuation and repairs. As the frequency of severe weather events continues to increase in connection with rising global temperatures and other climatic changes, interruptions to our business operations may become more frequent and costly, and future weather events could have a significant adverse effect on our business and results of operations.

If a rise in severe weather events increases the proportion of borrowers facing financial hardship, our servicing operations and financial condition could be negatively impacted.

Certain regions of the U.S. have experienced an increase in the frequency and severity of significant weather events during the last decade, resulting in costly property repairs and rising homeowner's insurance costs. To the extent borrowers living in impacted areas experience a financial hardship and become unable to meet their mortgage obligations or choose to abandon severely damaged property, our servicing operations will become more costly due to the increased expense of servicing delinquent mortgages and managing REO property. While we have programs in place to assist homeowners negatively impacted by weather events and other emergencies, we cannot guarantee that these programs would mitigate impacts to all borrowers. Consequently, if the frequency and severity of weather events continues to increase and the regions subject to extreme weather continue to expand, the results of our servicing operations and financial condition could be significantly impacted.

A significant portion of our business is in the states of California, Texas, Florida, New Jersey and New York, and our business may be significantly harmed by a slowdown in the economy or the occurrence of a natural disaster in those states.

A significant portion of the mortgage loans that we service and originate are secured by properties in California, Texas, Florida, New Jersey and New York. Any adverse economic conditions in these markets, including a downturn in real estate values, could increase loan delinquencies. Delinquent loans are more costly to service and require us to advance delinquent principal and interest and to make advances for delinquent taxes and insurance and foreclosure costs and the upkeep of vacant property in foreclosure to the extent that we determine that such amounts are recoverable. We could also be adversely affected by business disruptions triggered by incidents impacting specific geographic areas such as acts of terrorism or natural disasters, including the recent California wildfires, with respect to which we have not fully completed our analysis but do not presently expect to have a material impact on our business.

Reinsuring risk through our captive reinsurance entity could adversely impact our results of operation and financial condition.

If our captive reinsurance entity incurs losses from a severe catastrophe or series of catastrophes, particularly in areas where a significant portion of the insured properties are located, claims that result could substantially exceed our expectations, which could adversely impact our results of operation and financial condition. An increase in the frequency with which severe weather events occur in the U.S. would increase the risk of adverse impacts on our captive reinsurance business.

Pursuit of business or asset acquisitions exposes us to financial, execution and operational risks that could adversely affect us.

We are actively looking for opportunities to grow our business through acquisitions of businesses and assets. The performance of the businesses and assets we acquire through acquisitions may not match the historical performance of our other assets. Nor can we assure you that the businesses and assets we may acquire will perform at levels meeting our expectations. We may find that we overpaid for the acquired businesses or assets or that the economic conditions underlying our acquisition decision have changed. It may also take several quarters or longer for us to fully integrate newly acquired businesses and assets into our business, during which period our results of operations and financial condition may be negatively affected. Further, certain one-time expenses associated with such acquisitions may have a negative impact on our results of operations and financial condition. We cannot assure you that acquisitions will not adversely affect our liquidity, results of operations and financial condition.

The risks associated with acquisitions include, among others:

- unanticipated issues in integrating servicing, information, communications and other systems;
- unanticipated incompatibility in servicing, lending, purchasing, logistics, marketing and administration methods;
- unanticipated liabilities assumed from the acquired business;
- not retaining key employees; and
- the diversion of management's attention from ongoing business concerns.

The acquisition integration process can be complicated and time consuming and could potentially be disruptive to borrowers of loans serviced by the acquired business. If the integration process is not conducted successfully and with minimal effect on the acquired business and its borrowers, we may not realize the anticipated economic benefits of particular acquisitions within our expected timeframe, or we could lose subservicing business or employees of the acquired business. In addition, integrating operations may involve significant reductions in headcount or the closure of facilities, which may be disruptive to operations and impair employee morale. Through acquisitions, we may enter into business lines in which we have not previously operated. Such acquisitions could require additional integration costs and efforts, including significant time from senior management. We may not be able to achieve the synergies we anticipate from acquired businesses, and we may not be able to grow acquired businesses in the manner we anticipate. In fact, the businesses we acquire could decrease in size, even if the integration process is successful.

Further, prices at which acquisitions can be made fluctuate with market conditions. We have experienced times during which acquisitions could not be made in specific markets at prices that we considered to be acceptable, and we expect that we will experience this condition in the future. In addition, to finance an acquisition, we may borrow funds, thereby increasing our leverage and diminishing our liquidity, or we could raise additional equity capital, which could dilute the interests of our existing shareholders.

The timing of closing of our acquisitions is often uncertain. We have in the past and may in the future experience delays in closing our acquisitions, or certain aspects of them. For example, we and the applicable seller are often required to obtain certain regulatory and contractual consents as a prerequisite to closing, such as the consents of GSEs, the FHFA, RMBS trustees or regulators. Accordingly, even if we and the applicable seller are efficient and proactive, the actions of third parties can impact the timing under which such consents are obtained. We and the applicable seller may not be able to obtain all the required consents, which may mean that we are unable to acquire all the assets that we wish to acquire. Regulators may have questions relating to aspects of our acquisitions and we may be required to devote time and resources responding to those questions. It is also possible that we will expend considerable resources in the pursuit of an acquisition that, ultimately, either does not close or is terminated.

Loan put-backs and related liabilities for breaches of representations and warranties regarding sold loans could adversely affect our business.

We have exposure to representation, warranty and indemnification obligations relating to our Originations business, including lending, loan sales and securitization activities, and in certain instances, we have assumed these obligations on loans we service. Our contracts with purchasers of originated loans generally contain provisions that require indemnification or repurchase of the related loans under certain circumstances. While the language in the purchase contracts varies, such contracts generally contain provisions that require us to indemnify purchasers of loans or repurchase such loans if:

- representations and warranties concerning loan quality, contents of the loan file or loan underwriting circumstances are inaccurate;
- adequate mortgage insurance is not secured within a certain period after closing;
- a mortgage insurance provider denies coverage; or
- there is a failure to comply, at the individual loan level or otherwise, with regulatory requirements.

We believe that many purchasers of residential mortgage loans are particularly aware of the conditions under which originators must indemnify or repurchase loans and under which such purchasers would benefit from enforcing any indemnification rights and repurchase remedies they may have.

If home values decrease, our realized loan losses from loan repurchases and indemnifications may increase as well. As a result, our liability for repurchases may increase beyond our current expectations. Depending on the magnitude of any such increase, our business, financial condition and results of operations could be adversely affected.

We originate and securitize FHA-insured HECM reverse mortgages, which subjects us to risks that could have a material adverse effect on our business, reputation, liquidity, financial condition and results of operations.

We originate, securitize and service FHA-insured HECM mortgages. The reverse mortgage business is subject to substantial risks, including market, credit, interest rate, liquidity, operational, reputational and legal risks. Generally, a HECM reverse mortgage is a government-insured loan available to seniors aged 62 or older that allows homeowners to borrow money against the value of their home. No repayment of the mortgage is required until a default event under the terms of the mortgage occurs such as the borrower fails to pay real estate taxes or maintain proper insurance, the borrower dies, the borrower moves out of the home, or the home is sold. Foreclosures involving HECM reverse mortgages generally occur more frequently than forward mortgages. HUD HECM reverse mortgage program requires foreclosure upon death of the borrower. Borrower's heirs have very limited loss mitigation options under the HECM program, either payoff the debt at a discount (95% of UPB) or go through probate, a costly, time-consuming process, in order to sell the property or complete a deed in lieu of foreclosure. In addition, uncured loan defaults on HECM reverse mortgages can lead to foreclosures if borrowers fail to occupy the home as their primary residence, maintain their property or fail to pay taxes or home insurance premiums. A general increase in foreclosure rates may adversely impact how HECM reverse mortgages are perceived by potential customers and thus reduce demand for HECM reverse mortgages. A decline in the demand for HECM reverse mortgages may reduce the number of HECM reverse mortgages we originate and adversely affect our ability to sell HECM reverse mortgages in the secondary market. Additionally, we could become subject to negative headline risk in the event that loan defaults on HECM reverse mortgages lead to foreclosures or evictions of the elderly. The HUD HECM reverse mortgage program has in the past responded to scrutiny around similar issues by implementing rule changes, and may do so in the future. It is not possible to predict whether any such rule changes would negatively impact us. All of the above factors could have a material adverse effect on our business, reputation, liquidity, financial condition and results of operations.

Our HMBS repurchase obligations may reduce our liquidity, and if we are unable to comply with such obligations, it could materially adversely affect our business, financial condition, and results of operations.

As an HMBS issuer, we assume the obligation to purchase loans out of the Ginnie Mae securitization pools once the outstanding principal balance of the related HECM is equal to or greater than 98% of the maximum claim amount (MCA repurchases). Active repurchased loans are assigned to HUD and payment is typically received within 60 days of repurchase. HUD reimburses us for the outstanding principal balance on the loan up to the maximum claim amount. We bear the risk of exposure if the amount of the outstanding principal balance on a loan exceeds the maximum claim amount. Inactive repurchased loans (the borrower is deceased, no longer occupies the property or is delinquent on tax and insurance payments) are generally liquidated through foreclosure and subsequent sale of REO, with a claim filed with HUD for recoverable remaining principal and advance balances. The recovery timeline for inactive repurchased loans depends on various factors, including foreclosure status at the time of repurchase, state-level foreclosure timelines, and the post-foreclosure REO liquidation timeline. The timing and amount of our obligations with respect to MCA repurchases are uncertain as repurchase is dependent largely on circumstances outside of our control. MCA repurchases are expected to continue to increase due to the seasoning of our portfolio, the acquisition of more seasoned portfolios, and the increased flow of HECMs and REO that are reaching 98% of their maximum claim amount.

If we do not have sufficient liquidity or borrowing capacity to comply with our Ginnie Mae repurchase obligations, Ginnie Mae could take adverse action against us, including terminating us as an approved HMBS issuer. In addition, if we are required to purchase a significant number of loans with respect to which the outstanding principal balances exceed HUD's maximum claim amount, we could be required to absorb significant losses on such loans following assignment to HUD. In the case of inactive loans, active loans whereby we strategically opted to not assign the loans to HUD, and active loans with collateral defects preventing assignment, we could be required to absorb significant losses on such loans following liquidation and subsequent claim for HUD reimbursement. Further, during the periods in which HUD reimbursement is pending, our available borrowing or liquidity will be reduced by the repurchase amounts and we will have reduced resources with which to further other business objectives. For all of the foregoing reasons, our liquidity, business, financial condition, and results of operations could be materially and adversely impacted by our HMBS repurchase obligations.

Liabilities relating to our past sales of Agency MSRs could adversely affect our business.

We have made representations, warranties and covenants relating to our past sales of Agency MSRs, including sales made by PHH Corporation before we acquired it. To the extent that we (including PHH Corporation prior to its acquisition by us) made inaccurate representations or warranties or if we fail otherwise to comply with our sale agreements, we could incur liability to the purchasers of these MSRs pursuant to the contractual provisions of these agreements.

We may incur litigation costs and related losses if the validity of a foreclosure action is challenged by a borrower or if a court overturns a foreclosure.

We may incur costs if we are required to, or if we elect to, execute or re-file documents or take other action in our capacity as a servicer in connection with pending or completed foreclosures. We may incur litigation costs if the validity of a foreclosure action is challenged by a borrower. If a court were to overturn a foreclosure because of errors or deficiencies in the foreclosure process, we may have liability to a title insurer of the property sold in foreclosure. These costs and liabilities may not be legally or otherwise reimbursable to us, particularly to the extent they relate to securitized mortgage loans. In addition, if certain documents required for a foreclosure action are missing or defective, we could be obligated to cure the defect or repurchase the loan. A significant increase in litigation costs could adversely affect our liquidity, and our inability to be reimbursed for servicing advances could adversely affect our business, financial condition or results of operations.

A failure to maintain minimum servicer ratings could have an adverse effect on our business, financing activities, financial condition or results of operations.

S&P, Moody's, Fitch and others rate us as a mortgage servicer. Failure to maintain minimum servicer ratings could adversely affect our ability to sell or fund servicing advances going forward, could affect the terms and availability of debt financing facilities that we may seek in the future, and could impair our ability to consummate future servicing transactions or adversely affect our dealings with lenders, other contractual counterparties and regulators, including our ability to maintain our status as an approved servicer by Fannie Mae and Freddie Mac. The servicer rating requirements of Fannie Mae do not necessarily require or imply immediate action, as Fannie Mae has discretion with respect to whether we are in compliance with their requirements and what actions it deems appropriate under the circumstances in the event that we fall below their desired servicer ratings.

Certain of our servicing agreements require that we maintain specified servicer ratings. As a result of our current servicer ratings, termination rights have been triggered in some non-Agency servicing agreements. While the holders of these termination rights have not exercised them to date, they have not waived the right to do so, and we could, in the future, be subject to terminations either as a result of servicer ratings downgrades or future adverse actions by ratings agencies, which

could have an adverse effect on our business, financing activities, financial condition and results of operations. Downgrades in our servicer ratings could also affect the terms and availability of advance financing or other debt facilities that we may seek in the future. Our failure to maintain minimum or specified ratings could adversely affect our dealings with contractual counterparties, including GSEs, Ginnie Mae and regulators, any of which could have a material adverse effect on our business, financing activities, financial condition and results of operations. To date, terminations as servicer as a result of a breach of any of these provisions have been minimal.

Tax Risks

Changes in tax laws and interpretation and tax challenges may adversely affect our financial condition and results of operations.

The enactment of Federal Tax Reform has had, and is expected to continue to have, far reaching and significant effects. Further, U.S. tax authorities may at any time clarify and/or modify by legislation, administration or judicial changes or interpretation the income tax treatment of corporations. Such changes could adversely affect us.

In the course of our business, we are sometimes subject to challenges from taxing authorities, including the Internal Revenue Service (IRS), individual states, municipalities, and foreign jurisdictions, regarding amounts due. These challenges may result in adjustments to the timing or amount of taxable income or deductions, the allocation of income among tax jurisdictions, or the rate of tax imposed in such jurisdiction, all of which may require a greater provision for taxes or otherwise adversely affect our financial condition and results of operations.

Failure to retain the tax benefits provided by the USVI would adversely affect our financial condition and results of operations.

During 2019, in connection with our acquisition of PHH Corporation, overall corporate simplification and cost-reduction efforts, we executed a legal entity reorganization whereby OLS, through which we previously conducted a substantial portion of our servicing business, was merged into PHH. OLS was previously the wholly-owned subsidiary of OMS, which was incorporated and headquartered in the USVI prior to its merger with Ocwen USVI Services, LLC, an entity which is also organized and headquartered in the USVI. The USVI has an Economic Development Commission (EDC) that provides certain tax benefits to qualified businesses. OMS received its certificate to operate as a company qualified for EDC benefits in October 2012 and as a result received significant tax benefits. Following our legal entity reorganization, we are no longer able to avail ourselves of favorable tax treatment for our USVI operations on a going forward basis. However, if the EDC were to determine that we failed to conduct our USVI operations in compliance with EDC qualifications prior to our reorganization, the value of the EDC benefits corresponding to the period prior to the reorganization could be reduced or eliminated, resulting in an increase to our tax expense. In addition, under our agreement with the EDC, we remain obligated to continue to operate Ocwen USVI Services, LLC in compliance with EDC requirements through 2042. If we fail to maintain our EDC qualification, we could be alleged to be in violation of our EDC commitments and the EDC could take adverse action against us, which could include demands for payment and reimbursement of past tax benefits, and it could result in the loss of anticipated income tax refunds. If any of these events were to occur, it could adversely affect our financial condition and results of operations.

In December 2022, we executed an agreement with the USVI Bureau of Internal Revenue (BIR) for payment of the income tax refunds related to tax years 2013 through 2015, plus accrued interest, over a two-year period ending December 31, 2024. The BIR did not make the payment that was due on December 31, 2023 nor any subsequent payments pursuant to the agreement. On February 8, 2024, we filed a lawsuit against the USVI for the refund of income taxes paid in prior years and for the USVI's breach of the above-referenced agreement.

We may be subject to increased U.S. federal income taxation.

OMS was incorporated under the laws of the USVI and operated in a manner that caused a substantial amount of its net income to be treated as not related to a trade or business within the U.S., which caused such income to be exempt from U.S. federal income taxation. However, because there are no definitive standards provided by the Internal Revenue Code (the Code), regulations or court decisions as to the specific activities that constitute being engaged in the conduct of a trade or business within the U.S., and as any such determination is essentially factual in nature, we cannot assure you that the IRS will not successfully assert that OMS was engaged in a trade or business within the U.S. with respect to that income.

If the IRS were to successfully assert that OMS had been engaged in a trade or business within the U.S. with respect to that income in any taxable year, it may become subject to U.S. federal income taxation on such income. Our tax returns and positions are subject to review and audit by federal and state taxing authorities. An unfavorable outcome to a tax audit could result in higher tax expense.

Any “ownership change” as defined in Section 382 of the Internal Revenue Code could substantially limit our ability to utilize our net operating losses carryforwards and other deferred tax assets.

Onity has U.S. federal, state and USVI net operating loss (NOL) carryforwards, state tax credit carryforwards, and disallowed interest expense carryforwards under Section 163(j) in the U.S. jurisdiction - Refer to Note 21 — Income Taxes. NOL carryforwards, Section 163(j) disallowed interest expense carryforwards and certain built-in losses or deductions may be subject to annual limitations under Internal Revenue Code Section 382 (Section 382) (or comparable provisions of foreign or state law) in the event that certain changes in ownership were to occur as measured under Section 382. In addition, tax credit carryforwards may be subject to annual limitations under Internal Revenue Code Section 383 (Section 383). We periodically evaluate whether certain changes in ownership have occurred as measured under Section 382 that would limit our ability to utilize our NOLs, tax credit carryforwards, deductions and/or certain built-in losses. If it is determined that an ownership change(s) has occurred, there may be annual limitations under Sections 382 and 383 (or comparable provisions of foreign or state law).

Onity and PHH Corporation have both experienced historical ownership changes that have caused the use of certain tax attributes to be limited and have resulted in the write-off of certain of these attributes based on our inability to use them in the carryforward periods defined under tax law. Onity continues to monitor the ownership in its stock to evaluate whether any additional ownership changes have occurred that would further limit our ability to utilize certain tax attributes. As such, our analysis regarding the amount of tax attributes that may be available to offset taxable income in the future without restrictions imposed by Section 382 may continue to evolve. Our inability to utilize our pre-ownership change NOL carryforwards, Section 163(j) disallowed interest carryforwards, any future recognized built-in losses or deductions, and tax credit carryforwards could have an adverse effect on our financial condition, results of operations and cash flows. Finally, any future changes in our ownership or sale of our stock could further limit the use of our NOLs and tax credits in the future.

Risks Relating to Ownership of Our Common Stock

Our common stock price experiences substantial volatility and has dropped significantly on a number of occasions in recent periods, which may affect your ability to sell our common stock at an advantageous price.

The market price of our shares of common stock has been, and may continue to be, volatile. For example, the closing market price of our common stock on the New York Stock Exchange fluctuated during 2024 between \$22.48 per share and \$34.10 per share, and the closing stock price on February 14, 2025 was \$35.66 per share. Therefore, the volatility in our stock price may affect your ability to sell our common stock at an advantageous price. Market price fluctuations in our common stock may be due to factors both within and outside our control, including regulatory or legal actions, acquisitions, dispositions or other material public announcements or speculative trading in our stock (e.g., traders “shorting” our common stock), as well as a variety of other factors including, but not limited to those set forth under this Item 1.A. Risk Factors .

In addition, the stock markets in general, including the New York Stock Exchange, have, at times, experienced extreme price and trading fluctuations. These fluctuations have resulted in volatility in the market prices of securities that often has been unrelated or disproportionate to changes in operating performance. These broad market fluctuations may adversely affect the market prices of our common stock.

When the market price of a company's shares drops significantly, shareholders often institute securities class action lawsuits against the company. A lawsuit against us, even if unsuccessful, could cause us to incur substantial costs and could divert the time and attention of our management and other resources.

We have several large shareholders, and such shareholders may vote their shares to influence matters requiring shareholder approval.

Based on SEC filings, we understand several shareholders each own or control over five percent of our common stock. These large shareholders individually and collectively have the ability to vote a meaningful percentage of our outstanding common stock on all matters put to a vote of our shareholders. As a result, these shareholders could influence matters requiring shareholder approval, including the amendment of our articles of incorporation, the approval of mergers or similar transactions and the election of directors. If situations arise in which management and certain large shareholders have divergent views, we may be unable to take actions management believes to be in the best interests of Onity.

Further, certain of our large shareholders also hold significant percentages of stock in companies with which we do business. It is possible these interlocking ownership positions could cause these shareholders to take actions based on factors other than solely what is in the best interests of Onity.

Our Board of Directors may authorize the issuance of additional securities that may cause dilution and may depress the price of our securities.

Our articles of incorporation permit our Board of Directors, without our stockholders' approval, to:

- authorize the issuance of additional common stock or preferred stock in connection with future equity offerings or acquisitions of securities or other assets of companies; and
- classify or reclassify any unissued common stock or preferred stock and to set the preferences, rights and other terms of the classified or reclassified shares, including the issuance of shares of preferred stock that have preference rights over the common stock and existing preferred stock with respect to dividends, liquidation, voting and other matters or shares of common stock that have preference rights over common stock with respect to voting.

While any such issuance would be subject to compliance with the terms of our debt and other agreements, our issuance of additional securities could be substantially dilutive to our existing stockholders and may depress the price of our common stock.

Future offerings of debt securities, which would be senior to our common stock in liquidation, or equity securities, which would dilute our existing stockholders' interests and may be senior to our common stock in liquidation or for the purposes of distributions, may harm the market price of our securities.

We will continue to seek to access the capital markets from time to time and, subject to compliance with our other contractual agreements, may make additional offerings of term loans, debt or equity securities, including senior or subordinated notes, preferred stock or common stock. We are not precluded by the terms of our articles of incorporation from issuing additional indebtedness. Accordingly, we could become more highly leveraged, resulting in an increase in debt service obligations and an increased risk of default on our obligations. If we were to liquidate, holders of our debt and lenders with respect to other borrowings would receive a distribution of our available assets before the holders of our common stock. Additional equity offerings by us may dilute our existing stockholders' interest in us or reduce the market price of our existing securities. Because our decision to issue securities in any future offering will depend on market conditions and other factors beyond our control, we cannot predict or estimate the amount, timing or nature of our future offerings. Further, conditions could require that we accept less favorable terms for the issuance of our securities in the future. Thus, our existing stockholders will bear the risk of our future offerings reducing the market price of our securities and diluting their ownership interest in us.

Because of certain provisions in our organizational documents and regulatory restrictions, takeovers may be more difficult, possibly preventing you from obtaining an optimal share price. In addition, significant investments in our common stock may be restricted, which could impact demand for, and the trading price of, our common stock.

Our amended and restated articles of incorporation provide that the total number of shares of all classes of capital stock that we have authority to issue is 33.3 million, of which 13.3 million are common shares and 20.0 million are preferred shares, of which 2.4 million have been designated as Series B Preferred Stock. See Note 16 — Mezzanine Equity. Our Board of Directors has the authority, without a vote of the shareholders, to establish the preferences and rights of any preferred or other class or series of shares to be issued and to issue such shares. The issuance of preferred shares could delay or prevent a change in control. Since our Board of Directors has the power to establish the preferences and rights of the preferred shares without a shareholder vote, our Board of Directors may give the holders of preferred shares preferences, powers and rights, including voting rights, senior to the rights of holders of our common shares. In addition, our bylaws include provisions that, among other things, require advance notice for raising business or making nominations at meetings, which could impact the ability of a third party to acquire control of us or the timing of acquiring such control.

Third parties seeking to acquire us or make significant investments in us must do so in compliance with state regulatory requirements applicable to licensed mortgage servicers and lenders. Many states require change of control applications for acquisitions of "control" as defined under each state's laws and regulation, which may apply to an investment without regard to the intent of the investor. For example, New York has a control presumption triggered at 10% ownership of the voting stock of the licensee or of any person that controls the licensee. In addition, we have licensed insurance subsidiaries in New York and Vermont. Accordingly, there can be no effective change in control of Onity unless the person seeking to acquire control has made the relevant filings and received the requisite approvals in New York and Vermont. These regulatory requirements may discourage potential acquisition proposals or investments, may delay or prevent a change in control of us and may impact demand for, and the trading price of, our common stock.

ITEM 1B. UNRESOLVED STAFF COMMENTS

None.

ITEM 1C. CYBERSECURITY

Risk Management and Strategy

We have established information designed to identify, assess, and manage cybersecurity risks that could impact our critical information systems and confidential data. Our information security team employs a variety of methods to identify and evaluate material risks from cybersecurity threats, including risk and control self-assessments, vulnerability assessments and penetration testing, breach and attack simulations, ransomware table-top assessments, cyber threat intelligence reviews, as well as internal and external cybersecurity assessments.

To mitigate and manage these risks, we have implemented various technical, physical, and organizational safeguards. Depending on the environment or system, these safeguards include, for example, information security policies and procedures, perimeter security controls such as firewalls and intrusion prevention systems, network security controls including multi-factor authentication and role-based access controls, and server and endpoint security controls such as anti-malware. Additionally, depending on the environment or system, we utilize certain application security controls, data security controls including encryption, data loss prevention controls, immutable data backups, and security awareness programs for our personnel.

Our assessment and management of material risks from cybersecurity threats are integrated into our broader enterprise risk management strategies. Cybersecurity risks are categorized according to our enterprise risk assessment guidelines and are tracked in a centralized enterprise risk system. Cybersecurity risks are periodically reviewed by our IT Risk Committee and Enterprise Risk and Compliance Committee (discussed further below). We also engage third-party service providers for assistance in identifying, assessing, and managing cybersecurity risks. In the past, these third parties have provided us with services that include external penetration testing, cybersecurity audits, legal counsel, threat intelligence information, forensic investigations, and managed security service.

In addition, we have processes in place for assessing and managing cybersecurity risks associated with third-party service providers. Vendors are categorized based on a set of criteria that assess the importance of their services and the sensitivity of the information and systems they have access to. Depending on the nature of the services provided, the sensitivity of information systems and data at issue, and the identity of the provider, our vendor management process may involve different levels of assessment designed to help identify cybersecurity risks associated with the provider, such as due diligence questionnaires and periodic assessments, and we track the status of reported third party risks within our centralized risk governance framework.

In 2023 and 2024, cybersecurity incidents occurred involving our vendors and other contractual counterparties that did not materially and adversely impact our operations. However, we cannot assure that future third party incidents will not materially and adversely impact us. For a description of the risks from cybersecurity threats that may materially affect us and how they may do so, see our risk factors under Part 1. Item 1A. Risk Factors in this annual report on Form 10-K, including “Cybersecurity risks and the failure to maintain the security, confidentiality, integrity, and availability of our information technology systems or data, and those maintained on our behalf, could result in a material adverse impact to our business, including without limitation regulatory investigations or actions, a material interruption to our ability to provide services to our customers, damage to our reputation and/or subject us to costs, fines and penalties or lawsuits and otherwise adversely affect our operations.”

Cybersecurity Governance

Our Board of Directors addresses Onity’s cybersecurity risk management as part of its general oversight function. The Risk and Compliance Committee of the Board of Directors is responsible for overseeing Onity’s overall risk management processes, including cybersecurity-related risks, and receives periodic updates from the Chief Information Security Officer (CISO) concerning Onity’s significant cybersecurity threats and the processes Onity has implemented to address them. The Chair of our Risk and Compliance Committee and our Lead Independent Director have each received training and certification from the National Association of Corporate Directors Cyber-Risk Oversight Program.

Our cybersecurity risk assessment and management processes are implemented and maintained by the CISO and the information security team. The CISO is responsible for cybersecurity staffing and maintaining an up-to-date cybersecurity policy and processes framework designed to promote a strong cybersecurity resilience, drive security awareness, and facilitate a coordinated response to cybersecurity incidents. The IT Risk Committee, which is chaired by the Chief Information Officer (CIO) and includes the CISO, Chief Risk and Compliance Officer (CRCO) and other executive leadership team members, reviews cybersecurity risks and initiatives on a periodic basis.

In addition to their decades of experience and qualifications in finance and management, our CIO holds a Bachelor’s Degree in Computer Engineering and Master’s Degree in Computer Science, our CISO holds a Bachelor’s Degree in Electronics Engineering and has completed industry certifications including Certified Information Security Auditor, Certified Information Systems Security Professional, and ISO 27001 Lead Auditor, and our CRCO has received training in financial services cybersecurity risk management for legal professionals. In addition, all Onity executives, along with employees

generally, are required to refresh their cybersecurity and IT threat-recognition training annually or more frequently if circumstances warrant.

Cybersecurity-related risk events are reported to Onity's Enterprise Risk and Compliance Committee, an executive level management committee designed to assist the Chief Executive Officer and CRCO in executing our Enterprise Risk Management Program, including with respect to cybersecurity. The Enterprise Risk and Compliance Committee provides a formal governance and oversight infrastructure for identifying and monitoring cybersecurity risks and compliance-related issues facing Onity, which includes escalation to the Risk and Compliance Committee of the Board as appropriate.

In addition, our cybersecurity incident response processes are designed to escalate material cybersecurity incidents to members of management as part of the enterprise level Crisis Management Framework. The CISO, CIO, CRCO and senior operating unit leaders are part of the crisis management team in an effort to promote the prompt investigation of and response to cybersecurity incidents.

ITEM 2. PROPERTIES

Onity Group Inc. is headquartered in West Palm Beach, Florida, at 1661 Worthington Road, Suite 100. We have offices and facilities in the U.S., the USVI, India and the Philippines, all of which are leased. The following table sets forth information relating to our principal facilities at December 31, 2024:

Location	Owned/Leased	Square Footage
Principal executive offices		
West Palm Beach, Florida	Leased	41,858
Document storage and imaging facility		
West Palm Beach, Florida	Leased	51,931
Business operations and support offices		
U.S. facilities:		
Mt. Laurel, New Jersey (1)	Leased	18,270
Rancho Cordova, California (2)	Leased	8,094
Houston, Texas - Walters Road (3)	Leased	15,678
St. Croix, USVI (4)	Leased	6,096
APAC facilities (1)		
Bangalore, India	Leased	22,325
Mumbai, India	Leased	15,218
Pune, India	Leased	3,826
Manila, Philippines	Leased	13,134
Former operations and support offices no longer utilized		
Houston, Texas - Walters Road (3)	Leased	29,901

- (1) Supports our servicing and lending operations, as well as our corporate functions.
- (2) Primarily supports reverse lending operations. Effective August 2024, we terminated the lease on 17,157 square feet of space and entered into a new lease agreement.
- (3) Primarily supports our reverse servicing operations. Effective February 2025, we exercised the early termination option to terminate the lease on 36,171 square feet of space (including on 29,901 square feet, which was previously abandoned) and the lease term for the remaining space was extended through January 2028.
- (4) Primarily supports our forward servicing operations.

We regularly evaluate current and projected space requirements, considering the constraints of our existing lease agreements and the expected scale of our businesses. We operate through a hybrid workforce model which combines remote work for substantially all of our global workforce and in-office when required. During 2024, we exited a total of 18,995 of leased square feet.

ITEM 3. LEGAL PROCEEDINGS

See Note 27 — Contingencies to the Consolidated Financial Statements for a description of our material legal proceedings. That information is incorporated into this item by reference.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

The common stock of Onity Group Inc. is traded under the symbol "ONIT" on the NYSE.

Dividends

We have never declared or paid cash dividends on our common stock. We currently do not intend to pay cash dividends in the foreseeable future but intend to reinvest earnings in our business. The timing and amount of any future dividends will be determined by our Board of Directors and will depend, among other factors, upon our earnings, financial condition, cash requirements, the capital requirements of subsidiaries and investment opportunities at the time any such payment is considered. Our Board of Directors has no obligation to declare dividends on our common stock under Florida law or our amended and restated articles of incorporation.

Stock Return Performance

The following graph compares the cumulative total shareholder return (TSR) on the common stock of Onity Group Inc. since December 31, 2019, with the cumulative TSR on the stocks included in (i) the Russell 2000 Index and (ii) the peer group of companies Onity uses to inform compensation decisions. We have chosen to present the Russell 2000 for comparison purposes because we believe the Russell 2000 is comprised of companies which more closely resemble Onity in terms of market capitalization than other indices. We have selected our peer group for comparison purposes because Onity's management uses information about the peer group to make compensation decisions and we believe that information is relevant to our shareholders. The Compensation and Human Capital Committee of Onity's Board of Directors determines the constitution of our peer group after considering the recommendations of our independent compensation consultant, who identifies potential peers based on a number of metrics including industry classification, revenues, assets and number of employees. Our Compensation and Human Capital Committee modified the peer group in 2023 on the recommendation of our independent compensation consultant in order to ensure the constituent companies remain aligned with Onity in key metrics.

The Compensation and Human Capital Committee selected the following peer group as the comparator for benchmarking, including competitors in the mortgage finance industry and mortgage real estate investment trusts.

Associated Banc-Corp	Mr. Cooper Group Inc.
Axos Financial, Inc.	PennyMac Financial Services, Inc.
BankUnited, Inc.	Radian Group Inc.
Finance of America Companies, Inc.	South State Corporation
Guild Holdings Company	UWM Holdings Corporation
LendingTree, Inc.	Walker & Dunlop, Inc.
loanDepot, Inc.	Webster Financial Corporation
MGIC Investment Corporation	WSFS Financial Corporation

The cumulative TSR performance of peer group companies Guild Holdings Company, loanDepot Inc. and UWM Holdings is not included in the weighted average cumulative TSR calculation because they were publicly listed after the beginning of the five-year measurement period.

The graph assumes that \$100 was invested in our common stock, each index listed below, and each company in the peer group (except as described above) on December 31, 2019, and the reinvestment of all dividends. The returns of each peer group company are weighted according to their respective stock market capitalization at the beginning of the period.

Index / Peer Group	Period Ending					
	12/31/2019	12/31/2020	12/31/2021	12/31/2022	12/31/2023	12/31/2024
Onity Group Inc.	\$ 100.00	\$ 140.68	\$ 194.50	\$ 148.81	\$ 149.68	\$ 149.44
Russell 2000	\$ 100.00	\$ 118.36	\$ 134.57	\$ 105.56	\$ 121.49	\$ 133.66

This performance graph shall not be deemed “filed” for purposes of Section 18 of the Securities Exchange Act of 1934, as amended, or incorporated by reference into any filing by us under the Securities Act of 1933, as amended, except as shall be expressly set forth by specific reference in such filing.

Number of Holders of Common Stock

On February 14, 2025, 7,873,053 shares of our common stock were outstanding and held by approximately 44 holders of record. Such number of stockholders does not reflect the number of individuals or institutional investors holding our stock in nominee name through banks, brokerage firms and others.

Unregistered Sales of Equity Securities and Use of Proceeds

All unregistered sales of equity securities have been previously disclosed.

Purchases of Equity Securities by the Issuer and Affiliates

We did not repurchase any shares of our common stock during the quarter ended December 31, 2024.

ITEM 6. [RESERVED]

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS (Dollars in millions, except per share amounts and unless otherwise indicated)

The Management's Discussion and Analysis of Financial Condition and Results of Operations section of this Form 10-K generally discusses 2024 and 2023 items and provides year-to-year comparisons between 2024 and 2023. Discussions of year-to-year comparisons between 2023 and 2022 are not included in this Form 10-K and can be found in "Management's Discussion and Analysis of Financial Condition and Results of Operations" in Part II, Item 7 of our Annual Report on Form 10-K for the year ended December 31, 2023 filed with the SEC on February 27, 2024.

OVERVIEW

General

We are a leading non-bank mortgage servicer and originator providing solutions through our primary brands, PHH Mortgage and Liberty Reverse Mortgage. PHH is one of the largest non-bank servicers in the country based on UPB, focused on delivering a variety of servicing and lending programs. PHH is also one of the largest correspondent lenders in the U.S. based on origination UPB. Liberty is one of the nation's largest reverse mortgage lenders and servicers based on origination and securitization UPB, dedicated to education and providing loans that help customers meet their personal and financial needs by drawing upon their home equity. We serviced or subserviced 1.4 million loans with a total UPB of \$301.7 billion on behalf of more than 4,000 investors and 125 subservicing clients as of December 31, 2024. We service all mortgage loan classes, including conventional, government-insured, non-Agency, small-balance commercial and multi-family loans. Our Originations business is part of our balanced business model to generate gains on loan sales and profitable returns, and to support the replenishment and the growth of our servicing portfolio. Through our retail, correspondent and wholesale channels, we originate and purchase conventional and government-insured forward and reverse mortgage loans that we sell or securitize on a servicing retained basis. In addition, we grow our mortgage servicing volume through MSR flow purchase agreements, Agency Cash Window and co-issue programs, bulk MSR purchase transactions, and subservicing agreements. On June 10, 2024, Ocwen Financial Corporation changed its name to Onity Group Inc.

Volume Overview

The table below summarizes the volume of Originations by channel during 2024, compared with the volume of the two preceding years. The volume of Originations is a key driver of the profitability of our Originations segment, along with margins, and also a key driver of the replenishment and growth of our Servicing segment. In 2024, we added \$85.6 billion of new volume, with \$44.9 billion of new subservicing, \$29.7 billion of new Originations production, and \$10.9 billion in bulk acquisitions, as further detailed in the below table.

\$ In billions

	UPB			\$ Change	
	Years Ended December 31,			2024 vs 2023	2023 vs 2022
	2024	2023	2022		
Mortgage servicing originations					
Retail - Consumer Direct MSR (1)	\$ 0.9	\$ 0.4	\$ 1.2	\$ 0.5	\$ (0.9)
Correspondent MSR (1)	16.1	12.2	15.6	4.0	(3.4)
Flow and Agency Cash Window MSR purchases (2)	11.9	9.1	11.3	2.8	(2.3)
Reverse mortgage servicing (3)	0.8	0.7	1.4	0.1	(0.8)
Total servicing	29.7	22.3	29.5	7.4	(7.2)
Bulk MSR purchases (2) (4)	10.9	0.5	4.5	10.4	(4.1)
Total servicing additions	40.6	22.8	34.0	17.9	(11.3)
Interim forward subservicing	7.9	6.8	12.6	1.1	(5.8)
Other new forward subservicing	36.5	19.4	29.0	17.1	(9.5)
Reverse subservicing	0.5	1.4	13.2	(0.9)	(11.9)
Total Subservicing additions (5)	44.9	27.6	54.8	17.3	(27.2)
Total servicing and subservicing UPB additions	\$ 85.6	\$ 50.4	\$ 88.8	\$ 35.2	\$ (38.4)

- (1) Represents the UPB of loans that have been originated or purchased (funded) during the respective periods and for which we recognize a new MSR on our consolidated balance sheets upon sale or securitization.
- (2) Represents the UPB of loans for which the MSR is purchased.
- (3) Represents the UPB of reverse mortgage loans that have been securitized on a servicing retained basis. The loans are recognized on our consolidated balance sheets under GAAP without any separate recognition of MSRs.
- (4) Bulk MSR purchases include \$3.9 billion UPB for which PHH was previously performing the subservicing that were purchased from third parties in 2024.
- (5) Includes interim subservicing, including the volume of UPB associated with short-term interim subservicing for certain clients as a support to their originate-to-sell business.

The following table summarizes the average volume of our Servicing segment in 2024, compared with the two preceding years. The average servicing volume is a key driver of the profitability of our Servicing segment. The relative weight of performing and delinquent loans or servicing and subservicing also drive the amount and timing of gross revenue and expenses. In 2024, our total average servicing and subservicing portfolio increased \$7.1 billion, or 2%, net of runoff and sales, primarily driven by \$8.1 billion of subservicing additions. Our average owned MSR servicing portfolio stayed relatively flat year over year, with a \$0.8 billion, or 1% decrease.

<i>\$ in billions</i>	Average UPB			\$ Change	
	Years Ended December 31,			2024 vs 2023	2023 vs 2022
	2024	2023	2022		
Owned MSR	\$ 123.0	\$ 123.8	\$ 121.9	\$ (0.8)	\$ 1.9
Subservicing (including reverse subservicing)	64.5	56.4	57.0	8.1	(0.7)
Rithm	43.1	47.0	52.0	(3.9)	(5.0)
MAV	50.0	51.9	42.5	(2.0)	9.4
Other MSR capital partners	9.1	4.6	—	4.5	4.6
Reverse mortgage loans (owned)	9.0	7.8	7.4	1.2	0.4
Other servicing (including whole loans)	0.9	0.9	0.8	—	0.2
Total servicing and subservicing UPB (average)	\$ 299.6	\$ 292.4	\$ 281.6	\$ 7.1	\$ 10.9

As of December 31, 2024 and 2023, the total servicing and subservicing UPB amounted to \$301.7 billion and \$288.4 billion, respectively, a net increase of \$13.3 billion or 4.6%.

The following table presents key market interest rates which are important drivers of our businesses. As further discussed, the 30-year fixed rate mortgage is a key driver of Originations volume, the 10-year Treasury rate is a key benchmark for MSR valuation and hedging activities, and the 1-month SOFR is a key benchmark for the profitability of our Servicing segment (including float earnings and asset-backed financing cost).

	Years Ended December 31,		
	2024	2023	2022
30-year fixed rate mortgage (FRM) (1)			
Average	6.72%	6.80%	5.30%
End of period	6.85%	6.61%	6.42%
10-year Treasury rate (end of period)	4.58%	3.88%	3.88%
1-month Term SOFR (average)	5.11%	5.07%	1.85%

(1) Source: Freddie Mac PMMS - Primary Mortgage Market Survey

In 2024, the average 30-year fixed rate mortgage rate remained mostly flat (down 8 basis points vs. 2023) resulting in a continued depressed origination market due to borrower affordability. The Federal Reserve reduced its federal funds target rate a total of 1 percentage point between September and December 2024 (50-basis point reduction in September and consecutive 25-basis point reductions in November and December). Despite the Federal Reserve actions the 10-year Treasury rate increased by 70 basis points year over year, driving MSR fair values up. The average 1-month term SOFR remained flat (up 4 basis points vs. 2023) following the Federal Reserve respective actions in 2023 and 2024, as illustrated in the below graph.

In 2023, mortgage interest rates continued to rise following the decision of the Federal Reserve to continue to raise its federal funds target rate (with four times a 25-basis point increase from February to July 2023), resulting in the 30-year fixed rate mortgage reaching its peak 7.79% in October, 2023 and its yearly average up 1.5 percentage points higher than the prior year. This rate increase continued to depress the origination market, significantly limiting refinance opportunities and maintaining pressure on borrower affordability. The 30-year fixed rate mortgage dropped in the fourth quarter of 2023 to return to levels similar to December 31, 2022 (up 19 basis points). Similarly, while the 10-year Treasury rate, a benchmark for MSR fair value changes attributable to rates, stayed flat year-over-year, it increased 140 basis points from March 31, 2023 to October 31, 2023 and decreased 100 basis points from October 31, 2023 to December 31, 2023.

The following graph compares market interest rates over the current and comparative periods:

Financial Highlights

Results of operations for 2024

- Net income attributable to common stockholders of \$33 million, or \$4.28 income per share basic and \$4.13 diluted
- Servicing and subservicing fee revenue of \$832 million
- Originations gain on sale of \$58 million
- \$60 million MSR valuation gain attributable to rate and assumption changes, net of hedging

Financial condition at the end of the year

- Stockholders' equity of \$443 million, or \$56.26 book value per common share
- MSR investment of \$2.5 billion, and \$301.7 billion total servicing and subservicing UPB
- Cash position of \$185 million
- Total assets of \$16.4 billion

Business Strategy

We established the following strategy to return to sustainable profitability and create long-term value for shareholders:

- **Balance and diversification:** Maintain a scale position in origination and servicing to address market-cycle opportunities;
- **Prudent capital-light growth:** Emphasize on capital-light subservicing to drive servicing portfolio UPB growth and expand higher margin products and origination channels to drive accretive MSR investments;
- **Industry-leading cost structure:** Achieve industry cost leadership through continuous cost and process improvement, optimizing global operations and technology, and drive innovation, including artificial intelligence based solutions;
- **Top-tier operating performance and capabilities:** Deliver industry top-tier servicing operational performance and increase borrower and client satisfaction;
- **Dynamic asset management:** Optimize investment returns and liquidity through dynamic and opportunistic asset purchases and sales.

Our growth and asset management strategy includes purchasing assets and/or operations of complementary businesses, by means of acquisition, merger or other transaction forms. Our strategy may also include pursuing large transactions, including bulk purchases or sales of MSRs. We have engaged in such transactions in the past, and we continue to explore opportunities that may be accretive to our business and stockholders' value.

Results of Operations and Financial Condition

The following discussion and analysis of our results of operations and financial condition should be read in conjunction with our audited consolidated financial statements and the related notes thereto appearing elsewhere in this Annual Report on

Form 10-K. The segment information presented below is prepared under GAAP, consistent with the amounts included in our consolidated financial statements.

Condensed Statements of Operations	Years Ended December 31,			% Change	
	2024	2023	2022	2024 vs 2023	2023 vs 2022
Revenue	\$ 976.0	\$ 1,066.7	\$ 953.9	(9)%	12 %
MSR valuation adjustments, net	(96.2)	(232.2)	(10.4)	(59)	n/m
Operating expenses	436.5	412.1	532.4	6	(23)
Other income (expense), net	(404.1)	(480.5)	(386.2)	(16)	24
Income (loss) before income taxes	39.3	(58.1)	24.9	(168)	(333)
Income tax expense (benefit)	5.3	5.6	(0.8)	(4)	(795)
Net income (loss)	33.9	(63.7)	25.7	(153)	(348)
Segment income (loss) before income taxes					
Servicing	\$ 172.8	\$ 9.9	\$ 127.7	n/m	(92)%
Originations	30.4	(2.0)	2.9	n/m	(169)
Corporate	(163.9)	(66.1)	(105.7)	148	(37)
	\$ 39.3	\$ (58.1)	\$ 24.9	(168)%	(333)%

n/m: not meaningful

Onity reported \$33.9 million net income in 2024, as compared to a \$63.7 million net loss in 2023, or a net improvement of \$97.6 million, mostly driven by the following:

- A \$136.1 million lower loss on MSR valuation adjustments, net, primarily driven by higher market interest rates (the 10-year Treasury rate remained flat in 2023, and increased 70 basis points in 2024) and favorable assumption updates as compared to unfavorable updates in 2023 to reflect actual market trade pricing levels;
- A \$13.7 million net gain on the sale of our investment in MAV Canopy in November 2024;
- A \$49.4 million loss on debt extinguishment primarily mostly due to our corporate debt refinancing in November 2024 and redemption of the PMC Senior Secured Notes due 2026 and Onity Senior Secured Notes due 2027;
- A \$32.4 million increase in Originations profitability driven by higher volumes, with our increased recapture operational capability and our MSR replenishment strategy following bulk sales; and
- The reversal of litigation accruals in 2023 (within Professional services expenses) related to the resolution of the CFPB and other matters.

Revenue and Other income (expense) decreased due to the effects of our accounting derecognition of MSRs previously sold to Rithm for which the sale accounting criteria were met effective December 31, 2023 (\$124.9 million servicing fees recognized in 2023 with remittance reported as Pledged MSR liability expense in Other income (expense)). On December 31, 2023, we derecognized from our balance sheet \$421.7 million non-Agency MSRs and Pledged MSR liability associated with Rithm servicing agreements with a UPB of \$33.4 billion for which MSR sale accounting criteria was met. As PHH continues to subservice the portfolio, our statement of operations in 2024 reflects subservicing fee revenue as opposed to the gross presentation of servicing fee revenue and offsetting servicing fee remittances within Pledged MSR liability expense, a component of Other income (expense), net, prior to December 31, 2023. These required presentation changes do not affect the amount of net fee retained by Onity in connection with the Rithm servicing agreements.

Total Revenue

The below table presents total revenue by segment:

	Years Ended December 31,			% Change	
	2024	2023	2022	2024 vs 2023	2023 vs 2022
Servicing and subservicing fees	\$ 832.5	\$ 947.3	\$ 862.6	(12)%	10%
Gain on reverse loans held for investment and HMBS-related borrowings, net	42.5	\$ 46.7	\$ 36.1	(9)	29
Gain on loans held for sale, net	59.0	\$ 40.6	\$ 22.0	45	85
Other revenue, net	42.0	\$ 32.0	\$ 33.2	31	(4)
Total revenue	<u>\$ 976.0</u>	<u>\$ 1,066.7</u>	<u>\$ 953.9</u>	(9)%	12%
Servicing	\$ 866.7	\$ 994.6	\$ 828.5	(13)%	20%
Originations	109.3	72.1	141.1	52	(49)
Corporate	—	—	—	100	n/m
Total segment revenue (1)	<u>\$ 976.0</u>	<u>\$ 1,066.7</u>	<u>\$ 969.6</u>	(9)	10

(1) Refer to Note 24 — Business Segment Reporting for a reconciliation to Total revenue for 2022.

Total segment revenue for 2024 was \$90.7 million, or 9%, lower as compared to 2023 predominantly due to the accounting derecognition of Rithm servicing fees described above (\$124.9 million servicing fees presented gross in 2023), partially offset by a \$37.1 million increase in Originations revenue driven by higher volume.

- The \$114.7 million decrease in Servicing and subservicing fees is mainly due to the effects of our accounting derecognition of MSRs previously sold to Rithm, partly offset by \$10.5 million higher collection of previously deferred non-Agency servicing fees, among other factors.
- The \$4.3 million decline in Gain on reverse loans held for investment and HMBS-related borrowings, net is mostly driven by increasing interest rates partially offset by yield spread tightening (and is part of our MSR hedging strategy, see below).
- The \$18.4 million increase in Gain on loans held for sale, net is due to a \$27.3 million increase in Originations mostly attributed to higher volumes, partly offset by \$8.9 million lower gains in Servicing attributed to reverse mortgage buyouts. The increase in Originations volume is notable in both our Consumer Direct and Correspondent channels with our increased recapture operational capability and our owned MSR replenishment strategy following opportunistic MSR bulk sales.
- The \$10.0 million increase in Other revenue, net is largely driven by fees on higher loan production volume.

MSR Valuation Adjustments, Net

The table below presents the components of MSR valuation adjustments, net which include MSRs, MSR pledged liabilities and ESS financing liabilities at fair value, along with MSR hedging derivatives:

	Years Ended December 31,		
	2024	2023	2022
Realization of expected cash flows (runoff)	\$ (156.6)	\$ (143.6)	\$ (164.5)
Fair value gains (losses) due to rate and assumption changes	173.3	(55.5)	261.0
MSR hedging derivative fair value gain (loss)	(112.9)	(33.1)	(106.9)
MSR valuation adjustments, net (1)	<u>\$ (96.2)</u>	<u>\$ (232.2)</u>	<u>\$ (10.4)</u>

(1) Excludes fair value changes of reverse mortgage loans held-for-investment and HMBS related borrowing due to rates and assumptions that are part of the MSR hedging strategy. Refer to the MSR Hedging Strategy section of Item 7A. Quantitative and Qualitative Disclosures about Market Risks for further detail and the discussion below within Servicing.

The \$96.2 million loss on MSR valuation adjustments, net in 2024 is comprised of \$156.6 million runoff, \$173.3 million fair value gain attributed to rates and assumption changes and \$112.9 million loss on MSR hedging derivatives. MSR valuation adjustments, net decreased by \$136.1 million (lower loss) in 2024 compared to 2023 largely driven by interest rates, favorable assumption updates and changes in our hedge coverage ratio, as discussed below.

- MSRs are subject to runoff, a fair value decline due to the realization of expected cash flows and yield based on projected borrower behavior, including scheduled amortization of the loan UPB together with projected voluntary prepayments. The unfavorable \$13.0 million increase in runoff year-over-year is mostly due to the impact of higher market rate changes on expected cash flows.
- The \$173.3 million fair value gain due to rates and assumptions in 2024 is largely attributed to favorable assumption updates to reflect market participant perspectives on MSRs and actual market trade pricing levels and an increase in interest rates. The change from a \$55.5 million fair value loss in 2023 to a \$173.3 million fair value gain in 2024 is mostly driven by changes in market interest rates as the 10-year Treasury rate increased 70 basis points in 2024 (flat in 2023) and favorable assumption updates to reflect actual market trade pricing levels in 2024 as compared to unfavorable updates to reflect market participant perspectives on MSR fair value with actual trade pricing levels in 2023.
- MSR hedging derivative fair value gains or losses are designed to partially offset the expected fair value losses or gains, respectively, of the net MSR, MSR pledged liabilities and ESS exposure, commensurate with our target hedge coverage ratio. The \$112.9 million derivative loss is primarily driven by the increase in market interest rates discussed above. The \$79.7 million year-over-year increase in hedging losses is mainly due to market interest rates changes noted above, also considering the change in our hedge coverage ratio. During 2023, we gradually increased our minimum hedge coverage ratio from 25% to 60%, with the minimum increasing to 95% in December 2023, adjusted to 90% in April 2024. Also refer to Item 7A. Quantitative and Qualitative Disclosures about Market Risk for further detail on our hedging strategy and its effectiveness.

Operating Expenses

The table below presents the key components of operating expenses:

	Years Ended December 31,			% Change	
	2024	2023	2022	2024 vs 2023	2023 vs 2022
Compensation and benefits	\$ 232.5	\$ 229.2	\$ 289.4	1 %	(21)%
Servicing and origination	52.3	57.3	64.9	(9)	(12)
Technology and communications	52.9	52.5	57.9	1	(9)
Professional services	52.6	22.3	49.3	136	(55)
Occupancy, equipment and mailing	31.4	31.8	41.8	(1)	(24)
Other expenses	14.7	19.0	29.1	(23)	(35)
Total operating expenses	\$ 436.5	\$ 412.1	\$ 532.4	6 %	(23)%
Servicing	\$ 273.0	\$ 301.7	\$ 315.6	(10)%	(4)%
Originations	88.3	80.8	148.5	9	(46)
Corporate	75.2	29.6	68.3	154	(57)
	\$ 436.5	\$ 412.1	\$ 532.4	6 %	(23)%
Average headcount	4,374	4,670	5,476	(6)	(15)

Compensation and benefits expense for 2024 increased \$3.3 million, or 1%, as compared to 2023 largely due to an \$8.9 million increase in incentive compensation attributed to our improved financial performance in 2024 and a \$3.1 million increase in commissions due to higher production volume in our Originations segment, partially offset by a \$6.1 million decrease in salaries and benefits. Our total average headcount declined 6% (including a 11% decline in total average U.S. based headcount), driven by efficiencies in our Servicing activities and runoff of our reverse servicing portfolio.

Servicing and origination expense for 2024 decreased \$5.0 million, or 9%, as compared to 2023, mostly driven by a \$10.7 million decrease in Servicing expense, partially offset by \$5.1 million higher Originations expense. The decrease in Servicing expense is primarily due to lower claim loss on Ginnie Mae loan repurchases, and recoveries and favorable resolutions of our indemnification obligations in 2024. The increase in Originations expense was driven by higher production volume and a provision release for representation and warranty indemnification recorded in 2023 due to favorable resolution of demands.

Professional services expense for 2024 increased \$30.3 million, or 136%, as compared to 2023 primarily due to the reversal of our loss contingency accrual related to the CFPB and other matters resolved in 2023 and an increase in other litigation-related expenses recognized in 2024, largely offset by higher recoveries of prior year expenses in 2024 as compared to 2023.

Other Income (Expense)

	Years Ended December 31,			% Change	
	2024	2023	2022	2024 vs 2023	2023 vs 2022
Interest income	\$ 93.3	\$ 78.0	\$ 45.6	20	71
Interest expense	(288.9)	(273.6)	(186.0)	6	47
Net interest expense	\$ (195.6)	\$ (195.6)	\$ (140.4)	— %	39 %
Pledged MSR liability expense	(175.4)	(296.3)	(255.0)	(41)	16
Gain (loss) on extinguishment of debt	(49.4)	1.3	0.9	n/m	43
Earnings of equity method investee	22.9	7.3	18.5	214	(61)
Other, net	(6.6)	2.8	(10.2)	(337)	(127)
Other income (expense), net	\$ (404.1)	\$ (480.5)	\$ (386.2)	(16)	24

Loss on extinguishment of debt for 2024 includes the recognition of a \$53.4 million loss on our redemption in November 2024 of all of the outstanding PMC Senior Secured Notes due 2026 and Onity Senior Secured Notes due 2027, comprised of the accelerated write-off of \$36.8 million unamortized discount and debt issuance costs, the payment of an \$11.6 million make-whole redemption premium and a \$5.0 million transaction fee to Oaktree. In addition, during 2024, we repurchased and extinguished a portion of the PMC Senior Secured Notes and recognized a gain of \$4.1 million (prior to their redemption). During 2023, we repurchased \$15.0 million of PMC Senior Secured Notes at a discount and recognized a \$1.3 million gain on debt extinguishment, net of the respective write-off of unamortized discount and debt issuance costs.

Other, net expense for 2024 increased (higher net expense) \$9.3 million as compared to 2023 primarily driven by \$5.7 million of compensation from a subservicer related to a negotiated subservicing termination in the fourth quarter of 2023. The payment received offsets an unfavorable impact to the fair value of the associated MSRs (reported as a loss in MSR valuation adjustments, net). In addition, early payoff protection expense increased by \$5.7 million in 2024 in connection with our MSR opportunistic sale transactions.

Refer to the Servicing and Originations segments for discussion and analysis of Interest income and Interest expense. Refer to the Servicing segment for discussion and analysis of Pledged MSR liability expense and Earnings of equity method investee, including the related gain on sale of our investment in MAV Canopy.

Income Tax Expense (Benefit)

	Years Ended December 31,		
	2024	2023	2022
Income tax expense (benefit)	\$ 5.3	\$ 5.6	\$ (0.8)
Income (loss) before income taxes	39.3	(58.1)	24.9
Effective tax rate	14 %	(10)%	(3)%

Our effective tax rate for the periods indicated in the table above is lower than the 21% federal statutory income tax rate primarily due to the full valuation allowance recorded on our net U.S. federal and state deferred tax assets. We conduct periodic evaluations of positive and negative evidence to determine whether it is more likely than not that the deferred tax asset can be realized in future periods. In these evaluations, we give more significant weight to objective evidence, such as our actual financial condition and historical results of operations, as compared to subjective evidence, such as projections of future taxable income or losses. We evaluated all positive and negative evidence and determined that a full valuation allowance at December 31, 2024 remains appropriate. Refer to Note 21 — Income Taxes for further details on deferred tax assets.

For 2024, income tax expense of \$5.3 million was driven primarily by pre-tax earnings in foreign jurisdictions and current taxable income in the U.S. The increase in the effective tax rate is primarily due to the \$97.3 million increase in pre-tax earnings in 2024 compared to 2023.

Under our transfer pricing agreements, our operations in India and Philippines are compensated on a cost-plus basis for the services they provide, such that even when we have a consolidated pre-tax loss from operations these foreign operations have taxable income, which is subject to statutory tax rates in these jurisdictions that are higher than the U.S. statutory rate of 21%.

Total assets increased by \$3.9 billion, or 31%, between December 31, 2023 and December 31, 2024 mostly due to a \$3.1 billion increase in Loans held for investment following our acquisition of \$2.9 billion reverse mortgage loans and capitalization of interest. Refer to Note 5 – Reverse Mortgages for additional information. In addition, Loans held for sale increased \$612.9

million driven by the acquisitions of reverse mortgage buyouts and the growth in our Originations pipeline. MSR's increased \$194.0 million mostly attributed to \$487.2 million MSR additions partially offset by \$211.0 million sales and \$85.7 million derecognition of MSR's sold to MAV. These increases were partially offset by a \$101.6 million decline in servicing advances, mainly due to lower delinquencies in our non-Agency MSR portfolio, and \$37.8 million decline in Investment in equity method investee as a result of the sale of our 15% ownership interest in MAV Canopy in November 2024.

Total liabilities increased by \$3.8 billion, or 32%, as compared to December 31, 2023 largely due to factors described above. Our HMBS-related borrowings increased by \$3.1 billion mostly due to the \$2.9 billion acquisition of reverse mortgage assets and assumption of HMBS-related borrowings, and an increase in fair value attributable to interest. Mortgage loan financing facilities increased \$817.6 million due to the higher loans held for sale balance at December 31, 2024, including the issuance of OLIT Notes in 2024 for reverse mortgage loan buyouts. In addition, MSR financing facilities increased \$41.7 million with an increase in our MSR portfolio despite a lower utilization of available borrowing capacity at December 31, 2024. We issued \$49.9 million preferred stock in 2024 that is presented as mezzanine equity. Partially offsetting these increases, Senior notes, net decreased \$108.4 million due to our redemption of all of the outstanding 7.875% PMC Senior Secured Notes due 2026 and Onity Senior Secured Notes due 2027, and issuance of new PHH Corporation 9.875% Senior Notes due November 2029. Advance match funded liabilities decreased \$82.6 million consistent with the decline in servicing advances discussed above, and Other financing liabilities decreased \$53.1 million primarily due to the derecognition of MSR's previously sold to MAV noted above and partially offset by additional ESS financing.

Total stockholders' equity increased \$41.1 million during 2024 mostly due to \$33.9 million net income and \$5.4 million compensation related to equity-classified awards. See Note 17 — Stockholders' Equity for additional information.

Key Trends and Outlook

The following discussion provides information regarding certain key drivers of our financial performance and includes certain forward-looking statements that are based on the current beliefs and expectations of Onity's management and are subject to significant risks and uncertainties. Refer to Forward-Looking Statements beginning on page 2 and the Risk Factors section beginning on page 16, for discussion of certain of those risks and uncertainties and other factors that could cause Onity's actual results to differ materially because of those risks and uncertainties. There is no assurance that actual results will be in line with the outlook information set forth below, and Onity does not undertake to update any forward-looking statements. Refer to the Segment results of operations section for further detail, the description of our business environment, initiatives and risks.

Servicing and subservicing fee revenue - Our servicing fee revenue is a function of the volume being serviced - UPB for servicing fees and loan count for subservicing fees. We expect we will continue to grow our servicing and subservicing portfolio through our multi-channel Originations platform, MSR bulk acquisitions and subservicing additions. We expect ancillary float income to trend with short-term interest rates also considering changes in average float balances due to seasonality and portfolio growth.

Gain on sale of loans held for sale - Our gain on sale is driven by both Originations volume and margin, and is channel-sensitive. The updated industry forecasts (MBA and Fannie Mae) suggest a 15% increase in loan origination in 2025 as compared to 2023 with approximately 50 basis point lower 30-year fixed mortgage interest rates in the second half of 2025. We anticipate growth in our Consumer Direct channel considering our increased recapture capabilities. We expect to continue to prudently grow our Correspondent volume at margins that are accretive to the business as part of our MSR replenishment and growth strategy after the opportunistic MSR bulk sales in 2024. We expect continued competitive pressure on margins across all channels. We expect some further volatility of gain (loss) on sale on loans held for sale related to reverse mortgage buyouts (mostly inactive loans) due to the increased size of the portfolio.

Gain on reverse loans held for investment and HMBS-related borrowings, net - The reverse mortgage origination gain is driven by the same factors as gain on sale of loans held for sale, with smaller volumes in the reverse mortgage market and generally larger margins. With our experience and brand in the marketplace, we expect to continue to maintain or prudently grow our portfolio albeit with some channel mix changes. We expect continued uncertain market interest rate and spread conditions. The fair value of the net reverse servicing asset is expected to continue to follow market conditions, with fair value gains or losses generally associated with declining or increasing interest rates and spread, respectively, and is part of our forward MSR hedging strategy. On November 1, 2024, we completed the acquisition of \$2.9 billion UPB of HECM loans along with HMBS-related borrowings and other assets from MAM that we subserviced. We expect higher net interest income (reported as fair value changes) due to higher UPB and increased volatility in fair value changes that we expect would largely be offset with our MSR hedging strategy. Refer to Item 7.A. Quantitative and Qualitative Disclosures About Market Risk for further detail on our hedge strategy.

MSR valuation adjustments, net - Our net MSR fair value changes include multiple components. First, amortization of our investment is a function of the UPB, capitalized value of the MSR relative to the UPB, and prepayments. We expect the MSR realization of expected cash flows to generally follow the growth or size of our MSR portfolio net of ESS financing liabilities and pledged MSR liabilities with our MSR capital partners. Second, MSR fair value changes are driven by changes in interest

rates and assumptions, such as forecasted prepayments. Third, the MSR fair value changes due to changes in interest rates are partially offset by derivative fair value changes that economically hedge the MSR portfolio to the extent of our hedge coverage ratio and hedge performance. Refer to the sensitivity analysis in Item 7A. Quantitative and Qualitative Disclosures About Market Risk for further detail.

Operating expenses - Compensation and benefits are a significant component of our cost-to-service and cost-to-originate and is directly correlated to headcount levels. Headcount in Servicing is primarily driven by the number of loans or UPB being serviced and subserviced, and by the relative mix of performing, delinquent and defaulted loans. As servicing volume is expected to modestly increase (see above), we expect a stable workforce with productivity gains. We expect our Originations headcount and operating expenses to align with the expected growth in volume. Our operating expenses are expected to correlate with volumes, with some productivity and efficiencies expected through our technology and continuous improvement initiatives.

Net interest expense - Interest expense varies based on changes in average debt balance and changes in short-term interest rates on our variable rate debt. The average balance of collateralized financing facilities trends with the balance of the underlying assets discussed above (including MSR, advances and loans). Interest expense on our warehouse loan facilities is expected to be largely offset by interest income on our Originations pipeline loans. We also expect interest expense on our corporate debt to decline as a result of the corporate debt refinancing transactions in the fourth quarter of 2024.

Stockholders' equity - With the above considerations, we expect our businesses to continue to generate net income and increase our equity in 2025, absent any significant adverse change in interest rates, hedge performance or other factors. While our profitability was negatively affected by our refinancing transactions in the fourth quarter of 2024, partly offset by the gain on MAV sale, we expect our profitability in 2025 to be favorably impacted by such refinancing transactions, with an overall lower interest expense on our corporate debt after consideration of preferred stock dividends.

SEGMENT RESULTS OF OPERATIONS

We report our activities in three segments, Servicing, Originations and Corporate that reflect other business activities that are currently individually insignificant. Our business segments reflect the internal reporting that we use to evaluate operating and financial performance and to assess the allocation of our resources.

Servicing

This segment is primarily comprised of our mortgage servicing and subservicing business. We earn servicing and subservicing fees, including ancillary income, and incur cost to service the loans which varies depending on delinquency status. We are exposed to MSR valuation adjustments and advancing obligations when we own the MSR. Our servicing portfolio includes conventional, government-insured and non-Agency mortgage loans, including reverse mortgage loans classified as loans held for investment on our balance sheet. As of December 31, 2024, we serviced 1.4 million mortgage loans with an aggregate UPB of \$301.7 billion.

The Servicing segment includes CR Limited (CRL), our wholly-owned captive reinsurance subsidiary, which provides reinsurance related to direct physical loss coverage on foreclosed real estate properties owned or serviced by us. CRL assumes a 90% (60% through January 2024) quota share of insurance coverage written by a third-party insurer issued to PHH.

Concentration

Rithm is one of our largest subservicing clients. Servicing and subservicing fees from Rithm amounted to \$96.5 million, or 16% of total servicing and subservicing fees (excluding ancillary income) in 2024, and the related remittances to Rithm presented as Pledged MSR liability expense amounted to \$36.1 million. Rithm accounted for \$41.2 billion or 14% and 24% of the total serviced UPB and loan count, respectively, of our servicing and subservicing portfolio as of December 31, 2024, and 63% of all delinquent loans that Onity serviced, for which the cost to service and the associated risks are higher. Consistent with a subservicing relationship, Rithm is responsible for funding the advances we service on its behalf. The servicing agreements automatically renew annually unless notice of termination is provided. Refer to Note 8 — Other Financing Liabilities, at Fair Value.

Loan Resolutions

We have a strong track record of success as a leader in the servicing industry in foreclosure prevention and loss mitigation that helps homeowners stay in their homes and improves financial outcomes for mortgage loan investors. Reducing delinquencies also enables us to recover advances and recognize additional ancillary income such as late fees, which we do not recognize on delinquent loans until they are brought current. Loan resolution activities address the pipeline of delinquent loans and generally lead to (i) modification of the loan terms, (ii) repayment plan alternatives, (iii) a discounted payoff of the loan (e.g., a “short sale”), or (iv) foreclosure or deed-in-lieu-of-foreclosure and sale of the resulting REO. To select an appropriate loan modification option for a borrower in accordance with the applicable servicing agreement, we perform a structured analysis, using a proprietary model, of all options using information provided by the borrower as well as external data,

including recent broker price opinions to value the mortgaged property. Our proprietary model includes, among other things, an assessment of re-default risk.

Advance Obligation

As a servicer, we are generally obligated to advance funds in the event borrowers are delinquent on their monthly mortgage related payments. We advance principal and interest (P&I Advances), taxes and insurance (T&I Advances) and legal fees, property valuation fees, property inspection fees, maintenance costs and preservation costs on properties that have been foreclosed (Corporate Advances). For certain loans in non-Agency securitization trusts, we have the ability to cease making P&I advances and immediately recover advances previously made from the general collections of the respective trust if we determine that our P&I advances cannot be recovered from the projected future cash flows. With T&I and Corporate advances, we continue to advance if net future cash flows exceed projected future advances without regard to advances already made.

Most of our advances have the highest reimbursement priority (i.e., they are “top of the waterfall”), so we are entitled to repayment from respective loan or REO liquidation proceeds before any interest or principal is paid on the bonds that were issued by the trust. In the majority of cases, advances in excess of respective loan or REO liquidation proceeds may be recovered from pool-level proceeds. The costs incurred in meeting these obligations consist principally of the interest expense incurred in financing the servicing advances. Most subservicing agreements, including our agreements with Rithm and MAV, provide for prompt reimbursement of any advances from the owner of the servicing rights. Refer to Note 26 — Commitments to the Consolidated Financial Statements for further description of servicer advance obligations.

MSR Valuation Adjustments

The financial performance of our Servicing segment is impacted by the changes in fair value of the MSR portfolio due to changes in market interest rates, among other factors. Our MSR hedging policy is designed to reduce the expected volatility of the MSR portfolio fair value due to market interest rates commensurate with the target hedge coverage ratio determined by our Market Risk Committee. Refer to Item 7A. Quantitative and Qualitative Disclosures about Market Risk for further detail on our hedging strategy.

Significant Variables

The following factors could significantly impact the results of our Servicing segment from period to period.

Aggregate UPB and Loan Count. Servicing fees are generally earned as a percentage of UPB and subservicing fees are earned on a per-loan basis or as a percentage of UPB. As a result, the change in aggregate UPB and loan count for which we have servicing rights or subservice will directly impact our revenue contributed by our Servicing segment. Aggregate UPB and loan count decline over time as a result of portfolio run-off or sales and increase to the extent we retain MSRs from new originations or engage in MSR acquisitions.

Cost to Service and Operating Efficiency. The financial performance of our Servicing segment is heavily dependent on our ability to scale our operations to cost-effectively and efficiently perform servicing activities in accordance with our servicing agreements.

Delinquencies. Delinquencies impact our financial results and operating cash flows for our Servicing segment. Non-performing loans are more expensive to service because the loss mitigation activities that we must undertake to keep borrowers in their homes or to foreclose, if necessary, are costlier than the activities required to service a performing loan. These loss mitigation activities include increased contact with the borrower for collection and the development of forbearance plans or loan modifications by highly skilled associates who command higher compensation as well as the higher compliance costs associated with these, and similar activities. In addition, when borrowers are delinquent, the amount of funds that we are required to advance to the investors increases. We utilize servicing advance financing facilities (match funded liabilities) to finance a portion of our advances. As a result, increased delinquencies result in increased interest expense.

Prepayment Speed. The rate at which portfolio UPB declines can have a significant impact on our Servicing segment. Items reducing UPB include scheduled and unscheduled principal payments (runoff), refinancing, loan modifications involving forgiveness of principal, voluntary property sales and involuntary property sales such as foreclosures. Prepayment speed impacts future servicing fees, runoff and valuation of MSRs, float earnings on float balances and interest expense on advances. Increases in anticipated lifetime prepayment speeds generally cause MSR valuation adjustments to increase because MSRs are valued based on total expected servicing income over the life of a portfolio. The converse is true when expectations for prepayment speeds decrease. Prepayments do not vary linearly with interest rates resulting in the convexity of the MSR, i.e., the interest rate sensitivity of the MSR changes when interest rates change. Specifically, as interest rates further increase, the lower the fair value of the MSR increases.

Interest rates. In addition to the impact of interest rate changes on prepayment speeds, the fair value of the MSR and associated hedging activities, float earnings on float balances, and the funding cost of servicing advances and MSR financing facilities are directly impacted by interest rate changes.

Reverse Mortgages

Our reverse business activities include both the subservicing of reverse mortgage loans on behalf of investors and the servicing of our owned portfolio. Owned portfolio loans are insured by the FHA, which provides protection against risk of borrower default, and are securitized through the Ginnie Mae program.

Our servicing activities of reverse loans are generally consistent with forward mortgage loan servicing as described above, with the following additional functions: the funding of borrower advances or draws under their approved borrowing capacity and the repurchase of loans upon reaching a limit:

- a. *Borrower draw funding obligation* - Under the terms of ARM-based HECM loan agreements, the borrowers have additional borrowing capacity. Borrower draws or tails are funded by the servicer and are securitized. We do not incur any substantive underwriting, marketing or compensation costs in connection with any future draws, although we must maintain sufficient capital resources and available borrowing capacity to ensure that we are able to fund these future draws prior to securitization with Ginnie Mae (generally less than 30 days).
- b. *Loan repurchase obligation* - As an HMBS issuer, we are required to purchase loans out of the Ginnie Mae securitization pools once they reach 98% of the maximum claim amount (MCA buyouts). Active buyouts are assigned to HUD and payment is received from HUD through a claims process, generally within 30 days. HUD reimburses us for the outstanding principal balance on the loan up to the maximum claim amount; we bear the risk of exposure if the outstanding balance on a loan exceeds the maximum claim amount. Inactive buyouts (loans that are in default for one of the following reasons - title conveyances or the borrower is deceased, no longer occupies the property or is delinquent on tax and insurance payments) are generally liquidated through foreclosure and subsequent sale of REO. State specific foreclosure and REO liquidation timelines have a significant impact on the timing and amount of our recovery. If we are unable to sell the property securing the inactive reverse loan for an acceptable price within the timeframe established by HUD (six months), we are required to make an appraisal-based claim to HUD. In such cases, HUD reimburses us for the loan balance, eligible expenses and interest, less the appraised value of the underlying property. Thereafter, all the risks and costs associated with maintaining and liquidating the property remains with us; we may incur additional losses on REO properties as they progress through the liquidation processes related to delayed timelines due to market conditions, sales commissions, property preservation costs or property tax and insurance advances. The significance of future losses associated with appraisal-based claims is dependent upon the volume of inactive loans, condition of foreclosed properties and the general real estate market.

The Gain on reverse loans held for investment and HMBS-related borrowings, net reported within the Servicing segment includes the net fair value changes of securitized reverse mortgage loans held for investment and HMBS-related borrowings, that comprise the following:

- contractual interest income earned on securitized reverse mortgage loans, or HECM loans, net of interest expense on HMBS-related borrowings, that is, on a net basis, the servicing fee we are contractually entitled to and collect on a monthly basis under the Ginnie Mae MBS Guide regarding servicing HMBS; and
- other fair value changes of the net balance of securitized loans held for investment and HMBS-related borrowings, that effectively represents servicing and tails. Tails are participations in previously securitized HECM loans and are created by additions to principal for borrower draws on lines-of-credit (scheduled and unscheduled), interest, servicing fees, and mortgage insurance premiums.

The fair value of our Ginnie Mae securitized HECM loan portfolio, net of HMBS-related Borrowings generally decreases as market interest rates rise and increases as market rates fall. The exposure is managed as part of our MSR hedging strategy (see Item 7A - Quantitative and qualitative disclosures about market risk, Loans Held for Investment and HMBS-related Borrowings and the associated interest rate sensitivity disclosure).

Gain (loss) on reverse loans held for investment and HMBS-related borrowings, net strictly reflects the financial performance of owned loans/servicing and excludes any subservicing activity. The financial performance associated with the subservicing of reverse mortgage loans on behalf of investors is primarily reflected within Servicing and subservicing fees, net.

Since 2023, we have opportunistically acquired reverse mortgage assets from financial institutions, including active and inactive reverse mortgage loan buyouts, advances, HUD claim receivables and real estate properties. We finance our asset acquisitions along with the buyouts of our own portfolio through on-balance sheet private placement securitizations (referred to as OLIT). The financial performance of such reverse asset management is reported within the Servicing segment, largely within Gains (losses) on loans held for sale, that are driven by multiple factors, including liquidation timeline and changes in market interest rates.

Operating Metrics

The following table provides selected operating statistics for our Servicing segment:

Selected Operating Statistics

					% Change	
	2024	2023	2022	2024 vs 2023	2023 vs 2022	
Assets Serviced at December 31						
<i>Unpaid principal balance (UPB) in billions:</i>						
Performing loans (1)	\$ 289.7	\$ 276.5	\$ 276.2	5 %	— %

n/m: not meaningful

- (1) Performing loans include those loans that are less than 90 days past due and those loans for which borrowers are making scheduled payments under loan modification, forbearance or bankruptcy plans. We consider all other loans to be non-performing.
- (2) Includes HECM reverse mortgage loans held for investment with a UPB of \$10.7 billion that are recognized in our consolidated balance sheet at December 31, 2024.
- (3) Includes \$19.7 billion UPB subserviced and \$21.5 billion UPB of MSRs sold to MAV that did not achieve sale accounting treatment.

- (4) Loans serviced pursuant to our sale or transfer agreements with MAV, Rithm and others for which sale accounting is not achieved, and loans subserviced.
- (5) Includes \$32.1 billion UPB of subserviced loans on behalf of Rithm at December 31, 2024.
- (6) Related to our owned MSR forward servicing portfolio.
- (7) Total CPR includes voluntary and involuntary prepayments, as shown in the table, plus scheduled principal amortization.

The following table provides selected operating statistics related to our owned reverse mortgage loans held for investment reported within our Servicing segment:

	2024	2023	2022	% Change	
				2024 vs 2023	2023 vs 2022
Reverse Mortgage Loans at December 31					
<i>Unpaid principal balance (UPB):</i>					
Loans held for investment (1)	\$ 10,618.8	\$ 7,605.5	\$ 7,199.6	40 %	6 %
Active Buyouts (2)	158.8	68.4	73.0	132	(6)
Inactive Buyouts (2)	525.3	198.1	121.4	165	63

- (1) Excludes unsecuritized loans reported within the Originations segment.
- (2) Buyouts are reported as Loans held for sale, Receivables or REO depending on loan and foreclosure status.

The following table provides a breakdown of our servicer advances, net of allowance for losses:

Advances by investor type

December 31, 2024	Principal and Interest	Taxes and Insurance	Foreclosures, bankruptcy, REO and other	Total
Conventional	\$ 1.3	\$ 87.3	\$ 5.4	\$ 94.0
Government-insured	1.7	47.0	21.8	70.6
Non-Agency	146.8	179.8	86.0	412.6
Total, net	<u>\$ 149.8</u>	<u>\$ 314.2</u>	<u>\$ 113.2</u>	<u>\$ 577.2</u>

December 31, 2023	Principal and Interest	Taxes and Insurance	Foreclosures, bankruptcy, REO and other	Total
Conventional	\$ 3.5	\$ 91.2	\$ 6.2	\$ 100.8
Government-insured	3.3	37.7	19.3	60.2
Non-Agency	205.5	214.3	97.9	517.7
Total, net	<u>\$ 212.2</u>	<u>\$ 343.2</u>	<u>\$ 123.3</u>	<u>\$ 678.8</u>

The following table provides the rollforward of activity of our portfolio of mortgage loans serviced which includes MSRs, whole loans and subserviced loans, both forward and reverse:

	Amount of UPB (\$ in billions)			Count (000's)		
	2024	2023	2022	2024	2023	2022
Portfolio at January 1	\$ 288.4	\$ 289.8	\$ 268.0	1,344.5	1,378.8	1,353.3
Additions (1) (2) (3)	85.3	50.7	85.3	319.6	164.2	292.2
MSR Sales	(14.8)	—	(11.2)	(54.6)	(0.3)	(0.3)
Servicing transfers (1) (3)	(25.3)	(23.3)	(18.0)	(91.1)	(80.1)	(114.3)
Runoff	(32.0)	(28.7)	(34.3)	(123.3)	(118.1)	(152.1)
Portfolio at December 31	<u>\$ 301.7</u>	<u>\$ 288.4</u>	<u>\$ 289.8</u>	<u>1,395.1</u>	<u>1,344.5</u>	<u>1,378.8</u>

- (1) Includes the volume of UPB associated with short-term interim subservicing for some clients as a support to their originate-to-sell business, where loans may be boarded and deboarded within the same quarter.
- (2) Additions include purchased MSRs on portfolios with a UPB of \$5.5 billion that have not yet transferred to the PHH servicing system as of December 31, 2024. Because we have legal title to the MSRs, the UPB and count of the loans are included in our reported servicing portfolio. The seller continues to subservice the loans on an interim basis between the transaction closing date and the servicing transfer date.
- (3) Includes MSRs acquired from an unrelated third party in the third quarter of 2024 with a UPB of \$0.9 billion for which PHH was previously performing the subservicing.

Financial Performance

The following table presents selected results of operations of our Servicing segment. The amounts presented are before the elimination of balances and transactions with our other segments:

	Years Ended December 31,			% Change

Subservicing fees					
Average number of subserviced loans (4) (7)	587.9	294.1	273.1	100 %	8 %
Average monthly fee per loan (5)	\$ 16	\$ 23	\$ 24	(27)%	(6)%
Subservicing fees (3)	\$ 115.2	\$ 79.4	\$ 78.1	45 %	2 %
Servicing and subservicing fees (excluding Ancillary income)	<u>\$ 618.6</u>	<u>\$ 736.0</u>	<u>\$ 738.5</u>	(16)%	— %

(1) In \$ billions, (2) In % of UPB, annualized, (3) In \$ millions, (4) In thousands, (5) In dollars.

(6) Includes \$34.9 billion and \$38.7 billion average UPB of MSRs in the 2023 and 2022, previously sold to Rithm for which the sale accounting criteria were met effective December 31, 2023.

(7) Includes an average 258 thousand loans subserviced under Rithm agreements in the 2024, of MSRs previously sold to Rithm for which the sale accounting criteria were met effective December 31, 2023.

Servicing and subservicing fees (excluding ancillary income) for 2024 decreased \$117.5 million, with a \$153.3 million decrease in servicing fees and a \$35.8 million increase in subservicing fees.

These variances are largely due to the effects of our accounting derecognition of MSRs previously sold to Rithm for which the sale accounting criteria were not met until December 31, 2023 (\$124.9 million servicing fees remitted to Rithm recognized in 2023). Effective January 1, 2024, as PHH continues to subservice the portfolio, the statement of operations reflects subservicing fee revenue as opposed to the previous gross presentation of servicing fee revenue (collections) and separate offsetting presentation of servicing fee remittances within Pledged MSR liability expense (see further discussion below). These required accounting presentation changes do not affect the amount of net fee retained by Onity in connection with the Rithm servicing agreements (Loan servicing and subservicing fees less Pledged MSR liability expense).

The \$153.3 million decrease in servicing fees is primarily attributed to \$175.5 million servicing fees collected on behalf of Rithm as discussed above. In addition, servicing fees on our GSE servicing portfolio declined mostly due to MSR sales. These decreases were partially offset by the growth in Ginnie Mae servicing UPB, the growth in servicing UPB of other MSR capital partners, and \$10.5 million higher collection of previously deferred non-Agency servicing fees.

The \$35.8 million increase in subservicing fees is largely driven by \$45.6 million subservicing fees on Rithm agreements due to the effects of our derecognition of MSRs previously sold to Rithm as discussed above. In addition, subservicing fees increased due to a 149% increase in the forward subservicing portfolio. These increases were partially offset by \$17.4 million lower subservicing fees on a 38% lower reverse mortgage subservicing portfolio due to runoff and our acquisition of reverse mortgage loans from MAM in November 2024 that we previously subserviced.

The following table presents the detail of our ancillary income:

Ancillary Income	Years Ended December 31,			% Change	
	2024	2023	2022	2024 vs 2023	2023 vs 2022
Custodial accounts (float earnings)	\$ 129.3	\$ 110.7	\$ 26.2	17	323
Late charges	34.3	38.3	41.0	(10)%	(7)%
Reverse subservicing ancillary fees	22.3	33.5	20.4	(33)	64
Other	25.9	26.7	34.4	(3)	(23)
Ancillary income	<u>\$ 211.9</u>	<u>\$ 209.1</u>	<u>\$ 122.0</u>	1 %	71 %

Ancillary income for 2024 increased by \$2.8 million, or 1% as compared to 2023 largely driven by an \$18.6 million increase in float earnings mostly due to higher average float balance, partially offset by an \$11.2 million decline in reverse subservicing ancillary fees driven by portfolio runoff and acquisition of previously-subserviced client portfolio. The \$3.9 million decline in late charges is driven by the Rithm portfolio derecognition partially offset by an increase in payoff volume.

Gain (Loss) on Loans Held for Sale, Net

We recognized a \$1.4 million gain on loans held for sale, net for 2024, as compared to the \$10.3 million gain recognized in 2023. The \$8.9 million decline is largely driven by \$15.7 million revaluation gains recorded in 2023 on reverse mortgage buyouts opportunistically acquired at a discount and securitized, and lower redelivery losses in 2024 on Ginnie Mae forward loan repurchases and modifications.

Gain (Loss) on Reverse Loans Held for Investment and HMBS-Related Borrowings, Net

Gain (loss) on reverse loans held for investment and HMBS-related borrowings, net reported in the Servicing segment is the net change in fair value of securitized loans held for investment and HMBS-related borrowings. It excludes reverse subservicing that is reflected in Servicing and subservicing fees.

The following table presents the components of the net fair value change and is comprised of net interest income and other fair value gains or losses. Net interest income is primarily driven by the volume of securitized UPB as it is the interest income earned on the securitized loans offset against interest expense incurred on the HMBS-related borrowings, and represents a key component of our compensation for servicing the portfolio, which is generally a fixed percentage of the outstanding UPB. Other fair value changes are primarily driven by changes in market-based inputs or assumptions. Lower interest rates generally result in favorable net fair value impacts on our HECM reverse mortgage loans and the related HMBS financing liability and higher interest rates generally result in unfavorable net fair value impacts. The fair value changes of the net asset value between securitized HECM loans and HMBS (referred to as our reverse MSR) attributable to interest rate changes are effectively used as a hedge of our forward MSR portfolio. See further description of our hedging strategy and its effectiveness in Item 7A. Quantitative and Qualitative Disclosures about Market Risk.

	Years Ended December 31,			% Change	
	2024	2023	2022	2024 vs 2023	2023 vs 2022
Net interest income (servicing fee)	\$ 26.2	\$ 23.6	21.9	11	7 %
Other change in fair value of securitized loans held for investment and HMBS-related borrowings, net	(9.7)	(0.1)	(47.1)	n/m	(100)%
Gain (loss) on reverse loans held for investment and HMBS-related borrowings, net (Servicing)	<u>\$ 16.5</u>	<u>\$ 23.5</u>	<u>\$ (25.1)</u>	(30)%	(194)%

Gain (loss) on reverse loans held for investment and HMBS-related borrowings, net for 2024 declined \$6.9 million as compared to 2023, mostly driven by an unfavorable increase in market interest rates, partially offset by yield spread tightening. While not the only benchmark for the reverse mortgage exposure, the 10-year Treasury rate increased 70 basis points in 2024 resulting in a \$9.7 million other fair value loss. Interest rates and yield spreads remain relatively flat during 2023 resulting in a \$0.1 million other fair value loss recorded in 2023. As our HECM loan portfolio is predominantly comprised of ARMs, higher interest rates cause the loan balance to accrue and reach the 98% maximum claim amount liquidation event more quickly, shortening the life of the servicing net asset. Other change in fair value is partially hedged with our forward MSR hedge strategy. Net interest income, which effectively represents the servicing fee that we collect through monthly securitization, increased \$2.7 million in 2024 as compared with 2023, mostly due to the growth of the loan portfolio, including our acquisition of reverse mortgage loans from MAM in November 2024 that we previously subserviced.

MSR Valuation Adjustments, Net

Refer to the discussion above within Overview -Results of Operations and Financial Condition-MSR Valuation Adjustments, Net.

The following table summarizes the impact of our MSR interest rate hedging strategy on Servicing segment results along with the impact of fair value changes due to assumption updates. Refer to MSR Hedging Strategy section of Item 3. Quantitative and Qualitative Disclosures about Market Risks for further detail. Net MSR portfolio exposure gains (losses) comprise the fair value changes of the MSR portfolio attributable to rates and assumption changes, the MSR hedging derivative gains and losses, and other fair value changes of the HECM loans and HMBS-related borrowings used as a hedge for risk management purposes.

	Years Ended December 31,			% Change	
	2024	2023	2022	2024 vs 2023	2023 vs 2022
MSR fair value gains (losses) due to rate and assumption changes (1) - Servicing (2)	159.7	(67.2)	251.1	(338)%	(127)%
MSR hedging derivative fair value gain (loss) (1)	(112.9)	(33.1)	(122.6)	241	(73)
Other change in fair value of securitized loans held for investment and HMBS-related borrowings, net (3)	(9.7)	(0.1)	(47.1)	n/m	(100)
Net MSR portfolio exposure gains (losses)	<u>\$ 37.2</u>	<u>(100.4)</u>	<u>81.5</u>	(137)%	(223)%

- (1) See MSR valuation adjustments, net within the Overview section of Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.
- (2) Excludes MSR valuations adjustments, net reported within the Originations Segment.
- (3) See "Other change in fair value of securitized loans held for investment and HMBS-related borrowings, net" in above table.

The favorable change of Net MSR portfolio exposure gains for 2024 compared to losses for 2023 is mainly driven by assumption updates that reflect actual market trade pricing levels in the respective years, our adoption of a 95-105% interest rate hedge coverage ratio in December 2023 (revised to 90-110% in April 2024), and respective changes in interest rates.

Compensation and Benefits

	Years Ended December 31,			% Change	
	2024	2023	2022	2024 vs 2023	2023 vs 2022
Compensation and benefits	\$ 100.6	\$ 107.2	\$ 126.2	(6)%	(15)%
Average Employment - Servicing	3,133	3,414	3,645	(8)%	(6)

Compensation and benefits expense for 2024 declined \$6.6 million, or 6%, as compared to 2023 largely driven by an 8% headcount reduction resulting in a \$5.8 million decrease in salaries and benefits. The decrease in average headcount, with a 14% decrease in the U.S., was mostly attributed to the integration of reverse servicing and the runoff of our reverse subservicing portfolio, also reflecting our goal to improve efficiencies and create an industry leading cost structure. Declines in severance expense and commissions were mostly offset by an increase in annual cash awards expense due to our improved financial performance in 2024.

Servicing Expense

Servicing expense primarily includes claim losses and interest curtailments on government-insured loans, provision expense for advances and servicing representation and warranties, and certain loan-volume related expenses. Servicing expense for 2024 was \$10.7 million lower as compared to 2023 primarily attributed to \$6.8 million lower claim loss on Ginnie Mae loan repurchases, driven by lower new repurchase volume and severity, and a \$6.0 million favorable change in provision for indemnification obligations mostly driven by recoveries and favorable resolutions in 2024. These declines in servicing expense were partially offset by \$2.7 million higher CRL insurance loss expense following the higher quota share on reinsurance premiums assumed, among other offsetting factors.

Other Operating Expenses

Other operating expenses (total operating expenses less Compensation and benefit expense and Servicing expense) for 2024 decreased by \$11.4 million as compared to 2023. Professional services expense declined \$7.1 million mostly due to reimbursements received in 2024 related to prior year legal expenses and payments received following resolution of legacy litigation matters, partially offset by higher legal expenses in 2024, and a reduction in costs in our reverse subservicing

businesses. Other expenses declined mostly driven by lower amortization expense related to intangible assets and discount on servicing advances.

Other Income (Expense)

Other income (expense) primarily includes net interest expense and pledged MSR liability expense.

	Years Ended December 31,			% Change	
	2024	2023	2022	2024 vs 2023	2023 vs 2022
Interest Expense					
Advance match funded liabilities	\$ 37.3	\$ 41.4	\$ 19.8	(10)%	110 %
Mortgage loan financing facilities	40.9	21.9	9.5	87	129
MSR financing facilities	72.4	70.6	47.0	3	50
Corporate debt interest expense allocation	26.5	30.2	31.0	(12)	(2)
Escrow	7.4	9.3	7.5	(20)	24
Total interest expense	<u>\$ 184.4</u>	<u>\$ 173.3</u>	<u>\$ 114.8</u>	6 %	51 %
Average balances					
Advance match funded liabilities	\$ 391.1	\$ 427.7	\$ 461.1	(9)%	(7)%
Mortgage loan financing facilities	404.5	254.7	227.2	59	12
MSR financing facilities	875.9	884.6	942.6	(1)	(6)
Total asset-backed financing	<u>\$ 1,671.6</u>	<u>\$ 1,567.0</u>	<u>\$ 1,630.9</u>	7 %	(4)%
Effective average interest rate					
Advance match funded liabilities	9.54 %	9.68 %	4.29 %	(1)%	125 %
Mortgage loan financing facilities	10.10	8.59	4.18	18	106
MSR financing facilities	8.26	7.98	4.99	4	60
Average 1 month Term SOFR	5.11 %	5.07 %	1.85 %	1 %	174 %

Interest expense for 2024 increased by \$11.1 million, or 6%, compared to 2023, driven by a \$19.0 million increase in interest expense on mortgage loan financing facilities attributed to the OLIT securitization of acquired reverse mortgage buyouts. The increase was partially offset by a \$4.1 million decrease in interest expense on advance match funded facilities, mostly driven by the decline in average borrowings for servicing advances due to our advance collection efforts, and \$3.7 million decrease in corporate debt interest allocation mostly due to lower financing needs.

Interest income for 2024 increased \$11.2 million, or 51%, compared to 2023 primarily due to the reverse mortgage buyouts acquired in the first and third quarters of 2024 and the second quarter of 2023.

Pledged MSR liability expense includes the servicing fee remittance related to the MSR sales or transfers that do not meet sale accounting criteria and are presented on a gross basis in our consolidated financial statements, together with the servicing spread remittance associated with our ESS financing liability at fair value. See Note 8 — Other Financing Liabilities, at Fair Value to the Consolidated Financial Statements.

The following table provides the components of Pledged MSR liability expense:

	Years Ended December 31,		
	2024	2023	2022
Servicing fees collected on behalf of third parties	\$ 139.1	\$ 308.9	\$ 322.5
Less: Subservicing fee retained	(26.6)	(77.6)	(82.8)
Ancillary fee/income and other settlement (including expense reimbursement)	11.3	13.7	6.1
Net servicing fee remittance (1)	123.8	244.9	245.9
ESS servicing spread remittance	51.8	51.5	9.1
Pledged MSR liability expense	<u>\$ 175.6</u>	<u>\$ 296.4</u>	<u>\$ 255.0</u>

- (1) For MSR transfers that do not meet sale accounting criteria. See Note 8 — Other Financing Liabilities, at Fair Value to the Consolidated Financial Statements.

Pledged MSR liability expense for 2024 decreased \$120.8 million as compared to 2023, largely due to the accounting derecognition of MSRs previously sold to Rithm for which sale accounting criteria were met effective December 31, 2023 (\$33.4 billion UPB), partially offset by the increase in the portfolio of MSRs sold to MSR capital partners. As discussed above, effective January 1, 2024, as PHH continues to subservice the portfolio, our statement of operations reflects subservicing fee revenue as opposed to the previous gross presentation of servicing fee revenue (collections) and separate offsetting presentation of servicing fee remittances within Pledged MSR liability expense.

Rithm represented the largest portfolio of MSRs transferred, failing sale accounting, and the largest component of Pledged MSR liability expense through 2023. In 2024, Servicing fee and Pledged MSR liability expense continue to be presented on a gross basis for those MSRs sold to Rithm for which title has not transferred, also referred to as Right to MSR (\$9.1 billion UPB at December 31, 2024). The following table presents a subset of the above table related to Rithm, specifically the subservicing fees retained by Onity together with the associated serviced UPB on behalf of Rithm. The retained subservicing fee percentage of UPB for Rithm (0.16%) reflects the nature of the portfolio and delinquencies (22% delinquent more than 30 days as of December 31, 2024).

Rithm Servicing and Subservicing Fees	Years Ended December 31,			% Change	
	2024	2023	2022	2024 vs 2023	2023 vs 2022
Servicing fees collected on behalf of Rithm	\$ 50.9	\$ 230.2	\$ 255.0	(78)%	(10)%
Less: Subservicing fee retained (3)	(14.8)	(67.1)	(74.0)	(78)	(9)%
Pledged MSR liability expense (Net servicing fees remitted to Rithm) (1) (2)	<u>\$ 36.1</u>	<u>\$ 163.1</u>	<u>\$ 181.0</u>	(78)%	(10)%
Average Rithm UPB (\$ in billions)	\$ 9.5	\$ 47.0	\$ 52.0	(80)%	(10)%
Average annualized retained subservicing fees as a % of Rithm UPB	0.16 %	0.14 %	0.14 %	9 %	— %

(1) Reported within Pledged MSR liability expense.

(2) Excludes ancillary income.

(3) Net subservicing compensation of Onity retained and contractually agreed upon with Rithm.

Earnings of equity method investee, namely MAV Canopy, for 2024 increased \$15.6 million as compared to 2023, mostly attributable to the \$13.7 million gain, net of transaction costs, we recognized on the sale of our 15% ownership interest in November 2024.

Other, net is mostly driven by early payoff protection expense in 2024 in connection with our MSR sale transactions.

Originations

We originate and purchase loans and MSRs through multiple channels. Loans generally conform to the underwriting standards of Fannie Mae or Freddie Mac (GSEs) or are government-insured (FHA, VA or USDA). We generally sell the loans in the secondary mortgage market through GSE and Ginnie Mae mortgage securitizations on a servicing retained basis. The Originations business generates a gain on sale of loans, which represents the difference between the origination or purchase value and the sale or securitization value of the loans, along with fee revenue.

We conduct our Originations business through the following five channels:

1- Consumer Direct

Our Consumer Direct channel for forward mortgage loans focuses on targeting existing servicing customers by offering them competitive mortgage refinance opportunities, where permitted by the governing servicing and pooling agreement. A portion of our servicing portfolio is susceptible to refinance activity during periods of declining interest rates. Origination recapture volume and related gains are a natural economic hedge, to a certain degree, to the impact of declining MSR values as interest rates decline. In addition to rate and term refinance activities, our Consumer Direct channel targets purchase mortgage loans, cash-out, debt consolidation, mortgage insurance premium reduction, and new customer acquisition.

2- Correspondent Lending

Our correspondent lending channel drives the replenishment and growth of our MSR portfolio. We purchase closed loans that have been underwritten to investor guidelines from our network of correspondent sellers and sell and securitize them, on a servicing retained basis. We offer correspondent sellers the choice to take out mandatory or “best-efforts” contracts, under

which the seller's obligation to deliver the mortgage loan becomes mandatory only when and if the mortgage is closed and funded. Additionally, we offer correspondent sellers the opportunity to leverage a non-delegated underwriting option for best-efforts deliveries. We provide customary origination representations and warranties to investors in connection with our loan sales and securitization activities. We receive customary origination representations and warranties from our network of approved correspondent lenders. As of December 31, 2024, we have relationships with 716 approved correspondent sellers, or 4 net new sellers since December 31, 2023.

3- Reverse Originations

We originate and purchase reverse mortgage loans through our retail, wholesale and correspondent lending channels, under the guidelines of the HECM reverse mortgage insurance program of the FHA. Loans originated under this program are generally insured by the FHA, which provides protection against risk of borrower default. As the securitizations of reverse mortgage loans do not achieve sale accounting treatment and the loans remain reported as Loans held for investment, at fair value together with the securitization HMBS-related borrowings, revenue mostly include the fair value changes of the loan from lock date to securitization date that are reported in Gain on reverse loans held for investment and HMBS-related borrowings, net.

4- Co-Issue Programs

We purchase MSRs through flow purchase agreements, the Agency Cash Window co-issue programs and bulk MSR purchases. The Agency Cash Window programs we participate in, and purchase MSR from, allow mortgage companies and financial institutions to sell whole loans servicing released to the respective agency and sell the MSR to the winning bidder. In addition, we partner with other originators to replenish our MSRs through flow purchase agreements. As of December 31, 2024, we have relationships with 496 approved sellers through the Agency Cash Window co-issue programs, or 216 net new sellers since December 31, 2023. We initially recognize our MSR originations and purchases with the associated economics in our Originations segment, and transfer the MSR to our Servicing segment once the MSR is initially recognized on our balance sheet with all subsequent performance associated with the MSR, including funding cost, run-off and other fair value changes reflected in our Servicing segment.

5- Subservicing Growth

We source additional servicing volume through our subservicing and interim servicing agreements, through our existing relationships and our enterprise sales initiatives. We do not report any revenue or gain associated with subservicing within the Originations segment as the impact is captured in the Servicing segment. However, sales efforts and certain costs - marginal compensation and benefits - are managed and reported within the Originations segment.

Significant Variables

The following factors could significantly impact the results of our Originations segment from period to period.

Mortgage Rates. Changes in mortgage rates, primarily the 30-year fixed rate mortgage, directly impact the demand for both purchase and refinance forward mortgages and therefore impact the production volumes and financial results of our Originations segment. Small changes in mortgage rates directly impact housing affordability for both first-time and move-up home buyers and affect their ability to purchase a home. For refinance loans, current market mortgage rates must be considered relative to the rates on the current mortgage debt outstanding.

Market Size and Composition. The volume of new or refinanced loans is impacted by changes to existing, or development of new, GSE or other government sponsored programs. Changes in GSE or HUD guidelines and costs and the availability of alternative financing sources, such as non-Agency proprietary loans and traditional home equity loans, impact borrower demand for forward and reverse mortgages and therefore can impact the volume of mortgage originations.

Margins. Changes in pricing margin for mortgages are closely correlated with changes in market size for mortgage loans. As loan demand and market capacity move out of alignment, pricing adjusts. In a growing market, margins expand and in a contracting market, margins tighten as lenders seek to keep their production at or close to full capacity. Managing capacity and cost is critical as volumes change. Among our channels, our margins per loan are highest in the retail channel and lowest in the correspondent channel. We work directly with the borrower to process, underwrite and close loans in our retail and reverse wholesale channels. In our retail channel, we also identify the customer and take loan applications. As a result, our retail channel is the most people- and cost-intensive and experiences the greatest volume volatility.

Investor Demand. The liquidity of the secondary market for mortgage loans impacts the size of the mortgage loan market by defining loan attributes and credit guidelines for loans that investors are willing to buy and at what price. In recent years, the GSEs have been the dominant providers of secondary market liquidity for forward mortgages, keeping the product and credit spectrum relatively homogeneous and risk averse (higher credit standards).

Economic Conditions. General economic conditions can impact the growth and revenue of our Originations segment by impacting the capacity for consumer credit and the supply of capital. More specifically, employment levels and home prices are variables that can each have a material impact on mortgage volume. Employment levels, the level of wages and the stability of employment are underlying factors that impact credit qualification. The effect of home prices on lending volumes is significant and complex. As home prices go up, home equity increases and this improves the position of existing homeowners either to refinance or to sell their home, which often leads to a new home purchase and a new forward mortgage loan, or in the case of a reverse mortgage, increase the size of the mortgage loan available and the number of potential borrowers. However, if home prices increase rapidly, the effect on affordability for first-time and move-up buyers can dampen the demand for mortgage loans. The more restrictive standards for loan to value (LTV) ratios, debt to income (DTI) ratios and employment that characterize the current market amplify the significance and sensitivity of the housing market and related mortgage lending volumes to employment levels and home prices. If home prices decline due to increased mortgage interest rates or for other reasons, home sales may decline and it may be more difficult for homeowners to refinance existing mortgages, thereby negatively impacting mortgage volume.

Operating Metrics

The following table provides selected operating statistics for our Originations segment:

	Years Ended December 31,			% Change	
	2024	2023	2022	2024 vs 2023	2023 vs 2022
Funded Loan UPB by Channel (in billions)					
Forward loans

- (1) Includes \$2.0 million, \$2.1 million and \$2.1 million ancillary fee income related to MSR acquisitions reported as Servicing and subservicing fees at the consolidated level for 2024, 2023 and 2022, respectively.

Gain on Loans Held for Sale, Net

The following table provides information regarding Gain on loans held for sale by channel and the related forward loan origination volumes and margins (excluding fees that are presented in Other revenue, net):

	Years Ended December 31,			% Change	
	2024	2023	2022	2024 vs 2023	2023 vs 2022
Origination UPB (1) (in billions)					
Correspondent	\$ 16.1	\$ 12.2	\$ 15.6	33 %	(22)%
Consumer Direct	0.9	0.4	1.2	153	(71)
	<u>\$ 17.0</u>	<u>\$ 12.5</u>	<u>\$ 16.8</u>	36 %	(26)%
% Gain on Sale Margin (2)					
Correspondent	0.18 %	0.15 %	0.16 %	18 %	(2)%
Consumer Direct	3.13	3.22	2.30 %	(3)	40
	<u>0.34 %</u>	<u>0.24 %</u>	<u>0.31 %</u>	40 %	(23)%
Gain on Loans Held for Sale					
Correspondent	\$ 29.3	\$ 18.8	\$ 24.6	56 %	(24)%
Consumer Direct	28.3	11.5	28.3	146	(59)
	<u>\$ 57.7</u>	<u>\$ 30.3</u>	<u>\$ 52.9</u>	90 %	(43)%

(1) Defined as the UPB of loans funded in the period.

(2) Ratio of gain on Loans held for sale to funded UPB. Note that the ratio differs from the day-one gain on sale margin upon lock.

Gain on loans held for sale, net, increased \$27.3 million, or 90%, as compared to 2023 with a \$16.8 million increase in our Consumer Direct channel and a \$10.5 million increase in our Correspondent channel. The higher gain in 2024 is mainly due to a 36% increase in our total volume, exceeding the overall 17% mortgage origination growth in the industry. The increase in Consumer Direct gain is driven by a 153% increase in loan funded volume, attributed to our increased recapture operational capability and the relative interest rate environment in 2024 as compared to 2023, the lowest production year for refinance over the past 20 years. The increase in Correspondent gain is largely driven by the increased loan production volume, attributed to our MSR replenishment strategy following our opportunistic MSR bulk sales. While the channel margins remained relatively consistent with 2023, the aggregate margin increased due to the change in the channel mix. The elevated interest rate environment continues to adversely impact both purchase and refinance borrower activities due to a lack of affordability.

Gain on Reverse Loans Held for Investment and HMBS-Related Borrowings, Net

The following table provides information regarding Gain on reverse loans held for investment and HMBS-related borrowings, net of the Originations segment that comprises fair value changes of the pipeline and unsecuritized reverse mortgage loans held for investment, at fair value, together with volume and margin (including loan fees):

	Years Ended December 31,			% Change	
	2024	2023	2022	2024 vs 2023	2023 vs 2022
Origination UPB (1) (in billions)	\$ 0.8	\$ 0.7	\$ 1.4	11 %	(53)%
Origination margin (2)	3.41 %	3.41 %	4.25 %	—	(20)%
Gain on reverse loans held for investment and HMBS-related borrowings, net (Originations)	<u>\$ 25.9</u>	<u>\$ 23.2</u>	<u>\$ 61.2</u>	12 %	(62)%

(1) Defined as the UPB of loans funded in the period.

(2) Ratio of origination gain to funded UPB; includes loan fees.

Gain on reverse loans held for investment and HMBS-related borrowings, net increased \$2.7 million, or 12% as compared to 2023 attributed to higher origination volume and a stable aggregate margin. The increase is mostly driven by our Retail and Correspondent channels that experienced higher volumes. Industry-wide HECM securitization volume saw a 42% increase when comparing 2024 to 2023, and industry-wide HECM endorsements were down 12%. Similar to the forward mortgage market described above, the elevated interest rate environment continues to adversely impact reverse mortgage borrower activities due to a lack of affordability as elevated rates directly reduce HECM loan proceeds available to borrowers.

Other revenue, net

Other revenue, net for 2024 increased \$7.1 million, or 38% as compared to 2023 primarily due to the 36% increase in our Consumer Direct and Correspondent production volume.

MSR Valuation Adjustments, Net

MSR valuation adjustments, net includes revaluation gains on certain MSRs opportunistically purchased through the Agency Cash Window programs, and flow purchases. As an aggregator of MSRs, we may purchase MSRs from smaller originators with a purchase price at a discount to fair value and we recognize valuation adjustments for differences in exit markets in accordance with the accounting fair value guidance. We record such valuation adjustments as MSR valuation adjustments, net within the Originations segment since the segment's business objective is the sourcing of new MSRs at targeted returns. Changes in MSR valuation adjustments, net period over period are mostly due to volume changes.

Operating Expenses

Operating expenses for 2024 increased \$7.5 million, or 9%, as compared to 2023, mostly due to \$5.1 million higher Originations expense and \$3.4 million higher Compensation and benefits. The increase in Originations expense was driven by higher production volume and a provision release for representation and warranty indemnification recorded in 2023 due to favorable resolution of demands. The increase in Compensation and benefits was driven by a \$4.2 million increase in commissions on higher production volume and a \$1.3 million increase in incentive compensation, partially offset by a \$2.4 million decrease in salaries and benefits with a decrease in average U.S. based headcount as part of our cost-reduction efforts.

Corporate overhead allocations decreased \$1.9 million mainly due to targeted cost-reduction efforts.

Other Income (Expense)

Interest income consists primarily of interest earned on newly-originated and purchased loans during the pipeline period prior to securitization or sale to investors. Interest expense is incurred to finance the mortgage loans during the same pipeline period, which is generally approximately 20 days. We finance mortgage loans with repurchase and participation agreements, commonly referred to as warehouse lines. Our net interest margin is driven by the difference between the average mortgage note rate and the average warehouse line cost of funds, and by the average number of days loans remain in the pipeline.

Interest income for 2024 increased \$2.6 million, or 5% as compared to 2023 largely due to a higher average loans held for sale balance. Similarly, Interest expense for 2024 increased \$1.6 million, or 3% as compared to 2023 primarily due to an increase in average warehouse financing debt balance, consistent with higher average loans held for sale balances.

Corporate

Corporate includes expenses of corporate support services and activities that are not directly related to other reportable segments

- Interest expense on corporate debt is allocated to the Servicing segment and the Originations segment based on relative financing requirements, with the exception of the Onity Senior Secured Notes through their redemption date in November 2024. With intercompany financing agreements, the financing cost of the Servicing and Originations segments reflects, and is consistent with the financing needs of the licensed entity PHH that carries out these businesses.
- Certain expenses incurred by corporate support services, such as technology, legal, risk and compliance, or finance are allocated to the Servicing and Originations segments using various methodologies intended to approximate the utilization of such services.

The following table presents selected results of operations of Corporate. The amounts presented are before the elimination of balances and transactions with our other segments:

	Years Ended December 31,			% Change	
	2024	2023	2022	2024 vs 2023	2023 vs 2022
Revenue	\$ —	\$ —	\$ —	\$ —	n/m

Loss before income taxes	<u>\$ (163.9)</u>	<u>\$ (66.1)</u>	<u>\$ (105.7)</u>	148	(37)
n/m: not meaningful					

Compensation and Benefits

Compensation and benefits expense for 2024 increased \$6.4 million as compared to 2023, mainly driven by a \$5.6 million increase in incentive compensation due to our improved financial performance in 2024.

Professional Services

Professional services expense for 2024 increased \$37.2 million as compared to 2023, largely explained by the reversal recorded in 2023 of our loss contingency accrual related to the CFPB and other matters resolved in our favor in 2023. In addition, in 2024 legal fees and litigation-related expenses increased in 2024, with lower recoveries of prior years' legal expenses from mortgage insurers. Other professional fees also increased in 2024 driven by higher utilization of consulting services related to corporate strategy and business initiatives.

Other Income (Expense)

In November 2024, we redeemed all of the outstanding PMC Senior Secured Notes due 2026 and Onity Senior Secured Notes due 2027, resulting in the recognition of a \$53.4 million loss on debt extinguishment due to the accelerated write-off of \$36.8 million unamortized discount and debt issuance costs, the payment of an \$11.6 million make-whole redemption premium and a \$5.0 million transaction fee to Oaktree. In addition, during 2024 (prior to their redemption) and 2023, we repurchased and extinguished a portion of the PMC Senior Secured Notes and recognized gains on debt extinguishment, net of \$4.1 million and \$1.3 million, respectively.

LIQUIDITY AND CAPITAL RESOURCES

Overview

In 2024 (fourth quarter), we successfully executed our corporate debt refinancing which resulted in the extension of our corporate debt maturity and the reduction of our overall cost of funds:

- PHH Corporation issued \$500 million aggregate principal amount of 9.875% Senior Notes Due 2029 at a price of 99.956%. The net proceeds from the sale of the notes, together with the net proceeds from the sale of our investment in MAV Canopy (see below) and available liquidity, were used to redeem all of the outstanding \$289.1 million principal PMC Senior Secured Notes due 2026 and \$285.0 million principal Onity Senior Secured Notes due 2027 at a premium pursuant to the respective agreements.
- Onity sold to Oaktree its 15% ownership interest in MAV Canopy for \$50.0 million total cash proceeds.

In the normal course of business, we are actively engaged with existing and potential lenders and as a result add, terminate, replace or extend our debt agreements to the extent necessary to finance our operations and growth and optimize our financing costs. In addition, we completed the following transactions during 2024 impacting our liquidity and capital:

- Repurchased \$70.9 million of our PMC Senior Secured Notes in the open market (prior to their redemption discussed above);
- Completed two private placement securitizations of HECM loans, and related receivables and REO properties, referred to as reverse mortgage buyouts. In February and September 2024, certain classes of asset-backed notes with an initial principal amount of \$268.6 million and \$330.6 million were issued at a discount, with a stated interest rate of 3% and 5% respectively, and a three-year mandatory call date;
- Entered into a \$34.0 million junior-lien repurchase financing arrangement of our PLS MSR in March 2024. In November 2024, the facility was repaid and voluntarily terminated prior to its contractual termination date;
- Entered into ESS financing transactions and MSR financing transactions with MSR capital partners for aggregated proceeds of \$23.8 million and \$25.0 million, respectively. ESS financing transactions require PHH to remit to a third party a specified percentage of future servicing fee collections on reference pools of mortgage loans which PHH is entitled to as owner of the related MSRs. MSR financing transactions with MSR capital partners, including MAV, consist of MSR sales, where MSR title and ownership have generally passed, while PHH retains subservicing;
- Issued a new series of non-convertible, perpetual preferred stock (Series B Preferred Stock) with an aggregate liquidation preference amount of \$52.8 million as consideration for the acquisition of reverse mortgage assets of Waterfall previously subserviced by PHH. Concurrently, we entered into a two-year revolving line of credit with Waterfall, collateralized by certain acquired assets. The maximum committed amount decreases from an initial \$45.0 million to \$15.0 million after the first securitization of the acquired HECM tails.

A summary of borrowing capacity under our advance facilities, mortgage warehouse facilities and MSR financing facilities is as follows (see Note 14 — Borrowings to the Consolidated Financial Statements for additional information):

	December 31, 2024			December 31, 2023		
	Total Borrowing Capacity (1)	Remaining Borrowing Capacity - Committed (1)	Remaining Borrowing Capacity - Uncommitted (1)	Total Borrowing Capacity (1)	Remaining Borrowing Capacity - Committed (1)	Remaining Borrowing Capacity - Uncommitted (1)
Advance facilities	\$ 714.4	\$ 233.5	\$ 63.8	\$ 714.4	\$ 151.1	\$ 63.5
Mortgage loan financing facilities	2,553.1	212.5	1,294.3	2,696.1	372.7	1,591.7
MSR financing facilities	1,200.0	235.4	55.3	1,082.2	128.2	37.5
Total	<u>\$ 4,467.5</u>	<u>\$ 681.4</u>	<u>\$ 1,413.4</u>	<u>\$ 4,492.7</u>	<u>\$ 652.1</u>	<u>\$ 1,692.8</u>

(1) Total Borrowing Capacity represents the maximum amount which can be borrowed, subject to eligible collateral. Remaining Borrowing Capacity represents Total Borrowing Capacity less outstanding borrowings, subject to eligible collateral.

We may utilize committed borrowing capacity under our financing facilities to the extent we have sufficient eligible collateral to borrow against and otherwise satisfy the applicable conditions to funding. Uncommitted amounts can be advanced at the discretion of the lender, and there can be no assurance that any uncommitted amounts will be available to us at any particular time.

At December 31, 2024, we had \$63.7 million total available committed and uncommitted borrowing capacity based on the amount of eligible collateral as follows:

	December 31, 2024		
	Total	Committed	Uncommitted
Advance facilities	\$ —	\$ —	\$ —
Mortgage loan financing facilities	6.6	—	6.6
MSR financing facilities	57.1	57.1	—
Total available borrowing capacity based on eligible collateral	<u>\$ 63.7</u>	<u>\$ 57.1</u>	<u>\$ 6.6</u>

At December 31, 2024, our total liquidity of \$248.5 million included \$184.8 million of unrestricted cash and \$63.7 million total available committed and uncommitted borrowing capacity based on the amount of eligible collateral as described above. Considering the large financing and capital transactions described above, our total liquidity remained stable at December 31, 2024, as compared to \$241.6 million at December 31, 2023.

We optimize our daily cash position to reduce financing costs while closely monitoring our liquidity needs and ongoing funding requirements. We regularly monitor and project cash flows over various time horizons to anticipate and mitigate liquidity risk. We maintain liquidity buffers to be responsive to the level of risks, including stressed market interest rate conditions and operational risk.

Use of Funds

Our primary near-term uses of funds in the normal course include:

- Payment of operating costs and corporate expenses;
- Payments for servicing advances in excess of collections including advances and draws related to reverse mortgage assets (see below);
- Investment in MSRs (purchased and originated) and other related asset acquisitions;
- Originated, purchased and repurchased loans, including reverse mortgage buyouts;
- Payment of margin calls under our MSR financing facilities and derivative instruments;
- Debt service and repayments of borrowings, including under our MSR financing, advance financing, warehouse facilities and OLIT securitization notes, and payment of interest expense including on the Senior Notes Due 2029;
- Dividend payments on Series B Preferred Stock; and
- Net negative working capital and other general corporate cash outflows.

We have short-term commitments to lend \$1.3 billion in connection with our forward and reverse mortgage loan IRLCs outstanding at December 31, 2024. In addition, we have originated floating-rate reverse mortgage loans under which the borrowers have additional borrowing capacity of \$3.1 billion at December 31, 2024. During 2024, we funded \$255.2 million of the \$1.8 billion borrowing capacity available as of December 31, 2023. We are able to immediately securitize these borrower draws or advances under the Ginnie Mae program. As an HMBS issuer, we are required to repurchase loans out of the Ginnie Mae securitization pools once the outstanding principal balance of the loan is equal to or greater than 98% of the maximum claim amount (MCA repurchases). We carry these repurchases until reimbursement by HUD and/or property liquidation if inactive. Our reverse subservicing clients bear the financial obligation and risks associated with purchasing loans out of securitization pools within the portfolio we subservice. See Note 26 — Commitments to the Consolidated Financial Statements for additional information.

Regarding the current maturities of our borrowings, as of December 31, 2024, we have approximately \$2.1 billion of debt outstanding that would either come due, begin amortizing or require partial repayment in the next 12 months. This amount is comprised of \$1.0 billion of borrowings under forward and reverse mortgage loan financing facilities, \$416.5 million outstanding under advance financing facilities based on expected repayment date, \$659.7 million outstanding under GSE and Ginnie Mae MSR financing facilities maturing in the next 12 months, and \$25.6 million of scheduled principal amortization on the PLS Notes secured by PLS MSRs.

With respect to liquidity management, we consider our servicing advance requirements during each investor remittance period and the uncertainties of daily margin calls on our collateralized debt facilities and derivative instruments due to interest rate fluctuations.

As servicer, we are required to advance to investors the loan P&I installments not collected from borrowers for those delinquent loans, including those on forbearance plans. Loan payoffs and prepayments are a source of additional liquidity and are dependent on the interest rate environment. We also advance T&I and Corporate advances primarily on properties that are in default or have been foreclosed. Our obligations to make these advances are governed by servicing agreements or guides, depending on investors or guarantor. Refer to Note 26 — Commitments to the Consolidated Financial Statements for further description of our servicer advance obligations. As subservicer, we are also required to make P&I, T&I and Corporate advances

on behalf of servicers following the servicing agreements or guides. However, servicers are generally required to reimburse us within 30 days of our advancing under the terms of the subservicing agreements, and we are generally reimbursed by Rithm the same day we fund P&I advances, or within no more than three days for certain servicing advances.

We are generally subject to daily margining requirements under the terms of our MSR financing facilities and daily cash calls for our TBAs, interest rate swap futures or other derivatives. Declines in fair value of our MSRs due to declines in market interest rates, assumption updates or other factors require that we provide additional collateral to our lenders under MSR financing facilities. Similarly, declines in fair value of our derivative instruments require that we provide additional collateral to the clearing counterparties. While the objective of our hedging strategy is to reduce volatility due to interest rates, it is also designed to address cash and liquidity considerations. Refer to the sensitivity analysis in Item 7A. Quantitative and Qualitative Disclosures About Market Risk.

Our medium- and long-term requirements for cash include:

- Payment of interest and principal repayment of our PLS Notes that mature in 2025 and our Senior Notes Due 2029⁽¹⁾;
- Payment of interest and principal repayment of our OLIT securitization note issuances that have a three-year mandatory call date;
- Any payments associated with the confirmation of loss contingencies; and
- Any other payments required under contractual obligations discussed above that extend beyond one year.

⁽¹⁾ Supplemental information required pursuant to the Indenture governing the Onity Senior Notes Due 2029 disclosed in Exhibit 99.1.

Sources of Funds

Our primary sources of funds for near-term liquidity in normal course include:

- Collections of servicing and subservicing fees and ancillary revenues;
- Collections of advances in excess of new advances;
- Proceeds from match funded advance financing facilities;
- Proceeds from other borrowings, including warehouse facilities, MSR financing facilities, MSR transfers and ESS financing;
- Proceeds from sales and securitizations of originated loans and purchased loans; and
- Net positive working capital from changes in other assets and liabilities.

Servicing advances are an important component of our business and represent amounts that we, as servicer, are required to advance to, or on behalf of, our servicing clients if we do not receive such amounts from borrowers. Our use of advance financing facilities is integral to our cash and liquidity management strategy. Additionally, certain of our financing and subservicing agreements permit us to retain advance collections for a period ranging from one to two business days before remittance, thus providing a source of short-term liquidity.

We use mortgage loan repurchase and participation facilities (commonly called warehouse lines) to fund newly-originated or purchased loans on a short-term basis until they are sold or securitized to secondary market investors, including GSEs or other third-party investors, and to fund repurchases of certain Ginnie Mae forward loans, HECM loans, second-lien loans and other types of loans. These facilities contain eligibility criteria that include aging and concentration limits by loan type among other provisions. Currently, our financing agreements generally have maximum terms of 364-days. The funds are typically repaid using the proceeds from the sale of the loans to the secondary market investors, usually within 30 days.

We also rely on the secondary mortgage market as a source of liquidity to support our lending operations. Substantially all of the mortgage loans that we originate or purchase are sold or securitized in the secondary mortgage market in the form of residential mortgage-backed securities guaranteed by Fannie Mae or Freddie Mac and, in the case of mortgage-backed securities guaranteed by Ginnie Mae, are mortgage loans insured or guaranteed by the FHA, VA or United States Department of Agriculture (USDA). We issued private placement securitizations to finance reverse mortgage buyouts, expanding our access to capital markets and reducing our reliance on warehouse financing facilities.

We regularly evaluate financing structure options including asset-backed financing to support our investment plans and accommodate our business needs. We strive to diversify our sources of funds, optimize maturities and reduce our funding cost. We continuously evaluate the allocation of our capital to MSR and other investments, the related returns, funding and liquidity requirements.

Covenants

Our debt agreements contain various qualitative and quantitative covenants including financial covenants, covenants to operate in material compliance with applicable laws and regulations, monitoring and reporting obligations and restrictions on our ability to engage in various activities, including but not limited to incurring or guarantying additional debt, paying dividends or making distributions on or purchasing equity interests of Onity and its subsidiaries, repurchasing or redeeming

capital stock or junior capital, repurchasing or redeeming subordinated debt prior to maturity, issuing preferred stock, selling or transferring assets or making loans or investments or other restricted payments, entering into mergers or consolidations or sales of all or substantially all of the assets of Onity and its subsidiaries, creating liens on assets to secure debt, and entering into transactions with affiliates. These covenants may limit the manner in which we conduct our business and may limit our ability to engage in favorable business activities or raise additional capital to finance future operations or satisfy future liquidity needs. In addition, breaches or events that may result in a default under our debt agreements include, among other things, nonpayment of principal or interest, noncompliance with our covenants, breach of representations, the occurrence of a material adverse change, insolvency, bankruptcy, certain material judgments and litigation and changes of control. See Note 14 — Borrowings to the Consolidated Financial Statements for additional information regarding our covenants.

The most restrictive liquidity requirement under our debt agreements, excluding additional Agency or regulatory minimum liquidity requirements, is for a minimum of \$75.0 million in consolidated liquidity, as defined, under certain of our mortgage loan financing and MSR financing facilities agreements. At December 31, 2024, we held unrestricted cash in excess of this minimum amount. The minimum liquidity requirements for PHH contained in some debt agreements are also subject to the minimum requirement set forth by the Agencies. Refer to Note 25 — Regulatory Requirements.

Effective September 30, 2023, we implemented the revised minimum tangible net worth and liquidity requirements for GSE and Ginnie Mae seller/servicers. We believe that we are in compliance with these requirements as of December 31, 2024. Ginnie Mae announced a new risk-based capital ratio effective on December 31, 2024 for Ginnie Mae issuers. Ginnie Mae issued a waiver extending the deadline by which PHH must meet the risk-based capital ratio requirements to October 1, 2025. PHH will be required to maintain a minimum of 6% ratio of Adjusted Net Worth less Excess MSRs, as defined, to risk weighted assets. We are currently implementing certain actions intended to achieve compliance with the requirements. We intend to continue to operate our Ginnie Mae issuer activities through PHH which would be subject to the risk-based capital rules, and separately conduct certain GSE MSR investment activities through PHH Asset Services LLC (PAS), a wholly owned subsidiary of PHH Corporation and Onity. We have received all necessary licensing and regulatory approvals to operate PAS except for one state with whom discussions are ongoing.

In addition, our debt agreements generally include cross default provisions such that a default under one agreement could trigger defaults under other agreements. If we fail to comply with our debt agreements and are unable to avoid, remedy or secure a waiver of any resulting default, we may be subject to adverse action by our lenders, including termination of further funding, acceleration of outstanding obligations, enforcement of liens against the assets securing or otherwise supporting our obligations, and other legal remedies, any of which could have a material adverse effect on our business, financial condition, liquidity and results of operations. We believe that we are in compliance with the covenants in our debt agreements as of December 31, 2024.

Credit Ratings

Credit ratings are intended to be an indicator of the creditworthiness of a company's debt obligations. Lower ratings generally result in higher borrowing costs and reduced access to capital markets. The following table summarizes our current ratings and outlook by the respective nationally recognized rating agencies. A credit rating is not a recommendation to buy, sell or hold securities and may be subject to revision or withdrawal at any time.

Rating Agency	Rated Entity	Long-term Corporate Rating	Review Status / Outlook	Date of last action
Moody's	Onity	B3	Stable	October 21, 2024
S&P	Onity	B-	Stable	October 21, 2024

On October 21, 2024, Moody's assigned a Caa1 rating to the new PHH Corporation Senior Notes Due 2029. Moody's also assigned a B3 corporate family rating to Onity and withdrew the B3 corporate family rating of PHH Mortgage Corporation. The entities' outlooks are stable. Moody's recognizes Onity's improving performance and return to profitability and adequate capitalization. At the same time, Moody's explained the rating is constrained by Onity's modest scale compared to mortgage peers and history of uneven financial performance.

On October 21, 2024, S&P assigned a B- rating to the new PHH Corporation Senior Notes Due 2029. S&P also affirmed the B- rating to Onity with a Stable Outlook. The Stable Outlook reflects S&P's expectations that Onity will maintain certain levels of debt ratio and debt-interest coverage while continuing to grow and diversify its servicing portfolio.

It is possible that additional actions by credit rating agencies could have a material adverse impact on our liquidity and funding position, including materially changing the terms on which we may be able to borrow money.

Cash Flows

Our operating cash flow is primarily impacted by operating results, changes in our servicing advance balances, the level of mortgage loan production, the timing of sales, securitizations or liquidation of mortgage loans, and the margin calls required under our MSR financing facilities or derivative instruments. As one of the main differences between proceeds from sale and origination or purchase of loans held for sale, newly originated (capitalized) MSRs are effectively classified as operating cash flows under GAAP. Purchases of MSRs through flow purchase agreements, Agency Cash Window and bulk acquisitions are classified as investing activity. MSR investments, whether originated or purchased, represent a key indicator of our ability to generate future income in our Servicing business.

We classify changes in HECM loans held for investment as investing activity and changes in the related HMBS borrowings as financing activity. Our MSR transfer agreements with MAV, Rithm and others that do not meet sale accounting criteria have a significant impact on our consolidated statements of cash flows. Because the payments we receive in connection with the HECM loan securitizations and MSR transfer agreements are recorded as secured financings, additions to, and reductions in, the balance of those secured financings are presented as financing activity in our consolidated statements of cash flows, excluding the changes in fair value attributable to inputs and assumptions.

Our cash flows are summarized as follows:

<i>\$ in millions</i>	Years Ended December 31,	
	2024	2023
Net cash provided by (used in) operating activities	\$ (574)	\$ 10
Net cash provided by (used in) investing activities	401	(100)
Net cash provided by financing activities	183	71
Net increase (decrease) in cash, cash equivalents and restricted cash	\$ 10	\$ (19)
Cash, cash equivalents and restricted cash at end of period	\$ 266	\$ 255

Cash flows for the year ended December 31, 2024

Our operating activities used \$574 million of cash during the year with \$837 million net cash paid on loans held for sale and \$263 million other operating cash inflows, net. The \$837 million net cash paid on loans held for sale is attributed to the growth of the pipeline with loan production volume exceeding sales, \$246 million for the purchase of reverse mortgage buyouts, and \$248 million originated MSRs. Operating cash outflows also include \$46 million margin calls on derivatives. Operating cash inflows included \$82 million net collections of servicing advances and earnings distributions of \$9 million received from our former equity method investee MAV Canopy.

Our investing activities provided \$401 million of cash. Cash inflows primarily include \$371 million net cash received in connection with our HECM reverse mortgages held for investment, \$205 million proceeds from sales of MSRs, \$31 million proceeds from sales of real estate as part of our reverse asset management strategy, \$51 million of net cash received from our former equity method investee MAV Canopy, including \$46 million proceeds received from the sale of our 15% investment in November 2024, and \$15 million received from the sale of advances in connection with sales of MSRs. Offsetting cash outflows include \$232 million to purchase MSRs and \$37 million to purchase real estate (reverse buyouts).

Our financing activities provided \$183 million of cash. Financing cash inflows are primarily comprised of \$803 million net from borrowings under our mortgage loan financing facilities due to the increase in loans held for sale, including \$570 million with the issuances of the OLIT securitization of reverse mortgage buyouts, \$498 million proceeds from issuance of the new PHH Corporation 9.875% Senior Notes due November 2029, \$43 million net proceeds from borrowings under our MSR financing facilities, \$28 million of proceeds from the sale of MSRs accounted for as a financing in connection with sales of MSRs, \$24 million of proceeds from ESS financings, and \$20 million proceeds from the issuance of Series B Preferred Stock in connection with the acquisition of reverse mortgage assets of MAM (cash balance transferred with all other assets acquired and liabilities assumed). Offsetting cash outflows include \$659 million to redeem or repurchase all of our 7.875% PHH Senior Secured Notes and 9.875% Onity Senior Secured Notes, \$83 million of net repayments on advance match funded liabilities, and \$71 million of net payments on the financing liabilities related to MSRs transferred and ESS financings due to runoff. Cash inflows of \$1,074 million received in connection with our reverse mortgage securitizations, which are accounted for as secured financings, were more than offset by repayments on the related financing liability of \$1,475 million, indicating a runoff of the portfolio that exceeds originations.

Cash flows for the year ended December 31, 2023

Our operating activities provided a net \$10 million of cash during the year, after \$258 million net cash paid on loans held for sale, with loan production volumes exceeding sales, \$183 million of which was used to finance newly originated MSRs.

Operating cash flows included \$76 million net collections of servicing advances and earnings distributions of \$7 million received from our equity method investee MAV Canopy..

Our investing activities used \$100 million of cash. The primary uses of cash in our investing activities was \$120 million to purchase MSRs, \$42 million to acquire advances in connection with MSR transactions and \$11 million to purchase real estate. Offsetting cash inflows \$45 million net cash inflows in connection with our HECM reverse mortgages, \$18 million proceeds from the sale of real estate, and \$4 million of capital distributions received, net of contributions, from our equity method investee MAV Canopy.

Our financing activities provided \$71 million of cash. Financing cash inflows are primarily comprised of \$175 million of proceeds from sale of MSRs accounted for as a financing in connection with sales of MSRs and \$69 million of proceeds from ESS financings. Offsetting cash outflows include \$95 million of net payments on the financing liabilities related to MSRs transferred and ESS financings due to runoff, and \$36 million net repayment of borrowings under our MSR financing facilities, and \$14 million of net repayment on advance match funded liabilities. We also paid \$14 million to repurchase \$15 million of our 7.875% PHH Senior Secured Notes. Cash inflows of \$1,055 million received in connection with our reverse mortgage securitizations, which are accounted for as secured financings, were more than offset by repayments on the related financing liability of \$1,070 million.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our ability to measure and report our financial position and operating results is influenced by the need to estimate the impact or outcome of future events based on information available at the date of the financial statements. An accounting estimate is considered critical if it requires that management make assumptions about matters that were highly uncertain at the time the accounting estimate was made. In developing estimates and assumptions, management uses all available information; however, actual results could materially differ from those estimates and assumptions. If actual results differ from our judgments and assumptions, then it may have an adverse impact on the results of operations and cash flows. We have processes in place to monitor these judgments and assumptions, and management is required to review critical accounting policies and estimates with the Audit Committee of the Board of Directors. The following is a summary of certain accounting policies and estimates involving significant judgments. Our significant accounting policies and critical accounting estimates are described in Note 1 — Organization, Basis of Presentation and Significant Accounting Policies to the Consolidated Financial Statements.

Fair Value Measurements

We use fair value for recognition, subsequent measurement and disclosure of certain instruments. Refer to Note 3 — Fair Value to the Consolidated Financial Statements for the fair value hierarchy, descriptions of valuation methodologies used to measure significant assets and liabilities at fair value and details of the valuation models, key inputs to those models, significant assumptions utilized, and sensitivity analyses. We follow the fair value hierarchy to prioritize the inputs utilized to measure fair value and classify instruments as Level 3 when the valuation technique requires significant unobservable inputs or assumptions. We review and modify, as necessary, our fair value hierarchy classifications on a quarterly basis. The determination of the fair value of these Level 3 financial assets and liabilities and MSRs requires significant management judgment and estimation. See Item 7A. Quantitative and Qualitative Disclosures About Market Risk for a sensitivity analysis reflecting the estimated change in the fair value of our MSRs, HECM loans held for investment and loans held for sale carried at fair value as well as any related derivatives at December 31, 2024, given hypothetical instantaneous parallel shifts in the yield curve.

As of December 31, 2024, 91% of our assets and 74% of our liabilities were reported at fair value, with fair value changes reported in our statement of operations. Substantially all our assets and liabilities at fair value were classified as Level 3 instruments due to unobservable inputs. See Note 3 — Fair Value for the carrying amounts and the estimated fair values of our financial instruments and certain of our nonfinancial assets measured at fair value on a recurring and nonrecurring basis or disclosed, but not measured, using fair value.

We have various internal controls in place to ensure the appropriateness of fair value measurements. Significant fair value measures are subject to analysis and management review and approval. We utilize a number of controls to ensure the results are reasonable, including comparison, or “back testing,” of model results against actual performance and monitoring the market for recent trades, including our own price discovery in connection with potential and completed sales, and other market information that can be used to benchmark inputs or outputs. Considerable judgment is used in forming conclusions about Level 3 inputs. Changes to these inputs could have a significant effect on fair value measurements.

Valuation of Reverse Mortgage Loans Held for Investment and HMBS-related Borrowings

Reverse mortgage loans are insured by the FHA and transferred into Ginnie Mae guaranteed securities (or HMBS). Loan transfers in these Ginnie Mae securitizations do not qualify for sale accounting and are recorded as secured financings. We record both loans held for investment and the corresponding HMBS borrowings at fair value. Our net exposure to reverse mortgages and the HMBS-related borrowings is limited to the residual value we retain, including future draw commitments and servicing value. Changes in the fair value of the loans held for investment are largely offset by changes in the value of the

related secured financing. As of December 31, 2024, we reported \$11.0 billion securitized loans held for investment at fair value and \$10.9 billion HMBS-related borrowings at fair value.

The fair value of both reverse mortgage loans held for investment and HMBS-related borrowings is based primarily on discounted cash flow methodologies. Inputs to the discounted cash flows of these assets include future draws and tail securitization spreads, conditional prepayment rate (including voluntary and involuntary prepayments) and discount rate. The determination of fair value requires management judgment due to the significant unobservable assumptions, including conditional prepayment rate and discount rate.

We engage third-party valuation experts to support our valuation and provide observations and assumptions related to market activities. We evaluate the reasonableness of our fair value estimate and assumptions using historical experience, or cash flow backtesting, adjusted for prevailing market conditions and benchmarks with third-party expert valuations. We believe that our back-testing and benchmarking procedures provide reasonable assurance that the fair value used in our consolidated financial statements complies with the accounting guidance for fair value measurements and disclosures and reflect the assumptions that a market participant would use.

Refer to Note 3 — Fair Value for the range and weighted average of significant unobservable assumptions used (expressed as a percentage of UPB) as of December 31, 2024 and December 31, 2023.

Valuation of MSRs and Other Financing Liabilities, at Fair Value

We originate MSRs from our lending activities and acquire MSRs through flow purchase agreements, Agency Cash Window programs or bulk purchases. We account for MSRs, pledged MSR liabilities and ESS financing liabilities at fair value (reported within Other financing liabilities, at fair value). As of December 31, 2024, we reported a \$2.5 billion fair value of MSRs and \$0.8 billion Other financing liabilities.

We determine the fair value of MSRs, pledged MSR liabilities and ESS financing liabilities primarily using discounted cash flow methodologies. The significant estimated future cash inflows for MSRs include servicing fees, late fees, float earnings and other ancillary fees, and significant cash outflows include the cost of servicing, the cost of financing servicing advances and compensating interest payments. The determination of the fair value of MSRs, pledged MSR liabilities and ESS financing liabilities requires management judgment relating to the significant unobservable assumptions that underlie the valuation, including prepayment speed, delinquency rates, cost to service and discount rate. Our judgement is informed by the transactions we observe in the market, by our actual portfolio performance and by the advice and information we obtain from our valuation experts, amongst other factors.

To assist in the determination of fair value, we engage third-party valuation experts who generally utilize: (a) transactions involving instruments with similar collateral and risk profiles, adjusted as necessary based on specific characteristics of the asset or liability being valued; and/or (b) industry-standard modeling, such as a discounted cash flow model and a prepayment model, in arriving at their estimate of fair value. The prices provided by the valuation experts reflect their observations and assumptions related to market activity, generally the bulk market, incorporating available industry survey results and client feedback, and including risk premiums and liquidity adjustments. While interest rates are a key value driver, MSR fair value may change for other market-driven factors, including but not limited to the supply and demand of the market or the required yield or perceived value by investors of such MSRs. While the models and related assumptions used by the valuation experts are proprietary to them, we understand the methodologies and assumptions used to develop the prices based on our ongoing due diligence, which includes regular discussions with the valuation experts, and we perform additional verification and analytical procedures. We evaluate the reasonableness of our third-party experts' assumptions using historical experience adjusted for prevailing market conditions and benchmarks with third-party expert valuation and market participant surveys. We believe that our procedures provide reasonable assurance that the fair value used in our consolidated financial statements comply with the accounting guidance for fair value measurements and disclosures and reflect the assumptions that a market participant would use.

The following table provides the range and weighted average of significant unobservable assumptions used (expressed as a percentage of UPB) by MSR class projected for the five-year period beginning December 31, 2024:

	Conventional	Government-Insured	Non-Agency
Prepayment speed			
Range	4.7% to 8.8%	6.1% to 12.5%	6.7% to 7.99%
Weighted average	6.8%	8.2%	7.2%
Delinquency			
Range	0.4% to 1.2%	5.7% to 10.7%	8.5% to 17.8%
Weighted average	0.6%	7.0%	12.1%
Cost to service (in dollars)			
Range	\$67 to \$70	\$96 to \$117	\$177 to \$223
Weighted average	\$68	\$104	\$194
Discount rate	9.8%	10.8%	10.9%

Changes in these assumptions are generally expected to affect our results of operations as follows:

- Increases in prepayment speeds generally reduce the value of our MSRs as the underlying loans prepay faster which causes accelerated MSR portfolio runoff, higher compensating interest payments and lower overall servicing fees, partially offset by a lower overall cost of servicing, increased float earnings on higher float balances and lower interest expense on lower servicing advance balances.
- Increases in delinquencies generally reduce the value of our MSRs as the cost of servicing increases during the delinquency period, and the amounts of servicing advances and related interest expense also increase.
- Increases in the discount rate reduce the value of our MSRs due to the lower overall net present value of the net cash flows.
- Increases in interest rate assumptions will increase interest expense for financing servicing advances although this effect is partially offset by an increase in the amount of float earnings.

The fair value of Pledged MSR liabilities and ESS financing liabilities is generally expected to be impacted by the same assumptions as the underlying MSR, in opposite direction. Instrument or transaction specific assumption may apply and require our judgment, including the estimated life of the subservicing agreement when MSRs are sold subservicing retained, or the yield or discount rate to apply.

Income Taxes

We record a tax provision for the anticipated tax consequences of the reported results of operations. We compute the provision for income taxes using the asset and liability method, under which deferred tax assets and liabilities are recognized for the expected future tax consequences of temporary differences between the financial reporting and tax bases of assets and liabilities, and for operating losses and tax credit carryforwards. We measure deferred tax assets and liabilities using the currently enacted tax rates in each jurisdiction that applies to taxable income in effect for the years in which those tax assets are expected to be realized or settled. We record a valuation allowance to reduce deferred tax assets to the amount that is believed more likely than not to be realized.

We conduct periodic evaluations of positive and negative evidence to determine whether it is more likely than not that the deferred tax asset can be realized in future periods. In these evaluations, we gave more significant weight to objective evidence, such as our actual financial condition and historical results of operations, as compared to subjective evidence, such as projections of future taxable income or losses.

We recognize that cumulative losses in recent years is an objective form of negative evidence in assessing the need for a valuation allowance and that such negative evidence is difficult to overcome. Other factors considered in these evaluations are estimates of future taxable income, future reversals of temporary differences, tax character and the impact of tax planning strategies that may be implemented, if warranted.

As a result of these evaluations, we recognized a full valuation allowance on our U.S. deferred tax assets at December 31, 2024 and 2023. The U.S. jurisdictional deferred tax assets are not considered to be more likely than not realizable based on all available positive and negative evidence. We intend to continue maintaining a full valuation allowance on our deferred tax assets in the U.S. until there is sufficient evidence to support the reversal of all or some portion of these allowances. Release of the valuation allowance would result in the recognition of certain deferred tax assets and a decrease to income tax expense for

the period in which the release is recorded. However, the exact timing and amount of the valuation allowance release are subject to change based on the profitability that we achieve.

We recognize tax benefits from uncertain tax positions only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position. The tax benefits recognized in the financial statements from such positions are then measured based on the largest benefit that has a greater than 50% likelihood of being realized upon ultimate settlement.

NOL carryforwards, Section 163(j) disallowed interest expense carryforwards, and certain built-in losses or deductions may be subject to annual limitations under Internal Revenue Code Section 382 (Section 382) (or comparable provisions of foreign or state law) in the event that certain changes in ownership were to occur. In addition, tax credit carryforwards may be subject to annual limitations under Internal Revenue Code Section 383 (Section 383). We periodically evaluate our NOL and tax credit carryforwards and deductions and/or certain built-in losses and whether certain changes in ownership have occurred as measured under Section 382 that would limit our ability to utilize a portion of these tax attributes. If it is determined that an ownership change(s) has occurred, there may be annual limitations on the use of these NOL and tax credit carryforwards under Sections 382 and 383 (or comparable provisions of foreign or state law).

Onity and PHH Corporation have both experienced historical ownership changes that have caused the use of certain tax attributes to be limited and have resulted in the write-off of certain of these attributes based on our inability to use them in the carryforward periods defined under the tax laws. Onity continues to monitor the ownership in its stock to evaluate whether any additional ownership changes have occurred that would further limit its ability to utilize certain tax attributes. As such, our analysis regarding the amount of tax attributes that may be available to offset taxable income in the future without restrictions imposed by Section 382 may continue to evolve.

Indemnification Obligations

We have exposure to representation, warranty and indemnification obligations because of our lending, loan sales and securitization activities, our acquisitions to the extent we assume one or more of these obligations, and in connection with our servicing practices. We initially recognize these obligations at fair value. Thereafter, the estimation of the liability considers probable future obligations based on industry data of loans of similar type segregated by year of origination, to the extent applicable, and estimated loss severity based on current loss rates for similar loans, our historical rescission rates and the current pipeline of unresolved demands. Loss severity considers the historical loss experience that we incur upon loan sale or collateral liquidation, as well as current market conditions. We monitor the adequacy of the overall liability and make adjustments, as necessary, after consideration of our historical losses and other qualitative factors including ongoing dialogue and experience with our counterparties. We do not provide or assume any origination representations and warranties in connection with our MSR purchases. As of December 31, 2024, we have recorded a liability for representation and warranty obligations and similar indemnification obligations of \$27.4 million. See Note 27 — Contingencies for additional information.

Litigation

In the ordinary course of business, we are a defendant in, or a party or potential party to, many threatened and pending litigation matters. We monitor our litigation matters, including advice from external legal counsel, and regularly perform assessments of these matters for potential loss accrual and disclosure. We establish liabilities for settlements, judgments on appeal and filed and/or threatened claims for which we believe it is probable that a loss has been or will be incurred and the amount can be reasonably estimated based on current information regarding these matters. Where we determine that a loss is not probable but is reasonably possible or where a loss in excess of the amount accrued is reasonably possible, we disclose an estimate of the amount of the loss or range of possible losses for the claim if a reasonable estimate can be made, unless the amount of such reasonably possible loss is not material to our financial position, results of operations or cash flows. Management's assessment involves the use of estimates, assumptions, and judgments, including progress of the matter, prior experience, available defenses, and the advice of legal counsel and other experts. Accruals are adjusted as more information becomes available or when an event occurs requiring a change. Our total accrual for probable and estimable legal and regulatory matters, including accrued legal fees, was \$16.0 million at December 31, 2024. It is possible that we will incur losses relating to threatened and pending litigation that materially exceed the amount accrued. We cannot currently estimate the amount, if any, of reasonably possible losses above amounts that have been recorded at December 31, 2024.

RECENT ACCOUNTING DEVELOPMENTS

Recent Accounting Pronouncements

For additional information, see Note 1 — Organization, Basis of Presentation and Significant Accounting Policies to the Consolidated Financial Statements for additional information.

Our adoption of the standards listed below in 2024 did not have a material impact on our consolidated financial statements:

- Leases (ASC 842) Common Control Arrangements (ASU 2023-01)
- Segment Reporting (ASC 280) Improvements to Reportable Segment Disclosures (ASU 2023-07)

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK (Dollars in millions unless otherwise indicated)

Interest Rates

Our principal market risk exposure is the impact of interest rate changes on our mortgage-related assets and commitments, including MSRs, loans held for sale, loans held for investment, interest rate lock commitments (IRLCs) and other derivative instruments. In addition, changes in interest rates could materially and adversely affect the amount of escrow and float income, the volume of mortgage loan originations or result in MSR fair value changes. We also have exposure to the effects of changes in interest rates on our floating-rate borrowings, including MSR and advance financing facilities.

Our management-level Market Risk Committee establishes and maintains policies that govern our risk appetite and associated hedging programs, including such factors as duration and interest rate sensitivity measures, limits, targeted hedge coverage ratios, the hedge instruments that we are permitted to use in our hedging activities and the counterparties with whom we are permitted to enter into hedging transactions and our liquidity risk profile. See Note 18 — Derivative Financial Instruments and Hedging Activities to the Consolidated Financial Statements for additional information regarding our use of derivatives.

MSR Hedging Strategy

MSRs are carried at fair value with changes in fair value being recorded in earnings in the period in which the changes occur. The fair value of MSRs is subject to changes in market interest rates, among other inputs and assumptions.

The objective of our MSR interest rate risk management and hedging policy is to protect shareholders' equity and earnings against the fair value volatility of interest-rate sensitive MSR portfolio exposure, considering market, liquidity, cost and other conditions. The interest-rate sensitive MSR portfolio exposure is defined as follows:

- Agency MSR portfolio,
- expected Agency MSR bulk transactions subject to letters of intent (LOI),
- less the Agency MSRs subject to our sale agreements with MAV, Rithm and others, also referred to as Pledged MSR liabilities (See Note 8 — Other Financing Liabilities, at Fair Value),
- less the asset value for securitized HECM loans, net of the corresponding HMBS-related borrowings (also referred to as HECM or reverse MSR for risk management purposes),
- other interest-rate sensitive exposures, including our ESS financing liabilities, as deemed appropriate by the Market Risk Committee.

The hedge coverage ratio, defined as the ratio of hedge (including reverse MSR) to asset rate sensitivity (referred to as DV01) is subject to lower and upper target thresholds under our policy. We regularly evaluate the hedge coverage ratio at the intended shock interval to determine if it is relevant or warrants adjustment based on market conditions, symmetry of interest rate risk exposure, liquidity impacts under shock scenarios, and other factors. As the market dictates, management may choose to maintain the hedge coverage ratio at different thresholds, with approval of the Market Risk Committee, in order to preserve liquidity and/or optimize asset returns.

Effective September 2022, a minimum 25% and 30% hedge coverage ratios were required for interest rate declines less than, and more than 50 basis points, respectively. During the second quarter of 2023, management raised its minimum hedge coverage ratio to 60%. Effective December 2023, we established a targeted hedge coverage ratio range between 95% and 105%. In April 2024, we changed the risk measure to a dollar DV01 that resulted in an equivalent range of approximately 90% to 110%.

With a less-than 100% hedge coverage ratio, the changes in fair value of our hedging instruments may not fully offset the changes in fair value of our net MSR portfolio exposure attributable to interest rate changes. In addition, while interest rate sensitivity measures (DV01) may remain within the range of our hedging strategy's objective, actual changes in fair value of the derivatives and MSR portfolio may not offset to the same extent, due to many factors. These factors include non-parallel changes in the interest rate curve, the convexity of the MSR, the basis risk inherent in the MSR profile and hedging instruments,

model risk observed between actual vs. expected fair value changes, and hedge costs. We continuously evaluate the use of hedging instruments with the objective of enhancing the effectiveness of our interest rate hedging strategy.

Our derivative instruments include forward trades of MBS or Agency TBAs with different banking counterparties, exchange-traded interest rate swap futures and interest rate options. These derivative instruments are not designated as accounting hedges. TBAs, or To-Be-Announced securities are actively traded, forward contracts to purchase or sell Agency MBS on a specific future date. From time to time, we enter into exchange-traded options contracts with purchased put options financed by written call options. We report changes in fair value of these derivative instruments in MSR valuation adjustments, net in our consolidated statements of operations, within the Servicing segment. We may, from time to time, establish inter-segment derivative instruments between the MSR and pipeline hedging strategies to minimize the use of third-party derivatives (none in 2024 or 2023). The fair value gains and losses of such inter-segment derivatives effectively reclassify certain derivative gains and losses between MSR valuation adjustments, net within the Servicing segment and Gain on loans held for sale, net within the Originations segment to reflect the performance of these economic hedging strategies in the appropriate segments (see Note 24 — Business Segment Reporting for the amount of such reclassification). Such inter-segment derivatives are eliminated in our consolidated financial statements.

The derivative instruments are subject to margin requirements, posted as either initial or variation margin. Onity may be required to post or may be entitled to receive cash collateral with its counterparties through margin calls, based on daily value changes of the instruments. Changes in market factors, including interest rates, and our credit rating may require us to post additional cash collateral and could have a material adverse impact on our financial condition and liquidity.

Loans Held for Investment and HMBS-related Borrowings

The fair value of our securitized HECM loan portfolio generally decreases as market interest rates rise and increases as market rates fall. As our HECM loan portfolio is predominantly comprised of ARMs, higher interest rates cause the loan balance to accrue and reach a 98% maximum claim amount liquidation event more quickly, while lower interest rates extend the timeline to reach maximum claim amount liquidation. Additionally, portfolio value is heavily influenced by market spreads for fixed and discount margin for ARMs.

The fair value of our securitized HECM loan portfolio net of the fair value of the HMBS-related borrowings represent a reverse mortgage economic MSR (HMSR) for risk management purposes. The fair value of our HMSR generally decreases as market interest rates rise and increases as market rates fall. As our HECM loan portfolio is predominantly comprised of ARMs, higher interest rates cause the loan balance to accrue and reach a 98% maximum claim amount liquidation event more quickly, with lower interest rates extending the timeline to liquidation. HECM loans have a longer duration than HMBS-related borrowings as a result of the future draw commitments, and our obligations as issuer of HMBS to purchase loans out of the Ginnie Mae securitization pools once the outstanding principal balance of the related HECM loan is equal to 98% of the maximum claim amount. This HMSR exposure is used as a partial offset to our forward MSR exposure and managed as part of our MSR hedging strategy described above.

Pipeline Hedging Strategy - Loans Held for Sale and IRLCs

In our Originations business, we are exposed to interest rate risk and related price risk during the period from the date of the interest rate lock commitment through (i) the lock commitment cancellation or expiration date or (ii) through the date of sale or securitization of the resulting loan into the secondary mortgage market. Loan commitments for forward loans generally range from 5 to 75 days, with the majority of our commitments to borrowers for 40 to 60 days and our commitments to correspondent sellers for 5 to 30 days. Loans held for sale are generally funded and sold within 5 to 30 days. This interest rate exposure of loans and IRLCs is economically hedged with derivative instruments, including forward sales of Agency TBAs. The objective of our pipeline hedging strategy is to reduce the volatility of the fair value of IRLCs and loans due to market interest rates, thus preserving the initial gain on sale margin at lock date. The net daily market risk position of net pull-through adjusted locks and loans held for sale, less the offsetting hedges of the pipeline, is monitored daily and its daily limit is +/- 5%. We report changes in fair value of these derivative instruments as gain or loss on economic hedge instruments within either Gain on loans held for sale, net or Gain on reverse loans held for investment and HMBS-related borrowings, net in our consolidated statements of operations.

EBO and Loan Modification Hedging – Loans Held for Sale, at fair value

In our Servicing business, we hedge certain Ginnie Mae EBO loans repurchased out of securitization pools for modification and reperformance with TBAs to manage the interest rate risk while these loans await redelivery.

Advance Match Funded Liabilities

We monitor the effect of changes in interest rates on the interest paid on our variable-rate advance financing debt. Earnings on cash and float balances are a partial offset to our exposure to changes in interest expense.

Sensitivity Analysis

Fair Value MSRs, Loans Held for Sale, Loans Held for Investment and Related Derivatives

We assess and manage our interest rate risk on a daily basis primarily using sensitivity analyses. We develop sensitivity analyses to determine the impact on our earnings and financial condition across various interest rate scenarios that could be expected over different time horizons. Our interest rate exposure spans from overnight rates to 30-year rates, with increased sensitivity related to the 5-, 10-, and 30-year rates. Sensitivity analyses are based on hypothetical change in values of different interest-rate sensitive assets and liabilities together with our hedges and are presented under a set instantaneous +/- 25 basis point parallel move in rates. Changes in fair value cannot be extrapolated because the relationship to the change in fair value may not be linear and other factors may apply, such as change in yield, spreads or other assumptions.

The following table summarizes the estimated change in the fair value of our MSRs, HECM loans held for investment and loans held for sale that we have elected to carry at fair value as well as any related derivatives at December 31, 2024, given hypothetical instantaneous parallel shifts in the yield curve. These sensitivities are hypothetical and presented for illustrative purposes only. Changes in fair value based on variations in assumptions generally cannot be extrapolated because the relationship to the change in fair value may not be linear, among other factors.

	Change in Fair Value	
	Down 25 bps	Up 25 bps
Asset value of securitized HECM loans, net of HMBS-related borrowing	\$ 5	\$ (5)
Loans held for investment - Unsecuritized HECM loans and tails	—	—
Loans held for sale	17	(20)
Derivative instruments	1	—
Total MSRs - Agency and non-Agency (1)	(25)	23
IRLCs	(1)	1
Total, net	<u>\$ (2)</u>	<u>\$ (1)</u>

(1) Primarily reflects the impact of market interest rate changes on projected prepayments on the Agency MSR portfolio, Rithm and MAV pledged MSR financing liabilities and ESS financing liabilities.

Borrowings

The majority of the collateralized debt used to finance our operations is based on variable rates, but remains exposed to interest rate fluctuations between repricing dates. Our corporate debt is based on fixed interest rates. As servicer, we are also exposed to the impact of interest rate fluctuations on the float income we earn on balances held in trust from the date a loan payment is received from borrowers to the date funds are forwarded to investors.

Based on December 31, 2024 balances, if interest rates were to decrease by 100 bps, we estimate a net positive impact on our profitability of approximately \$1.4 million resulting from a decrease of \$22.2 million in annual interest income and other credits on cash deposits and float balances, and a decrease of \$23.6 million in annual interest expense on our variable-rate debt.

Foreign Currency Exchange Rate Risk

Our operations in India and the Philippines expose us to foreign currency exchange rate risk to the extent that our foreign exchange positions remain unhedged. Depending on the magnitude and risk of our positions we may enter into forward exchange contracts to hedge against the effect of changes in the value of the India Rupee or Philippine Peso. We did not enter into any foreign currency hedging derivative instruments during the three year period ended December 31, 2024.

Home Prices

Inactive reverse mortgage loans for which the maximum claim amount has not been met are generally foreclosed upon on behalf of Ginnie Mae with the REO remaining in the related HMBS until liquidation. Inactive MCA repurchased loans are generally foreclosed upon and liquidated by the HMBS issuer. Although active and inactive reverse mortgage loans are insured by FHA, we may incur expenses and losses in the process of repurchasing and liquidating these loans that are not reimbursable by FHA in accordance with program guidelines. In addition, in certain circumstances, we may be subject to real estate price risk to the extent we are unable to liquidate REO within the FHA program guidelines. As our reverse mortgage portfolio seasons, and the volume of MCA repurchases increases, our exposure to this risk will increase.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA

The information required by this section is contained in the Consolidated Financial Statements of Onity Group Inc. and Report of Deloitte & Touche LLP, Independent Registered Public Accounting Firm, beginning on Page F-1.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None.

ITEM 9A. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, under the supervision of and with the participation of our principal executive officer and our principal financial officer, has evaluated the effectiveness of our disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (Exchange Act), as of the end of the period covered by this Annual Report. Based on such evaluation, management concluded that, as of the end of such period, our disclosure controls and procedures are effective.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting, as that term is defined in Exchange Act Rules 13a-15(f) and 15d-15(f).

Under the supervision of and with the participation of our management, including our principal executive officer and principal financial officer, we conducted an evaluation of our internal control over financial reporting as of December 31, 2024, based on the framework set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework (2013 framework). Based on that evaluation, our management concluded that, as of December 31, 2024, internal control over financial reporting is effective based on criteria established in Internal Control—Integrated Framework issued by the COSO.

The effectiveness of Onity's internal control over financial reporting as of December 31, 2024 has been audited by Deloitte & Touche LLP, an independent registered public accounting firm, as stated in their report that appears herein.

Limitations on the Effectiveness of Controls

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States of America and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. In addition, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures may deteriorate.

Changes in Internal Control over Financial Reporting

There have not been any changes in our internal control over financial reporting during our fiscal quarter ended December 31, 2024 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

ITEM 9B. OTHER INFORMATION

None.

ITEM 9C. DISCLOSURE REGARDING FOREIGN JURISDICTIONS THAT PREVENT INSPECTIONS

Not applicable.

PART III

ITEM 10. DIRECTORS, EXECUTIVE OFFICERS AND CORPORATE GOVERNANCE

We have adopted a Code of Business Conduct and Ethics that applies to our directors, officers and employees as required by the New York Stock Exchange rules. We have also adopted a Code of Ethics for Senior Financial Officers that applies to our Chief Executive Officer, Chief Financial Officer, and Chief Accounting Officer. Any waivers for executive officers or directors of Onity from either the Code of Business Conduct and Ethics or the Code of Ethics for Senior Financial Officers must be approved by our Board of Directors or a Board Committee and must be promptly disclosed. The Code of Business Conduct and Ethics and the Code of Ethics for Senior Financial Officers are available on our web site at www.onitygroup.com in the “Shareholders” section under “Corporate Governance.” Any amendments to the Code of Business Conduct and Ethics or the Code of Ethics for Senior Financial Officers, as well as any waivers that are required to be disclosed under the rules of the SEC or the New York Stock Exchange, will be posted on our website.

We have adopted an Insider Trading Prevention Policy governing the purchase, sale and/or other dispositions of our securities by our directors, officers and employees. A copy of the Insider Trading Prevention Policy is filed as an exhibit to this Annual Report. In addition, it is Onity’s practice to comply with the applicable laws and regulations relating to insider trading.

The additional information required by this item is incorporated by reference to the information contained in our definitive Proxy Statement with respect to our 2025 Annual Meeting, which we intend to file with the SEC no later than 120 days after the end of our fiscal year ended December 31, 2024.

ITEM 11. EXECUTIVE COMPENSATION

The information required by this item is incorporated by reference to the information contained in our definitive Proxy Statement with respect to our 2025 Annual Meeting, which we intend to file with the SEC no later than 120 days after the end of our fiscal year ended December 31, 2024.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT AND RELATED STOCKHOLDER MATTERS

The information required by this item is incorporated by reference to the information contained in our definitive Proxy Statement with respect to our 2025 Annual Meeting, which we intend to file with the SEC no later than 120 days after the end of our fiscal year ended December 31, 2024.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS, AND DIRECTOR INDEPENDENCE

The information required by this item is incorporated by reference to the information contained in our definitive Proxy Statement with respect to our 2025 Annual Meeting, which we intend to file with the SEC no later than 120 days after the end of our fiscal year ended December 31, 2024.

ITEM 14. PRINCIPAL ACCOUNTANT FEES AND SERVICES

The information required by this item is incorporated by reference to the information contained in our definitive Proxy Statement with respect to our 2025 Annual Meeting, which we intend to file with the Securities and Exchange Commission no later than 120 days after the end of our fiscal year ended December 31, 2024.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES

(1) and (2) Financial Statements and Schedules. The information required by this section is contained in the Consolidated Financial Statements of Onity Group Inc. and Report of Deloitte & Touche LLP, Independent Registered Public Accounting Firm, beginning on Page F-1.

(3) Exhibits.

- 3.1 Amended and Restated Articles of Incorporation, as amended (20)
- 3.2 Amended and Restated Bylaws of Onity Group Inc. (8)

4.1	Form of Certificate of Common Stock (1)
4.2	Form of Series B Preferred Stock (18)
4.3	The Company agrees to furnish to the Securities and Exchange Commission upon request a copy of each instrument with respect to the issuance of long-term debt of the Company and its subsidiaries, the authorized principal amount of which does not exceed 10% of the consolidated assets of the Company and its subsidiaries.
4.4	Description of Common Stock (12)
10.1*	Onity Group Inc. 1998 Annual Incentive Plan, as amended (filed herewith)
10.2*	Onity Group Inc. Deferral Plan for Directors, dated March 7, 2005 (2)
10.3*	Onity Group Inc. 2007 Equity Incentive Plan, dated May 10, 2007 (3)
10.4*	Onity Group Inc. 2017 Performance Incentive Plan, as amended (13)
10.5(b)	Binding Term Sheet dated as of February 22, 2019 between Altisource S.à r.l., Onity Group Inc. and Ocwen Mortgage Servicing, Inc. (7)
10.6	Services Agreement, dated as of August 10, 2009, by and between Onity Group Inc. and Altisource Solutions S.à r.l., as amended (14)
10.7(d)	Binding Term Sheet among Onity Group Inc., Ocwen USVI Services, LLC and Altisource S.à r.l. dated as of May 5, 2021 (10)
10.8*	Form of Indemnification Agreement (10)
10.9*	Form of Undertaking to Repay Advancement of Indemnification Expenses (5)
10.10(a)	Transfer Agreement dated as of July 23, 2017 by and between Ocwen Loan Servicing, LLC, New Residential Mortgage LLC, Onity Group Inc., and New Residential Investment Corp., as amended (filed herewith)
10.11	Subservicing Agreement dated as of July 23, 2017 by and between New Residential Mortgage LLC and Ocwen Loan Servicing, LLC, as amended (filed herewith)
(a)(b)(c)(d)	New RMSR Agreement, dated as of January 18, 2018 by and among Ocwen Loan Servicing, LLC, HLSS Holdings, LLC, HLSS MSR - EBO Acquisition LLC, and New Residential Mortgage LLC, as amended (filed herewith)
10.12(a)	Subservicing Agreement dated as of August 17, 2018 between New Penn Financial, LLC and Ocwen Loan Servicing, LLC, as amended (filed herewith)
(b)(c)(d)	
10.13(a)	Offer Letter, dated April 17, 2018, between Onity Group Inc. and Glen Messina, as amended (14)
(b)(c)(d)	
10.14*	Offer Letter dated May 11, 2022 between Onity Group Inc. and Sean O'Neil (4)
10.15*	Form of Director Restricted Stock Unit Agreement (1)
10.16*	Amended and Restated Onity Group Inc. United States Basic Severance Plan (6)
10.17*	Amended and Restated Onity Group Inc. United States Change in Control Severance Plan (6)
10.18*	Onity Group Inc. Executive Nonqualified Deferred Compensation Plan (15)
10.19*	Transaction Agreement between Onity Group Inc. and Oaktree Capital Management L.P. and affiliates, dated as of December 21, 2020 (12)
10.20(c)	First Amendment to Transaction Agreement, dated as of March 4, 2021, by and among OCW MAV Holdings, LLC, Onity Group Inc., and affiliates of Oaktree Capital Management L.P. (11)
10.21(c)	Form of Securities Purchase Agreement between Onity Group Inc., Opps OCW Holdings, LLC, and ROF8 OCW MAV PT, LLC (12)
10.22(c)	Form of Registration Rights Agreement between Onity Group Inc., Opps OCW Holdings, LLC, and ROF8 OCW MAV PT, LLC (12)
10.23	Form of Warrant issuable to Opps OCW Holdings, LLC and ROF8 OCW MAV PT, LLC (12)
10.24	Onity Group Inc. 2021 Equity Incentive Plan, as amended (9)
10.25*	Note and Warrant Purchase Agreement, dated as of February 9, 2021, by and among Onity Group Inc., the purchasers signatory thereto, and Oaktree Fund Administration, LLC, as collateral agent (11)
10.26(c)	Second Lien Notes Pledge and Security Agreement, dated as of March 4, 2021, among Onity Group Inc. and Oaktree Fund Administration, LLC (11)
10.27(c)	Form of \$199,500,000 aggregate principal amount Senior Secured Notes due 2027 (11)
10.28	Form of Warrant issued March 4, 2021 (11)
10.29	Registration Rights Agreement dated as of March 4, 2021 between Onity Group Inc. and entities managed by Oaktree Capital Management L.P. (11)
10.30	Registration Rights Agreement dated as of November 1, 2024 between Onity Group Inc. and affiliates of Waterfall Asset Management, LLC (18)
10.31	

10.32	First Lien Notes Pledge and Security Agreement dated as of March 4, 2021 among PHH Mortgage Corporation, PHH Corporation, other guarantors thereto, and Wilmington Trust, National Association (11)
10.33(c)	Indenture, dated as of March 4, 2021, among PHH Mortgage Corporation, as the issuer, Onity Group Inc., as the parent, and the other guarantors thereto, and Wilmington Trust, National Association, as the trustee and collateral trustee (11)
10.34	Form of \$400,000,000 aggregate principal amount 7.875% Senior Secured Notes due 2026 (11)
10.35	Indenture, dated as of November 6, 2024, by and between PHH Escrow Issuer LLC and Wilmington Trust, national association, as trustee and collateral trustee (19)
10.36	Supplemental Indenture, dated as of November 27, 2024, among PHH Corporation, Onity Group Inc., the other guarantors party thereto, and Wilmington Trust, National Association, as trustee and collateral trustee (21)
10.37	Pledge and Security Agreement, dated as of November 27, 2024, among the PHH Corporation, PHH Escrow Issuer LLC, Onity Group Inc. the other grantors party thereto, and Wilmington Trust, National Association, as collateral trustee (21)
10.38(d)	Transaction Agreement dated September 30, 2024 among the Company, OCW MAV Holdings, LLC, MAV Canopy HoldCo I, LLC, MSR Asset Vehicle LLC and the other parties thereto (20)
10.39(d)	Note Purchase Agreement Amendment effective October 23, 2024 among the Company, Oaktree Fund Administration, LLC, as collateral agent, and the other parties thereto (20)
10.40(d)	Redemption Agreement among the Company, OCW MAV Holdings, LLC and MAV Canopy HoldCo I, LLC (filed herewith)
10.41	Form of Amendment effective October 23, 2024 to Warrants dated March 4, 2021 and May 3, 2021 (21)
10.42*	Form of 2023 Annual Performance-Based Cash Award Agreement (16)
10.43*	Form of 2023 Annual Performance-Based Stock Award Agreement (16)
10.44*	Form of 2023 Annual Time-Based Cash Award Agreement (16)
10.45*	Form of 2023 Annual Time-Based Stock Award Agreement (16)
10.46*	Form of 2024 Annual Performance-Based Cash Award Agreement (17)
10.47*	Form of 2024 Annual Performance-Based Stock Award Agreement (17)
10.48*	Form of 2024 Special Time-Based Stock Award Agreement (17)
19.1	Insider Trading Prevention Policy (filed herewith)
21.1	Subsidiaries (filed herewith)
23.1	Consent of Independent Registered Public Accounting Firm (filed herewith)
31.1	Certification of the principal executive officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 (filed herewith)
31.2	Certification of the principal financial officer pursuant to Section 302 of the Sarbanes-Oxley Act of 2002 (filed herewith)
32.1	Certification of the principal executive officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (furnished herewith)
32.2	Certification of the principal financial officer pursuant to 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (furnished herewith)
97.1	Onity Group Inc. Incentive Compensation Clawback Policy (16)
99.1	Supplemental Information Pursuant to the Indenture dated as of November 6, 2024 (filed herewith)
101	The following financial statements from the Company's Annual Report on Form 10-K for the year ended December 31, 2024 were formatted in Inline XBRL: (i) Consolidated Balance Sheets, (ii) Consolidated Statements of Operations, (iii) Consolidated Statements of Comprehensive Income (Loss), (iv) Consolidated Statements of Changes in Equity, (v) Consolidated Statements of Cash Flows, and (v) the Notes to Consolidated Financial Statements, tagged as blocks of text and including detailed tags.
104	The cover page from the Company's Annual Report on Form 10-K for the year ended December 31, 2024, formatted in iXBRL (included as Exhibit 101).

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and the Board of Directors of Onity Group Inc.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Onity Group Inc. (formerly Ocwen Financial Corporation) and subsidiaries (the “Company”) as of December 31, 2024 and 2023, the related consolidated statements of operations, comprehensive income (loss), changes in equity, and cash flows, for each of the three years in the period ended December 31, 2024, and the related notes (collectively referred to as the “financial statements”). In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2024 and 2023, and the results of its operations and its cash flows for each of the three years in the period ended December 31, 2024, in conformity with accounting principles generally accepted in the United States of America.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the Company's internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated February 21, 2025, expressed an unqualified opinion on the Company's internal control over financial reporting.

Basis for Opinion

These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's financial statements based on our audits. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement, whether due to error or fraud. Our audits included performing procedures to assess the risks of material misstatement of the financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

The critical audit matters communicated below are matters arising from the current-period audit of the financial statements that were communicated or required to be communicated to the audit committee and that (1) relate to accounts or disclosures that are material to the financial statements and (2) involved our especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matters below, providing separate opinions on the critical audit matters or on the accounts or disclosures to which they relate.

Fair Value - Mortgage Servicing Rights — Refer to Notes 3, 7, and 9 to the financial statements

Critical Audit Matter Description

The Company has elected to account for its mortgage servicing rights (“MSRs”) at fair value. The determination of the fair value of MSRs requires management judgment due to the significant assumptions that underlie the valuation. The Company estimates the fair value of its MSRs with the assistance of independent third-party valuation experts that use discounted cash flow and prepayment models, and current market data. The significant unobservable assumptions used in the valuation of MSRs include prepayment speeds, cost to service, and discount rates. MSRs were \$2.5 billion at December 31, 2024, which are classified as Level 3 in the valuation hierarchy. A change in the significant unobservable valuation assumptions utilized might result in a significantly higher or lower fair value measurement.

We identified the valuation of MSRs as a critical audit matter because of (i) the significant judgments made by management in determining the prepayment speeds, cost to service, and discount rates assumptions, and (ii) the high degree of auditor judgment and an increased extent of effort when performing audit procedures to evaluate the appropriateness of these significant unobservable valuation assumptions.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the significant unobservable valuation assumptions used by management to estimate the fair value of the Company's MSR's included the following, among others:

- We tested the design and operating effectiveness of controls over management's valuation of MSR's and management's evaluation of the reasonableness of the significant unobservable assumptions, including those related to the determination and supervision of their third-party valuation experts, data utilized in the third-party valuation expert's model, and the determination of (1) prepayment speeds (2) cost to service and (3) discount rate assumptions.
- We tested the data utilized in determining the unobservable assumptions used in the valuation model for a selection of loans by confirming balances with borrowers, obtaining and inspecting loan origination documents, and obtaining and inspecting supporting documentation for loan activity.
- We evaluated management's ability to reasonably estimate fair value by comparing management's assumptions and the overall fair value to market surveys.
- We inquired of the Company's third-party valuation experts regarding the reasonableness of the significant valuation assumptions and the appropriateness of the valuation model.
- With the assistance of our fair value specialists, we evaluated the MSR's fair value by comparing it against a fair value range that was independently developed using market data.
- We assessed the consistency by which management has applied significant unobservable valuation assumptions by comparing to prior periods.

Fair Value – Loans Held for Investment — Refer to Notes 3 and 5 to the financial statements

Critical Audit Matter Description

The Company has elected to account for its Home Equity Conversion Mortgages "HECM or reverse mortgages" that are classified as loans held for investment at fair value. The determination of the fair value of reverse mortgages requires management judgment due to the significant assumptions that underlie the valuation. The Company estimates the fair value of reverse mortgages with the assistance of independent third-party valuation experts that use expected future cash flows discounted over the expected life of the loans at a rate commensurate with the risk of the estimated cash flows, including future draw commitments on reverse mortgage loans. Reverse mortgages were \$11.1 billion at December 31, 2024, which is classified as Level 3 in the valuation hierarchy. A change in the valuation assumptions utilized might result in a significantly higher or lower fair value measurement.

We identified the valuation of reverse mortgages as a critical audit matter because of (i) the significant judgments made by management in determining the voluntary/involuntary prepayment speeds and discount rate assumptions, all of which are unobservable, and (ii) the high degree of auditor judgment and an increased extent of effort when performing audit procedures to evaluate the appropriateness of these significant unobservable valuation assumptions.

How the Critical Audit Matter Was Addressed in the Audit

Our audit procedures related to the significant unobservable valuation assumptions used by management to estimate the fair value of the Company's reverse mortgages included the following, among others:

- We tested the design and operating effectiveness of controls over management's valuation of reverse mortgages and management's evaluation of the reasonableness of the significant unobservable assumptions, and data utilized in the valuation model.
- We tested the data utilized in determining the unobservable assumptions used in the valuation model for a selection of loans, obtaining and inspecting loan origination documents, and obtaining and inspecting supporting documentation for loan activity.
- We inquired of the Company's third-party valuation experts regarding the reasonableness of the valuation assumptions and the appropriateness of the valuation model.
- With the assistance of our fair value specialists, we evaluated the reasonableness of the valuation methodology and significant assumptions used, including whether the significant assumptions were appropriate and consistent with what market participants would use.
- We evaluated the consistency by which management has applied significant unobservable valuation assumptions.

/s/ DELOITTE & TOUCHE LLP

New York, NY

February 21, 2025

We have served as the Company's auditor since 2009.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the shareholders and the Board of Directors of Onity Group Inc.

Opinion on Internal Control over Financial Reporting

We have audited the internal control over financial reporting of Onity Group Inc. and subsidiaries (the “Company”) as of December 31, 2024, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). In our opinion, the Company maintained, in all material respects, effective internal control over financial reporting as of December 31, 2024, based on criteria established in *Internal Control - Integrated Framework (2013)* issued by COSO.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the consolidated financial statements as of and for the year ended December 31, 2024, of the Company and our report dated February 21, 2025, expressed an unqualified opinion on those financial statements.

Basis for Opinion

The Company’s management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on the Company’s internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

Definition and Limitations of Internal Control over Financial Reporting

A company’s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company’s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company’s assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

ONITY GROUP INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
DECEMBER 31, 2024, 2023 AND 2022
(Dollars in millions, except per share data and unless otherwise indicated)

Note 1 — Organization, Basis of Presentation and Significant Accounting Policies

Organization

Onity Group Inc. (formerly Ocwen Financial Corporation) (Onity, we, us and our) is a non-bank mortgage servicer and originator providing solutions to homeowners, clients, investors and others through its primary operating subsidiary, PHH Mortgage Corporation (PHH, formerly referred to as PMC). PHH is a wholly-owned subsidiary of PHH Corporation, an intermediate holding company and wholly-owned subsidiary of Onity. We are headquartered in West Palm Beach, Florida with offices and operations in the United States (U.S.), the United States Virgin Islands (USVI), India and the Philippines. Onity is a Florida corporation organized in February 1988. On June 10, 2024, Ocwen Financial Corporation changed its name to Onity Group Inc. and continued to be publicly traded on the New York Stock Exchange under the new ticker symbol “ONIT” (formerly “OCN”).

Onity directly or indirectly owns all of the outstanding common stock of its operating subsidiaries, including PHH since its acquisition on October 4, 2018, Ocwen Financial Solutions Private Limited (OFSP) and Ocwen USVI Services, LLC (OVIS). Effective November 27, 2024, Onity completed the sale of its 15% equity interest in MAV Canopy HoldCo I, LLC (MAV Canopy) which invests in mortgage servicing assets through its licensed mortgage subsidiary MSR Asset Vehicle LLC (MAV). See Note 12 — Investment in Equity Method Investee and Related Party Transactions for additional information.

We perform servicing activities related to our own MSR portfolio (primary) and on behalf of other servicers (subservicing) and investors (primary and master servicing), including the Federal National Mortgage Association (Fannie Mae) and Federal Home Loan Mortgage Corporation (Freddie Mac) (collectively referred to as GSEs), the Government National Mortgage Association (Ginnie Mae, and together with the GSEs, the Agencies) and private-label securitizations (PLS, or non-Agency).

We source our servicing portfolio through multiple channels, including retail, wholesale, correspondent, flow MSR purchase agreements, the Agency Cash Window programs and bulk MSR purchases. We originate, sell and securitize conventional (conforming to the GSE underwriting standards) loans and government-insured (Federal Housing Administration (FHA), Department of Veterans Affairs (VA) or United States Department of Agriculture (USDA)) forward mortgage loans, generally with servicing retained. The GSEs or Ginnie Mae guarantee these mortgage securitizations. We originate and purchase Home Equity Conversion Mortgage (HECM) loans, or reverse mortgages, which are mostly insured by the FHA and we are an approved issuer of Home Equity Conversion Mortgage-Backed Securities (HMBS) that are guaranteed by Ginnie Mae.

We had a total of approximately 4,300 employees at December 31, 2024 of which approximately 2,900 were located in India and approximately 400 were based in the Philippines. Our operations in India and the Philippines provide support services to our loan servicing and originations businesses and our corporate functions.

Basis of Presentation and Significant Accounting Policies

Consolidation and Basis of Presentation

Principles of Consolidation

Our consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the U.S. (GAAP).

Our consolidated financial statements include the accounts of Onity, its wholly-owned subsidiaries and any variable interest entity (VIE) for which we have determined that we are the primary beneficiary. We apply the equity method of accounting to investments where we are able to exercise significant influence, but not control, over the policies and procedures of the entity.

We have eliminated intercompany accounts and transactions in consolidation.

Foreign Currency Translation

The functional currency of each of our foreign subsidiaries is the U.S. dollar. Re-measurement adjustments of foreign-denominated amounts to U.S. dollars are included in Other, net in our consolidated statements of operations.

Change in Presentation

Effective June 30, 2024, in our consolidated balance sheets we now present Contingent loan repurchase asset and Contingent loan repurchase liability as separate line items (previously reported in Other assets and Other liabilities, respectively). In connection with the Ginnie Mae early buyout program, our servicing agreements provide that we have the right, but not the obligation, to repurchase previously transferred mortgage loans under certain conditions, including the mortgage loans becoming unpaid for more than three consecutive months. Once these conditions are met, we have effectively regained control over the mortgage loans, and under GAAP, must re-recognize the loans on our consolidated balance sheets and establish a corresponding repurchase liability. The separate presentation of such assets and offsetting liabilities on the face of the balance sheet provides increased transparency compared to a presentation within Other assets and Other liabilities. The consolidated balance sheet as of December 31, 2023 has been recast to conform to the current period presentation. This presentation change had no impact on total assets or total liabilities in our consolidated balance sheets, no impact on the consolidated statements of cash flows, nor any other financial statements.

Use of Estimates and Assumptions

The preparation of financial statements in conformity with GAAP requires that management make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Such estimates and assumptions include, but are not limited to, those that relate to fair value measurements, income taxes and the provision for losses that may arise from contingencies including litigation proceedings. In developing estimates and assumptions, management uses all available information; however, actual results could materially differ from those estimates and assumptions.

Significant Accounting Policies

Cash and cash equivalents

Cash and cash equivalents includes both interest-bearing and non-interest-bearing demand deposits with financial institutions that have original maturities of 90 days or less.

Restricted Cash

We define Restricted cash as any cash that is legally restricted as to withdrawal or usage. Restricted cash includes amounts specifically designated to repay debt, to provide over-collateralization for MSR financing facilities, mortgage loan financing facilities and match funded debt facilities, and to provide additional collateral to support certain obligations, including derivative instruments and letters of credit.

Mortgage Servicing Rights

MSRs are assets representing our right to service portfolios of mortgage loans. We recognize MSRs when originated or purchased loans are securitized or sold in the secondary market. We also acquire MSRs through flow purchase agreements, Agency Cash Window programs, and bulk acquisition transactions, or through asset purchases or business combination transactions. The unpaid principal balance (UPB) of the loans underlying the MSRs is not included on our consolidated balance sheets. For servicing retained in connection with the securitization of reverse mortgage loans accounted for as secured financings, we do not recognize an MSR.

All newly acquired or retained MSRs are initially measured at fair value. To the extent any portfolio contract is not expected to compensate us adequately for performing the servicing, we would recognize a servicing liability. We define contracts as GSE, government-insured or non-Agency (commonly referred to as non-prime, subprime or private-label loans) based on applicable servicing guidelines, underwriting standards and borrower risk characteristics.

We account for servicing assets and servicing liabilities at fair value, and report changes in fair value in earnings (MSR valuation adjustments, net) in the period in which the changes occur.

We earn fees for servicing and subservicing mortgage loans. We collect servicing and subservicing fees, generally expressed as a percent of UPB or fee per loan by loan performing status, from the borrowers' payments or from the owner of the servicing in subservicing relationships. In addition to servicing and subservicing fees, we report late fees, prepayment penalties, float earnings and other ancillary fees as revenue in Servicing and subservicing fees in our consolidated statements of operations. We recognize servicing and subservicing fees as revenue when the fees are earned, which is generally when the borrowers' payments are collected, when loans are modified or liquidated through the sale of the underlying real estate collateral, or when subservicing services are performed.

Advances

During any period in which a borrower does not make payments, servicing and subservicing contracts may require that we advance our own funds to meet contractual principal and interest remittance requirements for the investors, to pay property taxes and insurance premiums and to process modifications and foreclosures. We also advance funds to maintain, repair and market foreclosed real estate properties on behalf of investors. These advances are made pursuant to the terms of each servicing and subservicing contract.

When we make an advance on a loan under each servicing or subservicing contract, we are entitled to recover that advance either from the borrower, for reinstated and performing loans, or from guarantors (GSEs), insurers (FHA/VA) and investors, for modified and liquidated loans in accordance with the governing servicing contract or published servicing guide. Most of our servicing and subservicing contracts provide that the advances made under the respective agreement have priority over all other cash payments from the proceeds of the loan, and in the majority of cases, the proceeds of the pool of loans that are the subject of that servicing or subservicing contract. As a result, we are entitled to repayment from loan proceeds before any interest or principal is paid on the bonds, and in the majority of cases, advances in excess of loan proceeds may be recovered from pool level proceeds.

Servicing advances are financial assets subject to the credit loss allowance model under Financial Accounting Standards Board's Accounting Standards Codification (ASC) 326: Financial Instruments - Credit Losses (CECL). The allowance for expected credit losses is estimated based on relevant qualitative and quantitative information about past events, including historical collection and loss experience, current conditions, and reasonable and supportable forecasts that affect collectability. Expected credit losses on advances are expected to be nil, or de minimis, as advances are generally fully reimbursable or recoverable under the terms of the servicing agreements. GSE and government-insured advances are subject to implicit and government guarantees, respectively, regarding advance reimbursement and the non-Agency pooling and servicing agreement terms regarding advance recovery, the credit loss history and the expectation over the remaining life of the advance portfolio support a zero allowance for credit loss.

Servicing advances may also include claimable (with investors) but nonrecoverable expenses, for example due to servicer error, such as lack of reasonable documentation as to the type and amount of advances. Such servicer errors result in the determination that the advance is uncollectible and represent operational losses resulting from not complying with servicing guidelines as established by the respective party (i.e., trustee, master servicer, investor, mortgage insurer). We establish an allowance for such operational losses through a charge to earnings (Servicing and origination expense) to the extent that a portion of advances are uncollectible taking into consideration, among other factors, probability of default, cure or modification, length of delinquency and the amount of the advance. We also assess collectability using proprietary cash flow projection models that incorporate different factors, depending on the characteristics of the mortgage loan or pool, including, for example, the probable loan liquidation path, estimated time to a foreclosure sale, estimated costs of foreclosure action, estimated future property tax payments and the estimated value of the underlying property net of estimated carrying costs, commissions and closing costs. Advances are charged off when determined to be non-recoverable.

Under the terms of our subservicing agreements, we are generally reimbursed by our subservicing clients on a monthly or more frequent basis. For those advances that have been reimbursed, i.e., that are off-balance sheet, if a loss contingency is probable and reasonably estimable, we recognize a loss contingency accrual for the amount of advances deemed uncollectible caused by our failure to comply with the subservicing agreements or our servicing practices. We report such loss contingency within Other liabilities - Liability for indemnification obligations.

Receivables

Receivables are financial assets subject to the expected credit loss allowance model under ASC 326: Financial Instruments - Credit Losses (CECL). The allowance for expected credit losses is estimated based on relevant qualitative and quantitative information about past events, including historical collection and loss experience, current conditions, and reasonable and supportable forecasts that affect collectability. We generally charge off the receivable balance when management determines the receivable to be uncollectible and when the receivable has been classified as a loss by our servicing claims analysis process.

Loans repurchased from Ginnie Mae guaranteed securitizations in connection with loan resolution activities are classified as receivables (government-insured claims). The government-insured claims that do not exceed the Department of Housing and Urban Development (HUD), VA, FHA or USDA insurance limits are not subject to any allowance for losses as guaranteed by the U.S. government. The receivable amount in excess of the guaranteed claim limits or recoverable amounts per insurer guidelines or as a result of servicer error, such as exceeding key filing or foreclosure timelines, is subject to an allowance for losses.

Loans Held for Sale

Loans held for sale include forward and reverse mortgage loans that we do not intend to hold until maturity. We report loans held for sale at fair value with changes in fair value in Gain on loans held for sale, net in the consolidated statements of

operations in the period in which the changes occur along with fair value gains or losses on any related derivatives. Gains on loans held for sale are initially recognized at the time of the interest rate lock commitment and take into consideration any retained interests, including servicing rights and representation and warranty obligations, both of which are separately recorded at fair value at the date of sale in our consolidated balance sheets. We include all changes in loans held for sale and related derivative balances in operating activities in the consolidated statements of cash flows.

We accrue interest income as earned within Interest income in the consolidated statements of operations. We place loans on non-accrual status after any portion of principal or interest has been delinquent for more than 89 days, or earlier if management determines the borrower is unable to continue performance. When we place a loan on non-accrual status, we reverse the interest that we have accrued but not yet received. We return loans to accrual status only when we reinstate the loan and there is no significant uncertainty as to collectability.

Loans Held for Investment

Originated and purchased reverse mortgage loans that are insured by the FHA and pooled into Ginnie Mae guaranteed securities that we sell into the secondary market with servicing rights retained are classified as loans held for investment. We have elected to measure these loans at fair value, with changes in fair value reported in Gain on reverse loans held for investment and HMBS-related borrowings, net in the consolidated statements of operations. Loan transfers in these Ginnie Mae securitizations do not meet the definition of a participating interest and as a result, the transfers of the reverse mortgages do not qualify for sale accounting. Therefore, we account for these transfers as secured financings, with the reverse mortgages classified as Loans held for investment, at fair value, on our consolidated balance sheets, with no gain or loss recognized on the transfer. We record the proceeds from the transfer of assets as secured borrowings (HMBS-related borrowings) and recognize no gain or loss on the transfer.

We report originations and collections of HECM loans in investing activities in the consolidated statements of cash flows. We report net fair value gains on HECM loans and the related HMBS borrowings as an adjustment to the net cash provided by or used in operating activities in the consolidated statements of cash flows. Proceeds from securitizations of HECM loans and payments on HMBS-related borrowings are included in financing activities in the consolidated statements of cash flows.

Gain on Reverse Loans Held for Investment and HMBS-Related Borrowings, Net

We measure the HECM loans held for investment and HMBS-related borrowings at fair value on a recurring basis. The fair value gains and losses of the HECM loans and HMBS-related borrowings are included in Gain on reverse loans held for investment and HMBS-related borrowings, net in our consolidated statements of operations. Included in net fair value gains and losses on the securitized HECM loans and HMBS-related borrowings are the interest income on the securitized HECM loans and the interest expense on the HMBS-related borrowings, together with the realized gains or losses on tail securitization. Interest is generally capitalized into the principal on a monthly basis. In addition, Gain on reverse loans held for investment and HMBS-related borrowings, net includes the fair value changes of the interest rate lock commitments related to new reverse mortgage loans through securitization date, reported in the Originations segment.

Upfront costs and fees related to loans held for investment, including broker fees, are recognized in Gain on reverse loans held for investment and HMBS-related borrowings, net in the consolidated statements of operations as incurred and are not capitalized. Premiums on loans purchased via the correspondent channel are capitalized upon origination because they represent part of the purchase price. However, the loans are subsequently measured at fair value on a recurring basis.

Gain on reverse loans held for investment and HMBS-related borrowings, net excludes subservicing fees and ancillary income associated with our subservicing agreements, that are reported in Servicing and subservicing fees in our consolidated statements of operations.

VIEs and Transfers of Financial Assets and MSRs

We securitize, sell and service forward and reverse residential mortgage loans. Securitization transactions typically involve the use of VIEs and are accounted for either as sales or as secured financings. We typically retain economic interests in the securitized assets in the form of servicing rights and obligations. In order to efficiently finance our assets and operations and create liquidity, we may sell servicing advances, MSRs, the right to receive certain servicing fees relating to MSRs or other mortgage related assets.

In order to determine whether or not a VIE is required to be consolidated, we consider our ongoing involvement with the VIE. In circumstances where we have both the power to direct the activities that most significantly impact the performance of the VIE and the obligation to absorb losses or the right to receive benefits that could be significant, we would conclude that we would consolidate the entity, which precludes us from recording an accounting sale in connection with the transfer of the financial assets. In the case of a consolidated VIE, we continue to report the underlying residential mortgage loans or servicing advances, and we record the securitized debt on our consolidated balance sheet.

In the case of transfers of financial assets where either one or both of the power or economic criteria above are not met, we evaluate whether a sale has occurred for accounting purposes.

In order to recognize a sale of financial assets, the transferred assets must be legally isolated, not be constrained by restrictions from further transfer and be deemed to be beyond our control. If the transfer does not meet any of these three criteria, the financial assets are not derecognized and the transaction is accounted for consistent with a secured financing. In certain situations, we may have continuing involvement in transferred loans through our retained servicing. Transactions involving retained servicing would still be eligible for sale accounting, as we have ceded effective control of these loans to the purchaser.

A sale of MSR's shall be recognized as a sale for accounting purposes if substantially all the risks and rewards inherent in owning the MSR's have been effectively transferred to the buyer, title has transferred to the buyer and any protection provisions retained by the seller are minor and can be reasonably estimated. In the case of transfers of MSR's accounted for as a sale where we retain the right to subservice, we defer any related gain or loss and amortize the balance over the life of the subservicing agreement. A loss shall be recognized currently if we determine that prepayments of the underlying mortgage loans may result in performing the future servicing at a loss.

Other Financing Liabilities and Pledged MSR Liability Expense

A transfer of MSR's does not achieve sale accounting if we retain title. In addition, a legal sale of MSR's with a subservicing contract may not be treated as a sale when the terms of the subservicing contract unduly limit the buyer's ability to exercise ownership control over the servicing rights or results in the seller retaining some of the risks and rewards of ownership. If the buyer cannot cancel or decline to renew the subservicing contract after a reasonable period of time, the buyer is precluded from exercising certain rights of ownership. Conversely, if the seller cannot cancel the subservicing contract after a reasonable period of time, the seller has not transferred substantially all of the risks of ownership. If the criteria for sale recognition are not met, the transferred MSR's are not derecognized and the transaction is accounted for consistent with a secured financing.

Accordingly, when a transaction does not achieve sale accounting treatment, we recognize the proceeds received and a corresponding liability, referred to as Pledged MSR liability within Other financing liabilities, that we subsequently remeasure at fair value with fair value gains and losses reported within MSR valuation adjustments, net in the consolidated statements of operations. In the case of a sale of MSR's accounted for as a secured financing where we retain the right to subservice, no gain or loss is generally recognized on the transfer. A gain or loss may be recognized to the extent the estimated fair value of the pledged MSR liability differs from the total proceeds of the MSR transfer. If the criteria for MSR sale recognition are not met, the servicing fee collected on behalf of MSR transferee and related ancillary income remain reported within Servicing and subservicing fees. Servicing fee remittance, net of the subservicing fee we are entitled to, is reported within Pledged MSR liability expense in the consolidated statements of operations.

Subsequent to the determination that a transaction does not meet the accounting sale criteria, we may determine that we meet the criteria. In the event we subsequently meet the accounting sale criteria, we derecognize the transferred assets and related liabilities. See Note 8 — Other Financing Liabilities, at Fair Value.

In addition, we report within Other financing liabilities certain financing liabilities, including certain ESS liabilities collateralized by MSR portfolios, for which we elected to measure under the fair value option. The fair value gains and losses of these financial liabilities are reported within MSR valuation adjustments, net in the consolidated statements of operations. The excess servicing spread remittance is reported within Pledged MSR liability expense in the consolidated statements of operations. Because the proceeds we received in connection with transfers of MSR's are accounted for as secured financings, additions to, and reductions in, the balance of the other financing liabilities are presented as financing activity in our consolidated statements of cash flows, excluding the changes in fair value attributable to inputs and assumptions.

Contingent Loan Repurchase Asset and Liability

In connection with the Ginnie Mae early buyout program, our agreements provide either that: (a) we have the right, but not the obligation, to repurchase previously transferred mortgage loans under certain conditions, including the mortgage loans becoming eligible for pooling under a program sponsored by Ginnie Mae; or (b) we have the obligation to repurchase previously transferred mortgage loans that have been subject to a successful trial modification before any permanent modification is made. Once these conditions are met, we have effectively regained control over the mortgage loan(s), and under GAAP, must re-recognize the loans on our consolidated balance sheets and establish a corresponding repurchase liability. With respect to those loans that we have the right, but not the obligation, to repurchase under the applicable agreement, this requirement applies regardless of whether we have any intention to repurchase the loan. We re-recognize the loans as Contingent loan repurchase in Other assets and a corresponding liability in Other liabilities.

Derivative Financial Instruments

We use derivative instruments to manage the fair value changes in our MSRs, interest rate lock commitments and loan portfolios which are exposed to interest rate risk. We do not use derivative instruments for trading or speculative purposes. We recognize all derivative instruments at fair value on our consolidated balance sheets in Other assets and Other liabilities. Derivative instruments are generally entered into as economic hedges against changes in the fair value of a recognized asset or liability and are not designated as hedges for accounting purposes. We generally report the changes in fair value of such derivative instruments in the same line item in the consolidated statements of operations as the changes in fair value of the related asset or liability. For all other derivative instruments not designated as a hedging instrument, we report changes in fair value in Other, net. Cash flows associated with derivative instruments and their related gains and losses are presented within Cash flows from operating activities.

Real Estate Owned (REO)

Foreclosed real estate received in full or partial satisfaction of a loan is classified as held for sale and initially recorded at the fair value less cost to sell the property, referred to as initial cost, within Other assets on our consolidated balance sheets. The carrying amount of the loan is reduced to the initial cost of the property at the time of receipt. REO properties are subsequently recorded at the lower of initial cost and fair value less cost to sell the property through a valuation allowance.

Premises and Equipment, Leases

We report premises and equipment at cost and depreciate them over their estimated useful lives on a straight-line basis as follows:

Computer hardware and software	2 – 5 years
Buildings	40 years
Leasehold improvements	Term of the lease not to exceed useful life
Right of Use (ROU) assets	Term of the lease not to exceed useful life
Furniture and fixtures	5 years
Office equipment	5 years

Our leases include non-cancelable operating leases for premises and equipment. At lease commencement and renewal date, we estimate the ROU assets and lease liability at present value using our estimated incremental borrowing rate. We amortize the balance of the ROU assets and recognize interest on the lease liability. Our lease liability represents the present value of the lease payments and is reduced as we make cash payments on our lease obligations. Our ROU lease assets are evaluated for impairment in accordance with ASC 360: Premises and Equipment.

Intangible Assets

Intangible assets are recorded at their estimated fair value at the date of acquisition. Intangible assets deemed to have a finite useful life are amortized on a basis representative of the time pattern over which the benefit is derived. Intangible assets subject to amortization are evaluated for impairment whenever events or circumstances indicate that their carrying amount may not be recoverable, but no less than annually. An impairment loss is recognized if the carrying value of the intangible asset is not recoverable and exceeds fair value.

Intangible assets primarily consist of reverse subservicing contract intangible assets that are being amortized ratably over the five-year term of the respective subservicing contracts based on portfolio runoff. Intangible assets are included in Other assets, net of accumulated amortization, on our consolidated balance sheets, and amortization expense is included in Other expenses in our consolidated statements of operations.

Investments in Equity Method Investee

We account for our investments in unconsolidated entities in which we hold a significant, but less than controlling, ownership interest using the equity method. These investments include our investment in MAV Canopy through its sale in November 2024. Under ASC 323: Investments - Equity Method and Joint Ventures, an investment of less than 20 percent of the voting stock of an investee shall lead to a presumption that an investor does not have the ability to exercise significant influence unless such ability can be demonstrated. Onity determined it had significant influence over MAV Canopy based on its representation on the MAV Canopy Board of Directors and certain services it provides, amongst other factors. Accordingly, Onity accounted for its investment in MAV Canopy under the equity method.

Under the equity method of accounting, investments are initially recorded at cost and thereafter adjusted for additional investments, distributions and the proportionate share of earnings or losses of the investee. We evaluate our equity method investments for impairment when events or changes in circumstances indicate that an other-than-temporary decline in value may have occurred. We present distributions received from MAV Canopy in our consolidated statements of cash flows using

the cumulative earnings approach. We present gains or losses from the sale of an equity method investment in Earnings of equity method investee within the Other income (expense) section of our consolidated statement of operations.

Litigation

We monitor our legal matters, including advice from external legal counsel, and periodically perform assessments of these matters for potential loss accrual and disclosure. We establish a liability for settlements, judgments on appeal and filed and/or threatened claims for which we believe that it is probable that a loss has been or will be incurred and the amount can be reasonably estimated. We recognize legal costs associated with loss contingencies in Professional services expense in the consolidated statements of operations as incurred.

Preferred Stock

We evaluate preferred stock issuances to determine their classification and accounting as debt, or permanent or temporary equity. We also evaluate if any embedded features must be recognized separate from the host contract. Non-convertible, mandatorily redeemable preferred stock is required to be classified as debt. Contingently redeemable preferred stock is not considered mandatorily redeemable until the contingency is met, for example upon change of control. Preferred stock that, by its terms, is contingently redeemable upon the occurrence of an event that is outside of the issuer's control, such as a change of control, and preferred stock that is redeemable at the option of the holder, is classified as mezzanine equity, i.e., outside of permanent equity. We record preferred stock dividends on the date of declaration by the Board of Directors.

Stock-Based Compensation

We initially measure the cost of employee services received in exchange for a stock-based award as the fair value of the award on the grant date. For awards which must be settled in cash and are therefore classified as liabilities rather than equity in the consolidated balance sheet, fair value is subsequently remeasured and fair value changes are reported as compensation expense at each reporting date. For all awards with a service condition, we recognize the cost as compensation expense ratably over the vesting period for the entire award. All compensation expense for an equity-classified award with a market condition is recognized if the requisite service period is fulfilled, even if the market condition is never satisfied.

Income Taxes

We file consolidated U.S. federal income tax returns. We allocate consolidated income tax among all subsidiaries included in the consolidated return as if each subsidiary filed a separate return or, in certain cases, a consolidated return.

We account for income taxes using the asset and liability method, which requires the recognition of deferred tax liabilities and assets for the expected future tax consequences of temporary differences between the carrying amounts and the tax bases of assets and liabilities. Additionally, we adjust deferred taxes to reflect estimated tax rate changes. We conduct periodic evaluations of positive and negative evidence to determine whether it is more likely than not that some or all of our deferred tax assets will not be realized in future periods. In these evaluations, we consider our sources of future taxable income as the deferred tax assets represent future tax deductions. Taxable income of the appropriate character, within the appropriate time frame, is necessary for the realization of deferred tax assets. Among the factors considered in this evaluation are estimates of future earnings, the future reversal of temporary differences and the impact of tax planning strategies that we can implement if warranted. We provide a valuation allowance for any portion of our deferred tax assets that, more likely than not, will not be realized.

We recognize the financial statement benefit of a tax position only after determining that the relevant tax authority would more likely than not sustain the position following an audit, based on the technical merits of the position. For tax positions meeting the more-likely-than-not threshold, the amount recognized in the consolidated financial statements is the largest benefit that has a greater than 50 percent likelihood of being realized upon ultimate settlement with the relevant tax authority. We recognize interest and penalties related to income tax matters in income tax expense.

Basic and Diluted Earnings per Share

We calculate basic earnings per share based upon the weighted average number of shares of common stock outstanding during the year. Income (loss) attributable to common stockholders is computed by deducting both the dividends declared in the period on preferred stock (whether or not paid) and the dividends accumulated for the period on cumulative preferred stock from net income. We calculate diluted earnings per share based upon the weighted average number of shares of common stock outstanding and all dilutive potential common shares outstanding during the year. The computation of diluted earnings per share includes the estimated impact of the exercise of outstanding options and warrants to purchase common stock using the treasury stock method.

Recently Adopted Accounting Standards

Leases (ASC 842) Common Control Arrangements (ASU 2023-01)

Prior to the issuance of this Accounting Standard Update (ASU), ASC 842 required all lessees to amortize leasehold improvements over the shorter of their useful life or the remaining term of the lease. For leases between entities under common control, the amendment in this ASU requires amortization of leasehold improvements over the useful life of those assets to the common control group, regardless of the lease term. When the lessee no longer controls the use of the asset underlying the common control lease, the leasehold improvements are accounted for as a transfer between entities under common control whereby the lessee records a distribution to the common control lessor through an adjustment to equity.

Our adoption of this standard on January 1, 2024 did not have a material impact on our consolidated financial statements.

Segment Reporting (ASC 280) Improvements to Reportable Segment Disclosures (ASU 2023-07)

The amendments in this ASU were issued to improve annual and interim segment disclosures, primarily about expenses that are significant to the segment, and regularly provided to the chief operating decision maker (CODM). This ASU also requires disclosure of the title and position of the individual or the name of the group identified as the CODM in the consolidated financial statements, as well as how the CODM uses each reported measure of segment profit or loss to assess performance and allocate resources to the segment. The ASU allows the disclosure of additional optional measures of a segment's profit or loss for each reportable segment if used by the CODM, subject to additional segment disclosures and the SEC's non-GAAP financial measures requirements.

The amended disclosures in this ASU were effective in the 2024 annual period and did not have a material impact on our consolidated financial statements upon adoption. Our adoption of the ASU resulted in additional reportable segment disclosures, primarily relating to significant segment expenses and CODM disclosures. This ASU was applied retrospectively to all prior years presented in these financial statements. Refer to Note 24 — Business Segment Reporting. For interim periods, the amended disclosures are required effective in 2025 and we do not anticipate a material impact on our consolidated financial statements.

Accounting Standards Issued but Not Yet Adopted

Business Combinations - Joint Venture Formations (ASC 805-60): Recognition and Initial Measurement (ASU 2023-05)

The amendments in this ASU require a joint venture to apply a new basis of accounting upon formation for the initial contribution of nonmonetary and monetary assets, initially measured at fair value (with exceptions to fair value measurement consistent with business combinations guidance). This ASU does not amend the definition of a joint venture, the accounting by an equity method investor for its investment in a joint venture, or the accounting by a joint venture for contributions received after its formation.

The amendments in this ASU are effective prospectively for all joint venture formations with a formation date on or after January 1, 2025, with early adoption permitted. A joint venture formed prior to the adoption date may elect to apply the new guidance retrospectively back to the original formation date. We do not anticipate that the adoption of this standard will have a material impact on our consolidated financial statements.

Income Taxes (ASC 740) Improvements to Income Tax Disclosures (ASU 2023-09)

The amendments in this ASU require disaggregated information about a reporting entity's effective tax rate reconciliation, including a tabular rate reconciliation for specified categories and additional information for reconciling items that meet a quantitative threshold. The ASU also requires additional disaggregated information on income taxes paid to an individual jurisdiction equal to or greater than 5% of total income taxes paid.

The amendments are effective in the 2025 annual period and in 2026 for interim periods, and shall be applied on a prospective basis with the option to apply the standard retrospectively.

Note 2 — Securitizations and Variable Interest Entities

We securitize, sell and service forward and reverse residential mortgage loans and regularly transfer financial assets in connection with asset-backed financing arrangements. We have aggregated these transfers of financial assets and asset-backed financing arrangements using special purpose entities (SPEs) or VIEs into the following groups: (1) securitizations of residential mortgage loans, (2) financings of loans held for sale and other related assets, (3) financings of advances and (4) MSR financings. Financing transactions that do not use SPEs or VIEs are disclosed in Note 14 — Borrowings.

Securizations of Residential Mortgage Loans

Transfers of Forward Loans

We sell or securitize forward loans that we originate or purchase from third parties, generally in the form of mortgage-backed securities guaranteed by the GSEs or Ginnie Mae. Securitization typically occurs within 30 days of loan closing or purchase. We act only as a fiduciary and do not have a variable interest in the securitization trusts. As a result, we account for these transactions as sales upon transfer.

The following table presents a summary of cash flows received from and paid to securitization trusts related to transfers of loans accounted for as sales that were outstanding:

	Years Ended December 31,		
	2024	2023	2022
Proceeds received from securitizations	\$ 16,787.8	\$ 12,344.0	\$ 17,027.0
Servicing fees collected (1)	153.3	121.9	91.8
Purchases of previously transferred assets, net of claims reimbursed	(10.0)	(17.9)	(11.4)
	<u>\$ 16,931.1</u>	<u>\$ 12,448.0</u>	<u>\$ 17,107.4</u>

- (1) We receive servicing fees based upon the securitized loan UPB and certain ancillary fees, all of which are reported in Servicing and subservicing fees in the consolidated statements of operations.

In connection with these transfers, we retained MSRs of \$247.6 million, \$183.0 million and \$234.7 million during 2024, 2023 and 2022, respectively.

Certain obligations arise from the agreements associated with our transfers of loans. Under these agreements, we may be obligated to repurchase the loans, or otherwise indemnify or reimburse the investor or insurer for losses incurred due to material breach of contractual representations and warranties. We receive customary origination representations and warranties from our network of approved correspondent lenders. To the extent that we have recourse against a third-party originator, we may recover part or all of any loss we incur. Also, refer to the Loan Put-Back and Related Contingencies section of Note 27 — Contingencies.

The following table presents the carrying amounts of our assets that relate to our continuing involvement with forward loans that we have transferred with servicing rights retained as well as an estimate of our maximum exposure to loss including the UPB of the transferred loans:

	December 31,	
	2024	2023
Carrying value of assets		
MSRs, at fair value	\$ 734.2	\$ 636.5
Advances	129.6	99.0
UPB of loans transferred (1)	49,641.2	46,810.1
Maximum exposure to loss (2)	<u>\$ 50,505.0</u>	<u>\$ 47,545.6</u>

- (1) Includes \$11.7 billion and \$10.5 billion of loans delivered to Ginnie Mae as of December 31, 2024 and 2023, respectively, and includes loan modifications repurchased and delivered through the Ginnie Mae Early Buyout Program (EBO).
- (2) The maximum exposure to loss in the table above is primarily based on the remaining UPB of loans serviced and assumes all loans were deemed worthless as of the reporting date. It does not take into consideration the proceeds from the underlying collateral liquidation, recoveries or any other recourse available to us, including from mortgage insurance, guarantees or correspondent sellers. We do not believe the maximum exposure to loss from our involvement with these previously transferred loans is representative of the actual loss we are likely to incur based on our contractual rights and historical loss experience and projections. Also, refer to the Loan Put-Back and Related Contingencies section of Note 27 — Contingencies.

At December 31, 2024 and 2023, 2.7% and 2.8%, respectively, of the transferred residential loans that we service were 60 days or more past due, including 60 days or more past due loans under forbearance. This includes 7.0% and 8.0%, respectively, of loans delivered to Ginnie Mae that are 60 days or more past due.

Transfers of Reverse Mortgages

We pool HECM loans into HMBS that we sell into the secondary market with servicing rights retained. We have determined that loan transfers in the HMBS program do not meet the definition of a participating interest and the servicing requirements require the issuer/servicer to absorb some level of interest rate risk, cash flow timing risk and incidental credit risk. As a result, the transfers of the HECM loans do not qualify for sale accounting, and therefore, we account for these

transfers as secured financings. Under this accounting treatment, the HECM loans are classified as Loans held for investment, at fair value, on our consolidated balance sheets. Holders of participating interests in the HMBS have no recourse against the assets of Onity, except with respect to standard representations and warranties and our contractual obligation to service the HECM loans and the HMBS.

Financing of Loans Held for Sale, Receivables and Other Assets using SPEs

We consolidate an SPE (trust) in connection with a warehouse mortgage loan financing facility structured as a gestation repurchase facility whereby Agency mortgage loans are transferred by PHH to the trust for collateralization purposes. We have determined that the trust is a VIE for which we are the primary beneficiary. Therefore, we have included the trust in our consolidated financial statements. We have the power to direct the activities of the VIE that most significantly impact the VIE's economic performance given we are the sole beneficial owner of the certificates issued by the trust and the servicer of the mortgage loans that result in cash flows to the trust. In addition, we designed the trust at inception to facilitate the funding facility. As of December 31, 2024 and 2023, \$200.0 million and \$150.1 million, respectively, loans held for sale were pledged as collateral for \$200.0 million and \$150.0 million, respectively, debt certificates issued by the trust. See Note 14 — Borrowings.

We finance certain reverse mortgage buyouts that are insured by the FHA, including loans held for sale, HUD claim receivables and REO properties, through private placement securitizations, referred to as OLIT transactions. The securitized assets include assets we purchased from third parties along with mortgage buyouts from our own reverse mortgage portfolio. The securitization trusts issued senior and mezzanine class Notes to third party investors. We retain certain mezzanine class Notes and ownership interests and service the underlying assets. As servicer, we are required to make certain servicing and principal advances that will not be reimbursable to us until all payments of interest and principal have been made to noteholders. We determined we were the primary beneficiary, and thus consolidate the securitization trusts and related depositor. Recourse for the Notes is limited to the assets of the respective securitization trusts. We executed our first OLIT securitization in 2023 and two in 2024. Also refer to Note 14 — Borrowings.

The table below presents the carrying value and classification of the assets and liabilities reported on our consolidated balance sheet that are associated with the OLIT securitized reverse mortgage loans buyouts and financing liabilities:

	December 31,	
	2024	2023
Mortgage loans (Loans held for sale, at fair value)	\$ 375.4	\$ 119.5
Receivables, net	31.9	19.9
REO (Other assets)	39.4	12.5
Debt service and Interest reserve accounts (Restricted cash)	13.3	6.8
Total assets	<u>\$ 460.0</u>	<u>\$ 158.6</u>
Outstanding borrowing UPB (Mortgage loan financing facilities, net)	\$ 517.3	\$ 164.4
Unamortized discount and debt issuance costs (Mortgage loan financing facilities, net)	(35.4)	(21.0)
Accrued expenses and Accrued interest (Other liabilities)	1.7	0.5
Total liabilities	<u>\$ 483.6</u>	<u>\$ 143.8</u>

Financings of Servicing Advances using SPEs

Match funded advances, i.e., advances that are pledged as collateral to our advance facilities, result from our transfers of residential loan servicing advances to SPEs in exchange for cash. We consolidate these SPEs because we have determined that we are the primary beneficiary of the SPEs. Through wholly-owned subsidiaries we hold the sole equity interests in the SPEs and service the mortgage loans that generate the advances. These SPEs issue debt supported by collections on the transferred advances, and we refer to this debt as Advance match funded liabilities.

We make transfers to these SPEs in accordance with the terms of our advance financing facility agreements. Debt service accounts require us to remit collections on pledged advances to the trustee within two days of receipt. Collected funds that are not applied to reduce the related Advance match funded debt until the payment dates specified in the indenture are classified as debt service accounts within Restricted cash in our consolidated balance sheets. The balances also include amounts that have been set aside from the proceeds of our match funded advance facilities to provide for possible shortfalls in the funds available to pay certain expenses and interest, as well as amounts set aside as required by our warehouse facilities as security for our obligations under the related agreements. The funds are held in interest earning accounts and those amounts related to match funded advance facilities are held in the name of the SPE created in connection with the facility.

The SPEs use collections of the pledged advances to repay principal and interest and to pay the expenses of the SPE. Holders of the debt issued by these entities have recourse only to the assets of the SPE for satisfaction of the debt. Amounts due to affiliates are eliminated in consolidation in our consolidated balance sheets.

The table below presents the carrying value and classification of the assets and liabilities of the advance financing facilities:

	December 31,	
	2024	2023
Match funded advances (Advances, net)	\$ 481.8	\$ 573.0
Debt service accounts (Restricted cash)	14.0	15.7
Advance match funded liabilities	416.5	498.9

MSR Financings using SPEs

We consolidate two SPEs (PMC ESR Trusts) in connection with a third-party financing facility secured by certain of PHH's Fannie Mae and Freddie Mac MSRs (GSE MSRs) and one SPE (PMC PLS ESR Issuer LLC) in connection with our PLS MSR financing facility (Ocwen Excess Spread-Collateralized Notes, Series 2022-PLS1 Class A), as further discussed below.

In 2019, we entered into a financing facility with a third-party secured by certain of PHH's GSE MSRs. Two SPEs (PMC ESR Trusts) were established in connection with this facility. We also entered into an MSR Excess Spread Participation Agreement under which we created a 100% participation interest in the Portfolio Excess Servicing Fees, pursuant to which the holder of the participation interest is entitled to receive certain funds collected on the related portfolio of mortgage loans (other than ancillary income and advance reimbursement amounts) with respect to such Portfolio Excess Servicing Fees. This participation interest has been contributed to the trusts. In connection with this facility, we entered into repurchase agreements with a third-party pursuant to which we sold trust certificates of the PMC ESR Trusts representing certain indirect economic interests in the GSE MSRs and agreed to repurchase such certificates at a future date at the repurchase price set forth in the repurchase agreements. Our obligations under the facility are secured by a lien on the related GSE MSRs. In addition, Onity guarantees the obligations under the facility.

In 2022, we issued Ocwen Excess Spread-Collateralized Notes, Series 2022-PLS1 Class A (PLS Notes) secured by certain of PHH's private label MSRs (PLS MSRs). The single class PLS Notes are an amortizing debt instrument with a fixed interest rate. The PLS Notes are issued by a trust that is included in our consolidated financial statements. The trust, PMC PLS ESR Issuer LLC (PLS Issuer) was established in this connection as a wholly-owned subsidiary of PHH. For collateralization purposes, PHH entered into an MSR Excess Spread Participation Agreement with PLS Issuer, whereby PHH created a participation interest in the Excess Servicing Fees, related float and REO fees associated with a PLS MSR portfolio PHH holds and granted a security interest to PLS Issuer in the underlying PLS MSRs. PLS Issuer's obligations under the PLS Notes credit agreement are secured by a lien on the related PLS MSRs. The PLS Issuer assigned the security interest in the PLS MSRs to the collateral agent for the noteholders. Onity guarantees the obligations of PLS Issuer under the facility.

We determined that the PMC ESR Trusts established in connection with the GSE MSR financing facility, and PLS Issuer established in connection with the PLS MSR financing facility, are VIEs for which we are the primary beneficiary. Therefore, we have included the PMC ESR Trusts and PLS Issuer in our consolidated financial statements. We have the power to direct the activities of these VIEs that most significantly impact the respective VIE's economic performance given that we are the servicer of the MSRs that result in cash flows to these VIEs. In addition, PHH has designed the PMC ESR Trusts and PLS Issuer at inception to facilitate these funding facilities under which we have the obligation to absorb the losses of the VIEs which could be potentially significant to the VIEs.

The table below presents the carrying value and classification of the assets and liabilities of the GSE MSR financing facility and the PLS Notes facility:

	December 31,	
	2024	2023
MSRs pledged (MSRs, at fair value)	\$ 814.9	\$ 449.6
Debt service account (Restricted cash)	1.8	1.7
Outstanding borrowings (MSR financing facilities, net)	440.7	282.1
Unamortized debt issuance costs (MSR financing facilities, net)	(0.1)	(0.4)

Note 3 — Fair Value

Fair value is estimated based on a hierarchy that maximizes the use of observable inputs and minimizes the use of unobservable inputs. Observable inputs are inputs that reflect the assumptions that market participants would use in pricing the asset or liability developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability developed based on the best information available in the circumstances. The fair value hierarchy prioritizes the inputs to valuation techniques into three broad levels whereby the highest priority is given to Level 1 inputs and the lowest to Level 3 inputs.

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the reporting entity can access at the measurement date.

Level 2: Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3: Unobservable inputs for the asset or liability.

We classify assets and liabilities in their entirety based on the lowest level of input that is significant to the fair value measurement.

The carrying amounts and the estimated fair values of our financial instruments and certain of our nonfinancial assets measured at fair value on a recurring or non-recurring basis or disclosed, but not measured, at fair value are as follows:

	Level	December 31,			
		2024		2023	
		Carrying Value	Fair Value	Carrying Value	Fair Value
Financial assets:					
Loans held for sale (a) (d)	3, 2	\$ 1,290.2	\$ 1,290.2	\$ 677.3	\$ 677.3
Loans held for investment, at fair value (a) (e)	3	\$ 11,125.3	\$ 11,125.3	\$ 7,975.5	\$ 7,975.5
Advances, net (b)	3	\$ 577.2	\$ 577.2	\$ 678.8	\$ 678.8
Receivables, net (b)	3	\$ 176.4	\$ 176.4	\$ 154.8	\$ 154.8
Financial liabilities:					
Advance match funded liabilities (b)	3	\$ 417.1	\$ 417.1	\$ 499.7	\$ 499.7
HMBS-related borrowings, at fair value (a)	3	\$ 10,872.1	\$ 10,872.1	\$ 7,797.3	\$ 7,797.3
Other financing liabilities, at fair value (a)	3	846.9	846.9	900.0	900.0
Mortgage loan financing facilities (b) (c)	3	\$ 1,528.2	\$ 1,535.3	\$ 710.6	\$ 717.6
MSR financing facilities (b) (c)	3	\$ 957.9	\$ 947.6	\$ 916.2	\$ 900.3
Senior notes (b) (c)	3, 2	\$ 487.4	\$ 495.0	\$ 595.8	\$ 556.5
Derivative financial instrument assets (liabilities), net					
Interest rate lock commitments (IRLCs) (a)	3	\$ (0.5)	\$ (0.5)	\$ 5.6	\$ 5.6
Other derivatives (a)	1	(11.7)	(11.7)	8.9	8.9
MSRs (a)	3	\$ 2,466.3	\$ 2,466.3	\$ 2,272.2	\$ 2,272.2

(a) Measured at fair value on a recurring basis in our financial statements.

(b) Disclosed, but not measured at fair value in our financial statements.

(c) The carrying values are net of unamortized debt issuance costs and discount. See Note 14 — Borrowings for additional information.

(d) The newly originated portfolio of GSE and forward Ginnie Mae loans held for sale pending securitization with the Agencies is classified as Level 2; all other loans are classified as Level 3.

(e) Includes nil and \$5.6 million at December 31, 2024 and December 31, 2023, respectively, of Loans held for investment - Restricted for securitization investors (non-reverse).

The following tables present a reconciliation of the changes in fair value of certain Level 3 assets and liabilities that we measure at fair value on a recurring basis (refer to the respective notes for other Level 3 assets and liabilities):

	Loans Held for Sale - Fair Value	ESS Financing Liability	IRLCs
Year Ended December 31, 2024			
Beginning balance	\$ 203.1	\$ (248.9)	\$ 5.6

- (1) IRLC activity (issuances and transfers) represent changes in fair value included in earnings. This activity is presented on a gross basis in the table for disclosure purposes. Total net change in fair value included in earnings attributed to IRLCs is a gain (loss) of \$(6.2) million, \$6.3 million and \$(18.8) million for 2024, 2023 and 2022, respectively. See Note 18 — Derivative Financial Instruments and Hedging Activities.

A reconciliation from the beginning balances to the ending balances of Loans held for investment and HMBS-related borrowings, MSR and Pledged MSR liabilities that we measure at fair value on a recurring basis is disclosed in Note 5 — Reverse Mortgages, Note 7 — Mortgage Servicing and Note 8 — Other Financing Liabilities, at Fair Value, respectively.

The methodologies that we use and key assumptions that we make to estimate the fair value of financial instruments and other assets and liabilities measured at fair value on a recurring or non-recurring basis and those disclosed, but not carried, at fair value are described below.

Loans Held for Sale

Residential forward and reverse mortgage loans held for sale are carried at fair value and are generally classified within Level 2 of the valuation hierarchy. The primary component of the price is obtained from observable values of mortgage forwards for loans of similar terms and characteristics. We have the ability to access this market, and it is the market into which conventional and government-insured mortgage loans are typically sold.

Repurchased Ginnie Mae forward and reverse loans are classified as Level 3 within the valuation hierarchy. We repurchase certain loans from Ginnie Mae guaranteed securitizations in connection with loan modifications, strategic EBO and loan resolution activity as part of our contractual obligations as the servicer of the loans. The fair value of the forward mortgage loans we purchased from Ginnie Mae guaranteed securitizations is estimated using both observable and unobservable inputs, including estimated default, prepayment, and discount rates. Significant unobservable inputs in estimating fair value include the estimated default rate and, for reverse loans the prepayment rate and liquidation timeline.

Loans Held for Investment - Reverse Mortgages

Reverse mortgage loans held for investment are carried at fair value and classified as Level 3 within the valuation hierarchy. These loans are not actively traded, and quoted market prices are not available. We measure these loans at fair value based on the expected future cash flows discounted over the expected life of the loans at a rate commensurate with the risk of the estimated cash flows, including future draw commitments for HECM loans. Inputs of the discounted cash flows of these assets include future draws and tail securitization spreads, conditional prepayment rate (including voluntary and involuntary prepayments) and discount rate.

We engage third-party valuation experts in the determination of fair value. While the models and related assumptions used by the valuation experts are proprietary to them, we understand the methodologies, the significant inputs and the assumptions used to develop the prices based on our ongoing due diligence, which includes regular discussions with the valuation experts. We evaluate the reasonableness of our third-party experts' assumptions using historical experience, or cash flow backtesting,

adjusted for prevailing market conditions and benchmarks of assumptions and value estimates. The fair value is equal to the third-party valuation expert fair value mark.

Significant unobservable assumptions include conditional prepayment rate and discount rate. The conditional prepayment rate assumption displayed in the table below is inclusive of voluntary (repayment or payoff) and involuntary (inactive/delinquent status and default) prepayments. The discount rate assumption is primarily based on an assessment of current market yields on reverse mortgage loan and tail securitizations, expected duration of the asset and current market interest rates.

Significant unobservable assumptions	December 31,	
	2024	2023
Life in years		
Range	0.4 to 7.6	0.8 to 7.9
Weighted average	4.2	5.2
Conditional prepayment rate (CPR), including voluntary and involuntary prepayments (a)		
Range	13.1% to 31.6%	12.0% to 35.4%
Weighted average	21.3 %	17.2 %
Discount rate	5.4 %	4.9 %

(a) Annualized rate of lifetime projected prepayments as a percentage of the UPB at the beginning of any given period.

Significant changes in any of these assumptions in isolation could result in a significant change in fair value. The effects of changes in the assumptions used to value the securitized loans held for investment, excluding future draw commitments, are partially offset by the effects of changes in the assumptions used to value the HMBS-related borrowings that are associated with these loans.

MSRs

MSRs are carried at fair value and classified within Level 3 of the valuation hierarchy. MSRs are not actively traded, and quoted market prices are not available. We determine the fair value of MSRs primarily using discounted cash flow methodologies. The significant components of the estimated future cash inflows for MSRs include servicing fees, late fees, float earnings and other ancillary fees. Significant cash outflows include the cost of servicing, the cost of financing servicing advances and compensating interest payments.

We engage third-party valuation experts who generally utilize: (a) transactions involving instruments with similar collateral and risk profiles, adjusted as necessary based on specific characteristics of the asset or liability being valued; and/or (b) industry-standard modeling, such as a discounted cash flow model and prepayment model, in arriving at their estimate of fair value. The prices provided by the valuation experts reflect their observations and assumptions related to market activity, generally the bulk market, incorporating available industry survey results and client feedback, and including risk premiums and liquidity adjustments. While interest rates are a key value driver, MSR fair value may change for other market-driven factors, including but not limited to the supply and demand of the market or the required yield or perceived value by investors of such MSRs. While the models and related assumptions used by the valuation experts are proprietary to them, we understand the methodologies and assumptions used to develop the prices based on our ongoing due diligence, which includes regular discussions with the valuation experts. We evaluate the reasonableness of our third-party experts' assumptions using historical experience adjusted for prevailing market conditions and benchmarks of assumptions and value estimates. We believe that the procedures executed by the valuation experts, supported by our verification and analytical procedures, provide reasonable assurance that the prices used in our consolidated financial statements comply with the accounting guidance for fair value measurements and disclosures and reflect the assumptions that a market participant would use.

Assumptions used in the valuation of MSRs include:

- Mortgage prepayment speeds
- Cost of servicing
- Discount rate
- Interest rate used for computing the cost of financing servicing advances
- Curtailment on advances
- Delinquency rates
- Interest rate used for computing float earnings
- Compensating interest expense
- Collection rate of other ancillary fees

The fair value is equal to the fair value mark provided by the third-party valuation experts, without adjustment, except in the event we have a potential or completed sale, including transactions where we have executed letters of intent, in which case the fair value of the MSRs is recorded at the estimated sale price.

A change in the valuation inputs or assumptions may result in a significantly higher or lower fair value measurement. Changes in market interest rates predominantly impact the fair value of Agency MSR via prepayment speeds by altering the borrower refinance incentive and the non-Agency MSR due to the impact on advance funding costs. In addition, changes in market interest rates impact float income. The significant unobservable assumptions used in the valuation of these MSRs include prepayment speeds, delinquency rates, cost to service and discount rates.

Significant unobservable assumptions	December 31,			
	2024		2023	
	Agency	Non-Agency	Agency	Non-Agency
Weighted average prepayment speed	6.4 %	7.8 %	7.7 %	7.9 %
Weighted average lifetime delinquency rate	1.2 %	10.4 %	1.3 %	10.0 %
Weighted average discount rate	10.0 %	10.9 %	9.2 %	11.4 %
Weighted average cost to service (in dollars)	\$ 71	\$ 193	\$ 71	\$ 192

Because the mortgages underlying these MSRs permit the borrowers to prepay the loans, the value of the MSRs generally tends to diminish in periods of declining interest rates, an improving housing market or expanded product availability (as prepayments increase) and increase in periods of rising interest rates, a deteriorating housing market or reduced product availability (as prepayments decrease).

The following table summarizes the estimated change in the value of the MSRs as of December 31, 2024 given hypothetical increases in lifetime prepayments and yield assumptions:

Adverse change in fair value	10%	20%
Change in weighted average prepayment speeds (in percentage points)	0.7	1.5
Change in fair value due to change in weighted average prepayment speeds	\$ (59.3)	\$ (117.2)
Change in weighted average discount rate (in percentage points)	1.0	2.0
Change in fair value due to change in weighted average discount rate	\$ (86.2)	\$ (165.3)

Advances

We value advances at their net realizable value, which generally approximates fair value. Servicing advances have no stated maturity and do not bear interest. Principal and interest advances are generally realized within a relatively short period of time. The timing of recovery of taxes, insurance and other corporate advances depends on the underlying loan attributes, performance, and in many cases, foreclosure or liquidation timeline. The fair value adjustment to servicing advances associated with the estimated time to recover such advances is separately measured and reported as a component of the fair value of the associated MSR, consistent with actual market transactions. Refer to MSRs above for a description of the valuation methodology and assumptions related to the cost of financing servicing advances and discount rate, among other factors.

Receivables

The carrying value of receivables generally approximates fair value because of the relatively short period of time between their origination and realization.

Advance Match Funded Liabilities

For advance match funded liabilities that bear interest at a rate that is adjusted regularly based on a market index, the carrying value approximates fair value. We assume the notes are refinanced at the end of their revolving periods, consistent with how we manage our advance facilities.

Financing Liabilities

HMBS-Related Borrowings

HMBS-related borrowings are carried at fair value and classified as Level 3 within the valuation hierarchy. These borrowings are not actively traded, and therefore, quoted market prices are not available. We determine fair value using a discounted cash flow approach, by discounting the projected recovery of principal and interest over the estimated life of the borrowing at a market rate commensurate with the risk of the estimated cash flows.

We engage third-party valuation experts to support our valuation and provide observations and assumptions related to market activities. The fair value is equal to the fair value mark provided by a third-party valuation expert. We evaluate the

reasonableness of our fair value estimate and assumptions using historical experience, or cash flow backtesting, adjusted for prevailing market conditions and benchmarks of assumptions and value estimates.

Significant unobservable assumptions include yield spread and discount rate. The yield spread and discount rate assumption for these liabilities are primarily based on an assessment of current market yields for newly issued HMBS, expected duration and current market interest rates.

Significant unobservable assumptions	December 31,	
	2024	2023
Life in years		
Range	0.4 to 7.6	0.8 to 7.9
Weighted average	4.2	5.2
Conditional prepayment rate		
Range	13.1% to 31.6%	12.0% to 35.4%
Weighted average	21.3 %	17.2 %
Discount rate	5.3 %	4.9 %

Significant changes in any of these assumptions in isolation could result in a significant change in fair value. The effects of changes in the assumptions used to value the HMBS-related borrowings are partially offset by the effects of changes in the assumptions used to value the associated pledged loans held for investment, excluding future draw commitments.

Pledged MSR Liabilities

Pledged MSR liabilities are carried at fair value and classified as Level 3 within the valuation hierarchy. We determine the fair value of the pledged MSR liability following a similar approach as for the associated transferred MSRs. Fair value of the pledged MSR liability in connection with the MSR capital partner transactions (including MAV) is determined using the fair value mark provided by third-party valuation expert, consistent with the associated MSR, using the same methodology and assumptions, while considering cash flows contractually retained by PHH and expected life of subservicing agreement, when applicable.

Significant unobservable assumptions	December 31,	
	2024	2023
Weighted average prepayment speed	5.4 %	6.5 %
Weighted average delinquency rate	3.0 %	2.8 %
Weighted average subservicing life (in years)	4.7	4.3
Weighted average discount rate	10.3 %	9.6 %
Weighted average cost to service (in dollars)	\$ 133	\$ 130

Significant changes in these assumptions in isolation would result in a significant change in fair value.

ESS Financing Liability

The Excess Servicing Spread (ESS) financing liability is carried at fair value and classified as Level 3 within the valuation hierarchy. The ESS financing liability consists of the obligation to remit to a third party a specified percentage of future servicing fee collections on reference pools of mortgage loans, which we are entitled to as owner of the related MSRs. The fair value represents the net present value of the expected servicing spread cash flows, consistent with the valuation model and behavioral projections of the underlying MSR, as applicable. The fair value of the ESS financing liability is determined using a third-party valuation expert. The significant unobservable assumptions used in the valuation of the ESS financing liability include prepayment speeds, delinquency rates, and discount rates. The discount rate is initially determined based on the expected cash flows and the proceeds from each issuance, and is subsequently updated, at each issuance level, to incorporate discount rate assumption updates for the underlying MSR or other factors, as provided by third-party valuation expert. At December 31, 2024 and 2023, the weighted average discount rate of the ESS financing liability was 10.0% and 9.4%, respectively. Refer to MSRs above for a description of other significant unobservable assumptions.

Mortgage Loan Financing Facilities

Our mortgage loan warehouse facilities bear interest at a rate that is adjusted regularly based on a market index. The carrying value of the outstanding borrowings under the revolving facilities approximates fair value. With respect to the OLIT securitization issuances, we issued senior and mezzanine classes of notes, at a discount, with fixed interest rates and mandatory

call dates. We determine the fair value of these notes based on bid prices provided by third parties involved in the issuance and placement of the notes.

MSR Financing Facilities

Our MSR financing facilities bear interest at a rate that is adjusted regularly based on a market index. The carrying value of the outstanding borrowings under these facilities approximates fair value.

In 2014, we issued Ocwen Asset Servicing Income Series (OASIS), Series 2014-1 Notes secured by Ocwen-owned MSRs relating to Freddie Mac mortgages. In 2022, we issued Ocwen Excess Spread-Collateralized Notes, Series 2022-PLS1 notes secured by certain of PHH's private label MSRs. We determine the fair value of these notes based on bid prices provided by third parties involved in the issuance and placement of the notes. At December 31, 2024, the Ocwen Excess Spread-Collateralized Notes, Series 2022-PLS1 notes carrying value approximates fair value, given the maturity date in February 2025.

Senior Notes

We base the fair value on quoted prices in a market with available limited trading activity, or on valuation data obtained from a pricing service in the absence of trading data. For Senior Notes with no pricing activity or trading data, we determine the fair value by discounting future principal and interest payments at a market rate commensurate with the risk of the estimated cash flows.

Derivative Financial Instruments

Interest rate lock commitments (IRLCs) are carried at fair value and classified as Level 3 within the valuation hierarchy. IRLCs represent an agreement to purchase loans from a third-party originator or an agreement to extend credit to a mortgage applicant (locked pipeline), whereby the interest rate is set prior to funding. Fair value amounts of IRLCs are adjusted for expected "fallout" (locked pipeline loans not expected to close) using models that consider cumulative historical fallout rates and other factors. Fallout rates are determined to be significant unobservable assumptions.

We use derivative instruments, including forward trades of MBS or Agency "to be announced" securities (TBAs) and exchange-traded interest rate swap futures, as economic hedging instruments of the fair value of our loans held for sale and MSR portfolio. Forward contracts, TBAs and interest rate swap futures are actively traded in the market and we obtain unadjusted market quotes for these derivatives; thus, they are generally classified within Level 1 of the valuation hierarchy.

Note 4 — Loans Held for Sale - Fair Value

The following table presents the estimated fair value of Loans held for sale for which we elected the fair value option:

	December 31, 2024	December 31, 2023
Unpaid principal balance	\$ 1,401.2	\$ 678.8
Premium (discount)	(91.6)	(2.4)
Unrealized gain (loss)	(19.4)	(2.2)
Total fair value	<u>\$ 1,290.2</u>	<u>\$ 674.2</u>

The following table presents the composition of Loans held for sale, at fair value by type:

	December 31, 2024	December 31, 2023
GSE loans	\$ 610.8	\$ 219.3
Government- Forward loans	215.5	254.0
Forward loans repurchased from Ginnie Mae guaranteed securitization (1)	26.1	19.1
Reverse loans (2)	432.4	166.6
Other residential mortgage loans	5.3	15.2
Total fair value	<u>\$ 1,290.2</u>	<u>\$ 674.2</u>

(1) Pursuant to Ginnie Mae servicing guidelines.

(2) Includes reverse mortgage loans purchased from Ginnie Mae securitization pools that reached the 98% of maximum claim amount and are generally liquidated through foreclosure and subsequent sale of the REO properties. As of December 31, 2024 and December 31, 2023, the balance includes \$375.4 million and \$119.5 million respectively loans pledged as collateral for the Asset-Backed Notes issued by OLIT. Also see Note 2 — Securitizations and Variable Interest Entities and Note 14 — Borrowings.

The following table presents the activity of Loans held for sale, at fair value:

	Years Ended December 31,		
	2024	2023	2022
Beginning balance	\$ 674.2	\$ 617.8	\$ 917.5
Originations and purchases	17,811.4	12,797.5	17,582.0
Proceeds from sales	(16,857.8)	(12,450.8)	(17,477.2)
Principal collections	(102.1)	(87.5)	(106.9)
Transfers from (to):			
Loans held for investment, at fair value	4.8	6.1	8.0
Receivables	(32.9)	(33.2)	(13.2)
REO (Other assets)	(26.8)	(19.4)	(3.1)
Advances (capitalization upon Ginnie Mae modifications)	9.3	6.4	18.1
Fair value gain (loss) on loans held for sale, at fair value (1)	(216.2)	(165.7)	(294.0)
Other (2)	26.1	2.8	(13.4)
Ending balance	<u>\$ 1,290.2</u>	<u>\$ 674.2</u>	<u>\$ 617.8</u>

(1) See below table of gain (loss) on loans held for sale, net, excluding MSRs retained on transfers of forward mortgage loans.

(2) Includes capitalized interest on reverse loans, reported within Interest income.

The following table presents the components of Gain (loss) of loans held for sale at fair value, net:

Gain (Loss) on Loans Held for Sale, Net	Years Ended December 31,		
	2024	2023	2022
MSRs retained on transfers of forward mortgage loans	\$ 247.6	\$ 183.0	\$ 234.7
Loss on sale of forward mortgage loans (1)	(200.0)	(178.8)	(278.0)
Loss on sale of repurchased Ginnie Mae loans (1)(2)	(1.4)	(2.7)	(10.1)
Change in fair value of loans held for sale (3)	(14.7)	15.9	(5.9)
Gain (loss) on loans held for sale, at fair value	31.4	17.3	(59.3)
Gain (loss) on economic hedge derivative instruments (4)	36.0	18.6	101.7
Change in fair value of IRLCs	(5.8)	6.4	(17.4)
Provision for representation and warranty obligations	(2.6)	(1.7)	(3.0)
	<u>\$ 59.0</u>	<u>\$ 40.6</u>	<u>\$ 22.0</u>

(1) Realized gain (loss) on sale of loans, excluding retained MSRs.

(2) Includes an \$8.8 million loss in 2022 on certain delinquent and aged loans repurchased (net of the associated Ginnie Mae MSR fair value adjustment) in connection with the Ginnie Mae EBO program with an aggregated UPB of \$299.7 million, net of the associated MSR fair value adjustment.

(3) Includes a \$10.9 million unrealized gain in 2023 related to the revaluation of inactive HECM loan buyouts opportunistically acquired at a discount and securitized in a private placement transaction completed in June 2023.

(4) Excludes gains of \$15.7 million on inter-segment economic hedge derivatives presented within MSR valuation adjustments, net for 2022. No such gains or losses were recognized during 2024 and 2023. See Note 24 — Business Segment Reporting.

Note 5 – Reverse Mortgages

The following table presents the estimated fair value of reverse mortgage loans held for investment for which we elected the fair value option:

	December 31, 2024	December 31, 2023
Unpaid principal balance	\$ 10,699.5	\$ 7,664.7
Fair value adjustments	425.8	305.3
Total fair value	<u>\$ 11,125.3</u>	<u>\$ 7,970.0</u>

The following table presents the composition of reverse mortgage loans held for investment, at fair value by type:

	December 31, 2024	December 31, 2023
HECM loans - securitized, pledged to HMBS-related borrowings (1)	\$ 10,950.8	\$ 7,868.5
New HECM loan originations and HECM loan tails (2) - unsecuritized	174.5	101.5
Total fair value	<u>\$ 11,125.3</u>	<u>\$ 7,970.0</u>

- (1) The Ginnie Mae securitization of conventional, HECM loans does not qualify for sale accounting treatment and is accounted for as a secured financing transaction, with the recognition of both loans and HMBS-related borrowing on the consolidated balance sheets.
- (2) Tails include draws on securitized HECM loans, mortgage insurance premium, servicing fee and other advances which we subsequently securitize.

The following table summarizes the activity in reverse mortgage loans held for investment and HMBS related borrowings that do not qualify for sale accounting and for which we elected the fair value option:

	Years Ended December 31,					
	2024		2023		2022	
	Loans Held for Investment - Reverse Mortgages	HMBS - Related Borrowings (3)	Loans Held for Investment - Reverse Mortgages	HMBS - Related Borrowings (3)	Loans Held for Investment - Reverse Mortgages	HMBS - Related Borrowings (3)
Beginning balance	\$ 7,970.0	\$ (7,797.3)	\$ 7,504.1	\$ (7,326.8)	\$ 7,199.8	\$ (6,885.0)
Originations	1,125.0	—	1,033.4	—	1,658.1	—
Securitization of HECM loans accounted for as a financing	—	(1,073.5)	—	(1,054.6)	—	(1,780.4)
Additional proceeds from securitization of HECM loans and tails	—	(13.2)	—	(11.0)	—	(25.2)
Acquisition (1) (2)	2,912.7	(2,880.9)	—	—	211.3	(209.1)
Repayments (principal payments received)	(1,495.4)	1,474.7	(1,076.9)	1,070.1	(1,579.9)	1,568.4
Transfers:						
Loans held for sale, at fair	(4.8)	—	(6.1)	—	(8.0)	—
Receivables, net	(3.0)	—	(3.4)	—	2.1	—
REO (Other assets)	(0.5)	—	(0.1)	—	(0.4)	—
Fair value gains (losses) included in earnings (4)	621.2	(581.8)	519.0	(475.0)	21.1	4.5
Ending Balance	<u>\$ 11,125.3</u>	<u>\$ (10,872.1)</u>	<u>\$ 7,970.0</u>	<u>\$ (7,797.3)</u>	<u>\$ 7,504.1</u>	<u>\$ (7,326.8)</u>

- (1) On November 1, 2024, we acquired certain reverse mortgage assets of MAM and investment funds managed by Waterfall Asset Management, LLC that own MAM (collectively “Waterfall”). The acquired assets were subserviced by PHH and included HECM reverse mortgage loans and mortgage servicing rights with a UPB of \$2.9 billion (which are reported on our consolidated balance sheet as Loans held for investment, at fair value along with HMBS-related borrowings, at fair value), \$20.0 million cash, and reverse mortgage buyouts, advances, tails and other related assets and liabilities. In consideration of the net acquired assets, Onity issued shares of a new series of preferred stock. See Note 16 — Mezzanine Equity and Supplemental non-cash activity of the consolidated statements of cash flows. Included in Other liabilities is the consideration for assets transferred with a UPB of \$14.2 million for which the final amount of consideration is subject to post-closing adjustment to be agreed upon by the parties and may be settled in the form of cash, additional preferred stock, other instrument, or a combination thereof.
- (2) During 2022, we purchased a reverse mortgage servicing portfolio of HECM loans securitized in Ginnie Mae pools. As the Ginnie Mae HMBS program does not qualify for sale accounting, the transaction conveyed the HECM loans and associated HMBS-related borrowings to us. We have accounted for this transaction as a secured financing, as a purchase of loans held for investment and assumption of an HMBS securitization liability for the obligation to Ginnie Mae.
- (3) Represents amounts due to the holders of beneficial interests in Ginnie Mae guaranteed HMBS that did not qualify for sale accounting treatment of HECM loans. Under this accounting treatment, the HECM loans securitized with Ginnie Mae remain on our consolidated balance sheets and the proceeds from the sale are recognized as a financing liability, which is recorded at fair value consistent with the related HECM loans. The beneficial interests in Ginnie Mae guaranteed HMBS have no maturity dates, and the borrowings mature as the related loans are repaid. The interest rate is the pass-through rate of the loans less applicable margin. See Note 2 — Securitizations and Variable Interest Entities.
- (4) See further breakdown of the net gain (loss) in the table below. Includes interest accruals.

The following table presents the Fair value gains (losses) on reverse loans held for investment and HMBS-related borrowings included in earnings:

Fair value gains (losses) included in earnings	Years Ended December 31,		
	2024	2023	2022
Fair value gains (losses) of Reverse loans held for investment	\$ 621.2	\$ 519.0	\$ 21.1
Fair value gains (losses) of HMBS related borrowings	(581.8)	(475.0)	4.5
Total fair value gains (losses) included in earnings	\$ 39.4	\$ 44.0	\$ 25.6

The following table presents the components of Gain (loss) on reverse loans held for investment and HMBS-related borrowings, net:

Gain (Loss) on Reverse Loans Held for Investment and HMBS-related Borrowings, Net	Years Ended December 31,		
	2024	2023	2022
Gain on new originations (1)	\$ 22.8	\$ 20.5	\$ 50.7
Net interest income (servicing fee) (2)	26.2	23.6	21.9
Other change in fair value of securitized loans held for investment and HMBS-related borrowings, net	(9.7)	(0.1)	(47.1)
Fair value gains (losses) included in earnings (3)	39.4	44.0	25.6
Loan fees and other	3.1	2.8	10.5
	\$ 42.5	\$ 46.7	\$ 36.1

- (1) Includes the changes in fair value of newly originated loans held for investment in the period from interest rate lock commitment date through securitization date.
- (2) Includes the interest income on loans held for investment less the interest expense on HMBS-related borrowings. The net interest income includes the servicing fee Onity is contractually entitled to on securitized loans.
- (3) See breakdown between Loans held for investment and HMBS-related borrowings in the table above.

Note 6 — Advances

The following table presents the composition of servicing advances by type:

	December 31,	
	2024	2023
Principal and interest	\$ 150.1	\$ 212.5
Taxes and insurance	314.2	343.3
Foreclosures, bankruptcy, REO and other (1)	120.3	130.3
Total advances, before allowance for losses	584.6	686.1
Allowance for losses	(7.4)	(7.3)
Advances, net	\$ 577.2	\$ 678.8

- (1) Balance at December 31, 2024 includes servicing advances of \$32.8 million (New York), \$8.9 million (Florida), \$8.5 million (California), \$5.8 million (New Jersey) and 5.3 million (Pennsylvania) based on the underlying property location of the related mortgage loans.

The following table presents the composition of servicing advances by investor:

	December 31,	
	2024	2023
GSE	\$ 94.0	\$ 100.8
Ginnie Mae	70.6	60.2
Non-Agency	412.6	517.7
Advances, net	\$ 577.2	\$ 678.8

The following table summarizes the activity in net advances:

	Years Ended December 31,		
	2024	2023	2022
Beginning balance - before Allowance for Losses	\$ 686.1	\$ 725.1	\$ 779.5
New advances	927.5	779.8	784.8
Transfer from (to) Receivables	8.3	14.7	6.5
Sales of advances	(14.2)	(6.3)	(2.9)
Acquisition of advances in connection with the purchase of MSRs	0.8	42.2	—
Transfer to Loans held for sale (capitalization upon Ginnie Mae modifications)	(9.3)	(6.4)	(18.1)
Collections of advances and other	(1,014.5)	(863.0)	(824.7)
Ending balance - before Allowance for Losses	584.6	686.1	725.1
Beginning balance - Allowance for Losses	\$ (7.3)	\$ (6.2)	\$ (7.0)
Provision expense	(7.3)	(8.5)	(7.2)
Net charge-offs and other	7.2	7.3	8.0
Ending balance - Allowance for Losses	(7.4)	(7.3)	(6.2)
Ending balance, net	\$ 577.2	\$ 678.8	\$ 718.9

Note 7 — Mortgage Servicing

The following table presents the composition of our MSR portfolio:

MSR UPB and Fair Value	December 31, 2024		December 31, 2023	
	Fair Value	UPB (\$ billions)	Fair Value	UPB (\$ billions)
Owned MSRs	\$ 1,869.6	\$ 129.8	\$ 1,604.6	\$ 122.7
Rithm and others transferred MSRs (1)	266.1	19.0	244.8	18.1
MAV transferred MSRs (1)	330.6	21.5	422.8	28.8
Total transferred MSR, subject to Pledged MSR liability, at fair value (1)	596.7	40.5	667.6	46.9
Total MSRs	<u>\$ 2,466.3</u>	<u>\$ 170.3</u>	<u>\$ 2,272.2</u>	<u>\$ 169.7</u>

(1) MSRs subject to sale agreements that do not meet sale accounting criteria. See Note 8 — Other Financing Liabilities, at Fair Value.

The following table presents the composition of our MSR portfolio by investor:

MSR UPB and Fair Value	December 31, 2024		December 31, 2023	
	Fair Value	UPB (\$ billions)	Fair Value	UPB (\$ billions)
GSE	\$ 1,902.5	\$ 129.3	\$ 1,773.9	\$ 127.3
GNMA	351.6	19.4	277.1	18.6
Non-Agency	212.2	21.6	221.2	23.8
Total MSRs	<u>\$ 2,466.3</u>	<u>\$ 170.3</u>	<u>\$ 2,272.2</u>	<u>\$ 169.7</u>

The following table summarizes the delinquency status of loans underlying our MSRs:

Delinquent loans	December 31, 2024				December 31, 2023			
	GSE	GNMA	Non - Agency	Total	GSE	GNMA	Non - Agency	Total
30 days	1.0 %	5.4 %	8.4 %	3.1 %	1.2 %	6.1 %	9.4 %	3.7 %
60 days	0.2	1.8	3.4	1.1	0.2	2.0	3.6	1.2
90 days or more	0.5	4.5	6.9	2.3	0.5	3.7	8.2	2.6
Total 30-60-90 days or more	<u>1.8 %</u>	<u>11.8 %</u>	<u>18.7 %</u>	<u>6.5 %</u>	<u>1.9 %</u>	<u>11.8 %</u>	<u>21.2 %</u>	<u>7.5 %</u>

The following table summarizes the activity of our MSRs at fair value:

Mortgage Servicing Rights, At Fair Value	Years Ended December 31,		
	2024	2023	2022
Beginning balance	\$ 2,272.2	\$ 2,665.2	\$ 2,250.1
Sales	(211.0)	0.1	(154.4)
Additions:			
Recognized on the sale of residential mortgage loans	247.6	183.0	234.7
Purchases of MSRs	239.6	109.9	181.6
Servicing transfers and adjustments (1) (2)	(87.1)	(454.3)	(25.3)
Net additions (sales)	<u>189.1</u>	<u>(161.3)</u>	<u>236.6</u>
Changes in fair value recognized in earnings:			
Changes in valuation inputs or assumptions	232.3	6.4	454.0
Realization of cash flows	(227.4)	(238.1)	(275.5)
Fair value gains (losses) recognized in earnings	<u>5.0</u>	<u>(231.7)</u>	<u>178.5</u>
Ending balance	<u>\$ 2,466.3</u>	<u>\$ 2,272.2</u>	<u>\$ 2,665.2</u>

- (1) On December 31, 2023, we derecognized \$421.7 million non-Agency MSRs and Pledged MSR liability associated with Rithm servicing agreements with a UPB of \$33.4 billion for which MSR sale accounting criteria were met. See Note 8 — Other Financing Liabilities, at Fair Value.
- (2) During 2024, 2023 and 2022, upon sale of GSE MSRs by MAV to third parties, we derecognized \$85.7 million, \$32.5 million and \$39.0 million, respectively, of those MSRs that were previously sold to MAV in transactions that did not qualify for sale accounting treatment. We derecognized the MSRs from our balance sheets along with the associated Pledged MSR liability - see Note 8 — Other Financing Liabilities, at Fair Value.

The geographic concentration of the UPB of residential loans and real estate underlying our MSR's at December 31, 2024 was as follows:

<i>(Dollars in billions) (Count in thousands)</i>	Amount	Count
California	\$ 33.5	109.0
Texas	15.5	73.5
Florida	11.5	55.1
New Jersey	7.8	30.5
New York	7.1	28.2
Other	94.8	454.3
	<u>\$ 170.3</u>	<u>750.5</u>

The following table summarizes the components of our servicing and subservicing fee revenue:

Servicing Revenue	Years Ended December 31,		
	2024	2023	2022
Loan servicing and subservicing fees			
Servicing fee	\$ 364.2	\$ 347.7	\$ 337.8
Subservicing fee (1)	107.6	71.6	72.9
MAV - Subservicing fee	7.7	7.9	5.2
MAV - Servicing fee / Transferred MSR (2)	63.8	67.4	67.6
Rithm and Others - Servicing fee / Transferred MSR (2) (3)	75.3	241.5	255.0
	<u>618.6</u>	<u>736.0</u>	<u>738.5</u>
Ancillary income			
Late charges	34.3	38.3	41.0
Custodial accounts (float earnings)	129.3	110.7	26.2
Reverse subservicing ancillary fees	22.3	33.5	20.4
Other	27.9	28.8	36.5
	<u>213.9</u>	<u>211.3</u>	<u>124.1</u>
Total Servicing and subservicing fees	<u>\$ 832.5</u>	<u>\$ 947.3</u>	<u>\$ 862.6</u>
Owned MSR and Subservicing	\$ 676.9	\$ 615.7	\$ 525.4
Transferred MSR (2) (4)	155.6	331.6	337.2

- (1) Includes \$45.6 million of subservicing fees in 2024 related to MSR's previously sold to Rithm for which the sale accounting criteria were met effective December 31, 2023. See Note 8 — Other Financing Liabilities, at Fair Value.
- (2) Includes servicing fees collected on behalf of respective parties related to transferred MSR's that do not achieve sale accounting. See Note 8 — Other Financing Liabilities, at Fair Value.
- (3) Includes \$175.5 million and \$194.7 million of servicing fees in 2023 and 2022, respectively, related to MSR's previously sold to Rithm for which the sale accounting criteria were met effective December 31, 2023. See Note 8 — Other Financing Liabilities, at Fair Value.
- (4) Includes \$16.4 million, \$22.7 million and \$14.7 million of ancillary income in 2024, 2023 and 2022, respectively, associated with transferred MSR's that do not achieve sale accounting.

Float balances on which we earn interest, referred to as float earnings (balances in custodial accounts, which represent collections of principal and interest that we receive from borrowers on behalf of investors and tax and insurance payments) are held in escrow by unaffiliated banks and are excluded from our consolidated balance sheets. Float balances amounted to \$2.04 billion, \$1.56 billion and \$1.54 billion at December 31, 2024, 2023 and 2022, respectively.

Note 8 — Other Financing Liabilities, at Fair Value

The following table presents financing liabilities carried at fair value which include pledged MSR liabilities recorded in connection with MSR transfers, subservicing retained, that do not qualify for sale accounting, liabilities of consolidated mortgage-backed securitization trusts and MSR excess servicing spread (ESS) financing liability carried at fair value (see Note 14 — Borrowings for ESS financing liability carried at amortized cost).

Borrowing Type	Collateral	Maturity	Outstanding Balance at December 31,	
			2024	2023
MSR transfers not qualifying for sale accounting (1)(3):				
Pledged MSR liability, at fair value - MAV	MSRs	(1)	\$ 322.7	\$ 409.2
Rights to MSRs Agreements, at fair value - Rithm	MSRs	(1)	115.1	121.0
Pledged MSR liability, at fair value - Others	MSRs	(1)	145.8	115.3
Total Pledged MSR liability, at fair value			583.5	645.5
ESS financing liability, at fair value (2)	MSRs	(2)	263.3	248.9
Financing liability - Owed to securitization investors, at fair value: Residential Asset Securitization Trust 2003-A11 (RAST 2003-A11)	Loans held for investment	November 2033	—	5.6
Total Other financing liabilities, at fair value			\$ 846.9	\$ 900.0

- (1) MSRs transferred in transactions which do not qualify for sale accounting treatment. Until such time as the transaction qualifies as a sale for accounting purposes, we continue to recognize the MSRs and the related financing liability (referred as Pledged MSR liability) on our consolidated balance sheets, as well as the full amount of servicing fee collected as revenue and the servicing fee remitted as Pledged MSR liability expense in our consolidated statements of operations.
- (2) Consists of the obligation to remit to third parties a specified percentage of future servicing fee collections (servicing spread) on reference pools of MSRs, which we are entitled to as owner of the related MSRs. The servicing spread remittance is reported in Pledged MSR liability expense.
- (3) Fair value gains and losses of the Pledged MSR liability and ESS financing liability are recognized in MSR valuation adjustments, net in our consolidated statements of operations - see Note 9 — MSR Valuation Adjustments, Net.

\$33.4 billion UPB of MSR and Pledged MSR liability associated with Rithm servicing agreements were derecognized on December 31, 2023 as MSR sale accounting criteria were met. Effective January 1, 2024, as PHH continues to subservice the portfolio, our statement of operations reflects subservicing fee revenue as opposed to the gross presentation of servicing fee revenue and separate offsetting presentation of servicing fee remittances within Pledged MSR liability expense prior to January 1, 2024.

The following table presents the activity of the pledged MSR liability recorded in connection with the MSR transfer agreements with MAV and other unrelated parties, including Rithm, that do not qualify for sale accounting.

Pledged MSR Liability	Years Ended December 31,		
	2024	2023	2022
Beginning balance	\$ 645.5	\$ 931.7	\$ 797.1
MSR transfers			
MSR transfers to MAV	—	81.1	85.6
MSR transfers to Rithm and Others	26.2	100.0	0.6
Total MSR transfers	26.2	181.0	86.3
Derecognition of financing liability			
Derecognition of financing liability - Rithm (1)	(0.1)	(421.7)	(0.7)
Derecognition of financing liability - MAV (2)	(85.7)	(32.5)	(39.0)
Total derecognition of financing liability	(85.7)	(454.3)	(39.7)
Fair value (gain) loss			
Changes in fair value due to inputs and assumptions	40.3	51.3	192.1
Realization of expected cash flows	(42.8)	(64.2)	(104.1)
Total fair value (gain) loss	(2.4)	(12.9)	88.0
Ending balance (3)	\$ 583.5	\$ 645.5	\$ 931.7

- (1) On December 31, 2023, we derecognized a portion of the Rithm Pledged MSR liability with a UPB of \$33.4 billion as MSR sale accounting criteria were met upon the renewal of the servicing agreements.
- (2) During 2024, 2023 and 2022, we derecognized a portion of the MAV Pledged MSR liability upon sale of the related MSRs by MAV to third parties with a UPB of \$5.5 billion, \$2.3 billion and \$2.9 billion, respectively.
- (3) The fair value of the Pledged MSR liability differs from the fair value of the associated transferred MSR asset mostly due to the portion of ancillary income that is contractually retained by PHH and other contractual cash flows.

The following tables present the Pledged MSR liability expense recorded in connection with the MSR sale agreements with MAV, Rithm and others that do not qualify for sale accounting and the ESS financing liabilities.

	Year Ended December 31, 2024		
	Rithm and Others	MAV	Total
Servicing fees collected on behalf of MAV, Rithm and others	\$ 75.3	\$ 63.8	\$ 139.1
Less: Subservicing fee retained by Onity	(17.7)	(8.9)	(26.6)
Ancillary fee/income and other settlement (including expense reimbursement)	12.1	(1.0)	11.1
Transferred MSR net servicing fee remittance	<u>\$ 69.7</u>	<u>\$ 54.0</u>	123.7
ESS servicing spread remittance			51.8
Pledged MSR liability expense			<u>\$ 175.4</u>

	Year Ended December 31, 2023		
	Rithm and Others (1)	MAV	Total
Servicing fees collected on behalf of MAV, Rithm and others	\$ 241.5	67.4	\$ 308.9
Less: Subservicing fee retained by Onity	(68.4)	(9.2)	(77.6)
Ancillary fee/income and other settlement (including expense reimbursement)	14.3	(0.8)	13.5
Transferred MSR net servicing fee remittance	<u>\$ 187.4</u>	<u>\$ 57.5</u>	244.8
ESS servicing spread remittance			51.5
Pledged MSR liability expense			<u>\$ 296.3</u>

- (1) Includes \$175.5 million of servicing fees collected on behalf of Rithm, \$50.7 million of subservicing fee retained and \$124.9 million of net servicing fee remittance related to MSRs previously sold to Rithm for which the sale accounting criteria were met effective December 31, 2023.

	Year Ended December 31, 2022		
	Rithm and Others (1)	MAV	Total
Servicing fees collected on behalf of Rithm and MAV	\$ 255.0	67.5	\$ 322.5
Less: Subservicing fee retained by Onity	(74.0)	(8.8)	(82.8)
Ancillary fee/income and other settlement (including expense reimbursement)	5.7	0.4	6.1
Transferred MSR net servicing fee remittance	<u>\$ 186.7</u>	<u>\$ 59.1</u>	245.9
ESS servicing spread remittance			9.1
Pledged MSR liability expense			<u>\$ 255.0</u>

- (1) Includes \$194.7 million of servicing fees collected on behalf of Rithm, \$56.0 million of subservicing fee retained and \$138.7 million of net servicing fee remittance related to MSRs previously sold to Rithm for which the sale accounting criteria were met effective December 31, 2023.

MAV (Related Party) Transactions

PHH entered into agreements to sell MSR portfolios to its related party MAV, on a bulk and flow basis, for which PHH has been retained as subservicer. While MSR legal title has transferred to MAV, the transactions do not qualify for sale accounting treatment primarily due to the termination restrictions of the subservicing agreement. See Note 12 — Investment in Equity Method Investee and Related Party Transactions. Accordingly, we continue to report the MSR and an associated Pledged MSR liability on our consolidated balance sheet.

Rithm Transactions

Starting in 2012, Onity and PHH entered into agreements to sell MSRs and the related servicing advances to Rithm, for which PHH has been retained as subservicer. As of December 31, 2023 and 2024, all transactions met sale accounting treatment, except for the agreement to sell a \$9.1 billion MSR portfolio to Rithm, referred to as Rights to MSRs (or RMSR). While most of the economics and risks of the MSR and related advances have contractually transferred to Rithm, the MSR legal title was retained by Onity and the third-party consents required for title transfer were not obtained, causing the transactions to

be accounted for as secured financing. Accordingly, we continue to report \$115.1 million MSR and an associated Pledged MSR liability on our consolidated balance sheet.

Prior to December 31, 2023, while MSR legal title had transferred to Rithm, other MSR sale transactions with a UPB of \$33.4 billion did not qualify for sale accounting treatment, primarily due to the length of the non-cancellable term of the subservicing agreements. On December 31, 2023, we derecognized \$421.7 million non-Agency MSRs and Pledged MSR liability associated with Rithm subservicing agreements with a UPB of \$33.4 billion for which MSR sale accounting criteria were then met. Specifically, after certain contractual amendments, starting on December 31, 2023, the parties have the right to cancel or decline to renew the servicing agreements within a reasonable period of time. We have accounted for these agreements as subservicing since December 31, 2023.

The RMSR agreement and subservicing agreements are subject to automatic one-year renewals, unless Onity provides seven months' advance notice of termination, or Rithm provides three months' advance notice of termination. In November 2024, Onity and Rithm agreed to extend the subservicing agreements through February 1, 2026, with subsequent, automatic one-year renewals if notice of termination is not provided by July 1, 2025 by Onity or November 1, 2025 by Rithm. In connection with the November 2024 renewal, the parties made changes to certain economic terms of the agreements including a reduction to Onity's subservicing fees.

If Rithm exercises its termination right of the \$9.1 billion RMSR agreement, Rithm has the option of seeking (i) the transfer of the MSRs through a sale to a third party of its Rights to MSRs (together with a transfer of Onity's title to those MSRs) or (ii) a substitute RMSR arrangement that substantially replicates the Rights to MSRs structure under which we would transfer title to the MSRs to a successor servicer and Rithm would continue to own the economic rights and obligations related to the MSRs. In the case of option (i), we have a purchase option as specified in the RMSR Agreements. If Rithm is not able to sell the Rights to MSRs or establish a substitute RMSR arrangement with another servicer, Rithm has the right to revoke its termination notice and re-instate the applicable servicing addendum or to establish a subservicing arrangement whereby the MSRs remaining subject to the RMSR Agreements would be transferred to up to three subservicers who would subservice under Onity's oversight. If such a subservicing arrangement were established, Onity would receive an oversight fee and reimbursement of expenses. We may also agree on alternative arrangements that are not contemplated under our existing agreements or that are variations of those contemplated under our existing agreements.

Other MSR Capital Partner Transactions

PHH entered into agreements to sell MSR portfolios to different unrelated third parties, referred to as MSR capital partners, on a bulk and flow basis, for which PHH has been retained as subservicer. While MSR legal title has transferred to the MSR capital partners, the transactions do not qualify for sale accounting treatment primarily due to the termination restrictions of the subservicing agreements. Accordingly, we continue to report the MSR and an associated Pledged MSR liability on our consolidated balance sheets.

Note 9 — MSR Valuation Adjustments, Net

The table below presents the components of MSR valuation adjustments, net, that include four MSR related instruments which we account for at fair value with changes in fair value recorded in earnings (also refer to Note 7 — Mortgage Servicing and Note 8 — Other Financing Liabilities, at Fair Value):

- (i) the fair value changes of the total MSR portfolio (Total MSRs) recorded on our consolidated balance sheets (\$2.5 billion fair value asset at December 31, 2024). Total MSRs include owned MSRs and MSRs that have been sold or transferred to third parties in transactions that do not achieve sale accounting criteria. Owned MSRs include MSRs subject to ESS financing transactions;
- (ii) the fair value changes of the Pledged MSR liabilities recorded as liabilities on our consolidated balance sheets when MSR sale accounting criteria are not achieved (\$583.5 million fair value liability at December 31, 2024);
- (iii) the fair value changes of the ESS financing liabilities for which we elected the fair value option (\$263.3 million fair value liability at December 31, 2024); and
- (iv) the fair value changes of the derivative instruments economically hedging the MSR exposure.

	Years Ended December 31,		
	2024	2023	2022
Total MSRs	\$ 5.0	\$ (230.8)	\$ 176.4
Pledged MSR liabilities (1)	2.4	12.9	(88.0)
ESS financing liabilities	9.3	18.9	8.0
Derivative fair value gain (loss) (MSR economic hedges) (2)	(112.9)	(33.1)	(106.9)
MSR valuation adjustments, net	\$ (96.2)	\$ (232.2)	\$ (10.4)
Total changes in fair value due to realization of expected cash flows	\$ (156.6)	\$ (143.6)	\$ (164.5)
Total changes in fair value due to rates and assumptions (3)	60.5	(88.6)	154.1

- (1) MSR transfers that do not achieve sale accounting.
- (2) Also refer to Note 18 — Derivative Financial Instruments and Hedging Activities.
- (3) Including MSR hedging derivative gains (losses); excludes reverse mortgage exposure (see below).

MSR valuation adjustments, net exclude fair value changes of reverse mortgage loans net of HMBS related-borrowings which are included in our economic MSR interest rate risk hedge strategy (refer to Note 18 — Derivative Financial Instruments and Hedging Activities), and are separately presented as Gain on reverse loans held for investment and HMBS-related borrowings, net (Other change in fair value of securitized loans held for investment and HMBS-related borrowings, net) within our consolidated statements of operations (refer to Note 5 – Reverse Mortgages).

Note 10 — Receivables

	December 31,	
	2024	2023
Servicing-related receivables:		
Government-insured loan claims - Reverse	\$ 83.3	\$ 64.5
Government-insured loan claims - Forward	31.5	43.6
Subservicing fees and reimbursable expenses	16.4	14.3
Due from custodial accounts	12.1	13.8
Receivable from sale of MSRs (holdback)	9.7	5.1
Subservicing fees, reimbursable expenses and other - Due from MAV	2.1	3.4
Other	7.2	4.5
	<u>162.4</u>	<u>149.2</u>
Income taxes receivable (1)	28.2	27.1
Other receivables	4.0	3.6
	<u>194.6</u>	<u>179.9</u>
Allowance for losses	<u>(18.1)</u>	<u>(25.1)</u>
	<u>\$ 176.4</u>	<u>\$ 154.8</u>

- (1) Includes \$26.6 million and \$25.2 million at December 31, 2024 and 2023, respectively, from the USVI Bureau of Internal Revenue (BIR) for a refund of income taxes paid in prior years. In December 2022, we executed an agreement with the BIR for payment of the income tax refunds related to tax years 2013 through 2015, plus accrued interest, over a two-year period ending December 31, 2024. The BIR did not make the payment that was due on December 31, 2023 nor any subsequent payments pursuant to the agreement. On February 8, 2024, we filed a lawsuit against the USVI for the refund of income taxes paid in prior years and for the USVI's breach of the above-referenced agreement; the USVI is defending against such claims and contesting that such refunds are owed.

Allowance for Losses	Years Ended December 31,		
	2024	2023	2022
Beginning balance	\$ 25.1	\$ 34.3	\$ 41.7
Provision	16.7	17.2	13.3
Charge-offs and other, net	(23.6)	(26.5)	(20.7)
Ending balance	<u>\$ 18.1</u>	<u>\$ 25.1</u>	<u>\$ 34.3</u>

At December 31, 2024 and 2023, the allowance for losses related to FHA-, VA- or USDA-insured loans repurchased from Ginnie Mae guaranteed securitizations (government-insured claims) was \$17.2 million and \$24.6 million, respectively.

Note 11 — Premises and Equipment

	December 31,	
	2024	2023
Computer hardware	\$ 23.2	\$ 22.6
Operating lease ROU assets	16.3	17.2
Computer software	15.0	15.0
Leasehold improvements	5.8	6.1
Furniture and fixtures, office equipment and other	2.5	2.5
	<u>62.8</u>	<u>63.4</u>
Less accumulated depreciation and amortization	<u>(51.8)</u>	<u>(50.3)</u>
	<u>\$ 11.0</u>	<u>\$ 13.1</u>

Note 12 — Investment in Equity Method Investee and Related Party Transactions

Oaktree Capital Management L.P. and certain affiliates, including managed investment funds and accounts (collectively Oaktree), MAV Canopy and MAV are deemed related parties to Onity. In addition to the transactions described below, Oaktree invested shares and warrants of our common stock and has two non-voting observers to our Board of Directors for as long as Oaktree owns at least 15.0% of all issued and outstanding common stock of Onity (assuming the exercise of warrants in full); also see Note 17 — Stockholders' Equity.

Investment in MAV Canopy

On December 21, 2020, Onity formed a strategic relationship with Oaktree to invest in MSR exclusively subserviced by PHH. The parties initially agreed to invest their pro rata portions of up to an aggregate of \$250.0 million in an intermediate holding company, MAV Canopy, held 15% by Onity and 85% by Oaktree. MAV Canopy's wholly owned subsidiary MAV is a licensed mortgage servicing company approved to purchase GSE MSRs. PHH and MAV entered into a number of definitive agreements which govern the terms of their business relationship, summarized below.

On November 27, 2024, Onity sold to Oaktree its 15% ownership interest in MAV Canopy, including its right to a Promote Distribution (distribution amount available after satisfaction of a specified internal rate of return on Oaktree capital contributions), for \$50.0 million total cash proceeds, resulting in the recognition of a \$13.7 million gain on sale, net of transaction costs, reported within Earnings of equity method investee in our consolidated statement of operations.

Through the date of sale of our ownership interest effective November 27, 2024, we accounted for our 15% investment in MAV Canopy under the equity method.

Subservicing Agreement with MAV

In 2021, PHH entered into a Subservicing Agreement with MAV for exclusive rights to service the mortgage loans underlying MSRs owned by MAV. Upon the sale of MAV Canopy in November 2024, PHH and MAV amended the Subservicing Agreement to provide that PHH will have the right to be the exclusive servicer for an initial term of five years through November 2029 subject to certain extensions of all MSRs that MAV currently owns, for all future MSRs that MAV acquires from PHH, and for the majority of MAV's MSR portfolio overall, as defined. In addition, the parties agreed to a six-month lockout during which MAV shall not sell or otherwise transfer any MSRs owned by MAV at the MAV Canopy sale date without the prior consent of PHH. Following this initial six-month period, the lockout restriction is subject to reduction in 25% increments through September 30, 2027. MAV may freely sell or transfer any MSRs thereafter.

As of December 31, 2024, PHH subserviced a total \$41.2 billion UPB on behalf of MAV under the Subservicing Agreement, of which \$21.5 billion of MSRs were previously sold by PHH to MAV and do not qualify for sale accounting and thus remain reported on the consolidated balance sheet of PHH, with a fair value of \$330.6 million MSR and \$322.7 million Pledged MSR liability - see Note 8 — Other Financing Liabilities, at Fair Value.

Joint Marketing Agreement and Recapture Agreement with MAV

In conjunction with the subservicing agreement, PHH and MAV entered into a joint marketing agreement and a flow MSR sale agreement (MSR recapture), whereby PHH is entitled to the exclusive right to solicit and refinance borrowers with loans underlying the MSR owned by MAV, and is obligated to transfer to MAV the MSR associated with the loans so originated. Under the agreements, the parties share the recapture benefits, whereby PHH realizes gains or losses on loans sold and MAV is delivered the recaptured MSR for no cash consideration. During 2024, 2023 and 2022, PHH transferred MSRs with a UPB of \$64.2 million, \$30.9 million and \$275.1 million, respectively, under this agreement.

MAV MSR Sale Agreements and Right of First Offer

During 2024, 2023 and 2022, pursuant to different MSR sale agreements, PHH transferred to MAV certain MSRs for an aggregate UPB of nil, \$6.8 billion and \$7.2 billion, respectively. While the MSR title has transferred to MAV, these MSR transfer transactions between PHH and MAV do not qualify for sale accounting primarily due to the termination restrictions of the subservicing agreement, and are accounted for as secured financings. See Note 8 — Other Financing Liabilities, at Fair Value.

MAV has a right of first offer (ROFO) for any GSE MSRs that PHH desires to sell that meet certain criteria, including ESS transactions. The ROFO will remain effective for an initial term of five years through November 2029 subject to certain extensions or terminations.

Administrative Services Agreement

Through the date of sale of our ownership interest in MAV Canopy effective November 27, 2024, Onity provided certain administrative services to MAV, including accounting, treasury, human resources, management information, MSR transaction support, and certain licensing, regulatory and risk management support. Onity was entitled to a fee for such services, subject to an annual cap of \$0.4 million.

Note Purchase Agreement Amendment

In February 2021, as part of our corporate debt refinancing, we issued to Oaktree in a private placement \$285.0 million of Onity Senior Secured Notes due 2027 pursuant to a Note Purchase Agreement, and shares and warrants of our common stock (see Note 17 — Stockholders' Equity).

On September 30, 2024, Onity entered into a definitive Transaction Agreement with Oaktree, MAV Canopy and MAV, that provided a framework pursuant to which the parties consummated a series of transactions described above, including the MAV Canopy sale and the amendment to the Subservicing Agreement, and the Note Purchase Agreement Amendment. Under the Note Purchase Agreement Amendment, the Onity Senior Secured Notes were amended to (i) permit a debt financing by Onity under certain conditions, (ii) waive a portion of the make-whole premium due in connection with any optional redemption of the Onity Senior Secured Notes on or prior to March 4, 2026, and (iii) require Onity to redeem the Onity Senior Secured Notes with the cash proceeds from the following transactions at reduced redemption prices.

- First, Onity was required to redeem a principal amount of Onity Senior Secured Notes equal to the cash proceeds from the MAV Canopy sale at a redemption price equal to 100% of the principal amount of Onity Senior Secured Notes so redeemed plus accrued interest.
- Second, Onity was required to redeem a principal amount of Onity Senior Secured Notes equal to (x) any remaining net proceeds from the debt financing, after repurchasing, redeeming or defeasing the PMC Notes in full, (y) the cash proceeds from the MAM Asset Acquisition and the proceeds from any debt financing secured with the assets acquired in the MAM Asset Acquisition, and (z) the net cash proceeds from the reverse mortgage asset OLIT securitization completed in September 2024 (see Note 14 — Borrowings), in each case, at a redemption price equal to 102.5% of the principal amount of Onity Senior Secured Notes so redeemed plus accrued interest.
- Finally, Onity had the option to redeem up to an additional \$50.0 million principal amount of Onity Senior Secured Notes prior to December 31, 2024 at a redemption price equal to 102.5% of the principal amount of Onity Senior Secured Notes so redeemed plus accrued interest.

On November 6, 2024, Onity issued \$500.0 million aggregate principal amount of 9.875% Senior Notes due 2029 (Senior Notes Due 2029) in a syndicated private placement. Oaktree was allocated \$50.0 million of the notes principal amount. On November 27, 2024, the net proceeds from the sale of the PHH Senior Notes, together with the net proceeds from the MAV Canopy sale and available liquidity, were used to redeem all of the outstanding PMC Senior Secured Notes due 2026 and all of the outstanding Onity Senior Secured Notes due 2027; refer to Note 14 — Borrowings.

In return for Oaktree agreeing to undertake the MAV Canopy sale, participate as an anchor investor in the debt financing, amend the Onity Senior Secured Notes agreement to permit the debt financing and amend the terms of the redemption provisions of the Oaktree Notes to waive a portion of the make-whole premium and make the other changes described above, Onity agreed to pay Oaktree a transaction fee of \$5.0 million that was dependent on the size and pricing of the financing.

Note 13 — Other Assets

	December 31,	
	2024	2023
REO (\$39.4 and \$12.5 related to VIEs)	\$ 43.9	\$ 18.3
Prepaid expenses (including prepaid lender fees)	26.1	34.3
Derivatives, at fair value	15.4	21.6
Derivative margin deposit	7.4	12.8
Prepaid representation, warranty and indemnification claims - Agency MSR sale	5.0	5.0
Intangible assets, net (net of accumulated amortization of \$13.1 million and \$10.1 million)	3.3	6.2
Deferred tax assets, net	3.2	3.1
Other	6.8	5.0
	<u>\$ 111.3</u>	<u>\$ 106.2</u>

Note 14 — Borrowings

Advance Match Funded Liabilities	Expected Repayment Date (1)	Remaining Borrowing Capacity		Outstanding Balance at December 31,	
		Uncommitted	Committed	2024	2023
Borrowing Type					
\$500 million Ocwen Master Advance Receivables Trust (OMART) - Advance Receivables Backed Notes - Series 2015- Variable Funding (VF)5 (2)	August 2025	\$ 50.0	\$ 121.3	\$ 328.7	\$ 409.8
\$200 million Ocwen GSE Advance Funding (OGAF) - Advance Receivables Backed Notes, Series 2015-VF1 (2)	August 2025	—	112.2	87.8	89.1
\$14.4 million EBO Advance facility (3)	May 2026	13.8	—	0.6	0.9
Total Advance match funded liabilities		\$ 63.8	\$ 233.5	\$ 417.1	\$ 499.7
Weighted average interest rate (4)				7.25 %	8.07 %

- (1) The Expected Repayment Date of our facilities, as defined, is the date on which the revolving period ends under each advance facility note and repayment of the outstanding balance is required if the note is not renewed or extended. In certain of our advance facilities, there are multiple notes outstanding.
- (2) The committed borrowing capacity under the OMART and OGAF facilities is available to us provided that we have sufficient eligible collateral to pledge. At December 31, 2024, none of the remaining borrowing capacity of the OMART and OGAF advance financing notes could be used based on the amount of eligible collateral.
- (3) At December 31, 2024, none of the remaining borrowing capacity of the facility could be used based on the amount of eligible collateral.
- (4) The weighted average interest rate excludes the effect of the amortization of prepaid lender fees. At December 31, 2024 and 2023, the balance of unamortized prepaid lender fees was \$2.1 million and \$5.5 million, respectively, and are included in Other assets in our consolidated balance sheets. At December 31, 2024 and 2023, 1-Month (1M) Term Secured Overnight Financing Rate (SOFR) was 4.33% and 5.35%, respectively.

Mortgage Loan Financing Facilities			Remaining Borrowing Capacity		Outstanding Balance at December 31,

Total Mortgage loan financing facilities, net					\$ 1,528.2	\$ 710.6
Weighted average interest rate (18)					5.46%	6.15%

- (1) Of the borrowing capacity on mortgage loan financing facilities extended on a committed basis, none of the remaining borrowing capacity could be used at December 31, 2024 based on the amount of eligible collateral that could be pledged on a committed basis.
- (2) In December 2024, the maturity date was extended to February 28, 2025. We expect to extend the facility on or before maturity.
- (3) In January 2025, the maturity date was extended to March 4, 2025.
- (4) In February 2025, the maturity date was extended to March 31, 2025.
- (5) In May 2024, the maturity date was extended to May 31, 2025 and the total maximum borrowing was increased to \$205.0 million.
- (6) In September 2024, the maturity date was extended to September 20, 2025.
- (7) In September 2024, the maturity date was extended to September 20, 2025 and the total maximum borrowing under this agreement was temporarily increased to \$500.0 million through December 31, 2024. In December 2024, the total maximum borrowing under this agreement was temporarily increased to \$500.0 million through March 31, 2025.
- (8) In September 2024, the maturity date was extended to September 20, 2025 and the total maximum borrowing under this agreement was increased to \$250.0 million.
- (9) In September 2024, the maturity date was extended to September 20, 2025 and the total maximum borrowing under this agreement was increased to \$40.0 million.
- (10) In October 2024, we entered into a Loan and Security Agreement with an entity managed by Waterfall pursuant to which PHH may borrow against certain eligible reverse mortgage assets, as defined, on a revolving basis for two years up to a maximum committed amount ("WAM Financing Agreement"). The maximum committed amount decreases from an initial \$45.0 million to \$15.0 million after the first securitization of HECM tails. The obligations of PHH under the Loan and Security Agreement are guaranteed by Onity. The maturity date of the facility is October 30, 2026.
- (11) In June 2024, we entered into a repurchase agreement which provides borrowing at our discretion up to a certain maximum amount of capacity on a rolling 90-day uncommitted basis. This facility is structured as a repurchase facility whereby the retained notes of the OLIT 2023 and OLIT 2024 HB2 transactions are pledged as collateral for the borrowings and this agreement has no stated maturity date. Also see (17) below and Note 2 — Securitizations and Variable Interest Entities.
- (12) This agreement has no stated maturity date.
- (13) The agreement has no stated maturity date, however each transaction has a maximum duration of four years.
- (14) This repurchase agreement provides borrowing at our discretion up to a certain maximum amount of capacity on a rolling 90-day committed basis. This facility is structured as a gestation repurchase facility whereby dry Agency mortgage loans are transferred to a trust which issues a trust certificate that is pledged as the collateral for the borrowings. Each certificate is renewed monthly. In April 2024, we increased the trust certificates by \$50.0 million to \$200.0 million. See Note 2 — Securitizations and Variable Interest Entities for additional information.
- (15) In April 2024, we voluntarily allowed the facility to mature.
- (16) In June 2024, we voluntarily allowed the facility to mature.
- (17) In June 2023, February 2024 and September 2024, OLIT issued different classes of Asset-Backed Notes with an initial principal amount of \$264.9 million, \$268.6 million and \$330.6 million at a discount and a mandatory call date of June 2026, February 2027 and August 2027, respectively. The notes have a stated interest rate of 3.0%, 3.0%, and 5.0%, respectively. Payments of interest and principal are made from available funds from a pool of reverse mortgage buyout loans and REOs in accordance with the indenture priority of payments. Also see Note 2 — Securitizations and Variable Interest Entities.
- (18) The weighted average interest rate excludes the effect of the amortization of discount, debt issuance costs and prepaid lender fees. At December 31, 2024 and 2023, unamortized prepaid lender fees were \$1.0 million and \$1.0 million, respectively, and are included in Other assets in our consolidated balance sheets.

Unamortized debt issuance costs (8) - PLS facilities					(0.1)	(0.4)
Total MSR financing facilities, net					<u>\$ 957.9</u>	<u>\$ 916.2</u>
Weighted average interest rate (8)					7.18%	8.18%

- (1) Of the borrowing capacity on MSR financing facilities extended on a committed basis, \$57.1 million of the remaining borrowing capacity could be used at December 31, 2024 based on the amount of eligible collateral that could be pledged on a committed basis.
- (2) PHH's obligations under this facility are secured by a lien on certain related MSRs. Onity guarantees the obligations of PHH under this facility. See Note 2 — Securitizations and Variable Interest Entities for additional information. We are subject to daily margining requirements under the terms of the facility. In September 2024, the maturity date was extended to September 11, 2025 and the borrowing capacity was increased to \$500.0 million. In January 2025, the borrowing capacity was increased to \$650.0 million.
- (3) PHH's obligations under this facility are secured by a lien on the related Ginnie Mae MSRs and servicing advances. Onity guarantees the obligations of PHH under the facility. We are subject to daily margining requirements under the terms of the facility. In March 2024, the maturity date was extended to February 25, 2025 and the uncommitted borrowing capacity was increased to \$300.0 million. We expect to refinance and extend the facility on or before maturity.
- (4) The single class PLS Notes are an amortizing debt instrument with an original principal amount of \$75.0 million and a fixed interest rate of 5.114%. The PLS Notes are issued by a trust (PLS Issuer) that is included in our consolidated financial statements, and PLS Issuer's obligations under the facility are secured by a lien on the related PLS MSRs. Onity guarantees the obligations of PLS Issuer under the facility. The principal balance amortizes in accordance with a predetermined schedule subject to modification under certain events, with a final payment due in February 2025. See Note 2 — Securitizations and Variable Interest Entities for additional information. We expect to refinance the facility into a repurchase agreement facility on or before maturity.
- (5) On March 4, 2024, PHH entered into a \$34.0 million repurchase agreement pursuant to which PHH sold the membership interest certificate representing 100% of the limited liability company interests in PLS Issuer and has agreed to repurchase such membership interest certificate at a specified future date at the price set forth in the repurchase agreement. Onity guarantees the obligations of PHH under the facility subject to the terms and conditions set forth in the guaranty. We are subject to daily margining requirements under the terms of the facility. In November 2024, the facility was repaid and voluntarily terminated prior to the contractual termination date of the facility of February 25, 2025. Refer to Note 2 — Securitizations and Variable Interest Entities for additional information regarding PLS Issuer and the PLS Notes.
- (6) OASIS noteholders are entitled to receive a monthly payment equal to the sum of: (a) 21 basis points of the UPB of the reference pool of Freddie Mac mortgages; (b) any termination payment amounts; (c) any excess refinance amounts; and (d) the note redemption amounts, each as defined in the indenture supplement for the notes. Monthly amortization of the liability is estimated using the proportion of monthly projected service fees on the underlying MSRs as a percentage of lifetime projected fees, adjusted for the term of the notes.
- (7) This facility is secured by a lien on certain of PHH's Agency MSRs and is subject to daily margining requirements. Any outstanding borrowings on the revolving loan will convert into a term loan on February 27, 2025. With the redemption of the 7.875% PMC Senior Secured Notes in November 2024 (prior to the maturity date of March 15, 2026), the maturity date of this facility was automatically extended to December 28, 2026.
- (8) Weighted average interest rate excludes the effect of the amortization of debt issuance costs and prepaid lender fees. At December 31, 2024 and 2023, unamortized prepaid lender fees related to revolving-type MSR financing facilities were \$2.1 million and \$3.6 million, respectively, and are included in Other assets in our consolidated balance sheets.

Senior Notes

	Interest Rate (1)	Maturity	Outstanding Balance at December 31,	
			2024	2023

(1) Excludes the effect of the amortization of debt issuance costs and discount.

(2) The discount and debt issuance costs are amortized to interest expense through the maturity of the respective notes.

(3) Includes original issue discount (OID) and additional discount related to the concurrent issuance of warrants and common stock. See below for additional information.

Issuance of 9.875% Senior Notes due 2029

On November 6, 2024, PHH Corporation issued \$500.0 million aggregate principal amount of 9.875% Senior Notes due November 1, 2029 (Senior Notes Due 2029) at a price of 99.556% of the principal amount in a syndicated private placement. Interest on the Senior Notes is payable semi-annually in arrears on May 1 and November 1 of each year, beginning on May 1, 2025, and principal is due at maturity. The Senior Notes are guaranteed by Onity and certain wholly-owned subsidiaries including PMC (collectively “restricted subsidiaries”). The Senior Notes are secured by the equity interests of the restricted subsidiaries and any Available Cash in excess of Agency Requirements, as defined.

On or after November 1, 2026, PHH Corporation may redeem some or all of the Senior Notes at its option at the following redemption prices, plus accrued and unpaid interest:

Redemption Year (12-month period beginning on November 1st of the years indicated below)	Redemption Price
2026	104.938 %
2027	102.469
2028 and thereafter	100.000

Prior to November 1, 2026, PHH Corporation may redeem some or all of the Senior Notes at its option at a redemption price equal to 100% of the principal amount of the Notes being redeemed with a “make-whole” premium, as defined, plus accrued and unpaid interest. In addition, prior to November 1, 2026, PHH Corporation may redeem up to 40% of the aggregate principal amount of the Notes with the net cash proceeds from certain equity offerings by Onity at the redemption price equal to 109.875% of the principal amount plus accrued and unpaid interest.

The Indenture contains customary covenants for debt securities of this type that limit the ability of PHH Corporation, Onity and its restricted subsidiaries to, among other things, (i) incur or guarantee additional Indebtedness, as defined, (ii) incur liens, (iii) pay dividends on or make distributions or make other restricted payments, (iv) make investments, (v) consolidate, merge, sell or otherwise dispose of certain assets, and (vi) enter into transactions with certain affiliates.

Redemption of PMC 7.875% Senior Notes due 2026 and Onity 12% Senior Notes due 2027

The proceeds from the issuance of the Senior Notes Due 2029 described above, together with proceeds from the sale of MAV Canopy and available cash, were used to redeem in November 2024 all of the outstanding \$289.1 million 7.875% PMC Senior Secured Notes due 2026 at a redemption price of 101.969% and the \$285.0 million 12% Onity Senior Secured Notes due 2027 at a redemption price equal to 102.5% (with the exception of notes redeemed equal to the cash proceeds from the MAV Canopy sale which were redeemed at par). The redemption of all of the outstanding notes resulted in the recognition of a \$53.4 million loss on debt extinguishment due to the accelerated write-off of \$36.8 million unamortized discount and debt issuance costs, the payment of an \$11.6 million make-whole redemption premium and a \$5.0 million transaction fee to Oaktree. Also refer to Note 12 — Investment in Equity Method Investee and Related Party Transactions.

In addition, during 2024 (prior to their redemption), 2023 and 2022, we repurchased and extinguished a total principal amount of \$70.9 million, \$15.0 million and \$25.0 million, respectively, of the PMC Senior Secured Notes, and recognized a gain of \$4.1 million, \$1.3 million and \$0.9 million on debt extinguishment, net of the associated write-off of unamortized discount and debt issuance costs.

Credit Ratings

Credit ratings are intended to be an indicator of the creditworthiness of a company's debt obligations. On October 21, 2024, Moody's assigned a Caa1 rating to the new \$500 million Senior Notes Due 2029. Moody's also assigned a B3 corporate family rating to Onity and withdrew the B3 corporate family rating of PHH Mortgage Corporation. The entities' outlooks are stable. On October 21, 2024, S&P assigned a B- rating to the new \$500 million Senior Notes Due 2029. S&P also affirmed the B- rating of Onity with a Stable Outlook. It is possible that additional actions by credit rating agencies could have a material adverse impact on our liquidity and funding position, including materially changing the terms on which we may be able to borrow money.

Covenants

Under the terms of our debt agreements in effect as of December 31, 2024, we are subject to various affirmative and negative covenants. Collectively, these covenants include:

- Financial covenants, including, but not limited to, specified levels of net worth, liquidity and leverage;
- Covenants to operate in material compliance with applicable laws;
- Restrictions on our ability to engage in various activities, including but not limited to incurring or guarantying additional forms of debt, paying dividends or making distributions on or purchasing equity interests of Onity and its subsidiaries, repurchasing or redeeming capital stock or junior capital, repurchasing or redeeming subordinated debt prior to maturity, issuing preferred stock, selling or transferring assets or making loans or investments or other restricted payments, entering into mergers or consolidations or sales of all or substantially all of the assets of Onity and its subsidiaries or of PHH Corporation or PHH and their respective subsidiaries, creating liens on assets to secure debt, and entering into transactions with affiliates;
- Monitoring and reporting of various specified transactions or events, including specific reporting on defined events affecting collateral underlying certain debt agreements; and
- Requirements to provide audited financial statements within specified timeframes, including requirements that Onity's financial statements and the related audit report be unqualified as to going concern.

The most restrictive consolidated net worth requirement contained in our debt agreements with borrowings outstanding at December 31, 2024, excluding additional Agency minimum requirements, is a minimum of \$275.0 million and \$300.0 million tangible net worth for Onity and PHH, respectively. The most restrictive liquidity requirement under our debt agreements with borrowings outstanding at December 31, 2024, excluding additional Agency minimum requirements, is for a minimum of \$75.0 million for both Onity and PHH consolidated liquidity. The minimum tangible net worth and liquidity requirements at PHH contained in some debt agreements are also subject to the minimum requirements set forth by the Agencies. See Note 25 — Regulatory Requirements.

As a result of the covenants to which we are subject, we may be limited in the manner in which we conduct our business and may be limited in our ability to engage in favorable business and investment activities or raise certain types of capital to finance future operations or satisfy future liquidity needs. In addition, breaches or events that may result in a default under our debt agreements include, among other things, nonpayment of principal or interest, noncompliance with our covenants, breach of representations, the occurrence of a material adverse change, insolvency, bankruptcy, certain material judgments and changes of control.

Covenants and default provisions of this type are commonly found in debt agreements such as ours. Certain of these covenants and default provisions are open to subjective interpretation and, if our interpretation was contested by a lender, a court may ultimately be required to determine compliance or lack thereof. In addition, our debt agreements generally include cross default provisions such that a default under one agreement could trigger defaults under other agreements. If we fail to

comply with our debt agreements and are unable to avoid, remedy or secure a waiver of any resulting default, we may be subject to adverse action by our lenders, including termination of further funding, acceleration of outstanding obligations, enforcement of liens against the assets securing or otherwise supporting our obligations and other legal remedies. Our lenders can waive their contractual rights in the event of a default.

We believe we were in compliance with all of the covenants in our debt agreements as of the date of these consolidated financial statements.

Collateral

Our assets pledged as collateral for secured borrowings are as follows at December 31, 2024. Assets may also be subject to other liens or restrictions under various agreements.

Asset Categories	Assets	Pledged Assets	Collateralized Financings (8)	Liability Categories
Cash (1)	\$ 184.8	\$ —	\$ —	n/a (1)
Restricted cash (2)	80.8	40.4	—	Multiple
Owned MSRs, excluding ESS (3)(5)	1,530.8	1,537.4	911.7	MSR financing facilities
Transferred MSRs, including ESS (4)	935.4	935.4	846.9	Other financing liabilities
Advances, net (5)	577.2	556.1	463.4	Advance match funded liabilities and MSR financing facilities
Loans held for sale	1,290.2	1,282.5	1,328.5	Mortgage loan financing facilities
Loans held for investment - securitized (6)	10,950.8	10,950.8	10,872.1	HMBS related borrowings
Loans held for investment - unsecuritized	174.5	98.5	89.2	Mortgage loan financing facilities
Receivables, net	176.4	106.9	98.9	Mortgage loan financing facilities
REO (Other assets)	43.9	40.0	47.0	Mortgage loan financing facilities
Total (7)	<u>\$ 15,944.8</u>	<u>\$ 15,548.0</u>	<u>\$ 14,657.7</u>	

- (1) Includes \$158.4 million Available Cash held by Regulated Subsidiary Guarantors, as defined, pursuant to the Senior Notes Due 2029.
- (2) Pledged assets primarily include amounts specifically designated to repay debt and to provide over-collateralization for MSR financing facilities, mortgage loan financing facilities and match funded debt facilities (debt service accounts).
- (3) Pledged assets exceed the MSR asset balance primarily due to the netting of certain PLS MSR portfolios with negative and positive fair values as eligible collateral.
- (4) Includes MSRs transferred to MAV, Rithm and others, and ESS pledged MSRs that are accounted for as secured financings.
- (5) \$46.3 million drawn under the \$300 million Ginnie Mae MSR financing facility is used to finance Ginnie Mae related advances.
- (6) Reverse mortgage loans and real estate owned are pledged as collateral to the HMBS beneficial interest holders, and are not available to satisfy the claims of our creditors. Ginnie Mae, as guarantor of the HMBS, is obligated to the holders of the HMBS in an instance of PHH's default on its servicing obligations, or if the proceeds realized on HECMs are insufficient to repay all outstanding HMBS related obligations. Ginnie Mae has recourse to PHH in connection with certain claims relating to the performance and obligations of PHH as both issuer of HMBS and servicer of HECMs underlying HMBS.
- (7) The total of selected assets disclosed in the above table does not represent the total consolidated assets of Onity. For example, the total excludes premises and equipment and certain other assets.
- (8) Amounts represent UPB and fair value for borrowings accounted for at amortized cost and fair value, respectively.

Maturities of Borrowings

Certain of our borrowings mature within one year of the date of issuance of these financial statements. Based on management's evaluation, we expect to renew, replace or extend all such borrowings to the extent necessary to finance our business on or prior to their respective maturities consistent with our historical experience.

	Expected Maturity/Repayment Date (1)						Total Balance	Fair Value
	2025	2026	2027	2028	2029	Thereafter		
Advance match funded liabilities	\$ 416.5	\$ 0.6	\$ —	\$ —	\$ —	\$ —	\$ 417.1	\$ 417.1
Mortgage loan financing facilities	1,010.1	143.5	410.0	—	—	—	1,563.6	1,535.3
MSR financing facilities	685.4	249.5	—	23.1	—	—	958.0	947.6
Senior notes	—	—	—	—	500.0	—	500.0	495.0
	<u>\$ 2,111.9</u>	<u>\$ 393.7</u>	<u>\$ 410.0</u>	<u>\$ 23.1</u>	<u>\$ 500.0</u>	<u>\$ —</u>	<u>\$ 3,438.7</u>	<u>\$ 3,395.0</u>

(1) Amounts are exclusive of any related discount, unamortized debt issuance costs or fair value adjustment.

Our MSR financing facilities provide funding based on an advance rate of MSR value that is subject to periodic mark-to-market valuation adjustments. In the normal course, MSR value is expected to decline over time due to runoff of the loan balances in our servicing portfolio. As a result, we anticipate having to repay a portion of our MSR debt over a given time period. The requirements to repay MSR debt including those due to unfavorable fair value adjustment, for example due to a decline in market interest rates, may require us to allocate a substantial amount of our available liquidity or future cash flows to meet these requirements.

Note 15 — Other Liabilities

	December 31,	
	2024	2023
Other accrued expenses	\$ 79.6	\$ 67.5
Servicing-related obligations	65.1	48.4
Due to Rithm - Advance collections and servicing fees	63.4	50.3
Checks held for escheat	54.1	52.0
Liability for indemnification obligations	30.5	35.5
Derivatives, at fair value	27.6	7.0
Accrued legal fees and settlements	16.0	8.3
Derivative related payables	15.2	10.7
Accrued interest payable	13.4	14.3
Liability for uncertain tax positions	13.3	12.2
MSR purchase price holdback	11.0	3.8
Lease liability	9.0	10.2
Mortgage insurance premium payable	7.5	5.0
Liability for unfunded pension obligation and India gratuity plan	6.7	9.2
Excess servicing fee spread payable	2.2	3.6
Income taxes payable	1.0	8.2
Other	4.8	3.2
	<u>\$ 420.6</u>	<u>\$ 349.3</u>

The following table presents the activity related to the Accrued legal fees and settlements:

Accrued Legal Fees and Settlements	Years Ended December 31,		
	2024	2023	2022
Beginning balance	\$ 8.3	\$ 42.2	\$ 44.0
Accrual for (reversal of) probable losses (1)	8.4	(30.0)	6.6
Payments (2)	(1.3)	(3.8)	(6.9)
Net increase (decrease) in accrued legal fees	0.6	(0.1)	(1.5)
Ending balance	<u>\$ 16.0</u>	<u>\$ 8.3</u>	<u>\$ 42.2</u>

- (1) Consists of amounts accrued for probable losses or reversed in connection with legal and regulatory settlements and judgments. Such amounts are reported in Professional services expense in the consolidated statements of operations.
- (2) Includes cash payments made in connection with resolved legal and regulatory matters.

Note 16 — Mezzanine Equity

On November 1, 2024, Onity issued 2,111,787 shares of a new series of non-convertible, preferred stock (Series B Preferred Stock) with an aggregate liquidation preference amount of \$52.8 million (\$25.00 per share). The Series B Preferred Stock ranks senior to all classes of common stock of Onity and have no voting rights except under limited circumstances. The Series B Preferred Stock will accrue cumulative dividends at a rate of 7.875% per year of the preference liquidation value for the first five years, increasing 2.5% each year thereafter up to a maximum rate of 15% per year, which dividends will be payable in cash and in arrears on a quarterly basis when, as and if declared by the Board of Directors of Onity.

On and after September 15, 2028, Onity will have the right to redeem the Series B Preferred Stock, in whole or in part, for cash at a redemption price equal to the liquidation preference plus an amount equal to any accumulated and unpaid dividends thereon. If Onity experiences a change of control, as defined, it would be required to offer to repurchase all of the shares of Series B Preferred Stock at a purchase price equal to 100% of the liquidation preference plus any accumulated and unpaid dividends thereon.

The shares of Series B Preferred Stock issued to Waterfall in consideration of an asset acquisition (see Note 5 – Reverse Mortgages) are subject to a Registration Rights Agreement pursuant to which Onity agreed to file a resale registration statement with the Securities and Exchange Commission within 180 days.

The Series B Preferred Stock is classified as mezzanine equity on our consolidated balance sheet as it is contingently redeemable in the event of a change of control that is not solely within Onity's control. The Series B Preferred Stock is reported at its initial fair value less issuance costs.

A \$0.5 million dividend, or \$0.24 per share, was declared and distributed in December 2024.

Note 17 — Stockholders' Equity

Common Stock

In 2021, in connection with the launch of MAV, a joint-venture vehicle to invest in MSRs exclusively subserviced by PHH (see Note 12 — Investment in Equity Method Investee and Related Party Transactions), and concurrent with the issuance of senior notes to Oaktree (see Note 14 — Borrowings), we issued to Oaktree 426,705 shares of our common stock, representing 4.9% of our then outstanding common stock, at a price per share of \$23.15 for an aggregate purchase price of \$9.9 million. In addition, we issued to Oaktree warrants to purchase 1,184,768 and 261,248 shares of our common stock at a price per share of \$26.82 and \$24.31, that may be exercised at any time through March 4, 2027 and May 3, 2025, respectively, in cash or pursuant to a cashless exercise, as defined. Refer to Note 28 — Subsequent Events. In 2021, the \$12.6 million allocated fair value of the common stock and \$20.8 million allocated fair value of the warrants was reported as Common stock, at par value of the shares issued, and Additional Paid-in Capital in our consolidated balance sheet. In aggregate, we issued to Oaktree warrants to purchase an additional 1,446,016 shares or 18.4% of our common stock issued and outstanding at December 31, 2024.

On October 23, 2024, the warrants were amended to provide that upon their exercise Oaktree can elect the cash exercise option only with the consent of Onity and, without the consent of Onity, the exercise price can only be paid via the net share settlement option (cashless exercise). The amendment did not result in any change in the accounting or equity presentation of the warrants.

Pursuant to a registration rights agreement with Oaktree, we registered with the SEC for resale the issued shares of common stock and the shares of common stock issuable upon exercise of the warrants described above.

On May 20, 2022, Onity's Board of Directors authorized a share repurchase program for an aggregate amount of up to \$50.0 million of Onity's issued and outstanding shares of common stock. The repurchase program is intended to qualify for the affirmative defense provided by Rule 10b5-1 under the Securities Exchange Act of 1934, as amended. Prior to the expiration of the program on November 20, 2022, we completed the repurchase of 1,750,557 shares of our common stock in the open market under this program at prevailing market prices for a total purchase price of \$50.0 million (including commissions) at an average price per share of \$28.53. The repurchased shares were retired in tranches throughout the term of the program.

Preferred Stock

Onity's Amended and Restated Articles of Incorporation authorize the issuance of up to 20,000,000 preferred shares. No such shares have been issued as of and for the three years ended December 31, 2024, with the exception of 2,111,787 Series B Preferred Shares issued in November 2024. See Note 16 — Mezzanine Equity for additional details.

Accumulated Other Comprehensive Income (Loss)

The components of accumulated other comprehensive income (loss), net of income taxes, were as follows:

	December 31,	
	2024	2023
Unfunded pension plan obligation, net	\$ 1.4	\$ (0.9)
Unrealized losses on cash flow hedges, net	(0.4)	(0.4)
Other	0.2	0.2
	<u>\$ 1.2</u>	<u>\$ (1.2)</u>

Note 18 — Derivative Financial Instruments and Hedging Activities

The table below summarizes the fair value, notional and maturity of our derivative instruments. The notional amount of our contracts does not represent our exposure to credit loss. None of the derivatives were designated as a hedge for accounting purposes as of or during the years ended December 31, 2024 and 2023:

	December 31, 2024			December 31, 2023		
	Maturities	Notional	Fair Value	Maturities	Notional	Fair Value

Interest Rate Risk

MSR Hedging

MSRs are carried at fair value with changes in fair value being recorded in earnings in the period in which the changes occur. The fair value of MSRs is subject to changes in market interest rates among other inputs and assumptions.

The objective of our MSR interest rate risk management and hedging policy is to protect shareholders' equity and earnings against the fair value volatility of interest-rate sensitive MSR portfolio exposure, considering market, liquidity, cost and other conditions. The interest-rate sensitive MSR portfolio exposure is defined as follows:

- Agency MSR portfolio,
- expected Agency MSR bulk transactions subject to letters of intent (LOI),
- less the Agency MSRs subject to our sale agreements with MAV, Rithm and others, also referred to as Pledged MSR liabilities (See Note 8 — Other Financing Liabilities, at Fair Value),
- less the asset value for securitized HECM loans, net of the corresponding HMBS-related borrowings,
- other interest-rate sensitive exposures, including our ESS financing liabilities and reverse mortgage buyouts, as deemed appropriate by the Market Risk Committee.

The hedge coverage ratio, defined as the ratio of hedge and asset rate sensitivity (referred to as DV01) is subject to lower and upper target thresholds under our policy. We regularly evaluate the hedge coverage ratio at the intended shock interval to determine if it is relevant or warrants adjustment based on market conditions, symmetry of interest rate risk exposure, liquidity impacts under shock scenarios and other factors. As the market dictates, management may choose to maintain the hedge coverage ratio at different thresholds, with approval of the Market Risk Committee, in order to preserve liquidity and/or optimize asset returns.

Prior to September 2022, the hedge coverage ratio was required to remain within a minimum of 40% and maximum of 60%. Effective September 2022, a minimum 25% and 30% hedge coverage ratios were required for interest rate declines less than, and more than 50 basis points, respectively. During the second quarter of 2023, management raised its minimum hedge coverage ratio to 60%. Effective December 2023, we established a targeted hedge coverage ratio range between 95% and 105%. In April 2024, we changed the risk measure to a dollar DV01 that resulted in an equivalent range of approximately 90% to 110%.

With a partial hedge coverage ratio, the changes in fair value of our hedging instruments may not fully offset the changes in fair value of our net MSR portfolio exposure attributable to interest rate changes. In addition, while DV01 measures may remain within the range of our hedging strategy's objective, actual changes in fair value of the derivatives and MSR portfolio may not offset to the same extent, due to many factors. These factors include non-parallel changes in the interest rate curve, the

convexity of the MSR, the basis risk inherent in the MSR profile and hedging instruments, model risk observed between actual vs. expected fair value changes, and hedge costs. We continuously evaluate the use of hedging instruments with the objective of enhancing the effectiveness of our interest rate hedging strategy.

Our derivative instruments include forward trades of MBS or Agency TBAs with different banking counterparties, exchange-traded interest rate swap futures and interest rate options. These derivative instruments are not designated as accounting hedges. TBAs, or To-Be-Announced securities, are actively traded, forward contracts to purchase or sell Agency MBS on a specific future date. From time to time, we enter into exchange-traded options contracts with purchased put options financed by written call options. We report changes in fair value of these derivative instruments in MSR valuation adjustments, net in our consolidated statements of operations, within the Servicing segment. We may, from time to time, establish inter-segment derivative instruments between the MSR and pipeline hedging strategies to minimize the use of third-party derivatives. The fair value gains and losses of such inter-segment derivatives effectively reclassify certain derivative gains and losses between MSR valuation adjustments, net within the Servicing segment and Gain on loans held for sale, net within the Originations segment to reflect the performance of these economic hedging strategies in the appropriate segments (see Note 24 — Business Segment Reporting for the amount of such reclassification). Such inter-segment derivatives are eliminated in our consolidated financial statements.

The derivative instruments are subject to margin requirements, posted as either initial or variation margin. Onity may be required to post or may be entitled to receive cash collateral with its counterparties through margin calls, based on daily value changes of the instruments. Changes in market factors, including interest rates, and our credit rating may require us to post additional cash collateral and could have a material adverse impact on our financial condition and liquidity.

Pipeline Hedging - Interest Rate Lock Commitments and Loans Held for Sale, at Fair Value

In our Originations business, we are exposed to interest rate risk and related price risk during the period from the date of the interest rate lock commitment through (i) the lock commitment cancellation or expiration date or (ii) through the date of sale or securitization of the resulting loan into the secondary mortgage market. Loan commitments for forward loans generally range from 5 to 75 days, with the majority of our commitments to borrowers for 40 to 60 days and our commitments to correspondent sellers for 5 to 30 days. Loans held for sale are generally funded and sold within 5 to 30 days. This interest rate exposure of loans and IRLCs is economically hedged with derivative instruments, including forward sales of Agency TBAs. The objective of our pipeline hedging strategy is to reduce the volatility of the fair value of IRLCs and loans due to market interest rates, thus to preserve the initial gain on sale margin at lock date. We report changes in fair value of these derivative instruments as gain or loss on economic hedge instruments within either Gain on loans held for sale, net or Gain on reverse loans held for investment and HMBS-related borrowings, net in our consolidated statements of operations.

Note 19 — Interest Income

	Years Ended December 31,		
	2024	2023	2022

U.S. Tax Reform - Global Intangible Low-Taxed Income (GILTI) inclusion	—	—	—	—	0.1	—
Other	0.1	—	0.3	—	(0.1)	—
Actual income tax expense (benefit)	<u>\$ 5.3</u>	<u>14 %</u>	<u>\$ 5.6</u>	<u>(10)%</u>	<u>\$ (0.8)</u>	<u>(3)%</u>

- (1) Onity is a global company with operations in the U.S., USVI, India and the Philippines, among other jurisdictions. In the effective tax rate reconciliation above, we first calculate income tax expense attributable to worldwide continuing operations at the U.S. statutory tax rate. The foreign tax rate differential therefore represents the difference in tax expense between jurisdictional income taxed at the U.S. statutory rate and each respective jurisdictional statutory rate.

Net deferred tax assets were comprised of the following:

	December 31,	
	2024	2023
Deferred tax assets		
NOL carryforwards - federal and foreign	\$ 55.3	\$ 106.8
NOL carryforwards and credits - state and local	75.5	82.0
Interest expense disallowance	170.2	123.0
Reserve for servicing exposure	6.0	5.8
Accrued legal settlements	3.5	4.8
Stock-based compensation expense	11.3	11.4
Accrued incentive compensation	6.9	4.5
Accrued other liabilities	4.4	4.4
Lease liabilities	0.4	0.9
Intangible asset amortization	7.2	7.2
Foreign deferred assets	3.7	3.4
Tax residuals and deferred income on tax residuals	0.2	1.4
Bad debt and allowance for loan losses	10.4	11.0
Other	1.6	1.7
	<u>356.6</u>	<u>368.3</u>
Deferred tax liabilities		
MSR amortization	170.9	175.0
Partnership losses	—	3.9
Other	1.5	1.2
	<u>172.4</u>	<u>180.1</u>
Net deferred tax assets (liabilities) before valuation allowance	184.2	188.2
Valuation allowance	(181.0)	(185.1)
Deferred tax assets, net	<u>\$ 3.2</u>	<u>\$ 3.1</u>

As of December 31, 2024, we had a deferred tax asset, net of deferred tax liability, of \$184.2 million including \$179.8 million in the U.S.

Valuation Allowances

We conduct periodic evaluations of positive and negative evidence to determine whether it is more likely than not that the deferred tax asset can be realized in future periods. In these evaluations, we gave more significant weight to objective evidence, such as our actual financial condition and historical results of operations, as compared to subjective evidence, such as projections of future taxable income or losses. We recognize that cumulative losses in recent years is an objective form of negative evidence in assessing the need for a valuation allowance and that such negative evidence is difficult to overcome. Other factors considered in these evaluations are estimates of future taxable income, future reversals of temporary differences, taxable income in prior carryback years, tax character and the impact of tax planning strategies that may be implemented, if warranted.

As a result of these evaluations, we recorded a full valuation allowance of \$179.8 million and \$183.9 million on our U.S. net deferred tax assets at December 31, 2024 and 2023, respectively. These U.S. jurisdictional deferred tax assets are not considered to be more likely than not realizable based on all available positive and negative evidence. We intend to continue maintaining a full valuation allowance on our net deferred tax assets in the U.S. until there is sufficient evidence to support the reversal of all or some portion of these allowances.

Net Operating Loss Carryforwards

At December 31, 2024, we had U.S. federal NOL carryforwards of \$259.2 million, and state NOL and tax credit carryforwards valued at \$75.5 million.

These U.S. federal and state NOL carryforwards will expire beginning 2025 through 2044 with U.S. federal NOLs generated after 2017 never expiring. We believe that it is more likely than not that the benefit from certain U.S. federal and state NOL carryforwards will not be realized. In recognition of this risk, we have provided a total valuation allowance of \$54.4

million and \$75.5 million on the deferred tax assets relating to the U.S. federal and state NOL carryforwards, respectively. If our assumptions change and we determine we will be able to realize these NOLs, the tax benefits relating to any reversal of the valuation allowance on deferred tax assets as of December 31, 2024 will be accounted for as a reduction of income tax expense. Additionally, \$334.5 million of USVI NOLs have been carried back to offset prior period tax due in the USVI and we recognized the tax-effect of this attribute as a \$12.9 million income taxes receivable, of which we received \$7.1 million in 2023 from the USVI. We also have disallowed interest carryforwards under Section 163(j) of \$675.5 million at December 31, 2024, against which a valuation allowance has been recorded.

Change of Control: Annual Limitations on Utilization of Tax Attributes

NOL carryforwards may be subject to annual limitations under Internal Revenue Code Section 382 (Section 382) (or comparable provisions of foreign or state law) in the event that certain changes in ownership were to occur. We periodically evaluate our NOL carryforwards and whether certain changes in ownership have occurred that would limit our ability to utilize a portion of our NOL and tax credit carryforwards. If it is determined that an ownership change(s) has occurred, there may be annual limitations on the use of these NOL and tax credit carryforwards under Section 382 (or comparable provisions of foreign or state law).

Onity and PHH Corporation have both experienced historical ownership changes that have caused the use of certain tax attributes to be limited and have resulted in the write-off of certain of these attributes based on our inability to use them in the carryforward periods defined under the tax laws. Onity continues to monitor the ownership in its stock to evaluate whether any additional ownership changes have occurred that would further limit its ability to utilize certain tax attributes. As such, our analysis regarding the amount of tax attributes that may be available to offset taxable income in the future without restrictions imposed by Section 382 may continue to evolve.

Uncertain Tax Positions

Our major jurisdiction tax years that remain subject to examination are our U.S. federal tax return for the years ended December 31, 2018 through the present, our USVI corporate tax return for the years ended December 31, 2021 through the present, and our India corporate tax returns for the years ended March 31, 2012 through the present. During 2021, we concluded our audit in the USVI jurisdiction for tax years 2013 - 2016 related to the carryback of losses generated in 2015 and 2016 to tax years 2013 and 2014, respectively, without any adjustment, and in December 2022, we executed a closing agreement with the BIR that calls for payment of the income tax refunds, plus accrued interest, over a two-year period ending December 31, 2024. However, the BIR has failed to remit refunds in accordance with the agreement and we have filed a lawsuit against the USVI for the unpaid portion of the refunds due. See Note 10 — Receivables for additional information.

The following table presents the activity related to unrecognized tax benefits for uncertain tax positions (excluding accrued interest and penalties):

	Years Ended December 31,		
	2024	2023	2022
Beginning balance	\$ 8.7	\$ 8.7	\$ 11.5
Additions for tax positions of current year	—	—	—
Reductions for settlements	—	—	(2.1)
Lapses in statute of limitations	—	—	(0.7)
Ending balance (1)	<u>\$ 8.7</u>	<u>\$ 8.7</u>	<u>\$ 8.7</u>

(1) Included in the Liability for uncertain tax positions in Other liabilities.

We recognized total interest and penalties of \$1.2 million, \$1.2 million and \$(1.0) million as income tax expense or (benefit) in 2024, 2023 and 2022, respectively. At December 31, 2024 and 2023, accruals for interest and penalties were \$4.6 million and \$3.4 million, respectively, and are included in the Liability for uncertain tax positions in Other liabilities. As of December 31, 2024 and 2023, we had unrecognized tax benefits for uncertain tax positions, excluding accrued interest and penalties, of \$8.7 million and \$8.7 million, respectively, all of which if recognized would affect the effective tax rate.

It is reasonably possible that there could be a change in the amount of our unrecognized tax benefits within the next 12 months due to activities of the Internal Revenue Service or other taxing authorities, including proposed assessments of additional tax, possible settlement of audit issues, or the expiration of applicable statutes of limitations.

Undistributed Foreign Earnings and Non-U.S. Jurisdictions

As of December 31, 2024, we have recognized a deferred tax liability of \$0.6 million for foreign subsidiary undistributed earnings. We do not consider our foreign subsidiary undistributed earnings to be indefinitely invested outside the U.S.

Global Tax Reform

The Organization for Economic Co-operation and Development's (OECD) Inclusive Framework on Base Erosion Profit Shifting (BEPS) has introduced rules to establish a global minimum corporate tax rate of 15% for multinational enterprises with a turnover of more than €750 million, commonly referred to as the Pillar Two rules. Numerous foreign countries have enacted legislation to implement the Pillar Two rules, effective beginning in 2024, or are expected to enact similar legislation. The OECD has issued rules and administrative guidance that include safe harbor rules as part of the implementation of the Pillar Two global minimum tax. We have evaluated the impact of these rules and the adoption of Pillar Two has not had any significant impact on our consolidated financial statements in 2024 due to qualifying for certain transitional safe harbors. We will continue to monitor the potential impact of the Pillar Two proposals and developments on our consolidated financial statements.

Note 22 — Basic and Diluted Earnings (Loss) per Share

Basic earnings or loss per share excludes common stock equivalents and is calculated by dividing net income or loss attributable to common stockholders by the weighted average number of shares of common stock outstanding during the year. We calculate diluted earnings or loss per share by dividing net income or loss attributable to common stockholders by the weighted average number of shares of common stock outstanding including the potential dilutive shares of common stock related to outstanding restricted stock awards, stock options and warrants as determined using the treasury stock method. For 2023, we have excluded the effect of all stock options, common stock awards, and warrants from the computation of diluted loss per share because of the anti-dilutive effect of our reported net loss.

	Years Ended December 31,		
	2024	2023	2022
Basic earnings (loss) per share			
Net income (loss) attributable to common stockholders	\$ 33.4	\$ (63.7)	\$ 25.7
Weighted average shares of common stock outstanding	7,816,093	7,635,584	8,647,399
Basic earnings (loss) per share	\$ 4.28	\$ (8.34)	\$ 2.97
Diluted earnings (loss) per share			
Net income (loss) attributable to common stockholders	\$ 33.4	\$ (63.7)	\$ 25.7
Weighted average shares of common stock outstanding	7,816,093	7,635,584	8,647,399
Effect of dilutive elements			
Common stock warrants	83,260	—	158,542
Stock option awards	—	—	18
Common stock awards	188,182	—	191,347
Dilutive weighted average shares of common stock	8,087,535	7,635,584	8,997,306
Diluted earnings (loss) per share	\$ 4.13	\$ (8.34)	\$ 2.85
Stock options and common stock awards excluded from the computation of diluted earnings (loss) per share			
Anti-dilutive (1)	87,879	66,710	222,602
Market-based (2)	64,085	58,397	62,867

- (1) Includes stock options and stock awards that are anti-dilutive based on the application of the treasury stock method.
(2) Shares that are issuable upon the achievement of certain market-based performance criteria related to Onity's stock price.

Note 23 — Employee Compensation and Benefit Plans

We maintain defined contribution plans to provide post-retirement benefits to our eligible employees and one non-contributory defined benefit pension plan which is frozen and covers certain eligible active and former employees. We also maintain additional incentive compensation plans for certain employees. We designed these plans to facilitate a pay-for-performance culture, further align the interests of our officers and key employees with the interests of our shareholders and to assist in attracting and retaining employees vital to our long-term success. These plans are summarized below.

Defined Contribution Savings Plans

We sponsor defined contribution savings plans for eligible employees in the U.S (401(k) plan) and India (Provident Fund).

Contributions of participating employees to the plans are matched on the basis specified by these plans. For the 401(k) plans, we match 50% of the first 6% of each eligible participant's contribution to the 401(k) plans with maximum aggregate matching of \$10,350 for 2024. For the Provident Fund, both the employee and the employer are required to make minimum contributions to the fund at a predetermined rate (currently 12%) applied to a portion of the employee's salary.

Our contributions to these plans were \$4.3 million, \$4.3 million and \$5.0 million for the years ended December 31, 2024, 2023 and 2022, respectively.

Defined Benefit Pension Plan

As of December 31, 2024, Onity sponsors the PHH Corporation Pension Plan (The Plan), a non-contributory defined benefit pension plan for which benefits are based on an employee's years of credited service and a percentage of final average compensation, or as otherwise described by the Plan. The Plan is frozen and only accrues additional benefits for a limited number of employees while no additional employees are eligible for participation in the plan.

The following table shows the benefit obligation, plan assets and funded status for the Plan:

	December 31,	
	2024	2023
Projected benefit obligation	\$ 18.2	\$ 42.2
Fair value of plan assets	19.1	39.6
Overfunded (unfunded) status recognized in Other liabilities	\$ 0.9	\$ (2.6)
Amounts recognized in Accumulated other comprehensive income (loss)	\$ 1.3	\$ (1.0)

In May 2024, the Plan purchased \$17.0 million annuities to transfer to a third party the obligation to pay benefits to selected participants or their beneficiaries. This partial settlement resulted in a reduction in the Plan's assets and the projected benefit obligation, representing the fair value of the assets at the time of the annuity purchase.

The rate used to discount the projected benefit obligation of the Plan increased from 4.75% in 2023 to 5.50% in 2024, contributing to a decrease of \$2.8 million in the Plan's benefit obligation. The net periodic benefit cost related to the defined benefit pension plans, included in Other expenses, was \$(0.6) million, \$0.4 million and \$(0.9) million for 2024, 2023 and 2022 respectively.

As of December 31, 2024, future expected benefit payments to be made from the assets of the Plan is \$1.4 million, for each of the years ending December 31, 2025 and 2026, \$1.5 million for each of the years ending December 31, 2027, 2028 and 2029. The expected benefit payments to be made for the subsequent five years ending December 31, 2030 through 2034 are \$7.1 million.

Onity contributes to the defined benefit pension plan amounts sufficient to meet minimum funding requirements as set forth in employee benefit and tax laws as well as additional amounts at their discretion. Our contributions to the defined benefit pension plans were \$0.6 million, \$0.0 million and \$0.1 million for 2024, 2023 and 2022, respectively. If PHH Corporation completes a full settlement of the Plan in the future, it may be required to make additional contributions for any unfunded obligation at that time.

Gratuity Plan

In accordance with India law, OFSPL provides for a defined benefit retirement plan (Gratuity Plan) covering all of its employees in India. The Gratuity Plan provides a lump-sum payment to vested employees at retirement or termination of employment based upon the respective employee's salary and years of employment. OFSPL provides for the gratuity benefit through actuarially determined valuations.

The following table shows the total benefit obligation, plan assets and funded status for the Gratuity Plan:

	December 31,	
	2024	2023
Benefit obligation	\$ 7.6	\$ 6.7
Fair value of plan assets	—	—
Unfunded status recognized in Other liabilities	<u>\$ (7.6)</u>	<u>\$ (6.7)</u>

During the years ended December 31, 2024, 2023 and 2022, benefits of \$0.4 million, \$0.5 million, and \$0.7 million were paid by OFSPL. As of December 31, 2024, future expected benefit payments to be made from the assets of the Gratuity Plan, which reflect expected future service, is \$1.1 million, \$1.1 million, \$1.0 million, \$0.9 million and \$0.8 million for the years ending December 31, 2025, 2026, 2027, 2028 and 2029, respectively. The expected benefit payments to be made for the subsequent five years ending December 31, 2030 through 2034 are \$3.2 million.

Annual Incentive Plan

The Onity Group Inc. Annual Incentive Plan and the 2021 Equity Incentive Plan (the 2021 Equity Plan) are our primary incentive compensation plans for executives, management and other eligible employees. Previously issued equity awards remain outstanding under the 2017 Performance Incentive Plan (the 2017 Equity Plan) and the 2007 Equity Incentive Plan (the 2007 Equity Plan). Under the terms of these plans, participants can earn cash and equity-based awards as determined by the Compensation and Human Capital Committee of the Board of Directors (the Committee). The awards are based on objective and subjective performance criteria established by the Committee. The Committee may at its discretion adjust performance measurements to reflect significant unforeseen events. We recognized \$29.0 million, \$18.7 million and \$13.1 million of compensation expense during 2024, 2023 and 2022, respectively, related to annual incentive compensation awarded in cash.

The 2007 Equity Plan, the 2017 Equity Plan and the 2021 Equity Plan authorize the grant of stock options, restricted stock, stock units or other equity-based awards, including cash-settled awards, to employees. Effective with the approval of the 2021 Equity Plan by Onity shareholders on May 25, 2021, no new awards have been, or will be, granted under the 2017 Equity Plan. The number of remaining shares available for award grants under the 2017 Equity Plan became available for award grants under the 2021 Equity Plan effective upon shareholder approval. At December 31, 2024, there were 542,752 shares of common stock remaining available for future issuance under these plans.

Equity Awards

Outstanding equity awards granted under the 2007 Equity Plan, the 2017 Equity Plan and 2021 Equity Plan had the following characteristics in common:

Type of Award	Percent of Total Equity Award	Vesting Period
2015 - 2024 Awards:		
Options:		
Service Condition - Time-based	1 %	Ratably over four years (25% vesting on each of the first four anniversaries of the grant date.)
Service Condition - Time-based	3	Ratably over three years (one-third vesting on each of the first three anniversaries of the grant date).
Stock Units:		
Service Condition - Time-based	38	Ratably over three years with one-third vesting on each of the first three anniversaries of the grant date.
Service Condition - Time-based	4	Ratably over four years with 25% vesting on each of the first four anniversaries of the grant date.
Service Condition - Time-based	1	Cliff-vest 100% after one year, six months from the grant date.

Type of Award	Percent of Total Equity Award	Vesting Period
Market Condition:		
Time-based vesting schedule and Market performance-based vesting date	53	Cliff-vest 100% after three years. Vesting of units credited based on Total Shareholder Return (TSR) for any performance period is subject to continued service through the third anniversary of the grant. There is no interim or ratable vesting. The number of performance-based awards that will vest is determined by Onity's TSR, either absolute or relative to a performance peer group, during each performance period.
Total Award	<u>100 %</u>	

The contractual term of all options granted is ten years from the grant date, except where employment terminates by reason of death, disability or retirement, in which case, the agreement may provide for an earlier termination of the options. The terms of the market-based options do not include a retirement provision. Stock units have a one year, three-year or four-year term. All our market-based stock units provide that if the market conditions are not met by the end of the applicable performance measurement period of the award, those units terminate on that date.

Stock Options	Years Ended December 31,					
	2024		2023		2022	
	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price
Outstanding at beginning of year	39,157	\$ 141.27	39,157	\$ 141.27	114,658	\$ 281.89
Forfeited / Expired (1)	(11,426)	278.79	—	—	(75,501)	354.83
Outstanding at end of year (2)(3)	<u>27,731</u>	\$ 84.61	<u>39,157</u>	\$ 141.27	<u>39,157</u>	\$ 141.27
Exercisable at end of year (2)(3)(4)	<u>27,731</u>	\$ 84.61	<u>34,657</u>	\$ 94.46	<u>34,657</u>	\$ 94.46

- (1) Includes 11,426 and 74,834 options which expired unexercised in 2024 and 2022, respectively, because their exercise price was greater than the market price of Onity's stock.
- (2) Outstanding and exercisable stock options (all are service condition time-based), at December 31, 2024 have a net aggregate intrinsic value of zero .
- (3) At December 31, 2024, the weighted average remaining contractual term of options outstanding and options exercisable was 2.5 years and 2.5 years, respectively.
- (4) The total fair value of stock options that vested and became exercisable during 2024, 2023 and 2022, based on grant-date fair value, was \$0.0 million for each of the years.

In 2019, Onity established an annual Long-Term Incentive (LTI) program in connection with changes made by the Committee to the compensation structure of Onity's executives and management. The LTI program is designed to promote actions and decisions aligned with our strategic objectives and reward our executives and other program participants for long-term value creation for our shareholders in a manner that is consistent with our pay-for-performance philosophy. The program includes both a time-vesting component for retention purposes and a performance component to align with pay-for-performance objectives, using TSR as the performance metric. For annual awards granted during 2020 through 2024, market-based performance is measured based on TSR relative to performance peer groups. The LTI awards are granted under the 2021 Equity Incentive Plan and 2017 Equity Plan.

Of the annual awards granted under the LTI program in 2024, 2023 and 2022, 50% were performance-based with a market condition and the remaining were time-based. The time-based awards vest equally on the first, second and third anniversaries of the award grant date if the continued employment condition is met. The recurring annual performance-based awards cliff-vest 100% after three years subject to meeting the market-based performance conditions and continuing employment. Because the cash-settled awards must be settled in cash, they are classified as liabilities (Other liabilities) in the consolidated balance sheets and remeasured at fair value at each reporting date with adjustments recorded as Compensation expense in the consolidated statements of operations.

In addition to the annual awards granted under the LTI program in 2024, 9,147 (liability-classified) and 7,405 (equity-classified) time-based units with a service condition were granted under the 2021 Equity Plan to certain employees in connection with their employment. The equity-classified awards cliff-vest 100% after one and one-half years subject continuing employment. The liability-classified awards vest ratably over periods ranging from nine months to three years, subject to continuing employment.

Stock Units - Equity-Classified Awards

	Years Ended December 31,					
	2024		2023		2022	
	Number of Stock Units	Weighted Average Grant Date Fair Value	Number of Stock Units	Weighted Average Grant Date Fair Value	Number of Stock Units	Weighted Average Grant Date Fair Value

Granted (1) (2)	315,165	30.57	421,074	31.40	373,614	28.43
Vested (3)(4)	(280,589)	33.08	(251,810)	17.17	(109,077)	23.11
Forfeited/Cancelled (5)	(95,189)	36.76	(16,215)	36.22	(76,874)	32.42
Unvested at end of year (6)(7)	<u>696,325</u>	<u>\$ 30.93</u>	<u>756,938</u>	<u>\$ 32.67</u>	<u>603,889</u>	<u>\$ 27.19</u>

- (1) Stock units granted in 2024, 2023 and 2022 include 153,080, 168,950 and 147,058 units, respectively, granted to Onity's CEO. Stock units granted in 2024, 2023 and 2022 include 8,153, 57,515 and 13,091 units, respectively, added as a result of a performance factor. Stock units granted in 2022 includes 436 units reclassified from liability-classified awards.
- (2) Includes 7,405 one-time service condition based awards granted in 2024 to certain employees in connection with their employment. Includes 89,664 one-time market performance based awards granted in 2023 to certain employees in connection with their employment. Also, includes 57,187 one-time equity-classified awards granted in 2022, of which 51,546 vest ratably over four years (25% vesting on each of the first four anniversaries of the grant date) and 5,641 awards vest ratably over four years (one-third vesting on each of the first three anniversaries of the grant date).
- (3) The total intrinsic value of stock units vested, which is defined as the weighted market value of the stock on the date of vesting, was \$7.4 million, \$6.5 million and \$2.2 million for 2024, 2023 and 2022, respectively.
- (4) The total fair value of the stock units that vested during 2024, 2023 and 2022, based on grant-date fair value, was \$9.3 million, \$4.3 million and \$2.5 million, respectively.
- (5) Stock units forfeited/cancelled in 2024, 2023 and 2022 includes 95,189, 11,319 and 42,885 units, respectively, forfeited due to market-based performance.
- (6) Excluding the 385,690 market-based stock awards that have not met their market-based performance criteria (and time-vesting requirements, where applicable), the net aggregate intrinsic value of stock awards outstanding at December 31, 2024 was \$9.5 million. .
- (7) At December 31, 2024, the weighted average remaining contractual term of share units outstanding was 1.8 years.

Stock Units - Liability-Classified Awards	Years Ended December 31,		
	2024	2023	2022
Unvested units at beginning of year	466,421	620,559	758,626
Granted	213,588	198,624	246,018
Vested	(187,056)	(410,752)	(191,728)
Forfeited/Cancelled (1)	(72,045)	(61,093)	(204,158)
Other (2)	6,884	119,083	11,801
Unvested units at end of year	<u>427,792</u>	<u>466,421</u>	<u>620,559</u>

- (1) Units forfeited/cancelled in 2024, 2023 and 2022 include 43,899, 6,005 and 105,552 units, respectively, forfeited due to market-based performance under the LTI program.
- (2) Includes 8,228, 118,834 and 12,204, units added during 2024, 2023 and 2022, respectively, as a result of market-based performance.

The number of performance-based awards that will vest under the annual LTI program awards for 2024, 2023 and 2022 is determined by Onity's TSR relative to a performance peer group (15-18 companies selected by the Committee, unique group for each grant year) during each performance period. Median (50th percentile) TSR performance will earn the target number of performance-based awards. The awards use four distinct weighted performance periods to measure overall market-based performance – for example for 2023, the period would be three annual periods ending April 3, 2024, 2025, 2026 and one three-year period ending April 3, 2026. Note that the awards do not vest at the end of each performance period. Vesting of units credited based on the TSR for any performance period is subject to continued service through the third anniversary of the grant date. There is no interim or ratably vesting.

For all performance-based awards, the number of units earned depends on the level of market-based performance achieved (Threshold = 50%; Target = 100%; Maximum = 200%, with results between levels interpolated). No units will be awarded for

performance below the Threshold level. TSR is calculated using the average closing stock prices during the 30 trading days up to and including the beginning and end date of each performance period.

The performance-based awards granted in July 2023 vested on the first anniversary of the grant date based on Onity's TSR compared to the same performance peer group selected for the annual awards, as outlined above for the annual awards. For these awards, the number of units earned depended on the level of market-based performance achieved (Threshold = 50% or less; Target = 100%; Maximum = 150% or more, with results between levels interpolated). 50% of the target units were earned.

Compensation expense related to all stock-based awards is initially measured at fair value on the grant date using an appropriate valuation model based on the vesting conditions of the awards. Awards classified as liabilities are subsequently remeasured at fair value at each reporting date, as described above. The fair value of the time-based option awards was determined using the Black-Scholes options pricing model. Stock unit awards with only a service condition are valued at their intrinsic value, which is the market value of the stock on the date of the award. The fair value of stock unit awards with both a service condition and a market-based vesting condition is based on the output of a Monte Carlo simulation.

The following assumptions were used to value awards:

Monte Carlo	2024	2023	2022
Risk-free interest rate	4.40%	3.73% - 5.37%	1.31% - 4.66%
Expected stock price volatility (1)	50.6%	55.5% - 75.4%	93.8% - 94.7%
Expected dividend yield	—%	—%	—%
Expected life (in years)	(2)	(2)	(2)
Fair value	\$33.57	\$36.91 - \$37.07	26.53 - \$50.99

- (1) We generally estimate volatility based on the historical volatility of Onity's common stock over the most recent period that corresponds with the estimated expected life of the option. For awards valued using a Monte Carlo simulation, volatility is computed as a blend of historical volatility based on daily stock price returns and implied volatility based on traded options on Onity's common stock.
- (2) The stock units that contain both a service condition and a market-based condition are valued using the Monte Carlo simulation. The expected term is derived from the output of the simulation and represents the expected time to meet the market-based vesting condition. For equity awards with both service and market conditions, the requisite service period is the longer of the derived or explicit service period. In this case, the explicit service condition (vesting period) is the requisite service period, and the straight-line method is used for expense recognition.

The following table summarizes Onity's stock-based compensation expense included as a component of Compensation and benefits expense in the consolidated statements of operations:

	Years Ended December 31,		
	2024	2023	2022
Compensation expense - Equity-classified awards			
Stock option awards	\$ —	\$ —	\$ (0.1)
Stock awards	7.8	9.7	4.7
	<u>\$ 7.8</u>	<u>\$ 9.7</u>	<u>\$ 4.6</u>
Compensation expense - Liability-classified awards	\$ 3.9	\$ 2.7	\$ 2.2
Excess tax benefit related to share-based awards	\$ (0.2)	\$ 1.9	\$ 0.4

As of December 31, 2024, no unrecognized compensation costs remained related to non-vested stock options. Unrecognized compensation costs related to non-vested stock units as of December 31, 2024 amounted to \$11.1 million, which will be recognized over a weighted-average remaining life of 1.8 years. Unrecognized compensation costs related to unvested liability awards as of December 31, 2024 amounted to \$7.7 million, which will be recognized over a weighted-average remaining life of 1.0 years.

Note 24 — Business Segment Reporting

Our business segments reflect the internal reporting that our Chief Executive Officer, whom we have determined to be our Chief Operating Decision Maker (CODM), uses to evaluate our operating and financial performance and to assess the allocation of our resources. The CODM uses pre-tax income calculated both on a GAAP basis and on a managed or adjusted basis, as internally defined, to assess the segment performance and allocate resources. The segment information presented below is prepared under GAAP, consistent with the amounts included in our consolidated financial statements. A brief description of our current reportable business segments is as follows:

Servicing. This segment is primarily comprised of our mortgage servicing and subservicing business and accounts for 89% of our total revenues in 2024. We earn servicing and subservicing fees, including ancillary income, and incur cost to service the loans which varies depending on delinquency status. We are exposed to MSR valuation adjustments and advancing obligations when we own the MSR. Our servicing portfolio includes both forward and reverse conventional, government-insured and non-Agency mortgage loans, including the reverse mortgage loans classified as loans held for investment on our balance sheet. The CODM uses pre-tax income to assess the segment performance and allocate resources, including employees, and financial and capital resources, predominantly in the annual budget and forecasting process. On a monthly basis, the CODM considers budget-to-actual variances, actual variances and trends. The CODM also uses segment pre-tax income for evaluating MSR investments and subservicing pricing and comparing the results and return on assets and the compensation of certain employees.

Originations. The Originations segment purchases and originates conventional and government-insured residential forward and reverse mortgage loans through multiple channels. The loans are typically sold (securitized through the GSEs and Ginnie Mae programs) shortly after origination on a servicing retained basis. We originate forward mortgage loans directly with customers (consumer direct channel) as well as through correspondent lending arrangements. We originate reverse mortgage loans in all three channels through our correspondent lending arrangements, broker relationships (wholesale) and retail channels. In addition to our originated MSRs, we acquire MSRs through multiple channels, including flow purchase agreements, the Agency Cash Window programs and bulk MSR purchases. The CODM uses pre-tax income to assess the segment performance and allocate resources, including employees, and financial and capital resources, predominantly in the annual budget and forecasting process. On a monthly basis, the CODM considers budget-to-actual variances, actual variances and trends. The CODM also uses segment pre-tax income for evaluating loan and MSR originations and acquisitions, monitoring margin and pricing, and comparing the results and return on assets and the compensation of certain employees.

Corporate. Corporate includes revenues and expenses of corporate support services, inactive entities, and our other business activities that are currently individually insignificant, revenues and expenses that are not directly related to other reportable segments, interest income on short-term investments of cash, gain or loss on extinguishment of debt, interest expense on unallocated corporate debt and foreign currency exchange gains or losses. To align with our internal reporting, we renamed the Corporate Items and Other segment as “Corporate” effective in the fourth quarter 2024, without any other changes to our operating and reporting segments.

Revenues and expenses directly associated with each respective business segments are included in determining its results of operations. We allocate certain expenses incurred by corporate support services to each business segment using various methodologies intended to approximate the utilization of such services, primarily based on time studies, personnel volumes and service consumption levels. Support service costs not allocated to the Servicing and Originations segments are retained in the Corporate segment along with certain other costs including certain litigation and settlement related expenses or recoveries, and other costs related to operating as a public company. Interest expense on direct asset-backed financings is recorded in the respective Servicing and Originations segments. We allocate interest expense on corporate debt from Corporate to the business segments based on relative financing requirements, with the exception of the Onity Senior Secured Notes through their redemption in November 2024. With intercompany financing agreements, the financing cost of the Servicing and Originations segments reflects, and is consistent with the financing needs of the licensed entity PHH that carries out these businesses.

Financial information for our segments prepared under GAAP is as follows:

Note 25 — Regulatory Requirements

Our business is subject to extensive regulation and supervision by federal, state, local and foreign governmental authorities, including the Consumer Financial Protection Bureau (CFPB), HUD, the SEC and various state agencies that license our servicing and lending activities. Accordingly, we are regularly subject to examinations, inquiries and requests, including civil investigative demands and subpoenas. The GSEs and their conservator, the Federal Housing Finance Agency (FHFA), Ginnie

Mae, the United States Treasury Department, various investors, non-Agency securitization trustees and others also subject us to periodic reviews and audits.

We must comply with a large number of federal, state and local consumer protection and other laws and regulations, including, among others, the CARES Act, the Dodd-Frank Wall Street Reform and Consumer Protection Act (the Dodd-Frank Act), the Telephone Consumer Protection Act (TCPA), the Gramm-Leach-Bliley Act, the Fair Debt Collection Practices Act (FDCPA), the Real Estate Settlement Procedures Act (RESPA), the Truth in Lending Act (TILA), the Servicemembers Civil Relief Act, the Homeowners Protection Act, the Home Mortgage Disclosure Act (HMDA), the Federal Trade Commission Act, the Fair Credit Reporting Act, the Equal Credit Opportunity Act, as well as individual state and local laws, and federal and local bankruptcy rules. These laws and regulations apply to all facets of our business, including, but not limited to, licensing, loan originations, consumer disclosures, default servicing and collections, foreclosure, filing of claims, registration of vacant or foreclosed properties, handling of escrow accounts, payment application, interest rate adjustments, assessment of fees, loss mitigation, use of credit reports, handling of unclaimed property, safeguarding of non-public personally identifiable information about our customers, and the ability of our employees to work remotely. These complex requirements can and do change as laws and regulations are enacted, promulgated, amended, interpreted and enforced. The general trend among federal, state and local legislative bodies and regulatory agencies as well as state attorneys general has been toward increasing laws, regulations, investigative proceedings and enforcement actions with regard to residential real estate lenders and servicers, which could increase the possibility of adverse regulatory action against us.

In addition, a number of foreign laws and regulations apply to our operations outside of the U.S., including laws and regulations that govern licensing, privacy, employment, safety, payroll and other taxes and insurance and laws and regulations that govern the creation, continuation and the winding up of companies as well as the relationships between shareholders, our corporate entities, the public and the government in these countries. Our foreign subsidiaries are subject to inquiries and examinations from foreign governmental regulators in the countries in which we operate outside of the U.S.

Our licensed entities are required to renew their licenses, typically on an annual basis, and to do so they must satisfy the license renewal requirements of each jurisdiction, which generally include financial requirements such as providing audited financial statements and satisfying minimum net worth requirements and non-financial requirements such as satisfactory completion of examinations relating to the licensee's compliance with applicable laws and regulations.

We are also subject to seller/servicer obligations under agreements with the GSEs, HUD, FHA, VA and Ginnie Mae, including capital requirements related to tangible net worth, as defined by the applicable agency, liquidity requirements, an obligation to provide audited financial statements within 90 days of the applicable entity's fiscal year end as well as extensive requirements regarding servicing, selling and other matters. PHH's minimum financial eligibility requirements for GSE seller/servicers and Ginnie Mae issuers include the following:

	GSEs	Ginnie Mae
Minimum tangible net worth	<ul style="list-style-type: none"> \$2.5 million plus 0.35% of the Ginnie Mae servicing portfolio, plus 0.25% of the GSE and other single family servicing portfolios 	<ul style="list-style-type: none"> \$2.5 million plus 0.35% of the Ginnie Mae total effective single-family outstanding obligations, as defined, plus 0.25% of the GSE and other servicing portfolios, and \$5.0 million plus 1.0% of the Ginnie Mae total effective HMBS outstanding obligations, as defined
Minimum liquidity	<ul style="list-style-type: none"> 0.15%* of the outstanding Ginnie Mae single-family servicing UPB, plus 0.09%* of the outstanding GSE single-family servicing UPB with scheduled/scheduled or scheduled/actual remittance types, plus 0.055%* of the outstanding GSE single-family servicing UPB, with actual/actual remittance types, plus 0.035% of the outstanding other servicing UPB <p>(*) includes a 0.05% and 0.02% supplemental liquidity requirements for Ginnie Mae and GSEs, respectively due to PHH status as a large non-depository seller/servicer</p>	<ul style="list-style-type: none"> 0.10% of the outstanding Ginnie Mae single-family servicing UPB plus 0.07% of the outstanding GSE single-family servicing UPB, if PHH remits the principal or interest, or both, as scheduled, regardless of whether principal or interest has been collected from the borrower, plus 0.035% of the outstanding GSE single-family servicing UPB, if PHH remits the principal and interest only as actually collected from the borrower and the outstanding non-Agency single-family servicing UPB, and 20% of minimum net worth required for HMBS issuer (defined above)

We believe our licensed entities were in compliance with all of their minimum net worth and liquidity requirements at December 31, 2024. Our non-Agency servicing agreements also contain requirements regarding servicing practices and other matters, and a failure to comply with these requirements could have a material adverse impact on our business.

The most restrictive of the various net worth and liquidity requirements for licensing and seller/servicer obligations referenced above are mostly based on the UPB of assets serviced by PHH. Under the applicable formula, the required minimum net worth was \$491.8 million at December 31, 2024. PHH's adjusted net worth was \$638.7 million at December 31, 2024. The most restrictive of the various liquidity requirements for licensing and seller/servicer obligations referenced above pertains to PHH and the required minimum liquidity was \$128.4 million at December 31, 2024. PHH's eligible liquidity, as defined, for licensing and seller/servicer obligations was \$214.5 million at December 31, 2024.

Ginnie Mae announced a new risk-based capital ratio (RBCR) effective on December 31, 2024 for Ginnie Mae issuers. Ginnie Mae issued a waiver extending the deadline by which PHH must meet the RBCR requirements to October 1, 2025. PHH will be required to maintain a minimum of 6% ratio of Adjusted Net Worth less Excess MSRs, as defined, to risk weighted assets. Excess MSR is deducted from Adjusted Net Worth when the MSR portfolio exceeds 100% of the Adjusted Net Worth. Government and GSE conforming loans held-for-sale are risk weighted at 20%, other assets at 100% and MSRs at 250%. MSR values may be reduced by 10% to 50% depending on historical Hedge Efficacy ratio of fair value changes of MSR hedging derivatives and MSR fair value changes due to market and model changes (e.g., 50% MSR value reduction for 80-120% Hedge Efficacy). We are currently implementing certain actions intended to achieve compliance with the requirements. We intend to continue to operate our Ginnie Mae issuer activities through PHH which would be subject to the risk-based capital rules, and separately conduct certain GSE MSR investment activities through PHH Asset Services LLC (PAS), a wholly owned subsidiary of PHH Corporation and Onity. We have received all necessary licensing and regulatory approvals to operate PAS except for one state with whom discussions are ongoing.

New York Department of Financial Services (NY DFS). The NY DFS currently limits our ability to acquire MSRs with respect to New York loans, so that Onity may not increase its aggregate portfolio of New York loans serviced or subserviced by Onity by more than 2% per year. This restriction will remain in place until the NY DFS determines that Onity has developed a satisfactory infrastructure to board sizable portfolios of MSRs. We believe we have complied with all terms required by the NY DFS.

Note 26 — Commitments

Servicer Advance Obligations

In the normal course of business as servicer or master servicer, we are required to advance loan principal and interest payments (P&I), property taxes and insurance premiums (T&I) on behalf of the borrower, if delinquent. We also advance legal fees, inspection, maintenance, and preservation costs (Corporate advances) on properties that are in default or have been foreclosed. Our obligations to make these advances are governed by servicing agreements or guides, depending on investors or guarantor. Advances made by us as primary servicer are generally recovered from the borrower or the mortgage loan investor. To the extent there are funds held for future distribution in the custodial accounts, generally we are permitted to borrow from these amounts if P&I advances are required. Advances are primarily recovered from the borrower via a cure of the delinquency, proceeds from sale of loan collateral, mortgage insurance proceeds, or the investor.

For PLS loans, generally, we may stop advancing for P&I once future advances are deemed non-recoverable from the anticipated net proceeds of the property, although we are generally obligated to continue T&I and Corporate advances until the loan delinquency is cured or until a completion of a foreclosure and sale of the REO.

For Ginnie Mae loans, we are required to make advances for the life of the loan without regard to whether we will be able to recover those payments from cure, liquidation proceeds, insurance proceeds, or late payments. We may stop advancing P&I by purchasing loans out of the pool when they are more than 90 days delinquent. We are also required to advance both T&I and Corporate advances until cure or liquidation.

For GSE loans, we are required to advance P&I until the borrower is 120 days delinquent for Fannie Mae loans, but advance only interest payments for the same length of delinquency for Freddie Mac loans. For Freddie Mac loans, servicers may submit claims for T&I and Corporate advances upon borrower resolution or liquidation. For Fannie Mae loans, we can submit reimbursement claims for certain T&I and Corporate advances after incurring the expense. T&I and Corporate advancing on GSE loans continues until the completion of the foreclosure sale.

As subservicer, we are required to make T&I and Corporate advances and in some cases P&I advances on behalf of servicers in accordance with the servicing agreements or guides. Servicers are generally required to reimburse us within 30 days of our advancing under the terms of the subservicing agreements. We are generally reimbursed by Rithm the same day we fund P&I advances, or within no more than three days for servicing advances and certain P&I advances under the Onity agreements.

Rithm is obligated to fund new servicing advances with respect to the MSRs underlying the Rights to MSRs (RMSR), pursuant to the servicing agreements. Rithm has the responsibility to fund advances for loans where they own the MSR, i.e., are the servicer of record. We are dependent upon Rithm for funding the servicing advance obligations for Rights to MSRs where

we are the servicer of record. As the servicer of record, we are contractually required under our servicing agreements to make certain servicing advances even if Rithm does not perform its contractual obligations to fund those advances.

Unfunded Lending Commitments

We have originated floating-rate reverse mortgage loans under which the borrowers have additional borrowing capacity of \$3.1 billion and \$1.8 billion at December 31, 2024 and 2023, respectively. This additional borrowing capacity is available on a scheduled or unscheduled payment basis. In 2024, we funded \$255.2 million out of the \$1.8 billion borrowing capacity as of December 31, 2023. In 2023, we funded \$258.4 million out of the \$1.8 billion borrowing capacity as of December 31, 2022. We also had short-term commitments to lend \$1.3 billion and \$25.6 million in connection with our forward and reverse mortgage loan IRLCs, respectively, outstanding at December 31, 2024. We finance originated and purchased forward and reverse mortgage loans with repurchase and participation agreements, also referred to as warehouse lines, prior to their respective securitization.

HMBS Issuer Obligations

As an HMBS issuer, we assume certain obligations related to each security issued. The most significant obligation is the requirement to purchase loans out of the Ginnie Mae securitization pools once the outstanding principal balance of a reverse mortgage loan is equal to or greater than 98% of the maximum claim amount (MCA repurchases). Active repurchased loans or buyouts are assigned to HUD and payment is received from HUD, typically within 60 days of repurchase. HUD reimburses us for the outstanding principal balance on the loan up to the maximum claim amount. We bear the risk of exposure if the amount of the outstanding principal balance on a loan exceeds the maximum claim amount. Inactive repurchased loans (the borrower is deceased, no longer occupies the property or is delinquent on tax and insurance payments) are generally liquidated through foreclosure and subsequent sale of REO, with a claim filed with HUD for recoverable remaining principal and advance balances. The recovery timeline for inactive repurchased loans depends on various factors, including foreclosure status at the time of repurchase, state-level foreclosure timelines, and the post-foreclosure REO liquidation timeline. We have no such exposure with our subservicing portfolio as our subservicing clients bear the financial obligation and risks associated with purchasing loans out of securitization pools within the portfolio of loans we subservice.

The timing and amount of our obligation with respect to MCA repurchases is uncertain as repurchase is dependent largely on circumstances outside of our control including the amount and timing of future draws and the status of the loan. MCA repurchases are expected to continue to increase due to the increased flow of HECMs and REO that are reaching 98% of their maximum claim amount.

The table below provides the breakdown of the portfolio UPB with respect to the percentage of the MCA at December 31, 2024.

Securitized HECM loans at less than 92% MCA	\$	8,691.0
Securitized HECM loans at equal to or greater than 92% and less than 95% MCA		689.3
Securitized HECM loans at equal to or greater than 95% MCA and less than 98% MCA		720.7
Total Securitized HECM loans UPB	\$	10,100.9

For 2024, 2023 and 2022, we repurchased HECM loans from Ginnie Mae securitizations in the amount of \$213.1 million, \$274.6 million and \$235.7 million, respectively. Activity with regard to HMBS repurchases for 2024 is as follows:

	Active	Inactive	Total
Beginning balance	\$ 55.4	\$ 130.6	\$ 186.0
Additions	125.3	87.8	213.1
Recoveries, net (1)	(112.9)	(51.7)	(164.6)
Transfers	0.5	(0.5)	—
Changes in value	0.2	(6.7)	(6.5)
Ending balance	\$ 68.5	\$ 159.5	\$ 228.0

(1) Includes amounts received upon assignment of loan to HUD, loan payoff, REO liquidation and claim proceeds less any amounts charged off as unrecoverable.

Active loan repurchases are classified as Receivables, as reimbursement from HUD is generally received within 60 days and are initially recorded at fair value. Inactive loan repurchases are classified as Loans held for sale and recorded at fair value. Loans are reclassified to REO in Other assets or Receivables as the loans move through the resolution process and permissible claims are submitted to HUD for reimbursement. Receivables are valued at net realizable value. REO is valued at the estimated value of the underlying property less cost to sell.

Lease Commitments

We lease certain of our premises and equipment under non-cancelable operating leases with terms expiring through 2029 exclusive of renewal option periods. At December 31, 2024, the weighted average remaining term of our leases was 3.3 years. A maturity analysis of our lease liability as of December 31, 2024 is summarized as follows:

2025	\$	3.5
2026		2.9
2027		2.5
2028		1.1
2029		0.3
Thereafter		—
Total lease payments		10.3
Less: Adjustment to present value (1)		(1.3)
Lease liability	\$	9.0

(1) At December 31, 2024, the weighted average discount rate used to estimate the present value was 9.7% based on our incremental borrowing rate.

Operating lease cost for 2024, 2023 and 2022 was \$4.7 million, \$5.3 million and \$8.3 million, respectively. The operating lease cost for 2024, 2023 and 2022 includes \$1.2 million, \$0.7 million and \$1.0 million, respectively, of variable lease expense.

Client Concentration

Our Servicing segment has exposure to concentration risk and client retention risk. For 2024, servicing and subservicing fees from Rithm amounted to \$96.5 million, or 16% of total servicing and subservicing fees (excluding ancillary income), and the related Rithm Pledged MSR liability expense amounted to \$36.1 million. As of December 31, 2024, Rithm represented \$41.2 billion, or 14% of the UPB and 24% of the loan count of our total servicing and subservicing portfolio, and approximately 63% of all delinquent loans that Onity services. Our subservicing agreements with Rithm provide for automatic one-year renewals, unless Onity or Rithm provide advance notice of termination.

If Rithm exercises its right to terminate the subservicing agreements for convenience by November 1, 2025 or for cause at any time, we might need to right-size certain aspects of our servicing business as well as the related corporate support functions, and we may need to adjust our daily liquidity management due to the reduction of servicing float balances associated with the Rithm agreements. Also refer to Note 8 — Other Financing Liabilities, at Fair Value and Note 15 — Other Liabilities.

Note 27 — Contingencies

When we become aware of a matter involving uncertainty for which we may incur a loss, we assess the likelihood of any loss. If a loss contingency is probable and the amount of the loss can be reasonably estimated, we record an accrual for the loss. In such cases, there may be an exposure to potential loss in excess of the amount accrued. Where a loss is not probable but is reasonably possible or where a loss in excess of the amount accrued is reasonably possible, we disclose an estimate of the amount of the loss or range of possible losses for the claim if a reasonable estimate can be made, unless the amount of such reasonably possible loss is not material to our financial position, results of operations or cash flows. If a reasonable estimate of loss cannot be made, we do not accrue for any loss or disclose any estimate of exposure to potential loss even if the potential loss could be material and adverse to our business, reputation, financial condition and results of operations. An assessment regarding the ultimate outcome of any such matter involves judgments about future events, actions and circumstances that are inherently uncertain. The actual outcome could differ materially. Where we have retained external legal counsel or other professional advisers, such advisers assist us in making such assessments.

Litigation

In the ordinary course of business, we are a defendant in, or a party or potential party to, many threatened and pending legal proceedings, including proceedings brought by borrowers, regulatory agencies (discussed further under “Regulatory” below), current or former employees, those brought on behalf of various classes of claimants, and those brought derivatively on behalf of Onity against certain current or former officers and directors or others, and those brought under the False Claims Act by private citizens on behalf of the U.S. In addition, we may be a party or potential party to threatened or pending legal proceedings involving fair-housing advocates, current and former commercial counterparties and market competitors, including, among others, claims related to the sale or purchase of loans, MSRs or other assets, and breach of contract actions, parties on whose behalf we service or serviced mortgage loans, parties who provide ancillary services including property preservation and other post-foreclosure related services, applicable taxing authorities, and parties who provide or provided consulting, subservicing, or other services to Onity.

The majority of these proceedings are based on alleged violations of federal, state and local laws and regulations governing our mortgage servicing and lending activities, including, among others, the Dodd-Frank Act, the Gramm-Leach-Bliley Act, the FDCPA, the RESPA, the TILA, the Fair Credit Reporting Act, the Servicemembers Civil Relief Act, the Homeowners Protection Act, the Federal Trade Commission Act, the TCPA, the Equal Credit Opportunity Act, as well as individual state licensing and foreclosure laws, federal and local bankruptcy rules, federal and local tax regulations, and state deceptive trade practices laws. Such proceedings include wrongful foreclosure and eviction actions, bankruptcy violation actions, payment misapplication actions, allegations of wrongdoing in connection with lender-placed insurance and mortgage reinsurance arrangements, claims relating to our property preservation activities, claims related to REO management, claims relating to our written and telephonic communications with our borrowers such as claims under the TCPA and individual state laws, claims related to our payment, escrow and other processing operations, claims relating to fees imposed on borrowers relating to inspection fees, foreclosure attorneys' fees, reinstatement fees, foreclosure registration fees, payment processing, payment facilitation or payment convenience fees, claims related to ancillary products marketed and sold to borrowers, claims related to loan modifications and loan assumptions, claims related to call recordings, claims regarding certifications of our legal compliance related to our participation in certain government programs, claims related to improper occupancy inspections, claims related to untimely recording of mortgage satisfactions, and claims related to tax deficiencies owed by and tax refunds due to us. In some of these proceedings, claims for substantial monetary damages are asserted against us. For example, we are currently a defendant in various matters alleging that (1) certain fees imposed on borrowers relating to payment processing, payment facilitation or payment convenience violate the FDCPA and similar state laws, (2) certain fees we assess on borrowers are improperly assessed and/or marked up improperly in violation of applicable state and federal law, (3) we breached fiduciary duties we purportedly owe to benefit plans due to the discretion we exercise in servicing certain securitized mortgage loans, (4) certain legacy mortgage reinsurance arrangements violated RESPA, (5) we failed to subservice loans appropriately pursuant to subservicing and other agreements, and (6) we did not comply with specific state and federal wage and hour laws for certain non-exempt employees. In the future, we are likely to become subject to other private legal proceedings alleging failures to comply with applicable laws and regulations, including putative class actions, in the ordinary course of our business.

In view of the inherent difficulty of predicting the outcome of any threatened or pending legal proceedings, particularly where the claimants seek very large or indeterminate damages, including punitive damages, or where the matters present novel legal theories or involve a large number of parties, we generally cannot predict what the eventual outcome of such proceedings will be, what the timing of the ultimate resolution will be, or what the eventual loss, if any, will be. Any material adverse resolution could materially and adversely affect our business, reputation, financial condition, liquidity, and results of operations.

Where we determine that a loss contingency is probable in connection with a pending or threatened legal proceeding and the amount of our loss can be reasonably estimated, we record an accrual for the loss. We have accrued for losses relating to threatened and pending litigation that we believe are probable and reasonably estimable based on current information regarding these matters. Where we determine that a loss is not probable but is reasonably possible or where a loss in excess of the amount accrued is reasonably possible, we disclose an estimate of the amount of the loss or range of possible losses for the claim if a reasonable estimate can be made, unless the amount of such reasonably possible loss is not material to our financial position, results of operations or cash flows. It is possible that we will incur losses relating to threatened and pending litigation that materially exceed the amount accrued. Our accrual for probable and estimable legal and regulatory matters, including accrued legal fees, was \$16.0 million at December 31, 2024. We cannot currently estimate the amount, if any, of reasonably possible losses above amounts that have been recorded at December 31, 2024.

As previously disclosed, we are subject to individual lawsuits relating to our FDCPA compliance and putative state law class actions based on the FDCPA and similar state statutes. We are currently defending a class action lawsuit challenging, under state and federal law, our practice of charging borrowers a fee to use certain optional payment methods, in *Jones v. PHH Mortg. Corp., et al.* (D. NJ), which we moved to dismiss. On July 23, 2024, the court granted the motion in part, dismissing the majority of the claims. Onity filed an answer to the surviving claims on August 14, 2024. On October 25, 2024, *Knapp v. PHH Mortg. Corp., et al.* (D. Or.) was filed in state court in Oregon. We removed the matter to federal court in Oregon on November 27, 2024, and filed our motion to dismiss the complaint on December 11, 2024. In addition, between November 2022 and June 2023, we settled the previously disclosed cases of *Morris v. PHH Mortg. Corp., et al.* (S.D. FL), *Torliatt v. PHH Mortg. Corp., et al.* (N.D. CA), *Thacker v. PHH Mortg. Corp., et al.* (N.D. WV), *Forest v. PHH Mortg. Corp., et al.* (D. RI), and *Williams v. PHH Mortg. Corp., et al.* (S.D. TX).

In addition, we continue to be involved in legacy matters arising prior to Onity's October 2018 acquisition of PHH Corporation, including a putative class action filed in 2008 in the United States District Court for the Eastern District of California against PHH and related entities alleging that PHH Corporation's legacy mortgage reinsurance arrangements between its captive reinsurer, Atrium Insurance Corporation, and certain mortgage insurance providers violated RESPA. See *Munoz v. PHH Mortgage Corp. et al.* (Eastern District of California). In June 2015, the court certified a class of borrowers who obtained loans with private mortgage insurance through PHH's captive reinsurance arrangement between June 2007 and December 2009. PHH asserted numerous legal defenses against the claims. Following pre-trial developments in August 2020,

the only issues remaining for trial were whether the plaintiffs had standing to bring their claims and whether the reinsurance services provided by PHH Corporation's captive reinsurance subsidiary, Atrium, were actually provided in order for the safe harbor provision of RESPA to apply. In January 2022, the Court denied a motion by the plaintiffs to enter new evidence and a motion by PHH to decertify the class, which motion PHH may renew if the case ultimately goes to trial. Following the entry of this order, at the request of the parties, the Court dismissed all of the plaintiffs' claims for lack of standing and entered judgment in favor of PHH. The plaintiffs appealed to the United States Court of Appeals for the Ninth Circuit, and in February 2023 that court reversed and remanded for further proceedings. Onity will continue to vigorously defend itself. Our current accrual with respect to this matter is included in the \$16.0 million legal and regulatory accrual referenced above. At this time, Onity is unable to predict the outcome of this lawsuit. If our efforts to defend this lawsuit are not successful, our business, reputation, financial condition, liquidity and results of operations could be materially and adversely affected.

Onity is a defendant in a certified class action in the U.S. District Court in the Eastern District of California where the plaintiffs claim Onity marked up fees for property valuations and title searches in violation of California state law. See *Weiner v. Ocwen Financial Corp., et al.* In May 2020, the court ruled that plaintiff's recoverable damages are limited to out-of-pocket costs, i.e., the amount of marked-up fees actually paid, rather than the entire cost of the valuation that plaintiffs sought. In October 2023, the parties reached a tentative settlement to resolve the lawsuit prior to trial. On March 29, 2024, the district court entered an order granting preliminary approval of the parties' settlement agreement, and directing notice to the settlement class. The notice process began on April 29, 2024, and continues until September 29, 2025. On October 10, 2024, the Court entered an order approving the settlement.

We have settled a dispute with a former subservicing client, HSBC Bank USA, N.A. (HSBC). See *HSBC Bank USA, N.A. v. PHH Mortgage Corp.* (Supreme Court of the State of New York). HSBC's claims related to alleged breaches of agreements entered into under a prior subservicing arrangement and origination assistance agreement. In its complaint, HSBC also asserted a claim for fraud, which was dismissed by the Court. PHH answered the complaint and asserted counterclaims against HSBC for breach of contract. PHH filed a motion for summary judgment on December 19, 2022. In June 2024, PHH and HSBC agreed to settle HSBC's claims for \$3.0 million, which amount was previously accrued. The case has now been dismissed with prejudice.

Over the past several years, lawsuits have been filed by RMBS trust investors alleging that the trustees and master servicers breached their contractual and statutory duties by (i) failing to require loan servicers to abide by their contractual obligations; (ii) failing to declare that certain alleged servicing events of default under the applicable contracts occurred; and (iii) failing to demand that loan sellers repurchase allegedly defective loans, among other things. Onity has received several letters from trustees and master servicers purporting to put Onity on notice that the trustees and master servicers may ultimately seek indemnification from Onity in connection with the litigations. Onity has not yet been impleaded into any of these cases, but it has produced and continues to produce documents to the parties in response to third-party subpoenas.

Onity has, however, been impleaded as a third-party defendant into five consolidated loan repurchase cases first filed against Nomura Credit & Capital, Inc. in 2012 and 2013. Onity is vigorously defending itself in those cases against allegations by the mortgage loan seller-defendant that Onity failed to inform its contractual counterparties that it had discovered defective loans in the course of servicing them and had otherwise failed to service the loans in accordance with accepted standards. In September 2023, the Court granted in part Onity's motion for summary judgment, dismissing Nomura's "failure to notify" claim in its entirety; the Court, however, denied Onity's motion with respect to Nomura's second claim alleging failure to service loans in accordance with accepted standards. Subsequent appeals by both parties were denied. A bench trial is anticipated to occur in the third quarter of 2025. The scope of any resulting trial is uncertain, and thus Onity is unable at this time to predict the ultimate outcome of these matters, the possible loss or range of loss, if any, associated with the resolution of these matters or any potential impact they may have on us or our operations. If, however, we were required to compensate claimants for losses related to the alleged loan servicing breaches, then our business, reputation, financial condition, liquidity and results of operations could be adversely affected.

In addition, several RMBS trustees have received notices of events of default alleging material failures by servicers to comply with applicable servicing agreements. Although Onity has not been sued by an RMBS trustee in response to an event of default notice, there is a risk that Onity could be replaced as servicer as a result of said notices, that the trustees could take legal action on behalf of the trust certificate holders, or, under certain circumstances, that the RMBS investors who issue notices of event of default could seek to press their allegations against Onity, independent of the trustees. We are unable at this time to predict what, if any, actions any trustee will take in response to an event of default notice, nor can we predict at this time the potential loss or range of loss, if any, associated with the resolution of any event of default notice or the potential impact on our operations. If Onity were to be terminated as servicer, or other related legal actions were pursued against Onity, it could have an adverse effect on Onity's business, reputation, financial condition, liquidity and results of operations.

Regulatory

We are subject to a number of ongoing federal and state regulatory examinations, orders, inquiries, subpoenas, civil investigative demands, requests for information and other actions. We may also on occasion be subject to foreign regulatory actions in the countries where we operate outside the U.S. Where we determine that a loss contingency is probable in connection with a regulatory matter and the amount of our loss can be reasonably estimated, we record an accrual for the loss. Where we determine that a loss is not probable but is reasonably possible or where a loss in excess of the amount accrued is reasonably possible, we disclose an estimate of the amount of the loss or range of possible losses for the claim if a reasonable estimate can be made, unless the amount of such reasonably possible loss is not material to our financial position, results of operations or cash flows. It is possible that we will incur losses relating to regulatory matters that materially exceed any accrued amount. Predicting the outcome of any regulatory matter is inherently difficult and we generally cannot predict the eventual outcome of any regulatory matter or the eventual loss, if any, associated with the outcome.

We regularly receive information requests and other inquiries, both formal and informal in nature, from our state financial regulators as part of their general regulatory oversight of our licensed servicing and lending businesses, as well as from state attorneys general, the CFPB and other federal agencies, including the Department of Justice, HUD, and various inspectors general. For example, we have received requests regarding the charging of certain fees to borrowers (including our practice of charging borrowers a fee to use certain optional payment methods, or “convenience fees”); the post-boarding process to verify loan and payment terms are properly implemented, calculated, and applied; bankruptcy practices; COVID-19-related forbearance and post-forbearance options; and Homeowner Assistance Fund participation and implementation. Many of our regulatory engagements arise from a complaint that the entity is investigating, although some are formal investigations or proceedings. The GSEs (and their conservator, FHFA), HUD, FHA, VA, Ginnie Mae, the United States Treasury Department, and others also subject us to periodic reviews and audits, and engage with us on various matters. For example, we are currently engaged with several regulators related to borrower convenience fees and we recently resolved one such matter with HUD, which requires us to credit/refund consumers for convenience fees charged on FHA-insured loans since May 1, 2020. We have in the past resolved, and may in the future resolve, these or other matters via consent orders, payments of monetary amounts and other agreements in order to settle issues identified in connection with examinations or other oversight activities, and such resolutions could have material and adverse effects on our business, reputation, operations, results of operations and financial condition. Our current accrual with respect to these matters is included in the \$16.0 million legal and regulatory accrual referenced above.

Loan Put-Back and Related Contingencies

Our contracts with purchasers of originated loans contain provisions that require indemnification or repurchase of the related loans under certain circumstances. While the language in the purchase contracts varies, they generally contain provisions that require us to indemnify purchasers of related loans or repurchase such loans if:

- representations and warranties concerning loan quality, contents of the loan file or loan underwriting circumstances are inaccurate;
- adequate mortgage insurance is not secured within a certain period after closing;
- a mortgage insurance provider denies coverage; or
- there is a failure to comply, at the individual loan level or otherwise, with regulatory requirements.

We received origination representations and warranties from our network of approved originators in connection with loans we purchased through our correspondent lending channel. To the extent that we have recourse against a third-party originator, we may recover part or all of any loss we may incur.

We have exposure to representation, warranty and indemnification obligations relating to our Originations business, including lending, loan sales and securitization activities. We initially recognize these obligations at fair value. Thereafter, the estimation of the liability considers probable future obligations based on industry data of loans of similar type segregated by year of origination, to the extent applicable, and estimated loss severity based on current loss rates for similar loans, our historical rescission rates and the current pipeline of unresolved demands. Our historical loss severity considers the historical loss experience that we incur upon loan sale or collateral liquidation as well as current market conditions.

We have exposure to servicing representation, warranty and indemnification obligations relating to our servicing practices. We record an accrual for a loss contingency if the loss contingency is probable and the amount can be reasonably estimated. We monitor the adequacy of the overall liability and make adjustments, as necessary, after consideration of our historical losses and other qualitative factors including ongoing dialogue and experience with our counterparties. We do not provide or assume any origination representations and warranties in connection with our MSR purchases.

At December 31, 2024 and 2023, we had outstanding representation and warranty repurchase demands of \$18.1 million UPB (66 loans) and \$20.7 million UPB (71 loans), respectively. We review each demand and monitor through resolution, primarily through rescission, loan repurchase or make-whole payment.

The following table presents the changes in our liability for representation and warranty obligations and similar indemnification obligations:

	Years Ended December 31,		
	2024	2023	2022
Beginning balance (1)	\$ 32.9	\$ 41.5	\$ 49.4
Provision for (reversal of) representation and warranty obligations	(1.8)	0.3	0.3
Provision for representation and warranty obligations - New production liability	2.6	1.7	3.0
Charge-offs and other (2)	(6.3)	(10.6)	(11.2)
Ending balance (1)	<u>\$ 27.4</u>	<u>\$ 32.9</u>	<u>\$ 41.5</u>

- (1) The liability for representation and warranty obligations is reported in Other liabilities (a component of Liability for indemnification obligations) on our consolidated balance sheets.
- (2) Includes reclassification of principal and interest losses in connection with repurchased loans, make-whole, indemnification and fee payments and settlements net of recoveries, if any.

Other

We may, from time to time, have affirmative indemnification and other claims against service providers, parties from whom we purchased MSRs or other assets, investors or other parties. Although we pursue these claims, we cannot currently estimate the amount, if any, of further recoveries. Similarly, from time to time, indemnification and other claims are made against us by parties to whom we sold MSRs or other assets or by parties on whose behalf we service mortgage loans. We cannot currently estimate the amount, if any, of reasonably possible loss above amounts recorded.

Note 28 — Subsequent Events

On February 13, 2025, under the terms of the warrant agreement discussed in Note 17 — Stockholders' Equity, Oaktree exercised its right to purchase 261,248 shares of our common stock in a net share settlement, at the exercise price of \$24.31 per share, entitling Oaktree to an estimated 92,788 shares of common stock based on the trailing average stock price, as defined. Pursuant to the warrant agreement, Onity elected to settle in cash the exercise of the warrants. The estimated cash payment of \$3.2 million to Oaktree will result in an equal reduction of Stockholders' Equity. The warrant exercise will not result in any change to the number of issued and outstanding shares of common stock.
