Company Announcement No. 37-2008:

New material handling order to FLSmidth in Germany

FLSmidth MVT/KOCH has signed a contract worth 28.7m euros (DKK 214m) to supply material handling equipment for a new coal fired power plant near Hamburg in northern Germany.

The contract comprises two grab shipunloaders for coal and one combined shiploader for FGD-gypsum, dry ash and wet ash. Mechanical, electrical and structural supplies for the three machines are also included as is pneumatic ash handling equipment provided by FLSmidth Möller.

The state-of-the-art systems meet Germany's strict environmental standards, and the combined gypsum and ash shiploader will save the customer from installing separate shiploaders for the various materials.

"There is currently a high demand in Germany for this type of equipment. The country is replacing many of its older nuclear and coal-fired power plants with modern, more environmentally friendly plants, and FLSmidth's capability of combining different material handling systems into one complete solution of the highest environmental standard makes us very competitive in the market," Group CEO Jørgen Huno Rasmussen comments.

The order will contribute beneficially to FLSmidth's earnings until the equipment is commissioned in late 2011 or early 2012.

Please address any questions regarding this announcement to Group Chief Executive Officer Jørgen Huno Rasmussen, FLSmidth & Co. A/S at +45 36 18 18 00.
