SHARE PURCHASE PLAN DEMAND UPDATE

The directors of Nova Minerals Limited (**Nova** or **Company**) (ASX: NVA, FSE: QM3) wish to advise that the share purchase plan (SPP) will not be extended beyond the prescribed Closing Date being 5.00pm, Monday 29 July 2019.

Nova will provide an update on the final acceptances under the SPP in due course.

NVA Managing Director, Mr. Avi Kimelman said:

"We undertook the SPP to give existing shareholders the opportunity to buy shares on the same terms as the recent placement to institutional and sophisticated investors. The SPP has been strongly supported and the offer will not be extended after 5.00pm, Monday 29 July 2019."

"It's very exciting to see the breadth of support we have among investors with Nova's Oxide prospect sharing geological similarities to that of Kinross' Fort Knox Gold and Victoria Gold's Dublin Gulch Eagles Gold Mine systems as we look to advance one of our fifteen known targets to a maiden Inferred JORC Resource in the near term."

"We also look forward to updating shareholder on Snow Lake Resources Ltd in due course."

Internal Prioritised Systematic Exploration Strategy

The Company's ranked and prioritised systematic exploration strategy and activities at Estelle are guided by an exploration "Project Pipeline" process to maximise the probability of multiple major discoveries (**Table 1**). Each Milestone is defined by a specific deliverable and has each criteria needs to be ticked to determine which prospect must pass through before moving to the next Milestone. Economic criteria and probability of success increase as projects move along the pipeline. The methodology helps to ensure work is carried out across all stages of the process, cost are kept minimal and that focus is kept on the best quality targets and that the pipeline is kept full with early Milestone projects.

EXPLORATION PROGRAM	PASS/FAIL
Big Picture (Historical Data Review)	
Airborne geophysics	
Soil Sampling	
Alteration Mapping	
IP Surveys overlay of Alteration Zone	
Target Prioritisation	
RC and/or Diamond Drilling
