

Response to Media Article Regarding Pakistani Antimony Concentrate

Nova Minerals Limited (Nova or the Company) (ASX: NVA, NASDAQ: NVA, NVAWW OTC: NVAAF, FSE: QM3) a gold and critical minerals exploration stage company focused on advancing the Estelle Gold and Critical Minerals Project in Alaska, U.S.A., has become aware of media articles speculating on the Company's arrangements regarding the potential acquisition of antimony in Pakistan. An article in the Financial Times on 29 December 2025 ("*The wildcat traders and US contractors piling into Pakistan's antimony*"), includes comments attributed to the Company's CEO, Mr Christopher Gerteisen, regarding a potential purchase of over 100 tonnes of Pakistani antimony.

The Company wishes to clarify that, while preliminary discussions have been held in relation to sourcing antimony concentrate for testing purposes principally to assess plant capability, all discussions remain exploratory in nature.

The Company can confirm that it is in compliance with ASX Listing Rule 3.1. The Company will, in accordance with the ASX Listing Rules, disclose the terms of any arrangement which becomes binding and material when, and if, it occurs.

This announcement has been authorised for release by the Company Secretary, Ian Pamensky.

About Nova Minerals Limited

Nova Minerals Limited is a Gold, Antimony and Critical Minerals exploration and development company focused on advancing the Estelle Project, comprised of 514 km² of State of Alaska mining claims, which contains multiple mining complexes across a 35 km long mineralized corridor of over 20 advanced Gold and Antimony prospects, including two already defined multi-million ounce resources, and several drill ready Antimony prospects with massive outcropping stibnite vein systems observed at surface. The 85% owned project is located 150 km northwest of Anchorage, Alaska, USA, in the prolific Tintina Gold Belt, a province which hosts a >220 million ounce (Moz) documented gold endowment and some of the world's largest gold mines and discoveries including, Kinross Gold Corporation's Fort Knox Gold Mine. The belt also hosts significant Antimony deposits and was a historical North American Antimony producer
