Comments from the CEO

Best quarter in the history of the firm

2020 was a year when we broke record after record, and the final quarter was no exception. Q4 turned out to be our best quarter ever. Although Q4 is normally our strongest, it well exceeded our expectations, as revenues reached NOK 893m (+77 % y-o-y). In fact, full-year revenues of NOK 1,926m (+43%) was the second-strongest figure we have ever reported, and far from the outcome anyone could have predicted at the outbreak of COVID-19.

In a strong market, it is no surprise that we presented strong results. However, ABGSC has also outperformed the market, as we have gained market share in core segments in both of our two main markets, Norway and Sweden.

The most important factor behind the record-strong results is the historically high number of ECM transactions, with solid contribution from the TMT and green sectors and transactions on the Euronext Growth platform in Norway. At the same time, we have been able to successfully capitalize on investments made in our Swedish franchise with market share gains in particular in ECM transactions. ABGSC was involved in more than 70 ECM transactions during the year, and no other bank or financial advisor conducted more IPOs than we did.

For the initial quarters of the year, activity in the DCM and M&A segments was meaningfully behind last year, but it recovered in Q4. Revenues from institutional brokerage and research services developed well, and we believe we have strengthened our market position during the year.

I am very proud of what our organisation and all of our staff have been able to deliver in a year that has been challenging in so many ways, with record-strong results and increased market share, while continuing to manage costs. Thanks to our agile approach, we were able to swiftly adapt to new circumstances, delivering high quality advice and earning the trust of our clients.

Stronger pipeline than last year

With 2020 fresh in our memories, we know that things may not turn out exactly as we predict. Nevertheless, we have a stronger pipeline of transactions now than this time last year, and we enter the year with an even stronger organisation, having added new talent in 2020 as well as in the first part of the new year.

2020 dividend

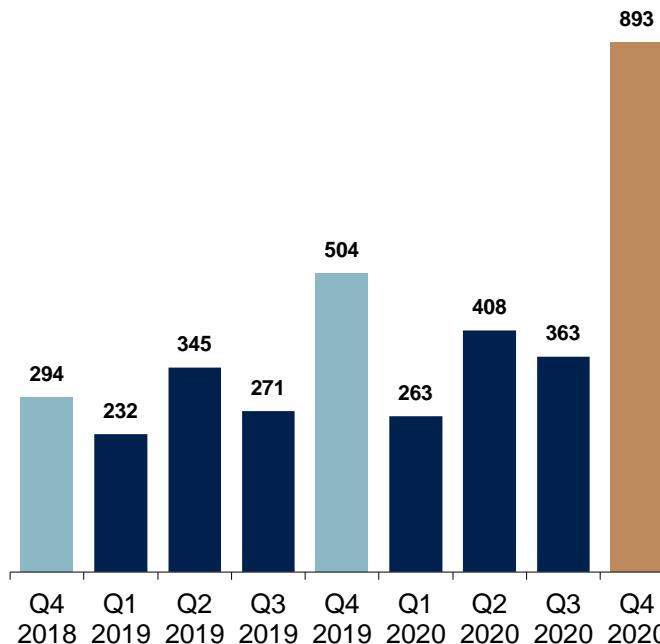

The Board has proposed that the annual general meeting approve the distribution of a final cash dividend to shareholders of NOK 0.83 per share. Adding this to the NOK 0.17 interim payment for the first half, this implies a full-year cash distribution of NOK 1.00. This allows for a capital buffer comfortably above the new regulatory minimum requirement to be implemented later this year. The Board has decided to revert to annual dividend payments, so there will not be any mid-year interim dividend in 2021.

Brokerage and Research: Another good quarter driven by secondary trading

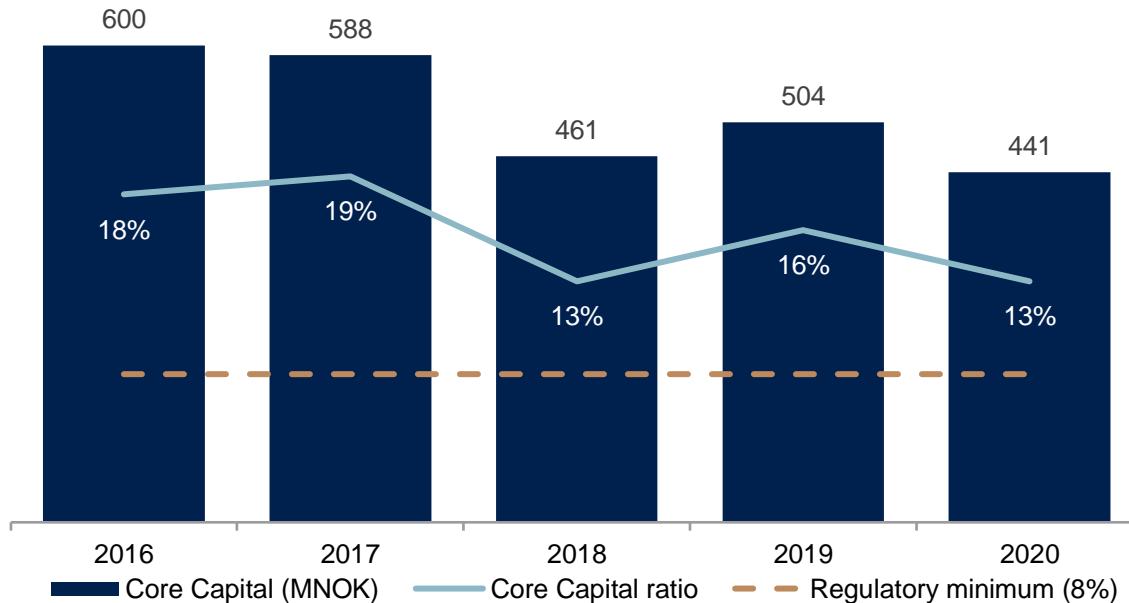

Operating costs: Full-year operating costs up 28%, mainly driven by higher variable compensation costs and the weakened Norwegian krone (NOK)

- Strong top line and profitability increased variable compensation costs
- Approx. NOK 32m cost increase due to weakening of the NOK relative to last year
- Several new hires joined our team at the end of the year and current headcount is approximately 300
- Positive effect from the implemented measures initiated to reduce non-compensation costs

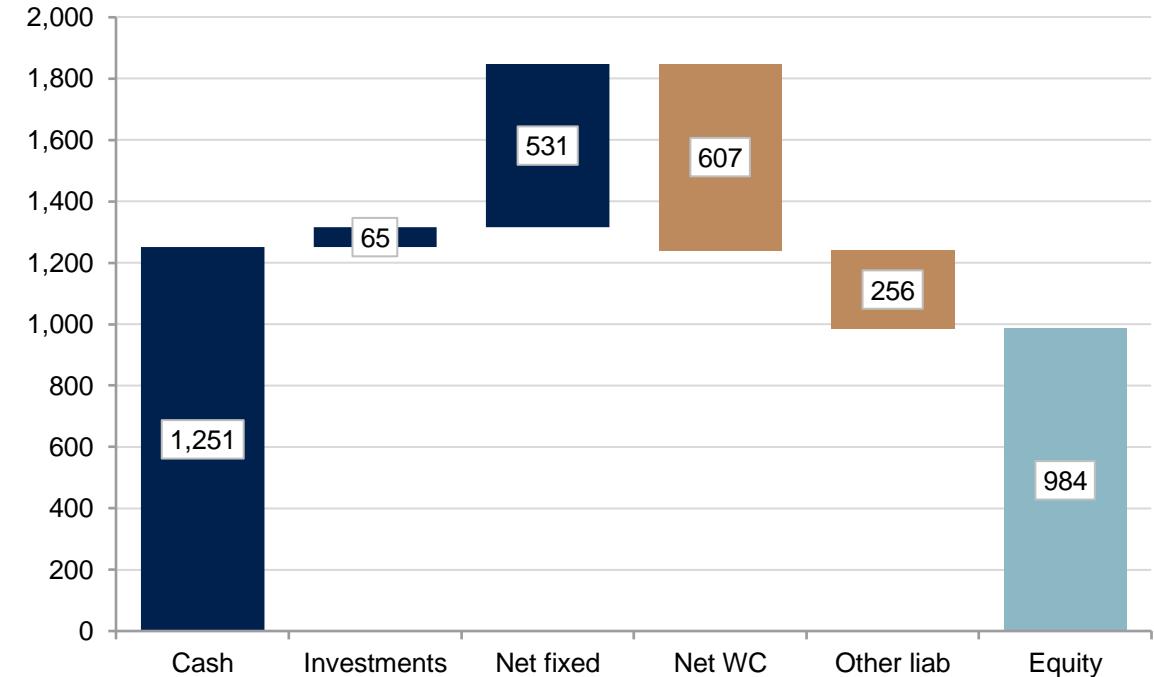

Capital and balance sheet summary: Highly liquid asset base and solid capitalisation with satisfactory buffers to regulatory requirement

Core capital and regulatory capital ratio, period-end (NOKm)

- ABGSC is well capitalised with a core capital ratio of 1.6x the current regulatory minimum requirement and >2x future requirement to be implemented in Q3

Balance sheet summary (NOKm)

- Liquid balance sheet with limited proprietary trading activity and a modest and conservative security financing operation
- Net working capital shall be close to neutral over time, but may be subject to short-term fluctuations¹⁾
- Cash & Bank includes collateral cash deposits (stock borrowing, clearing, etc.)

12 1) ABGSC currently has credit lines of NOK 1bn for catering to short-term liquidity needs

Closing remarks

- An impressive, albeit special year that ended with the best quarter ever while managing costs
- ECM transactions strongest contributor in 2020, but DCM and M&A catching-up in Q4
- ABGSC gained market share compared to peers, confirming market leading position – ABGSC the #1 advisor for Nordic IPOs
- With our agile approach we were able to adapt swiftly, earning the trust of our clients
- 2021 outlook: pipeline of deals stronger than ever and we are ready with an even stronger team and a sharpened strategy

Notes to the financial statements

1) Accounting principles

The quarterly report is prepared in accordance with IAS 34 Interim Financial Reporting and International Financial Reporting Standards (IFRS) published by the International Accounting Standards Board (IASB) and all interpretations from the Financial Reporting Interpretations Committee (IFRIC), which have been endorsed by the European Commission for adoption within the EU. The quarterly report is prepared using the same principles as those used for the 2019 annual report. The quarterly report is unaudited.

2) Judgments, estimates and assumptions

The preparation of condensed consolidated interim financial statements in accordance with IFRS and the application of the chosen accounting policies require management to make judgments, estimates and assumptions that affect the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. Actual results may differ from these estimates. The estimates and underlying assumptions are reviewed on a continuous basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods. When preparing these condensed consolidated interim financial statements, the significant judgments made by management in applying the Group's accounting policies and the key sources of estimate uncertainty were the same as those that applied to the consolidated financial statements as of the period ending 31 December 2019.

3) Risk and uncertainty

As described in ABGSC's annual report, ABGSC's total risk exposure is analysed and evaluated at the group level. Risk evaluations are integrated in all business activities both at the group and business unit levels, increasing ABGSC's ability to take advantage of business opportunities. There has not been any significant change in the risk exposure or the risks and uncertainties described in the annual report.

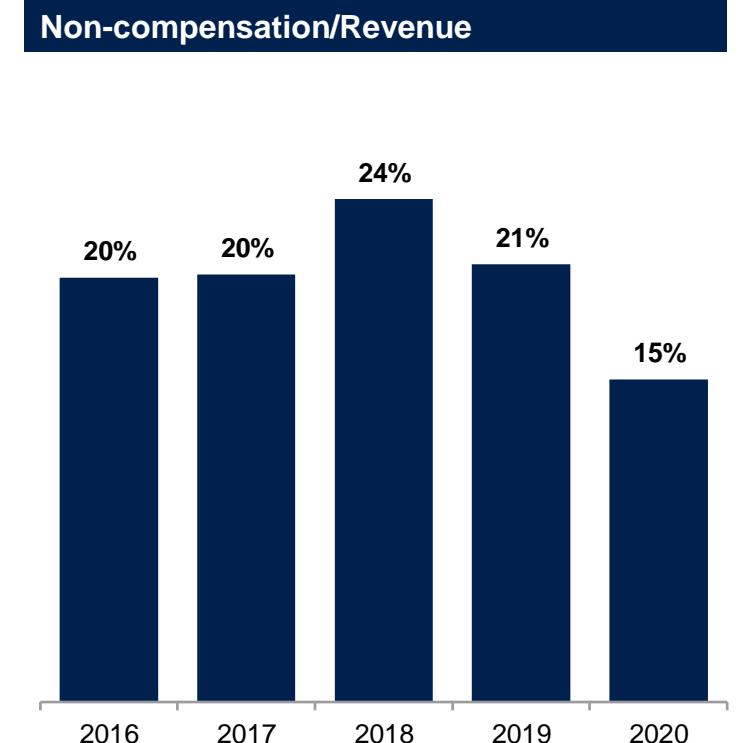

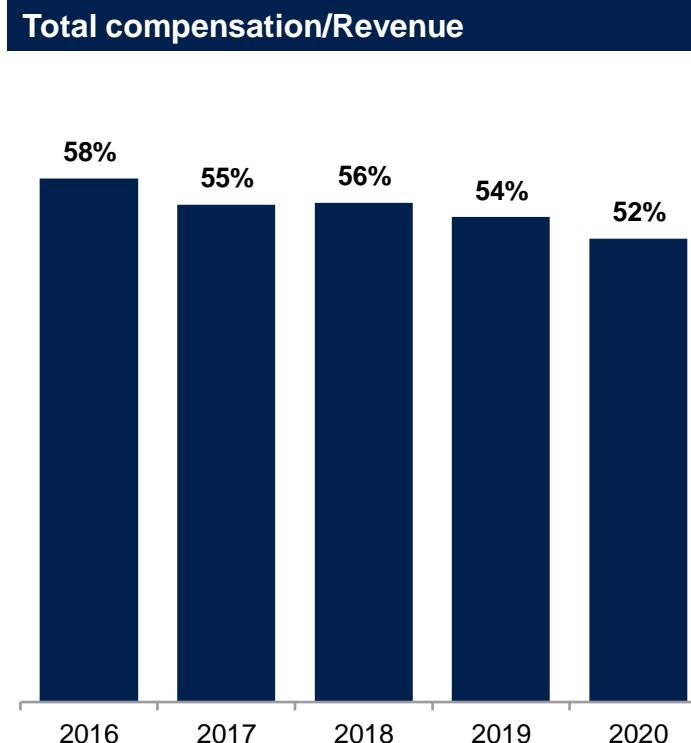

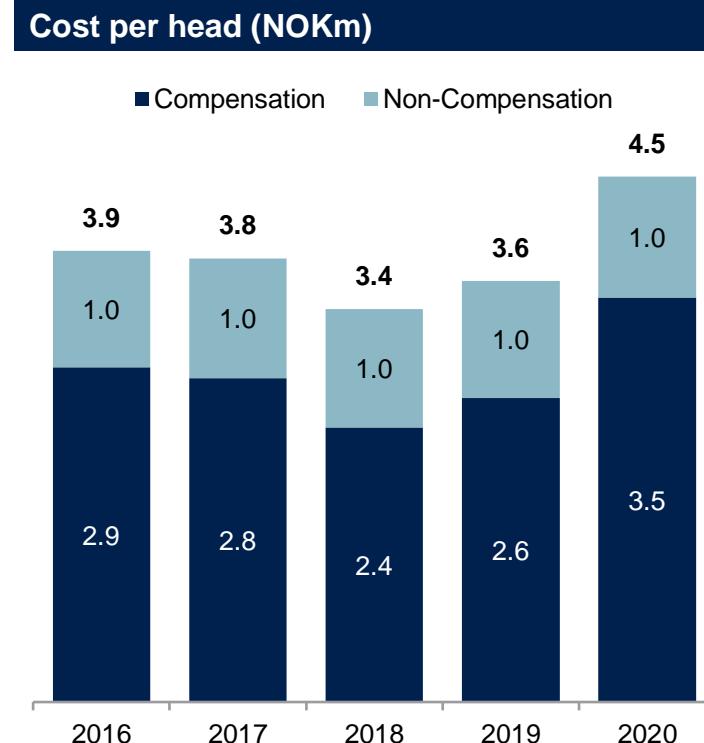

4) Related parties

There have not been any changes or transactions with any related parties that significantly impact the Group's financial position or results for the period.

5) Segment information

The group segments its business primarily on a product level as this provides the best understanding of the Group's integrated operation. The Group does not allocate profits or split the balance sheet per product. Revenues are also split at an overall geographical level. Segment information is presented on other pages of this report, including on the historical quarterly summary pages.

As part of the partner share incentive programme, several partners in the firm have entered into forward contracts for the future delivery of shares. Under the programme, new and certain existing partners are given the opportunity to acquire restricted partner shares at market price, with a 15% price adjustment reflecting several restrictions with regards to the selling (or purchasing) of these shares.

The final settlement price will be adjusted to reflect any distribution to shareholders paid prior to settlement. The interest element in the forward contract will also lead to an adjustment of the settlement price in cases where the contract is settled prior to the original expiry date.

Shareholder matters: Distribution to shareholders

- The Board is committed to returning excess capital to shareholders through cash and buy-backs of shares over time. Excess capital will be evaluated on a continuous basis, taking into consideration a number of factors, including market conditions, regulatory requirements, counterparty and market perceptions and the nature of our business

- The Board has decided to revert to annual dividend payments, so there will not be any mid-year interim dividend in 2021
