

BerGenBio Announces Poster Presentation at Upcoming ASH Meeting

BERGEN, Norway, November 2, 2023, BerGenBio ASA (OSE: BGBIO), a clinical-stage biopharmaceutical company developing novel, selective AXL kinase inhibitors for severe unmet medical needs, today announced that a poster highlighting final results from a clinical study of its highly selective AXL inhibitor bemcentinib in patients with Acute Myeloid Leukemia (AML) or Myelodysplastic Syndrome (MDS) will be presented during the American Society of Hematology (ASH) Annual Meeting being held December 9-12, 2023 in San Diego, CA.

Poster Details:

Publication Number: 4287

Title: Phase Ib/II Study (NCT02488408 / BGBC003) of Bemcentinib Monotherapy or in Combination with Cytarabine or Decitabine in Acute Myeloid Leukemia (AML) or Myelodysplastic Syndrome (MDS): FINAL Results

Session Name: 616. Acute Myeloid Leukemias: Investigational Therapies, Excluding Transplantation and Cellular Immunotherapies: Poster III

Session Date: Monday, December 11, 2023

Presentation Time: 6:00 PM - 8:00 PM

Location: San Diego Convention Center, Halls G-H

-End-

About Bemcentinib

Bemcentinib is a potentially first-in-class, potent and highly selective inhibitor of the tyrosine kinase AXL. Extensive studies confirm the ability to combine bemcentinib with immune checkpoint inhibitors, chemotherapies and targeted therapies with the goal of improving a patient's immune response and delaying the development of chemoresistance. Bemcentinib is currently being investigated in combination with

immune checkpoint inhibition and chemotherapy in first line NSCLC patients harboring mutations in the STK11 gene, a known prognostic factor of poor response to existing therapies.

About BerGenBio ASA

BerGenBio is a clinical-stage biopharmaceutical company focused on developing transformative drugs targeting AXL as a potential cornerstone of therapy for aggressive diseases, including cancer and severe respiratory infections. The Company is focused on its proprietary lead candidate, bemcentinib, a potentially first-in-class selective AXL inhibitor in development for STK11 mutated NSCLC and COVID-19.

BerGenBio is based in Bergen, Norway with a subsidiary in Oxford, UK. The company is listed on the Oslo Stock Exchange (ticker: BGBIO). For more information, visit www.bergenbio.com

Forward looking statements

This announcement may contain forward-looking statements, which as such are not historical facts, but are based upon various assumptions, many of which are based, in turn, upon further assumptions. These assumptions are inherently subject to significant known and unknown risks, uncertainties, and other important factors. Such risks, uncertainties, contingencies and other important factors could cause actual events to differ materially from the expectations expressed or implied in this announcement by such forward-looking statements.
