Cautionary note regarding forward-looking statements

This presentation, prepared by BEWI ASA (the "Company"), may contain statements about future events and expectations that are forward-looking statements. Any statement in this presentation that is not a statement of historical fact including, without limitation, those regarding the Company's financial position, business strategy, plans and objectives of management for future operations is a forward-looking statement that involves known and unknown risks, uncertainties and other factors which may cause the actual results, performance or achievements of the Company to be materially different from any future results, performance or achievements. Such forward-looking statements are based on numerous assumptions regarding the Company's present and future business strategies and the environment in which the Company will operate in the future. Although management believes that the expectations reflected in these forward-looking statements are reasonable, it can give no assurances that they will materialize or prove to be correct. Because these statements are based on assumptions or estimates and are subject to risks and uncertainties, the actual results or outcome could differ materially from those set out in the forward-looking statements.

The Company assumes no obligations to update the forward-looking statements contained herein to reflect actual results, changes in assumptions or changes in factors affecting these statements. This presentation contains alternative performance measures, or non-IFRS financial measures. Definitions and calculations are presented in our quarterly report.

First quarter of 2025 Summary and outlook

BEW/

Summary and outlook

- Sales and volume growth across segments
 - Entering seasonally stronger quarters for insulation
 - Standing biomass of salmon indicates growth in fish box volumes
- Increased collection for recycling
 - Target of 30% average recycled content in products
- Transactions to facilitate growth

Positioned to accelerate growth in recovering markets

✓ Strong market fundamentals

- ✓ Streamlined operations
- ✓ Room for production ramp-up
- ✓ Strengthening financial position

✓ Growing M&A pipeline
