

BioFish – Applied for land-based salmon production

NOT FOR DISTRIBUTION OR RELEASE, DIRECTLY OR INDIRECTLY, TO U.S. NEWS WIRE SERVICES OR FOR DISSEMINATION IN OR INTO THE UNITED STATES, AUSTRALIA, CANADA OR JAPAN, OR ANY OTHER JURISDICTION IN WHICH THE DISTRIBUTION OR RELEASE WOULD BE UNLAWFUL.

Biofish is pleased to announce that the operational company Biofish AS has applied to Vestland Fylkeskommune for a new license also producing land-based salmon.

The production application will be under existing operational production facilities. The total production regulation will be of total 2.200 ton of post smolt and applied land-based salmon production.

About Biofish:

Biofish is a land-based producer of smolt – juvenile fish destined for aquaculture facilities. The company's production takes place in its production facility in Kvam on the Norwegian west coast, using a Recirculating Aquaculture System (RAS), which recycles at least 99% of the water used. Biofish deliver smolt to salmon farms along the Norwegian coast.
