What are the key risks that are specific to the Issuer?

The Barclays Bank Group has identified a broad range of risks to which its businesses are exposed. Material risks are those to which senior management pay particular attention and which could cause the delivery of the Barclays Bank Group's strategy, results of operations, financial condition and/or prospects to differ materially from expectations. Emerging risks are those which have unknown components, the impact of which could crystallise over a longer time period. The factors set out below should not be regarded as a complete and comprehensive statement of all the potential risks and uncertainties which the Barclays Bank Group faces. For example, certain other factors beyond the Barclays Bank Group's control, including escalation of global conflicts, acts of terrorism, natural disasters and similar events, although not detailed below, could have a similar impact on the Barclays Bank Group.

- **Material existing and emerging risks potentially impacting more than one principal risk:** In addition to material and emerging risks impacting the principal risks set out below, there are also material existing and emerging risks that potentially impact more than one of these principal risks. These risks are: (i) potentially unfavourable global and local economic and market conditions, as well as geopolitical developments; (ii) the impact of interest rate changes on the Barclays Bank Group's profitability; (iii) the competitive environments of the banking and financial services industry; (iv) the regulatory change agenda and impact on business model; (v) change delivery and execution risks and (vi) card partnerships.

- **Climate risk:** Climate risk is the risk of financial losses arising from climate change, through physical risks and risks associated with transitioning to a lower carbon economy.

- **Credit and Market risks:** Credit risk is the risk of loss to the Barclays Bank Group from the failure of clients, customers or counterparties, to fully honour their obligations to members of the Barclays Bank Group. The Barclays Bank Group is subject to risks arising from changes in credit quality and recovery rates for loans and advances due from borrowers and counterparties. Market risk is the risk of loss arising from potential adverse changes in the value of the Barclays Bank Group's assets and liabilities from fluctuation in market variables.

- **Treasury and capital risk and the risk that the Issuer and the Barclays Bank Group are subject to substantial resolution powers:** There are three primary types of treasury and capital risk faced by the Barclays Bank Group which are (1) liquidity risk - the risk that the Barclays Bank Group is unable to meet its contractual or contingent obligations or that it does not have the appropriate amount of stable funding and liquidity to support its assets, which may also be impacted by credit rating changes; (2) capital risk – the risk that the Barclays Bank Group has an insufficient level or composition of capital to support its normal business activities and to meet its regulatory capital requirements under normal operating environments and stressed conditions and (3) interest rate risk in the banking book – the risk that the Barclays Bank Group is exposed to capital or income volatility because of a mismatch between the interest rate exposures of its (non-traded) assets and liabilities. Under the Banking Act 2009, substantial powers are granted to the Bank of England (or, in certain circumstances, HM Treasury), in consultation with the United Kingdom Prudential Regulation Authority, the UK Financial Conduct Authority and HM Treasury, as appropriate as part of a special resolution regime. These powers enable the Bank of England (or any successor or replacement thereto and/or such other authority in the United Kingdom with the ability to exercise the UK Bail-in Power) (the "Resolution Authority") to implement various resolution measures and stabilisation options (including, but not limited to, the bail-in tool) with respect to a UK bank or investment firm and certain of its affiliates (as at the date of the Registration Document, including the Issuer) in circumstances in which the Resolution Authority is satisfied that the relevant resolution conditions are met.

- **Operational and model risks:** Operational risk is the risk of loss to the Barclays Bank Group from inadequate or failed processes or systems, human factors or due to external events where the root cause is not due to credit or market risks. Model risk is the potential for adverse consequences from decisions based on incorrect or misused model outputs and reports.

- **Compliance, reputation, legal risks and legal, competition and regulatory matters and financial crime risk:** Compliance risk is the risk of poor outcomes for, or harm to, customers, clients and markets, arising from the delivery of the Barclays Bank Group’s products and services (Compliance Risk) and the risk to the Barclays Bank Group, its clients, customers or markets from a failure to comply with the laws, rules and regulations applicable to the firm (LRR risk). Reputation risk is the risk that an action, transaction, investment, event, decision or business relationship will reduce trust in the Barclays Bank Group's integrity and/or competence. The Barclays Bank Group conducts diverse activities in a highly regulated global market which exposes it and its employees to legal risk arising from (i) the multitude of laws, rules and regulations that apply to the activities it undertakes, which are highly dynamic, may vary between jurisdictions and/or conflict, and may be unclear in their application to particular circumstances especially in new and emerging areas; and (ii) the diversified and evolving nature of the Barclays Bank Group's businesses and business practices. In each case, this exposes the Barclays Bank Group and its employees to the risk of loss or the imposition of penalties, damages or fines from the failure of members of the Barclays Bank Group to meet applicable laws, rules, regulations or contractual requirements or to assert or defend their intellectual property rights. Legal risk may arise in relation to any number of the material existing and emerging risks summarised above. Financial crime risk is the risk that the Barclays Bank Group and its associated persons (employees or third parties) commit or facilitate financial crime, and/or the Barclays Bank Group's products and services are used to facilitate financial crime.

The value of the Underlying Preference Share will be calculated in accordance with the following:

If:

a 'Trigger Event' has not occurred:

Value of the Underlying Preference Share = the Calculation Amount (being GBP 100.00) multiplied by the sum of (a) the ordinal number of the last valuation date in relation to which the fixed return condition is satisfied multiplied by the Fixed Return Percentage and (b) 100%. The fixed return condition is satisfied if, in respect of a Fixed Return Valuation Date, the closing price or level of the Worst Performing Underlying Preference Share Reference Asset is equal to or greater than the Fixed Return Barrier on such Fixed Return Valuation Date.

If:a 'Trigger Event' has occurred:

Value of the Underlying Preference Share = the Calculation Amount (being GBP 100.00) multiplied by the sum of (a) the ordinal number of the last valuation date in relation to which the fixed return condition is satisfied multiplied by the Fixed Return Percentage and (b) the Final Performance divided by the Strike Price Percentage (being 100.000%). The fixed return condition is satisfied if, in respect of a Fixed Return Valuation Date, the closing price or level of the Worst Performing Underlying Preference Share Reference Asset is equal to or greater than the Fixed Return Barrier on such Fixed Return Valuation Date.

Where:

- **Calculation Amount:** GBP 100.00.

- **Final Performance:** in respect of the Worst Performing Underlying Preference Share Reference Asset, an amount which is calculated by dividing the Final Valuation Price of such Worst Performing Underlying Preference Share Reference Asset by the Initial Price of such Worst Performing Underlying Preference Share Reference Asset.

- **Final Valuation Price:** in respect of each Underlying Preference Share Reference Asset, the closing price or level of such Underlying Preference Share Reference Asset on 9 October 2029, subject to adjustment.

- **Fixed Return Barrier:** in respect of each Underlying Preference Share Reference Asset and a Fixed Return Valuation Date, an amount which is calculated as the Fixed Return Barrier Percentage specified in the table below in respect of such Fixed Return Valuation Date multiplied by the Initial Price of such Underlying Preference Share Reference Asset.

- **Fixed Return Percentage:** 2.55%.

- **Initial Price:** in respect of each Underlying Preference Share Reference Asset, the Initial Price specified in the table below, being the closing price or level of such Underlying Preference Share Reference Asset$_{(i)}$, (where (i) = 1, 2, 3) on 6 October 2025, (where (i) = 4) on 7 October 2025, subject to adjustment.

3	EURO STOXX 50® Index	5,628.72
4	NIKKEI 225 Index	47,950.88

- **Knock-in Barrier Percentage:** 65.0000%.

- **Strike Price Percentage:** 100.000%.

- **Trigger Event:** the closing price or level of any Underlying Preference Share Reference Asset on the Final Valuation Date (being the "trigger event observation date") is less than its corresponding Knock-in Barrier Price.

- **Underlying Preference Share Reference Asset:** S&P 500 Index, FTSE 100 INDEX, EURO STOXX 50® Index and Nikkei 225.

- **Worst Performing Underlying Preference Share Reference Asset:** the Underlying Preference Share Reference Asset with the lowest performance. Early redemption of the Underlying Preference Shares following an autocall event (phoenix):

If the closing level of the Worst Performing Underlying Preference Share Reference Asset observed in respect of an Autocall Valuation Date (Phoenix) is greater than or equal to its corresponding Autocall Barrier (Phoenix) in respect of such Autocall Valuation Date (Phoenix), the Underlying Preference Shares will be redeemed on the Autocall Early Redemption Date (Phoenix) immediately following such Autocall Valuation Date (Phoenix). In such an event, the value of the Underlying Preference Share will be equal to the Calculation Amount (being GBP 100.00) multiplied by the sum of (a) the ordinal number of the last valuation date in relation to which the fixed return condition is satisfied multiplied by the Fixed Return Percentage and (b) 100%, payable on the relevant Autocall Early Redemption Date (Phoenix).

The 'Autocall Barrier (Phoenix)' of each Underlying Preference Share Reference Asset is calculated as the Autocall Barrier Percentage(Phoenix) specified in the table below multiplied by the Initial Price of such Underlying Preference Share Reference Asset.

Early redemption in respect of the Securities

Securities may at the option of the Issuer (in the case of (i) or (ii)) or shall (in the case of (iii)) be redeemed earlier than the scheduled redemption date (i) if performance becomes unlawful or impracticable, (ii) following the occurrence of an additional disruption event which may include, but not be limited to, a change in applicable law or a currency disruption event, or (iii) following the occurrence of the redemption the Underlying Preference Shares (other than by scheduled redemption pursuant to its terms).

The early redemption amount due in respect of each Security will be calculated in the same way as if the Securities were redeemed on the scheduled redemption date save that for such purpose the final value in respect of the Underlying Preference Share shall be its value as of the day on which it is determined that the Security will be early redeemed, all as determined by the determination agent in good faith and in a commercially reasonable manner.

Status of the Securities: The Securities are direct, unsubordinated and unsecured obligations of the Issuer and rank equally among themselves.

Description of restrictions on free transferability of the Securities: Securities are offered and sold outside the United States to non-US persons in reliance on 'Regulation S' and must comply with transfer restrictions with respect to the United States. Securities held in a clearing system will be transferred in accordance with the rules, procedures and regulations of that clearing system. Subject to the foregoing, the Securities will be freely transferable.

Where will the Securities be traded?

Application is expected to be made by the Issuer (or on its behalf) for the Securities to be admitted to trading on the Regulated Market of the London Stock Exchange with effect from 13 October 2025.

What are the key risks that are specific to the Securities?

The Securities are subject to the following key risks:

- **Depending on the performance of the Underlying Preference Share, you could lose some or all of your investment**. The return on the Securities depends on the change in value of the Underlying Preference Share, which may fluctuate up or down depending on the performance of the Underlying Preference Share Reference Asset(s). Past performance of the Underlying Preference Share Reference Asset(s) should not be taken as an indication of future performance. If the value of the Underlying Preference Share on final valuation is less than upon initial valuation, you will lose some or all of your investment. The Securities may drop in value after issuance and therefore if you sell them prior to maturity in the secondary market (if any) you may lose some of your investment.

- **You are subject to the credit risk of the Issuer.** As the Securities do not constitute a deposit and are not insured or guaranteed by any government or agency or under the UK Government credit guarantee scheme, all payments to be made by the Issuer under the Securities are subject to its financial position and its ability to meet its obligations. The Securities constitute unsubordinated and unsecured obligations of the Issuer and rank pari passu with each and all other current and future unsubordinated and unsecured obligations of the Issuer. Further, under the Banking Act 2009, if the relevant UK resolution authority is satisfied that the Issuer is failing or likely to fail then, subject to certain other conditions being satisfied, the Issuer may be subject to action taken by the resolution authority, including potentially the write down of claims of unsecured creditors of the Issuer (potentially including claims of investors in the Securities) and the conversion of unsecured debt claims (potentially including the Securities) to other instruments (e.g. equity shares), the transfer of all or part of the Issuer's business to another entity, or other resolution measures. The insolvency of the Issuer and/or any action taken by the resolution authority may lead to a partial or total loss of the invested capital.

- **Taxation risks:** The levels and basis of taxation on the Securities and any reliefs for such taxation will depend on your individual circumstances and could change at any time over the life of the Securities. This could have adverse consequences for you and you should therefore consult your own tax advisers as to the tax consequences to you of transactions involving the Securities.

- **Risks relating to the Underlying Preference Share Reference Asset(s)**:

As the Underlying Preference Share Reference Assets are equity indices the Underlying Preference Share may be subject to the risk of fluctuations in market interest rates, currency exchange rates, equity prices, inflation, the value and volatility of the relevant equity index, and also to economic, financial, regulatory, political, terrorist, military or other events in one or more jurisdictions, including factors affecting capital markets generally. This could have an adverse effect on the value of the Underlying Preference Share which, in turn, will have an adverse effect on the value of your Securities.

The value of the Underlying Preference Share depends on the level of the Underlying Preference Share Reference Asset(s) reaching or crossing a 'barrier' on a specified date. If the Underlying Preference Share Reference Asset(s) performs in such a way so that the Final Performance of the Worst Performing Underlying Preference Share Reference Asset is less than its Knock-in Barrier Percentage on such specified date, the value of and return on the Underlying Preference Share and, in turn, the Securities may be dramatically less that if the level of the Underlying Preference Share Reference Asset(s) had reached or crossed the 'barrier'.

A component of the value of the Underlying Preference Share may be conditional on the nth observation date in which the Underlying Preference Share Reference Asset(s) last satisfied a performance criteria. If the performance criteria is never satisfied (or is only satisfied on earlier observation dates), the additional gain from this memory component factored into the value of the Underlying Preference Share will be zero (or lower than expected) and will, therefore, affect the value of the Underlying Preference Share and, in turn, the Securities.

You will be exposed to the performance of the Underlying Preference Share Reference Asset which has the worst performance, rather than the basket as a whole. Regardless of how the other Underlying Preference Share Reference Asset(s) perform, if the worst performing Underlying Preference Share Reference Asset fails to meet a relevant threshold or barrier, the value of and return on the Underlying Preference Share and, in turn, the Securities may be reduced and you could lose some or all of your investment.

- **Risks of a lack of secondary market or sale in such market:** There may not be a secondary market for the Securities and, therefore, you may not be able to sell them prior to their scheduled maturity or only for a substantial loss.
- **Reinvestment risk/loss of yield:** Following an early redemption of your Securities for any reason, you may be unable to reinvest the redemption proceeds at an effective yield as high as the yield on the Securities being redeemed which may have an adverse effect on your investment prospects.
- **Risks relating to potential adjustments to the terms of the Underlying Preference Share:** You will not have any rights in respect of the Underlying Preference Share or the Underlying Preference Share Reference Asset(s). The terms of the Underlying Preference Share may be adjusted in respect of, for example, valuation of the Underlying Preference Share Reference Asset(s) which may be exercised by the issuer of the Underlying Preference Share(s) in a manner which has an adverse effect on the market value and/or amount repayable in respect of the Securities.
