

For Immediate Release

Cambi ASA establishes an advisory board and appoints to it three experienced water sector professionals to guide future strategic growth

Asker, Norway, 31 May 2023

Cambi is pleased to announce the establishment of an advisory board to guide its strategic decisions and future growth. The advisory board will at the outset consist of three esteemed members: Cindy Wallis-Lage, Glen Thomas Daigger, and Jean-Michel Herrewyn.

"We are delighted to welcome Cindy, Glen, and Jean-Michel to Cambi's advisory board," said Per Lillebø, chairman of Cambi ASA's board of directors. "Their collective experience and expertise will be invaluable as we continue to grow our business and provide responsible, sustainable solutions for the treatment of wastewater solids and other wet organic waste streams."

Cindy Wallis-Lage is a recognised thought leader in the global water industry, having advised public and private entities successfully develop, enhance and manage their wastewater and biosolids infrastructure and practices. She has held various leadership positions at Black and Veatch, including that of president of the company's global water business. With her deep knowledge of the water industry and her experience as a business leader, Mrs Wallis-Lage will bring a wealth of insight to Cambi's advisory board.

Glen Thomas Daigger is widely recognised as a leader in the field of wastewater treatment and served as board director for Cambi from 2015 to 2023. He is a professor of engineering practice at the University of Michigan and has published numerous articles and books on the subject. With over 40 years of experience in the industry and an outstanding global professional network, professor Daigger brings valuable knowledge and expertise to Cambi's advisory board.

Jean-Michel Herrewyn is a seasoned executive with more than 30 years of experience in the water and wastewater treatment industry. He has advised public and private customers, operators, tech companies and infrastructure funds on investment opportunities in the water-related sectors. Mr Herrewyn has held executive positions at several major companies, including Veolia Water Technologies. His extensive experience in international business and strategic planning will inform to Cambi's future growth.

About Cambi:

Cambi is a global biogas technology and solutions supplier for wastewater treatment plants and anaerobic digestion facilities. Since 1992, Cambi has retained market leadership through continuous innovation and a robust portfolio of proven and patented technologies. With strong project delivery and customer support capabilities, the company has delivered many well-performing installations in 25 countries on six continents.

Cambi's thermal hydrolysis process increases renewable energy output, reduces operational costs, and minimises greenhouse gas emissions. It is suitable for all biosolids outlets, including land application and thermal processes such as drying, pyrolysis, and incineration. Thermal hydrolysis is compatible with all sludge and waste treatment regulations and easy to integrate at new and existing anaerobic digestion sites.

Cambi is listed on Euronext Growth Oslo, a multilateral trading facility part of Euronext, the largest stock exchange platform in Europe. Find out more at cambi.com.
