Apptix Reports Third Quarter and Year to date 2018 Results

Oslo, Norway – November 14, 2018 – Apptix ASA (OSE: APP), announced its unaudited financial results for the three and nine months ended September 30, 2018.

Interim Management Report

Evimeria EMR AB, which was acquired in Q2 2018, continued its strong development in growth and profitability. Demand remains strong in the Swedish market and a structured process has been initiated to launch Webdoc also for the Norwegian market during 2019.

The outcome from the Swedish election in September 2018 drives some political uncertainty which might have some effect on the market. There is also some uncertainty related to how the local regions in Sweden will act when it comes to private healthcare and the requirements for IT systems. However, we don't expect this to have any relevant impact in the foreseeable future.

We still believe a population that grows older with more healthcare needs combined with a necessity to drive greater efficiency out of public budgets have been the door opener for private healthcare. There are no guarantees that this trend will continue or not be reversed, however an accelerated adoption of new technologies in the healthcare industry may be argued to be a force that favors the multitude of healthcare services that private institutions guarantee.

Overview of Third Quarter 2018 consolidated results for Apptix ASA:

- Revenues of NOK 9,0 million as compared to no revenues during Q3-17.
- Net profit of NOK 0,0 million as compared to net profit of NOK 6,3 million during Q3-17.
- Cash balances of NOK 7,9 million at September 30, 2018.

Overview of Third Quarter results for Evimeria EMR AB:

- Revenue of SEK 9,8 million, an increase of 34,7 % as compared to same period 2017.
- EBITDA of SEK 2,4 million as compared to SEK 1,6 million during same period 2017.
- EBIT of SEK 1,7 million as compared to SEK 1,2 million during 2017.
- Signed 14 new clinics, representing approximately one new clinic per week. Ended the third quarter with 294 active clinics.
- Initiated project for a geographical expansion into Norway. Expect to launch 2H 2019.
- Continued strong demand for Evimeria services in Sweden.

Key Highlights of Third Quarter 2018

The growth for Evimeria remained strong in the Swedish market during the third quarter in 2018. The Company added more than one new clinic per week and continuously developed and delivered add-on services to existing customers. As a result, the growth in revenues exceeded 34,7 % compared to third quarter 2017. The scalability of the business and delivery model continues to increase earnings.

Even though the outcome from the Swedish election in September 2018, and the direction from the regional decisions for IT in private healthcare, has driven some political uncertainty in the market, Evimeria expects demand in the Swedish market to remain strong for a long period of time.

During the third quarter, the Company has also conducted an analysis regarding market conditions and potential in the Norwegian market. The outcome shows great potential for Webdoc and a structured process has been initiated to develop and adjust Webdoc for the Norwegian market. The Company expects to launch 2H 2019.
