

# CO2 CAPSOL

## CO2 Capture Market Dynamics

Carbon Transition ASA seminar  
Sparebank 1 Markets  
21 June 2022

Wayne Thomson, Board Member CO2 Capsol

## Market

---

- CCUS projects to date have been unreliable and costly
- **Reliable low-cost carbon capture technology** key to a robust CO2 capture market
- **Huge market opportunity for right technology;** operationally reliable, safe and low cost
- Hydrocarbon industry needs to solve CO2 emissions to prosper

## Incentives

---

- Governments have or are ready to put in place necessary incentives after we show a reliable low cost CCUS solution
- Incentives will be adequate to implement CCUS; trading credits or tax incentives

## The Svante Story

---

### **Challenging early times to stay alive**

- Companies talking about CCUS but no one investing \$
- Government programs less developed

### **Technology development**

- Earlier technology not able to meet cost targets
- Developed technology, moved to customized CO2 adsorbents to bring costs down

### **Partnerships**

- Technology partners
- Partner to host and partially pay for a sizable demo
- Investment climate improved, found funding partners

### **Team**

- Hired exceptional team

### Technology safe and reliable

- Improvement on proven technology; limited technology development needed
- Safe low impact absorbent

### Partners in place

- Already have partner proceeding with commercial capture facility
- Investor support

### Personal criteria

- Feel I can add value
- Trust the team

# Thank you!
