About Circa

Established in 2006, Circa Group converts waste, non-food biomass into advanced bio-based chemicals with its proprietary Furacell™ process. Its developing product portfolio includes flavours, biopolymers, and bio-solvents including Cyrene™, an alternative to traditional polar aprotic solvents, which is produced in one step from platform biomolecule Levoglucosenone. By creating renewable chemicals from cellulose, Circa is extracting value from non-food, waste biomass and addressing a gap in the market by providing bio-based alternatives contributing to a more circular economy. In March 2021, Circa Group successfully listed on the Euronext Growth Market in Oslo, stock symbol CIRCA.
