

## **DOF Subsea contract awards**

DOF Subsea has been awarded several contracts, securing utilisation for vessels in the Subsea/IMR Projects segment.

In the Atlantic region, Skandi Skansen has been awarded a contract for mooring installation on the Njord Future project by Equinor.

The Atlantic region further announces successful contract awards on the UKCS for two operators to undertake 60 days of work using the Geosund, one of which is called off under a long-term frame agreement. The works include pipeline inspection and environmental sampling.

In the North America region, DOF Subsea is pleased to announce a 3-year renewal of a frame agreement with a major operator in the US Gulf of Mexico (GOM). Under the frame agreement, DOF Subsea will be responsible for the final assembly, transportation and installation of well production jumpers and control flying leads to support new tie-ins to existing brownfields. The primary installation vessel will be the Jones Act compliant vessel Harvey Deep Sea.
