

Q2 2025 Quarterly report

Q2 Highlights

- Net revenue adj. NOK 370m (NOK 389m) and EBIT adj. NOK 93m (NOK 106m). LTM Net revenue adj. NOK 1725m (NOK 1762m) and LTM EBIT adj. NOK 500m (NOK 546m).
- Opex adj. NOK 277m (NOK 282m) and LTM Opex adj. of NOK 1 225m (NOK 1 216m). Stable nominal opex guidance for 2025 reconfirmed.
- Payments to obtain new contracts was NOK 39m (NOK 37m), LTM NOK 137m.
- Strong credit metrics on Group level, but credit and hedging losses in the Nordic segment increased due weakening SME Horeca customers in Sweden.
- Reported NWC increased due to new financing structure and sourcing model. Underlying leverage unchanged.

Strong customer growth across all segments

In the second quarter of 2025, net revenue adj. was NOK 370m and EBIT adj. was NOK 93m, compared to NOK 389m and NOK 106m, respectively, in Q2 2024. Volume sold decreased by 3% YoY, partly driven by temperature and reduced volume from low margin tender customers within the Business segment as well as phase-out of legacy fixed price contracts in the Nordic segments.

The customer growth in the quarter was strong. Building on the strong momentum from the first quarter, the Consumer segment delivered its strongest quarterly organic growth since Q4 2022, adding 6 thousand deliveries in the period. In the Business segment, the solid track record of organic growth continued, marking the fifth consecutive quarter of customer growth, with an increase of approximately 1,300 deliveries. Within Mobile, the growth also continued from last quarter, reaching 114 thousand subscribers at quarter-end.

The Nordic segment recorded underlying growth in B2C spot contracts. With a revised product portfolio aimed at capturing B2C spot customers, the spot portfolio achieved YoY growth of 13 thousand deliveries in Finland, marking uninterrupted monthly growth in the portfolio since January 2022, currently constituting approximately 60 thousand deliveries.

From May 2025, the Group's in-house Power Trading function became fully operational.

Among its new responsibilities is daily volume forecasting, where accuracy directly impacts balancing costs. Since insourcing, forecasting accuracy has improved significantly, contributing to more efficient operations.

The dividend of NOK 3.00 per share was distributed on 12 May 2025.

Consumer

Volume sold was 1,552 GWh, in line with Q2 2024. The number of electricity deliveries in the Consumer segment increased by six thousand in the quarter, and the market churn remained at a historically low level.

Net revenue adj. amounted to NOK 186m (NOK 175m), opex adj. amounted to NOK 127m (NOK 125m) and EBIT adj. amounted to NOK 59m (NOK 50m).

Business

At the end of the quarter, the Business segment comprised 132 thousand electricity deliveries, an increase of thousand deliveries from last quarter. The volume sold in the quarter was 1,404 GWh, a decrease of 6% compared to Q2 2024, driven by temperature and phase-out of low margin tender customers.

Net revenue adj. amounted to NOK 115m (NOK 123m), opex adj. amounted to NOK 62m (NOK 61m) and EBIT adj. amounted to NOK 53m (NOK 62m).

Nordic

The Nordic segment's customer portfolio saw an underlying growth in the quarter, while the legacy fixed price phase-out continued. Volume sold was 333 GWh in the quarter, a decrease of 7 % from Q2 2024, primarily driven by the phase-out of legacy fixed price contracts.

Net revenue adj. amounted to NOK 35m (NOK 51m), opex adj. to NOK 58m (NOK 66m) and EBIT adj. amounted to NOK -23m (NOK -15m).

New Growth Initiatives

At the end of the quarter, the number of mobile subscribers was 114 thousand, while number of deliveries in AllRate, the Group's service provider of rating and billing services, was 99 thousand. Alliance volume in the quarter was 732 GWh, which was a 9% increase YoY.

Net revenue adj. in the New Growth Initiatives segment amounted to NOK 34m (NOK 40m). Opex adj. amounted to NOK 30m (NOK 30m) and EBIT adj. amounted to NOK 4m (NOK 9m).

Financials

Gross revenue amounted to NOK 2,061 (NOK 2,114m), a decrease of 2%, due to electricity price development and reduced volume sold.

Adjusted net revenue amounted to NOK 370m (NOK 389m), a decrease of 5% YoY, due to a reduction in volume sold and credit and hedging losses in the Nordic segment.

Adjusted operating expenses amounted to NOK 277m (NOK 282m).

Adjusted EBIT amounted to NOK 93m (NOK 106m) due to the factors described above. Net financial income amounted to NOK -34m (NOK -28m), due to elspot price and volume development and revised financing structure.

Profit for the period amounted to NOK 27m (NOK 37m) in the quarter due to the factors described above.

Consolidated cash flow

Net cash from operating activities was NOK -98m (NOK 594m). Net cash used in investing activities was NOK -20m (NOK -23m). Net cash from financing activities was NOK 258m (NOK -525m).

Financial position

The total equity as of 30.06.2025 was NOK 1,353m (NOK 1,394m)

The total capital as of 30.06.2025 was NOK 5,099m (NOK 5,132m).

Events after the reporting period

There are no significant events after the reporting period that have not been reflected in the consolidated financial statements.

Risks and uncertainties

The demand for electricity, electricity prices, customer churn and competition are the main uncertainties in a short-term perspective. The demand for electricity varies with i.a. weather conditions and temperature. Electricity prices are determined by supply and demand through Nordpool, the marketplace for electricity in the Nordics.

The Group is exposed to volume and profile risk on certain fixed price contracts in the Nordic segment. In events where consumption volumes or profile costs deviate significantly from expected levels, this might have a negative impact on the Group's results. The volume of fixed price contracts with profile risk was

significantly reduced as from Q2 2023.

The Group is also exposed to volume and price risk on variable contracts. The sale of these contracts has been stopped in the Consumer segment, and a soft phase-out of the product has been initiated.

The Group is exposed to counterparties defaulting on their contractual obligations.

The Group's Norwegian brands are certified according to DNV's "Trygg Strømhandel", which will contribute to increased transparency and reduced risk.

Outlook

The Group's forward-looking statements are presented in the quarterly presentation.

Note 1 Accounting policies

General information

Elmera Group ASA and its subsidiaries ('the Group') is a supplier of electrical power in Norway, Sweden and Finland. The Group's core business is concentrated at purchase, sales and portfolio management of electrical power to households, private and public companies, and municipalities. In 2017, the Group also became a provider of mobile phone services to private customers in Norway.

Elmera Group ASA is incorporated and domiciled in Norway. The address of its registered office is Folke Bernadottes Vei 38, 5147 Bergen, Norway.

These interim financial statements, which are unaudited, were approved by the Board of Directors for issue on 20 August 2025.

Basis of preparation

These interim financial statements have been prepared in accordance with International Accounting Standard 34, "Interim financial reporting". These interim financial statements do not provide the same scope of information as the annual financial statements and should therefore be read in conjunction with the annual financial statements for the year ended 31 December 2024, which have been prepared in accordance with IFRS.

Going concern

The Group has adopted the going concern basis in preparing it's consolidated financial statements. When assessing this assumption, management has assessed all available information about the future. This comprises information about net cash flows from existing customer contracts and other service contracts, debt service and obligations. After making such assessments, management has a reasonable expectation that the Group has adequate resources to continue its operational existence for the foreseeable future.

Accounting policies

The accounting policies applied in preparing these interim financial statements are consistent with those described in the previous annual report for the financial year 2024.

There are no new or amended accounting standards or interpretations of which application is mandatory for reporting periods commencing 1 January 2025, that have had a material impact on these interim financial statements.

Use of estimates

The preparation of interim financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expense. Actual results may differ from these estimates.

In preparing these interim financial statements, the significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements for the year ended 31 December 2024, except for defined benefit obligations. Present value of defined benefit obligations and the fair value of plan assets are at the end of each interim reporting period estimated by extrapolation of the pension expense in the latest annual actuarial valuation, and an estimate of actuarial gains and losses calculated using updated estimates for significant actuarial assumptions. In the annual financial statements however the present value of defined benefit obligations and the fair value of plan assets are estimated based on a complete set of annual actuarial valuations.

Comparative figures and reclassifications

The consolidated statements of profit or loss, comprehensive income, financial position, equity, cash flow and notes provide comparable information in respect of the previous periods. The following changes have been made in comparative figures in the Q2 2025 quarterly report:

Prior period adjustment of power purchase In Q3 2024 a prior period adjustment of power purchase was made due to an error in invoicing from Statkraft Energi AS. A significant proportion of the amount related to the period 2019-2022 and consequently the Equity balance and Trade and other payables as of 1 January 2023 was restated with NOKt 34 836. Comparative figures for Q2 2024 in the statement of financial position have been updated accordingly in these interim financial statements.

Presentation of accrued power purchase from Statkraft Energi AS

Part of the accrued power purchase from Statkraft Energi AS has in previous reporting been reported in Other current liabilities in the statement of financial position. From the Q3 2024 quarterly report and going forward all accrued power purchases from Statkraft Energi AS will be reported as Trade payables. Comparative figures have been reclassified to align with current presentation increasing Trade and other payables / decreasing other current liabilities with NOKt 421 351 at 30 June 2024. Comparative figures in the statement of cash flow and note 10 have been updated accordingly.

Disaggregation of revenue from contracts with customers

Operating segments are reported in a manner consistent with the internal financial reporting provided to the chief operating decision maker. The chief operating decision maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the Board of Directors. The Board of Directors examines the Group's performance from a type of services perspective. Segment performance is evaluated based on profit or loss and is measured consistently with profit or loss in the consolidated financial statements.

The Group's reportable segments under IFRS 8 - "Operating Segments" are therefore as follows:

- Consumer segment Sale of electrical power and related services to private consumers in Norway.
- Business segment Sale of electrical power and related services to business consumers in Norway.

 Nordic segment - Sale of electrical power and related services to consumers in Finland and Sweden.

Information reported to the chief operating decision maker for the purposes of resource allocation and assessment of segment performance is focused on the category of customer for each type of activity. No operating segments have been aggregated in arriving at the reportable segments of the Group. The principal categories of customers are direct sales to private consumers, business consumers and alliance partners.

The segment profit measure is adjusted operating profit which is defined as operating profit earned by each segment without the allocation of: acquisition related costs and other one-off items, estimate deviations from previous periods, unrealised gains and losses on derivatives, impairment of intangible assets and cost to obtain contracts, depreciation of acquisitions, and change in provisions for onerous contracts. This is the

measure reported to the chief operating decision maker for the purposes of resource allocation and assessment of segment performance. The accounting policies of the reportable segments are the same as the Group's accounting policies.

All of the Group's revenue is from external parties and from activities currently carried out in Norway, Sweden and Finland. There are no customers representing more than 10 % of revenue.

The tables below is an analysis of the Group's revenue adjusted and operating profit adjusted by reportable segment. New growth initiatives comprise of other business activities (sale of EV chargers, PV panels, mobile services and power sale and related services to Alliance partners) which are not considered separate operating segments. Note 3 (Revenue recognition) shows the breakdown from Revenue adjusted to Total revenue.

Q1 2025

| NOK in thousands | Consumer | Business | Nordic | Total reportable segments | New growth initiatives | Total segments | | |
|--|---|-------------|-----------|---------------------------|------------------------|----------------|--|--|
| Revenue adjusted** | 2 110 487 | 1645623 | 381 672 | 4 137 782 | 82 262 | 4 220 044 | | |
| Direct cost of sales adjusted | (1870 907) | (1 483 049) | (322 430) | (3 676 386) | (42 071) | (3 718 457) | | |
| Net revenue adjusted | 239 580 | 162 574 | 59 242 | 461 396 | 40 191 | 501 587 | | |
| | | | | | | | | |
| Personnel and other operating expenses adjusted | (126 029) | (67 738) | (35 731) | (229 498) | (33 518) | (263 016) | | |
| Depreciation and amortisation adjusted | (32 828) | (9 230) | (19 409) | (61 467) | (2 946) | (64 413) | | |
| Total operating expenses adjusted | (158 857) | (76 968) | (55 140) | (290 965) | (36 464) | (327 429) | | |
| | | | | | | | | |

Note 7 Trade receivables

Trade receivables are amounts due from customers for goods sold or services performed in the ordinary course of business. If collection of the amounts is expected in one year or less they are classified as current assets. Trade receivables are generally due for settlement within 30 days. No interest is charged on outstanding trade receivables, unless it is past due date.

The Group always measures the loss allowance for trade receivables at an amount equal to lifetime expected credit loss (ECL). For customers in the business segment, the expected credit losses on trade receivables are estimated using a provision matrix by grouping trade receivables based on reference to past default experience for the group of customers. For customers in the private segment, the expected credit losses on trade receivables are estimated by an individual assessment of each specific customer performed by the Group's Debt Collection Service provider.

There have been no changes in the estimation techniques or significant assumptions made during the current reporting period.

The Group writes off a trade receivable when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the debtor has been placed under liquidation or has entered into bankruptcy proceedings, or when the trade receivables are over one year past due, whichever occurs earlier. The trade receivables that have been written off are still subject to collection processes.

The following table details the loss allowance provision recognised in trade receivables:

| NOK in thousands | 31 March 2025 | 30 June 2025 | 30 June 2024 | 31 December 2024 |
|--------------------------|------------------|-----------------|-----------------|---------------------|
| Gross nominal amount | 940 347 | 817 992 | 632 719 | 863 837 |
| Loss allowance provision | (49 918) | (52 688) | (61 047) | (55 235) |
| Trade receivables, net | 890 429 | 765 304 | 571 672 | 808 601 |

The following table shows the movement in lifetime ECL that has been recognised for trade receivables in accordance with the simplified approach set out in IFRS:

| NOK in thousands | Q1 2025 | Q2 2025 | Q2 2024 | YTD 2025 | YTD 2024 | Full year 2024 |
|--|---------|---------|---------|----------|----------|-------------------|
| Loss allowance provision, opening balance | 55 235 | 49 918 | 46 379 | 55 235 | 39 947 | 39 947 |
| Change in loss allowance recognised in profit or loss for the period | (6 067) | 2 428 | 14 957 | (3 639) | 21 347 | 14 815 |
| Currency translation difference | 750 | 342 | (288) | 1092 | (247) | 474 |
| Loss allowance provision, balance at end of period | 49 918 | 52 688 | 61 048 | 52 688 | 61 047 | 55 235 |

During the period, the following gains/(losses) in relation to impaired receivables were recognised as other operating expenses in profit or loss:

| NOK in thousands | Q1 2025 | Q2 2025 | Q2 2024 | YTD 2025 | YTD 2024 | Full year 2024 |
|--|---------|---------|---------|----------|----------|-------------------|
| Receivables written off | 14 161 | 8 902 | 11 314 | 23 063 | 27 561 | 41 888 |
| Movement in provision for impairment | (6 067) | 2 428 | 14 957 | (3 639) | 21 347 | 14 815 |
| Received payment on previously written off receivables | (3 546) | (3 639) | (4 163) | (7 184) | (7 254) | (14 481) |
| Net impairment expense recognised on trade receivables | 4 548 | 7 692 | 22 107 | 12 239 | 41 655 | 42 222 |

Note 8
Derivatives
and fair value
measurement of
financial
instruments

Derivatives

All financial electricity derivatives are either financial customer contracts, or purchased for the purpose of hedging physical or financial customer contracts. Hence derivatives are only used for economic hedging purposes and not as speculative investments. However, where derivatives do not meet the hedge accounting criteria, they are classified as 'held for trading' for accounting purposes and are accounted for at fair value through profit or loss. Derivatives are presented as current assets or liabilities to the extent they are expected to be settled within 12 months after the end of the reporting period.

| Total derivative financial liabilities and firm commitments | 1132 223 | 1 011 988 | 1 311 814 | 1 203 571 |

Note 8

Derivatives and fair value measurement of financial instruments

Fair value measurements of financial instruments

This note explains the judgements and estimates made in determining the fair value of the financial instruments and firm commitments that are recognised and measured at fair value in the financial statements. The table below provides details for the Group's financial instruments measured at fair value. The Group also has financial instruments which are not measured at fair value in the statement of financial position. For the majority of these instruments, the fair value is not materially different to their carrying amounts, since the interest receivable/payable is either close to current market rates or the instruments are short-term in nature. Significant differencs between fair value and carrying amount at 30 June 2025 have not been identified.

To provide an indication about the reliability of the inputs used in determining fair value, the Group has classified its financial instruments into the three levels prescribed under the accounting standards. An explanation of each level follows below the table.

Recurring fair value measurements At 30 June 2025

| NOK in thousands | Level 1 | Level 2 | Level 3 | Total |
|--|---------|---------|---------|-----------|
| Derivative financial assets and firm commitments | | | | |
| Designated as hedging instruments for accounting purposes | | | | |
| Electricity derivatives - Hedge contracts | - | - | - | - |
| Electricity derivatives - Customer contracts | - | 136 860 | 12 724 | 149 584 |
| Classified as held for trading for accounting purpose | | | | |
| Electricity derivatives - Hedge contracts | - | 142 839 | 10 964 | 153 803 |
| Electricity derivatives - Customer contracts | - | 576 728 | 2 383 | 579 111 |
| Hedged item in fair value hedge | | | | |
| Firm commitments | - | 79 104 | 10 146 | 89 250 |
| Total financial assets and firm commitments at fair value | - | 935 531 | 36 217 | 971749 |
| Derivative financial liabilities and firm commitments Designated as hedging instruments for accounting purposes | | | | |

| Electricity derivatives - Customer contracts | - | 366 215 | 10 708 | 376 923 |
| Hedged item in fair value hedge | | | | |
| Firm commitments | - | 126 520 | 12 503 | 139 022 |
| Total financial liabilities and firm commitments at fair value | - | 975 764 | 36 224 | 1 011 988 |

Note 8

Derivatives and fair value measurement of financial instruments

There were no transfers between level 1 and 2 for recurring fair value measurements during the period. The Group's policy is to recognise transfers into and transfers out of fair value hierarchy levels as at the end of the reporting period.

Level 1: The fair value of financial instruments traded in active markets (such as publicly traded derivatives, and trading and available-for-sale securities) is based on quoted market prices at the end of the reporting period. The quoted market price used for financial assets held by the Group is the current bid price. These instruments are included in level 1.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, over-the-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and relies as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs to a fair value valuation are not based on observable market data, the instrument is included in level 3.

Valuation techniques used to determine fair values

Specific valuation techniques used to value derivative financial instruments, in majority electricity derivatives, include present value of future cash flows based on forward power prices from Nasdag Commodities at the balance sheet date. In the case of material longterm contracts, the cash flows are discounted at a discount rate calculated by using interest rates on Government bonds with matching maturities, added a risk premium of 0,2 percentage points. Valuation method is used for bilateral forward contracts and option contracts associated with purchase and sale of electricity. Key inputs to the valuation are expected power prices (Nordic system price and area prices in the power price areas in Norway, Sweden and Finland), contract prices and discount rates.

Level 3 inputs consists of expected power prices for delivery periods which there is no observable market price:

- Nordic system price for delivery periods beyond the next 10 calendar years.
- Area prices for price areas in Norway for delivery periods beyond the next 3 calendar years.
- Area prices for price areas in Sweden and Finland for delivery periods beyond the next 4 calendar years.

The Group does not hold electricity derivatives with maturities beyond the next 10 calendar years at 30 June 2025, hence all level 3 derivatives are long term area price contracts.

Note 9 Credit facilities

| NOK in thousands | Effective interest rate | 31 March 2025 | 30 June 2025 | 30 June 2024 | 31 December 2024 |
|---------------------------|-------------------------|------------------|-----------------|-----------------|---------------------|
| Term loan | NIBOR 3 months + 2,25 % | 807 500 | 786 250 | 585 625 | 828 750 |
| Revolving credit facility | NIBOR 3 months + 2,25 % | _ | - | 275 000 | |
| Total principal amounts | | 807 500 | 786 250 | 860 625 | 828 750 |

Credit facilities agreement

Elmera Group ASA entered into a new credit facilities agreement on 23 September 2024. The credit facilities agreement is facilitated by DNB Bank ASA, acting as the agent for a syndicate comprising DNB Bank, Danske Bank, Swedbank and Sparebanken Vest.

The agreement includes the following facilities;

- a NOKt 850 000 term loan facility
- a NOKt 5 200 000 revolving credit facility
- a NOKt 2 000 000 guarantee facility

The Term Loan - NOKt 850 000

At 30 June 2025 the remaining term loan principal balance was NOKt 786 250. The termination date of the loan is in September 2027, with an option to extend the termination date by two periods of twelve months. The Term Loan is to be repaid in quarterly repayments of 2,5 % of the original amount of the Term Loan, with the remainder being repaid in full on the termination date. The reference interest rate is NIBOR. The loan instalments of NOKt 85 000 that are due within the next twelve months are reported as short term interest-bearing debt in the statement of financial position.

The Revolving Credit Facility - NOKt 5 200 000

The undrawn amount under the Revolving Credit Facility is available until one month before the termination date. The termination date is in September 2027, with an option to extend the termination date by two

periods of twelve months. Any repaid drawing under the facility is available for re-drawing. Part of the Revolving Credit Facility can be carved out as ancillary facilities. The Group has carved out an overdraft facility of NOKt 1500 000, see below.

As of 30 June 2025, the Group has not drawn upon the Revolving Credit Facility.

The Overdraft Facility - NOKt 1500 000

The Group has carved out an Overdraft Facility from the Revolving Credit Facility, which is available one year from the agreement date in September 2024. The Overdraft Facility will be renewed annually unless the Group requests otherwise.

At 30 June 2025 a total of NOKt 869 339 was drawn under the Overdraft Facility.

The Guarantee Facility - NOKt 2 000 000

The purpose of the Guarantee Facility is the issuance of guarantees and letters of credit for the general corporate and working capital purposes of the Group, hereunder gurantees related to re-invoicing agreements with grid owners and property rental agreements. The termination date of the Guarantee Facility is in September 2027, with an option to extend the termination date by two periods of twelve months.

At 30 June 2025 guarantees of total NOKt 1 415 226 were issued under the Guarantee Facility.

Security

The Group's trade receivables have been pledged as security for all credit facilities under the facilities agreement.

Transactions costs

Transactions costs realted to the establishment of the term loan facility amounted to NOKt 4 053 and are recognised as part of the amortised cost of the term loan. Transaction costs related to the establishment of the revolving credit facility and the guarantee facility amounted to NOKt 30 244 and are amortised on a straight line basis. The amortisation period runs from the date of the new credit facilities agreement until the termination date.

Financial covenants

Under the new Credit Facility Agreement, the following covenants apply:

- The Drawn RCF Debt Percentage¹ does not exceed 80 per cent at any time;
- Leverage² at all times is less than 2:1; and
- Liquidity³ at all times shall be at least NOK 500,000,000.

The Group was in compliance with the covenants at the end of this reporting period.

¹⁾ Drawn RCF Debt Percentage is defined as the Drawn RCF Debt as a percentage of the Adjusted Accounts Receivables at that time. Adjusted Accounts Receivables is defined as Accounts Receivables and Accrued Receivables of the Group relating to electricity sales, deducted for loss provisions according to the Group's procedures. VAT is added in the part of Accounts Receivables that have been delivered but not invoiced.

²⁾ Leverage is defined as the ratio of Total Long-Term Interest- Bearing Debt to Adjusted EBITDA. Adjusted EBITDA is defined as reported EBITDA less any interest cost under the Revolving Facility and the Statkraft Agreement accrued during the Relevant Period.

³⁾ Liquidity is defined as the aggregate of any undrawn and available Revolving Facility Commitments and any Cash and Cash Equivalents.

Note 10 Other current liabilities

| NOK in thousands | 31 March 2025 | 30 June 2025 | 30 June 2024 Restated | 31 December 2024 |

^{*} Telia Norge AS is part of the Telia Company group, which is a major shareholder (non-controlling interest) in the Group's subsidiary Fjordkraft Mobil AS.

Payables to related parties are unsecured and are excpected to be settled in cash.

^{**} The chairman of the Board of Directors in Elmera Group ASA is the CEO of Atea ASA.

^{***} The Group divested its shares in Metzum AS on 17 December 2024.

Note 12 Events after the reporting period

There are no significant events after the reporting period that has not been reflected in the consolidated financial statements.

Directors responsibility statement

We confirm that, to the best of our knowledge, the condensed set of financial statements for the first six months of 2025, which have been prepared in accordance with IAS 34 Interim Financial Statements, gives a true and fair view of the Group's consolidated assets, liabilities, financial position and results of operations. To the best of our knowledge, the interim report for the first six months of 2025 includes

a fair review of important events that have occurred during the period and their impact on the condensed financial statements, the principal risks and uncertainties for the remaining half of 2025, and major related party transactions.

Appendix

The alternative performance measures (abbreviated APMs) that hereby are provided by the Group are a supplement to the financial statements prepared in accordance with IFRS. The APMs are based on the guidelines for APM published by the European Securities and Markets Authority (ESMA) on or after 3 July 2016. As indicated in the guidelines an APM is a financial measure of historical or future financial performance, financial position, or cash flows, other than a financial measure defined or specified in the applicable financial reporting framework. The performance measures are commonly used by analysts and investors.

The Group uses the following APMs (in bold). The words written in italics are included in the list of definitions or in the statement of profit or loss.

Cash EBIT is equivalent to Operating free cash flow before tax and change in Net working capital. This APM is used to illustrate the Group's underlying cash generation in the period.

Capex excl. M&A is used to present the capital expenditures excluding mergers and acquisi-

tions to illustrate the Group's organic maintenance capex.

EBIT reported is equivalent to Operating profit and is used to measure performance from operational activities. EBIT reported is an indicator of the company's profitability.

EBIT adjusted

In order to give a better representation of underlying performance, the following adjustments are made to the reported EBIT:

- Acquisition related costs and other one-off items: Items that are not part of the ordinary business
- Estimate deviations from previous periods: A substantial proportion of the Group's power sales has historically been finally settled after the Group has finalised its periodical financial statements. Revenues related to sale of power were thus recognised based on estimates. Any estimate deviation related to the previous reporting period is recognised in the following reporting period
- Unrealised gains and losses on derivatives:
 Consist of unrealised gains and losses on derivative financial instruments associated

- with the purchase and sale of electricity
- Impairment of intangible assets and cost to obtain contracts: Consist of impairment of intangible assets and cost to obtain contracts related to fixed price customer contracts
- Depreciation of acquisitions: Consist
 of depreciations of customer portfolios
 acquired separately and recognised as
 intangible assets, and depreciations of
 customer portfolios and other intangible
 assets recognised as part of a business
 combination
- Change in provisions for onerous contracts: Consist of change in provisions for onerous contracts associated with the purchase and sale of electricity

EBIT reported margin is EBIT divided by Net revenue. This APM is a measure of the profitability and an indicator of the earnings ability.

EBIT margin adjusted is calculated as EBIT adjusted divided by Net revenue adjusted. This APM is a measure of the profitability and an indicator of the earnings ability.

EBITDA is defined as operational profit/loss before depreciation and amortisation. This

APM is used to measure performance from operating activities.

EBITDA adjusted

In order to give a better representation of underlying performance, the following adjustments are made to EBITDA:

- Acquisition related costs and other one-off items: Items that are not part of the ordinary business
- Estimate deviations from previous periods:
 A substantial proportion of the Group's power sales has historically been finally settled after the Group has finalised its periodical financial statements. Revenues related to sale of power were thus recognised based on estimates. Any estimate deviation related to the previous reporting period is recognised in the following reporting period
- Unrealised gains and losses on derivatives:
 Consist of unrealised gains and losses on derivative financial instruments associated with the purchase and sale of electricity
- Impairment of intangible assets and cost to obtain contracts: Consist of impairment of intangible assets and cost to obtain contracts related to fixed price customer contracts

 Change in provisions for onerous contracts: Consist of change in provisions for onerous contracts associated with the purchase and sale of electricity

Net income is equivalent to Profit/(loss) for the period as stated in the statement of profit or loss.

Net income adjusted for certain cash and non-cash items is used in the dividend calculation, and defined as the following: [(Adjusted EBIT + net finance)*(1-average tax rate) – amortisation of acquisition debt].

Net interest-bearing debt (NIBD) shows the net cash position and how much cash would remain if all interest-bearing debt was paid. The calculation is total Long term interest-bearing debt, Short term interest-bearing debt and Overdraft facilities, deducted with the following; transaction costs recognised as part of amortised cost of Long term interest-bearing debt and Cash and cash equivalents.

Net revenue is equivalent to Revenue less direct cost of sales as stated in the statement of profit or loss.

Net revenue adjusted

This APM presents Net revenue adjusted for:

- Other one-off items: which represents non-recurring income is recognised in the profit or loss for the period
- Estimate deviations from previous periods:
 A substantial proportion of the Group's

power sales has historically been finally settled after the Group has finalised its periodical financial statements. Revenues related to sale of power were thus recognised based on estimates. Any estimate deviation related to the previous reporting period is recognised in the following reporting period.

- Unrealised gains and losses on derivatives:
 Consist of unrealised gains and losses on derivative financial instruments associated with the purchase and sale of electricity
- Change in provisions for onerous contracts: Consist of change in provisions for onerous contracts associated with the purchase and sale of electricity

Net working capital (NWC) is used to measure short-term liquidity and the ability to utilise assets in an efficient matter. NWC includes the following items from current assets: Inventories, Intangible assets, Trade receivables and Other current assets (that is, all current assets in the statement of financial position except Derivative financial instruments and Cash and cash equivalents); and the following items from current liabilities; Trade payables, Current income tax liabilities, Social security and other taxes, Lease liability - short term, and other current liabilities.

Non-cash NWC elements and other items is used when analysing the development in NIBD. Non-cash NWC relates to items included in "change in NWC" that are not affecting Net interest-bearing debt while other items

include interest, tax, change in long-term receivables, proceeds from non-current receivables, proceeds from other long-term liabilities and adjustments made on EBITDA.

Number of deliveries is used to present the number of electrical meters supplied with electricity. One customer may have one or more electricity deliveries.

OpFCF before tax and change in NWC is Operating free cash flow and change in working capital, and is defined as EBITDA adjusted less Capex excl. M&A and payments to obtain contract assets.

Volume sold is used to present the underlying volume generating income in the period.
