2 Risk Factors

All investments in interest bearing securities have risk associated with such investment. The risk is related to the general volatility in the market for such securities, varying liquidity in a single bond issue as well as company specific risk factors. An investment in interest bearing securities is only suitable for investors who understand the risk factors associated with this type of investments and who can afford a loss of all or part of the investment. Prospective investors should also read the detailed information set out in the Registration Document dated 2 June 2021 and reach their own views prior to making any investment decision. The risk factors set out in the Registration Document and the Securities Note cover the Issuer and the bonds issued by the Issuer, respectively.

Risk factors material to the Bonds

Risk factors that apply to Subordinated Tier 2 Own Funds instruments (Tier 2")

Due to the status of each of the Tier 2 Bonds as unsecured and subordinated debt obligations of the Issuer, in connection with a Bankruptcy Event of the Issuer, the Tier 2 Bonds will rank: a) pari passu without any preference among the Bonds; b) pari passu with all outstanding Parity Obligations; c) in priority to payments to creditors in respect of Junior Obligations; and d) junior in right of payment to any present or future claims of (i) policyholders of the Issuer, and (ii) any other obligations of the Issuer ranking or expressed to rank senior to the Tier 2 Bonds. Junior Obligations means (i) the Issuer's share capital, or (ii) any other obligations of the Issuer ranking or expressed to rank junior to the Tier 2 Bonds.

In case of a Bankruptcy Event, payments to investors in subordinated debt will depend on funds left after payments are made to unsubordinated creditors. This may result in a loss for the bondholder. From the status of the Tier 2 Bonds it also follows that the interest payments may be deferred and accrual of interest on the deferred amount will be made for later payment. As a consequence, the investor may not receive timely coupon payments to spend or reinvest. Further, redemption of the principal amount at the stated maturity date may be suspended by the Issuer Supervisor if the Issuer is not in compliance with capital requirements. Finally, if the audited accounts of the Issuer show that a substantial part of its subordinated debt capital has been lost, the loss may be absorbed by reduction of the nominal value without any accompanying payment to the investors.

The Tier 2 Bonds are scheduled to be redeemed at their principal amount in 2051 (the "Maturity Date") provided that on such date that there is no suspension of redemption and the preconditions to redemption as described in the Bond Terms are all fulfilled, including but not limited to the continued solvency of the Issuer and the Issuer Group and the approval by the Issuer Supervisor has been obtained. The Issuer is under no obligation to redeem the Tier 2 Bonds at any time before the Maturity Date, and the Bondholders have no right to call for their redemption. If the Issuer does not fulfil its Solvency Condition, the Maturity date may be postponed without any compensation other than the accrual of coupons.

Interest payments under the Subordinated Tier 2 instrument may be optionally or mandatorily deferred. Any deferred interest is accumulated but will not carry any interest. The interest payment obligations (including any deferred interest) of the Issuer under the Bond Terms is conditional upon the Issuer being Solvent at the time of payment and still being solvent immediately thereafter (the "Solvency Condition"). Other than in a Bankruptcy Event, no amount will be payable under or arising from the Tier 2 Bonds except to the extent that the Issuer could make such payment in satisfaction of the Solvency Condition. Any actual or anticipated deferral or of interest payments is likely to have an adverse effect on the market price of the Tier 2 Bonds.

Risks related to the market value of the Bonds

There is a risk that the value of the Bonds may decrease due to changes in relevant market risk factors. The price of a single bond issue will fluctuate in accordance with the interest rate and credit markets in general, the market view of the credit risk of that particular bond issue, and the liquidity of this bond issue in the market. In spite of an underlying positive development in the Issuer's business activities, the price of a bond may fall independent of this fact.

If the Issuer's early redemption right (ordinary or conditional (Regulatory Call, Tax Call and/or Rating Call) as stated in the Bond Terms) is exercised, the Call Price is 100 % of the applicable denomination at the time of an early redemption. The Call Price may limit the market value of the Bonds and an investor may not be able to reinvest the redemption proceeds in a manner which achieves a similar effective return.

The Issuer's early redemption right may affect the value of the Bonds. The Issuer may elect to redeem the Bonds when the cost of borrowing is lower than the interest rate of the Bonds. The Issuer's ability to call the Bonds is likely to limit the market value of the Bonds as during any period when the Issuer may redeem the Bonds, the market value of the Bonds generally will not rise substantially above the price at which they can be redeemed.

Liquidity risk

Liquidity risk is the risk that a party interested in trading bonds cannot do it because nobody else in the market wants to trade the bonds. Missing demand for the bonds may result in a loss for the bondholder in the form of not getting access to liquidity through sale of the bonds but has to wait until maturity for the bonds to receive liquidity.

Interest-rate risk

Interest rate risk is the risk that results from the variability of the NIBOR interest rate. The coupon payments, which depend on the NIBOR interest rate and the Margin, will vary in accordance with the variability of the NIBOR interest rate. The interest rate risk related to this bond issue will be limited, since the coupon rate will be adjusted quarterly according to the change in the reference interest rate (NIBOR 3 months) over the tenor. The primary price risk for a floating rate bond issue will be related to the market view of the correct trading level for the credit spread related to the bond issue at a certain time during the tenor, compared with the credit margin the bond issue is carrying. A possible increase in the credit spread trading level relative to the coupon defined credit margin may relate to general changes in the market conditions and/or Issuer specific circumstances. However, under normal market circumstances the anticipated tradable credit spread will fall as the duration of the bond issue becomes shorter. In general, the price of bonds will fall when the credit spread in the market increases, and conversely the bond price will increase when the market spread decreases.

The regulation and reform of "benchmarks" may adversely affect the value of securities linked to or referencing such "benchmarks" - Interest rates and indices which are deemed to be "benchmarks", (including NIBOR) are subject of recent national and international regulatory guidance and proposals for reform. Some of these reforms are already effective whilst others are still to be implemented. These reforms may cause such benchmarks to perform differently than in the past, to disappear entirely, or have other consequences which cannot be predicted. Any such consequence could have a material adverse effect on any securities linked to or referencing such a "benchmark". The Benchmarks Regulation could have a material impact on any Bonds linked to or referencing a "benchmark", in particular, if the methodology or other terms of the "benchmark" are changed in order to comply with the requirements of the Benchmarks Regulation. Such changes could, among other things, have the effect of reducing, increasing or otherwise affecting the volatility of the published rate or level of the "benchmark".

The Bonds are linked to NIBOR and there is a risk that any discontinuance or reforms of NIBOR may material adverse effect the pricing of the Bonds. No guarantees can be made as to the continuance of the current underlying reference rate of the Bonds and the possible consequences a potential discontinuance of NIBOR may have of the value of the Bonds.

Changes to Solvency II or other applicable law or regulation may increase the risk of the deferral or cancellation of interest payments, suspension of redemption, write-down or the occurrence of a Capital Disqualification Event

Solvency II requirements adopted, whether as a result of further changes to Solvency II or changes to the way in which the Issuer Supervisor interprets and applies these requirements to the Issuer and/or the Issuer Group may change. Any such changes, either individually and/or in aggregate, may lead to further unexpected changes in relation to the calculation of the Solvency Capital Requirement, Minimum Capital Requirement and/or Eligible Own-Fund Items to cover the Solvency Capital Requirement or Minimum Capital Requirement, and such changes may make the applicable regulatory capital requirements more onerous. Such changes that may occur in the application of Solvency II subsequent to the date of this presentation and/or subsequent changes to such rules and other variables may individually or in aggregate negatively affect the calculation of the Solvency Capital Requirement and/or Minimum Capital Requirement and thus increase the risk of deferral (Tier 2 Bonds) or cancellation of interest payments, suspension of redemption, or alternatively, trigger a Capital Disqualification Event and subsequent redemption of the Bond Issues by the Issuer. Additionally, the Issuer may be required to raise further capital pursuant to applicable law or regulation or the official interpretation thereof in order to maintain the then applicable Minimum Capital Requirement and Solvency Capital Requirement. Changes to Solvency II requirements may also increase the likelihood of a Capital Disqualification Event and subsequent early redemption of one or both of the Bond Issues by the Issuer.

A Capital Disqualification Event may occur as a result of any replacement of, or change to (or change to the interpretation of), the Applicable Regulations after the Issue Date. Such an event may lead to the Tier 2 Bonds no longer being qualified as Tier 2 Capital for the purposes of the Issuer and/or Issuer Group.

Credit ratings may not reflect all risks

The Bond Issue is rated BBB+ (Subordinated Tier 2) by S&P. S&P is established in the European Economic Area and registered under the EU CRA Regulation and is as of date included in the list of credit rating agencies published by the European Securities and Markets Authority on its website (<http://www.esma.europa.eu/page/List-registered-and-certified-CRAs>) in accordance with the CRA Regulation. The rating S&P has given to the Bond Issues is endorsed by S&P Global Ratings UK Limited which is established in the UK and registered under the UK CRA Regulation. The rating may not reflect the potential impact of all risks related to the structure, market, additional factors discussed above, and other factors that may affect the value of the respective Bond issue.

A credit rating is not a recommendation to buy, sell or hold securities and may be suspended, revised or withdrawn by the rating agency at any time. Any adverse change in an applicable credit rating could adversely affect the trading price for the Bond Issues. In addition, rating agencies other than S&P could seek to rate the Bond Issues and such unsolicited ratings are lower than the comparable ratings assigned to the Bond Issues by S&P, those unsolicited ratings could have an adverse effect on the value and the marketability of the Bond Issues.

No vote may be cast by any nominee if the Bondholder has presented relevant evidence to the Bond Trustee pursuant to Clause 5.3 (*Bondholders' rights*) stating that it is the owner of the Bonds voted for. If the Bondholder has voted directly for any of its nominee registered Bonds, the Bondholder's votes shall take precedence over votes submitted by the nominee for the same Bonds.
- (d) Any of the Issuer, the Bond Trustee and any Bondholder has the right to demand a vote by ballot. In case of parity of votes, the Chairperson will have the deciding vote.

A Summons for a repeated Bondholders' Meeting shall also contain the voting results obtained in the initial Bondholders' Meeting.
- (c) A repeated Bondholders' Meeting may only be convened once for each original Bondholders' Meeting. A repeated Bondholders' Meeting may be convened pursuant to the procedures of a Written Resolution in accordance with Clause 6.5 (*Written Resolutions*), even if the initial meeting was held pursuant to the procedures of a Bondholders' Meeting in accordance with Clause 6.2 (*Procedure for arranging a Bondholders' Meeting*) and vice versa.

6.5 Written Resolutions

- (a) Subject to these Bond Terms, anything which may be resolved by the Bondholders in a Bondholders' Meeting pursuant to Clause 6.1 (*Authority of the Bondholders' Meeting*) may also be resolved by way of a Written Resolution. A Written Resolution passed with the relevant majority is as valid as if it had been passed by the Bondholders in a Bondholders' Meeting, and any reference in any Finance Document to a Bondholders' Meeting shall be construed accordingly.
- (b) The person requesting a Bondholders' Meeting may instead request that the relevant matters are to be resolved by Written Resolution only, unless the Bond Trustee decides otherwise.

- (f) Only Bondholders of Voting Bonds registered with the CSD on the Relevant Record Date, or the beneficial owner thereof having presented relevant evidence to the Bond Trustee pursuant to Clause 5.3 (*Bondholders’ rights*), will be counted in the Written Resolution.
- (g) A Written Resolution is passed when the requisite majority set out in paragraph (f) or paragraph (g) of Clause 6.1 (*Authority of Bondholders’ Meeting*) has been obtained, based on a quorum of the total number of Voting Bonds, even if the Voting Period has not yet expired. A Written Resolution will also be passed if the sufficient numbers of negative votes are received prior to the expiry of the Voting Period.
- (h) The effective date of a Written Resolution passed prior to the expiry of the Voting Period is the date when the resolution is approved by the last Bondholder that results in the necessary voting majority being obtained.
