PowerPool.io Achieves SOC 2 Type I Certification

Madrid, Spain, November 11th, 2025, Chainwire

[PowerPool.io](#), a crypto-mining platform built for scale and institutional standards, today announced that it has successfully achieved **Grant Thornton’s SOC 2 Type I certification**. This certification validates PowerPool.io’s dedication to enterprise-grade security, availability, processing integrity, confidentiality, and privacy – solidifying its position as a trusted infrastructure partner for institutional and large-scale miners worldwide.

f

“This milestone marks a pivotal step in our journey,” said Ruben Gomez, CEO of PowerPool.io.

“Earning the SOC 2 Type I certification demonstrates our ongoing commitment to transparency and control at every level of our operation. But it’s just the beginning – our next milestones include SOC 1 compliance and the launch of PowerPool Hosting, a breakthrough model designed to eliminate traditional electricity-cost burdens for miners.”

”

Log In

Institutional miners demand audited systems, rigorous standards, and reliable partners. With SOC 2 Type I certification, PowerPool.io now meets the compliance expectations that allow institutions, mining farms, and crypto infrastructure providers to engage with confidence. The certification removes a key friction point for institutional onboarding – paving the way for a new era of compliant, large-scale, and energy-efficient mining at PowerPool.io.

About PowerPool.io

Founded to deliver low-cost, high-efficiency mining services, PowerPool.io combines cutting-edge technology, advanced infrastructure and a miner-centric business model. The company has grown rapidly and now serves a growing community of miners and operations globally. With the achievement of SOC 2 Type I certification, PowerPool.io now furthers its ambition to become the trusted partner for institutional miners seeking scale, transparency and operational excellence.
